

Patient Protection Model Disclosure

When applicable, it is important that individuals enrolled in a plan or health insurance coverage know of their rights to (1) choose a primary care provider or a pediatrician when a plan or issuer requires designation of a primary care physician; or (2) obtain obstetrical or gynecological care without prior authorization. Accordingly, the interim final regulations regarding patient protections under section 2719A of the Affordable Care Act require plans and issuers to provide notice to participants of these rights when applicable. The notice must be provided whenever the plan or issuer provides a participant with a summary plan description or other similar description of benefits under the plan or health insurance coverage. This notice must be provided no later than the first day of the first plan year beginning on or after September 23, 2010.

The following model language can be used to satisfy the notice requirement:

For plans and issuers that require or allow for the designation of primary care providers by participants or beneficiaries, insert:

CalPERS health plans generally allow the designation of a primary care provider. You have the right to designate any primary care provider who participates in the health plan network and who is available to accept you or your family members. Until you make this designation, the health plan or health insurance issuer will designate one for you. For information on how to select a primary care provider, and for a list of the participating primary care providers, contact the health plan at <http://www.calpers.ca.gov/index.jsp?bc=/member/health/edu/plans-online.xml>.

For plans and issuers that require or allow for the designation of a primary care provider for a child, add:

For children, you may designate a pediatrician as the primary care provider.

For plans and issuers that provide coverage for obstetric or gynecological care and require the designation by a participant or beneficiary of a primary care provider, add:

You do not need prior authorization from the health plan or from any other person (including a primary care provider) in order to obtain access to obstetrical or gynecological care from a health care professional in our network who specializes in obstetrics or gynecology. The health care professional, however, may be required to comply with certain procedures, including obtaining prior authorization for certain services, following a pre-approved treatment plan, or procedures for making referrals. For a list of participating health care professionals who specialize in obstetrics or gynecology, contact the health plan at <http://www.calpers.ca.gov/index.jsp?bc=/member/health/edu/plans-online.xml>.
