Agenda Report  
June 16, 2020

SECTION:  
CONSENT CALENDAR

**SUBJECT: A RESOLUTION ADOPTING VEHICLE MILES TRAVELED THRESHOLDS FOR DETERMINING SIGNIFICANCE OF TRANSPORTATION IMPACTS THROUGH THE CALIFORNIA ENVIRONMENTAL QUALITY ACT IN CONFORMANCE WITH SB 743**

**RECOMMENDATION:** That the City Council consider and adopt a resolution adopting Vehicle Miles Traveled (VMT) Thresholds for determining significance of transportation impacts through the California Environmental Quality Act (CEQA) in conformance with Senate Bill 743 (SB 743).

**COUNCIL GOALS: Operate in a Businesslike Manner  
Pursue City's Goals and Objectives by Working with Other Governmental Agencies**

**FISCAL IMPACT:** None.

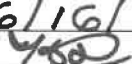

**BACKGROUND:** In 2013, SB 743 was adopted which directed the Office of Planning and Research (OPR) to examine alternative ways to analyze transportation impacts of projects during the CEQA process. OPR determined that using VMT is a more suitable metric than Level of Service (LOS) in determining transportation impacts of a project. By July 1, 2020, all cities in the State of California are required to adopt VMT thresholds for passenger vehicle and light duty trucks and determine the methodology to be used during this analysis. These decisions are at the sole discretion of each jurisdiction.

City staff participated in a collaborative study led by San Bernardino County Transportation Authority (SBCTA) which evaluated the tools, thresholds, and mitigation options appropriate for jurisdiction in this county. This study allowed for the unique characteristics of the region to be examined and provided broad guidance to the local jurisdictions within it. The VMT thresholds and methodology being proposed exempt projects that are not likely to generate significant VMT by applying the OPR and SBCTA collaborative recommendations, and it will rely on the current General Plan (The Ontario Plan-“TOP”).

While LOS will no longer be used to assess the impacts of a project during the CEQA process, use of LOS to comply with Congestion Management Plan requirements, assess a project's consistency with TOP and determine project specific transportation improvements will continue.

On May 26, 2020, the Planning Commission considered the proposed VMT thresholds and voted 6-0 to issue a resolution recommending the City Council approve them.

**ENVIRONMENTAL REVIEW:** The project is exempt from the requirements of the California Environmental Quality Act (CEQA) pursuant to § 15061(b)(3) (General Rule) of the CEQA Guidelines based on the fact that there is no possibility that adoption of VMT Thresholds will result in a significant effect on the environment.

# PLANNING COMMISSION STAFF REPORT

**FILE NO.:** SB 743 VMT Thresholds

**SUBJECT:** Adoption of Vehicle Miles Traveled Thresholds (VMT) for determining significance of transportation impacts through the California Environmental Quality Act in conformance with SB 743; **City Initiated. City Council action is required.**

**RECOMMENDED ACTION:** That the Planning Commission consider and recommend City Council adoption of Vehicle Miles Traveled (VMT) Thresholds for Implementing the California Environmental Quality Act (CEQA) pursuant to SB 743, pursuant to the facts and reasons contained in the staff report and attached resolution.

## PROJECT ANALYSIS:

(1) Background - The California Environmental Quality Act (CEQA) is California's comprehensive environmental law. It requires public agencies to evaluate the environmental effects of a project before action is taken. CEQA also aims to prevent significant environmental effects from occurring as a result of agency actions by requiring agencies avoid or reduce, when feasible, the significant environmental impacts of their decisions.

With the adoption of SB 743 in 2013, Office of Planning and Research (OPR) was directed to examine alternative ways to analyze transportation impacts of projects during the CEQA process. OPR determined that use of Vehicle Miles Traveled (VMT) rather than Level of Service (LOS) is most suitable when analyzing the environmental impacts of a project since LOS assesses automobile delay and roadway efficiency rather than environmental impacts on transportation from projects. The use of VMT thresholds for passenger vehicle and light duty trucks was incorporated into revised state CEQA Guidelines that were adopted in December 2018. In addition, OPR adopted guidelines for use of VMT as the transportation metric to assist local governments when preparing their VMT thresholds. This VMT analysis does not apply to large trucks typically used for transporting of goods.

All cities in the State of California are required to adopt VMT thresholds for use during the CEQA process no later than July 1, 2020. The thresholds will determine what non-exempt projects may have a significant impact upon transportation. The decision on what the thresholds shall be is at the sole discretion of each jurisdiction. City staff participated in a collaborative study led by San Bernardino County Transportation Authority (SBCTA) which evaluated the tools, thresholds, and mitigation options appropriate for San

Bernardino County. This study allowed for the unique characteristics of our region to be examined and provide broad guidance to the local jurisdictions within it.

While LOS will no longer be used to assess the impacts of a project during the CEQA process, it does not preclude the City from using LOS analysis to comply with Congestion Management Plan requirements, assess a project's consistency with The Ontario Plan or to conduct project specific transportation analysis.

#### Local CEQA Guidelines

In July 2019, City Council adopted the current City CEQA Guidelines which includes provisions for using VMT thresholds. This proposed action would establish the thresholds that the City of Ontario will use during the review of projects for their environmental impacts to transportation.

These VMT Thresholds will become effective upon adoption. New projects or projects that have not circulated CEQA documents for public review before the effective date must comply with the City's new VMT Thresholds.

[2] Analysis — The proposed VMT Impact Thresholds contained in Exhibit A attached to the draft resolution identify the thresholds being proposed. The proposed VMT thresholds are based on the City's average VMT for Service Population (Residents and Employees) and includes trips both within the County and between the City and locations outside the County. The combination of the high number of jobs in Ontario, reasonable housing costs (compared to counties to the west), the presence of various regional uses such as Ontario International Airport, Ontario Mills, Toyota Arena and various large distribution facilities, and its proximity to Los Angeles, Riverside and Orange counties, make Ontario's VMT characteristics unique. Residents who work in Los Angeles or Orange counties can find more affordable housing in Ontario than locations to the west yet are within a commutable distance. Conversely, Ontario is within a reasonable commute distance from locations outside of Ontario for the more than 100,000 people who work in Ontario. This results in an average Service Population VMT higher than both the County and SCAG region because of these unique characteristics.

While Ontario's VMT for Service Population rate is higher than the County or SCAG region, The Ontario Plan land use and mobility plans concentrates balanced growth in strategic areas resulting in an overall Ontario and regional reduction in both VMT (0.2%) and GHG (0.2%). In addition, The Ontario Plan land uses have been incorporated into the County transportation model (SBTAM) which have been incorporated into SCAG's regional transportation model. As such, projects consistent with The Ontario Plan are consistent with the Regional Transportation Plan (RTP) and Sustainable Communities Strategy (SCS). Therefore, with the incorporation of the VMT reduction within The Ontario Plan land use analysis, staff is recommending that the City maintain TOP VMT reduction goal of 0.2%. Future projects consistent with TOP and in conformance with the VMT Impact Thresholds (Exhibit A) are determined to have less than significant impacts for transportation. Projects that exceed the TOP VMT Citywide average for Service

Population under General Plan Buildout conditions and/or RTP/SCS are determined to be significant and require additional CEQA analysis.

**COMPLIANCE WITH THE ONTARIO PLAN:** The proposed project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan (TOP). More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

[1] City Council Goals.

- Operate in a Businesslike Manner
- Pursue City's Goals and Objectives by Working with Other Governmental Agencies

[2] Policy Plan (General Plan)

**Mobility Element:**

- Goal M1: A system of roadways that meets the mobility needs of a dynamic and prosperous Ontario.
  - M1-2 Mitigation of Impacts. We require development to mitigate its traffic impacts.

**HOUSING ELEMENT COMPLIANCE:** The project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

**AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE:** The project site is located within the Airport Influence Area of the Ontario International Airport and has been found to be consistent with the policies and criteria set forth within the Ontario International Airport Land Use Compatibility Plan.

**ENVIRONMENTAL REVIEW:** The project is exempt from the requirements of the California Environmental Quality Act (CEQA) pursuant to § 15061(b)(3) (General Rule) of the CEQA Guidelines based on the fact that there is no possibility that adoption of VMT Thresholds will result in a significant effect on the environment.

RESOLUTION NO. PC20-021

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING CITY COUNCIL ADOPT “VEHICLES MILES TRAVELED” THRESHOLDS OF SIGNIFICANCE FOR PURPOSES OF ANALYZING TRANSPORTATION IMPACTS UNDER THE CALIFRONIA ENVIRONMENTAL QUALITY ACT (CEQA).

WHEREAS, the California Environmental Quality Act Guidelines (“CEQA Guidelines”) encourage public agencies to develop and publish generally applicable “thresholds of significance” to be used in determining the significance of a project’s environmental effects; and

WHEREAS, CEQA Guidelines section 15064.7(a) defines a threshold of significance as “an identifiable quantitative, qualitative or performance level of a particular environmental effect, noncompliance with which means the effect will normally be determined to be significant by the agency and compliance with which means the effect normally will be determined to be less than significant”; and

WHEREAS, CEQA Guidelines section 15064.7(b) requires that thresholds of significance must be adopted by ordinance, resolution, rule, or regulations, developed through a public review process, and be supported by substantial evidence; and

WHEREAS, pursuant to CEQA Guidelines section 15064.7(c), when adopting thresholds of significance, a public agency may consider thresholds of significance adopted or recommended by other public agencies provided that the decision of the agency is supported by substantial evidence; and

WHEREAS, Senate Bill 743, enacted in 2013 and codified in Public Resources Code section 21099, required changes to the CEQA Guidelines regarding the criteria for determining the significance of transportation impacts of projects; and

WHEREAS, in 2018, the Governor’s Office of Planning and Research (“OPR”) proposed, and the California Natural Resources Agency certified and adopted, new CEQA Guidelines section 15064.3 that identifies vehicle miles traveled (“VMT”) – meaning the amount and distance of automobile travel attributable to a project – as the most appropriate metric to evaluate a project’s transportation impacts; and

WHEREAS, as a result, automobile delay, as measured by “level of service” (“LOS”) and other similar metrics, will generally no longer constitute a significant environmental effect under CEQA; and

WHEREAS, CEQA Guidelines section 15064.3 requires agencies to stop treating automobile delay/LOS as an environmental impact effective on July 1, 2020, though public agencies may elect to be governed by this section immediately; and

WHEREAS, the City of Ontario, following a public review process consisting of staff presentations before the Planning Commission, wishes to adopt the VMT thresholds of significance for determining the significance of transportation impacts that are recommended in an analysis conducted by the San Bernardino County Transportation Authority on behalf of its member jurisdictions; and

WHEREAS, the project is exempt from the requirements of the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") pursuant to § 15061(b)(3) (General Rule) of the CEQA Guidelines based on the fact that there is no possibility that adoption of VMT Thresholds will result in a significant effect on the environment; and

WHEREAS, on May 26, 2020, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

**SECTION 1. *Environmental Determination and Findings.*** As the recommending body for the Project, the Planning Commission has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the Planning Commission, the Planning Commission finds as follows:

a. The Project is exempt from environmental review pursuant to Section 15601(b)(3) (General Rule) of the CEQA Guidelines; and

b. The application of the categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and

c. The determination of CEQA exemption reflects the independent judgment of the Planning Commission.

**SECTION 2. *Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing,

and upon the specific findings set forth in Section 1, above, the Planning Commission hereby concludes as follows:

a. Adoption of the Vehicle Miles Traveled (VMT) Thresholds is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan; and

b. The Vehicle Miles Traveled (VMT) Thresholds would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City.

**SECTION 3. *Planning Commission Action.*** Based upon the findings and conclusions set forth in Sections 1 through 2, above, the Planning Commission hereby RECOMMENDS THE CITY COUNCIL APPROVE

1. Utilizing the San Bernardino County Travel Demand Model (SBTAM) as its preferred methodology to measure VMT.
2. Utilizing the San Bernardino County Travel Demand Model (SBTAM) as its preferred method to analyze a project's VMT impact.
3. Utilizing a threshold consistent with Table 1 in Exhibit A

**SECTION 4: *Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

**SECTION 5: *Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

**SECTION 6: *Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

-----

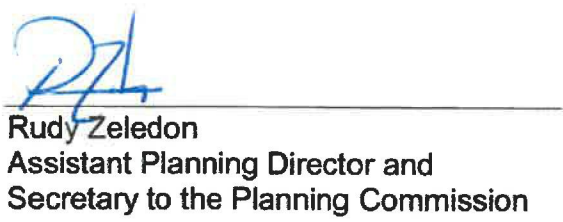

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 26<sup>th</sup> day of May, 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

RESOLUTION NO. \_\_\_\_\_

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ADOPTING VEHICLES MILES TRAVELED THRESHOLDS OF SIGNIFICANCE FOR PURPOSES OF ANALYZING TRANSPORTATION IMPACTS UNDER THE CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA).

WHEREAS, the California Environmental Quality Act Guidelines (“CEQA Guidelines”) encourage public agencies to develop and publish generally applicable “thresholds of significance” to be used in determining the significance of a project’s environmental effects; and

WHEREAS, CEQA Guidelines section 15064.7(a) defines a threshold of significance as, “an identifiable quantitative, qualitative or performance level of a particular environmental effect, noncompliance with which means the effect will normally be determined to be significant by the agency and compliance with which means the effect normally will be determined to be less than significant”; and

WHEREAS, CEQA Guidelines section 15064.7(b) requires that thresholds of significance must be adopted by ordinance, resolution, rule, or regulations, developed through a public review process and be supported by substantial evidence; and

WHEREAS, pursuant to CEQA Guidelines section 15064.7(c), when adopting thresholds of significance, a public agency may consider thresholds of significance adopted or recommended by other public agencies provided that the decision of the agency is supported by substantial evidence; and

WHEREAS, Senate Bill 743, enacted in 2013 and codified in Public Resources Code section 21099, required changes to the CEQA Guidelines regarding the criteria for determining the significance of transportation impacts of projects; and

WHEREAS, in 2018, the Governor’s Office of Planning and Research (“OPR”) proposed, and the California Natural Resources Agency certified and adopted, new CEQA Guidelines Section 15064.3 that identifies vehicle miles traveled (“VMT”) - meaning the amount and distance of automobile travel attributable to a project – as the most appropriate metric to evaluate a project’s transportation impacts; and

WHEREAS, as a result, automobile delay, as measured by “level of service” (“LOS”) and other similar metrics, will generally no longer constitute a significant environmental effect under CEQA; and

WHEREAS, CEQA Guidelines Section 15064.3 requires agencies to stop treating automobile delay/LOS as an environmental impact effective on July 1, 2020, though public agencies may elect to be governed by this section immediately; and

WHEREAS, the City of Ontario, following a public review process consisting of staff presentations before the Planning Commission, wishes to adopt the VMT thresholds of significance for determining the significance of transportation impacts that are recommended in an analysis conducted by the San Bernardino County Transportation Authority on behalf of its member jurisdictions; and

WHEREAS, the project is exempt from the requirements of the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") pursuant to § 15061(b)(3) (General Rule) of the CEQA Guidelines based on the fact that there is no possibility that adoption of VMT Thresholds will result in a significant effect on the environment; and

WHEREAS, on May 26, 2020, the Planning Commission of the City of Ontario considered the proposed VMT Thresholds and recommended the City Council adopt the VMT Thresholds; and

WHEREAS, on June 16, 2020, the City Council of the City of Ontario considered the proposed VMT Thresholds; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the City Council of the City of Ontario ("City"), as follows:

**SECTION 1. Environmental Determination and Findings.** As the decision-making body for the Project, the City Council has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the City Council, the City Council finds as follows:

- a. The Project is exempt from environmental review pursuant to Section 15601(b)(3) (General Rule) of the CEQA Guidelines; and
- b. The application of the categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and
- c. The determination of CEQA exemption reflects the independent judgment of the City Council.

**SECTION 2. Concluding Facts and Reasons.** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Section 1, above, the City Council hereby concludes as follows:

- a. Adoption of the Vehicle Miles Traveled (VMT) Thresholds is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan; and

b. The Vehicle Miles Traveled (VMT) Thresholds would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City.

**SECTION 3. *City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 2, above, the City Council hereby ADOPTS:

1. Utilizing the San Bernardino County Travel Demand Model (SBTAM) as its preferred methodology to measure VMT.
2. Utilizing the San Bernardino County Travel Demand Model (SBTAM) as its preferred method to analyze a project's VMT impact.
3. Utilizing a threshold consistent with Table 1 in Exhibit A

**SECTION 4. *Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

**SECTION 5. *Certification to Adoption.*** The City Clerk shall certify to the adoption of the Resolution.

PASSED, APPROVED, AND ADOPTED this 16<sup>th</sup> day of June 2020.

RESOLUTION NO. 2020-071

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ADOPTING VEHICLES MILES TRAVELED THRESHOLDS OF SIGNIFICANCE FOR PURPOSES OF ANALYZING TRANSPORTATION IMPACTS UNDER THE CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA).

WHEREAS, the California Environmental Quality Act Guidelines (“CEQA Guidelines”) encourage public agencies to develop and publish generally applicable “thresholds of significance” to be used in determining the significance of a project’s environmental effects; and

WHEREAS, CEQA Guidelines section 15064.7(a) defines a threshold of significance as, “an identifiable quantitative, qualitative or performance level of a particular environmental effect, noncompliance with which means the effect will normally be determined to be significant by the agency and compliance with which means the effect normally will be determined to be less than significant”; and

WHEREAS, CEQA Guidelines section 15064.7(b) requires that thresholds of significance must be adopted by ordinance, resolution, rule, or regulations, developed through a public review process and be supported by substantial evidence; and

WHEREAS, pursuant to CEQA Guidelines section 15064.7(c), when adopting thresholds of significance, a public agency may consider thresholds of significance adopted or recommended by other public agencies provided that the decision of the agency is supported by substantial evidence; and

WHEREAS, Senate Bill 743, enacted in 2013 and codified in Public Resources Code section 21099, required changes to the CEQA Guidelines regarding the criteria for determining the significance of transportation impacts of projects; and

WHEREAS, in 2018, the Governor’s Office of Planning and Research (“OPR”) proposed, and the California Natural Resources Agency certified and adopted, new CEQA Guidelines Section 15064.3 that identifies vehicle miles traveled (“VMT”) - meaning the amount and distance of automobile travel attributable to a project – as the most appropriate metric to evaluate a project’s transportation impacts; and

WHEREAS, as a result, automobile delay, as measured by “level of service” (“LOS”) and other similar metrics, will generally no longer constitute a significant environmental effect under CEQA; and

WHEREAS, CEQA Guidelines Section 15064.3 requires agencies to stop treating automobile delay/LOS as an environmental impact effective on July 1, 2020, though public agencies may elect to be governed by this section immediately; and

WHEREAS, the City of Ontario, following a public review process consisting of staff presentations before the Planning Commission, wishes to adopt the VMT thresholds of significance for determining the significance of transportation impacts that are recommended in an analysis conducted by the San Bernardino County Transportation Authority on behalf of its member jurisdictions; and

WHEREAS, the project is exempt from the requirements of the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") pursuant to § 15061(b)(3) (General Rule) of the CEQA Guidelines based on the fact that there is no possibility that adoption of VMT Thresholds will result in a significant effect on the environment; and

WHEREAS, on May 26, 2020, the Planning Commission of the City of Ontario considered the proposed VMT Thresholds and recommended the City Council adopt the VMT Thresholds; and

WHEREAS, on June 16, 2020, the City Council of the City of Ontario considered the proposed VMT Thresholds; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the City Council of the City of Ontario ("City"), as follows:

**SECTION 1. Environmental Determination and Findings.** As the decision-making body for the Project, the City Council has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the City Council, the City Council finds as follows:

a. The Project is exempt from environmental review pursuant to Section 15601(b)(3) (General Rule) of the CEQA Guidelines; and

b. The application of the categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and

c. The determination of CEQA exemption reflects the independent judgment of the City Council.

**SECTION 2. Concluding Facts and Reasons.** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Section 1, above, the City Council hereby concludes as follows:

a. Adoption of the Vehicle Miles Traveled (VMT) Thresholds is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan; and

b. The Vehicle Miles Traveled (VMT) Thresholds would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City.

**SECTION 3. City Council Action.** Based upon the findings and conclusions set forth in Sections 1 through 2, above, the City Council hereby ADOPTS:

1. Utilizing the San Bernardino County Travel Demand Model (SBTAM) as its preferred methodology to measure VMT.
2. Utilizing the San Bernardino County Travel Demand Model (SBTAM) as its preferred method to analyze a project's VMT impact.
3. Utilizing a threshold consistent with Table 1 in Exhibit A

**SECTION 4. Custodian of Records.** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

**SECTION 5. Certification to Adoption.** The City Clerk shall certify to the adoption of the Resolution.

PASSED, APPROVED, AND ADOPTED this 16<sup>th</sup> day of June 2020.

Mr. Jay Bautista  
City of Ontario

**SUBJECT: SCOPING ASSUMPTIONS FOR THE MERRILL COMMERCE CENTER TRAFFIC IMPACT ANALYSIS**

Dear Mr. Jay Bautista:

Urban Crossroads, Inc. has conducted an initial assessment of the proposed Merrill Commerce Center development (**Project**) to establish a traffic impact analysis (**TIA**) scope of work that would be prepared in support of a Project Environmental Impact Report (**EIR**). The Project is located north of Merrill Avenue between Grove Avenue and Carpenter Avenue in the City of Ontario. Based on the results of this assessment, the following memo outlines the project-related trip generation, trip distribution patterns, proposed study area and analysis scenarios expected to be included in the Project traffic impact analysis.

It is our understanding that the City will use the information contained in this memo as part of its Request for Proposal (RFP) process to solicit bids from consultants to prepare the EIR, TIA, and other technical studies that rely on the TIA. Thus, all responses to the RFP will rely on the same TIA scope of work outlined herein for bidding purposes. The following outlined scoping assumptions also can be utilized in the preparation of a traffic scoping agreement for the future Project TIA which would be reviewed and approved by City staff.

## **PROJECT DESCRIPTION**

Exhibit 1 illustrates a preliminary land use plan for the Project and indicates the proposed phasing. Phase 1 of the proposed Project is anticipated to be developed by Year 2022 and includes the development of Planning Areas 5/5A. Phase 1A, also with an Opening Year of 2022), includes the development of Planning Areas 4/4A. Phase 2 of the proposed Project is anticipated to be developed by Year 2023 for Planning Areas 3/3A and 6/6A. Project Buildout is to include the development of Planning Areas 1/1A and 2 by the Year 2024. As indicated on Exhibit 1, the total development is proposed to consist of up to 7,014,000 square feet of industrial uses within Planning Areas 1, 2, 3, 4, 5, and 6 and up to 1,441,000 square feet of business park uses in Planning Areas 1A, 3A, 4A, 5A, and 6A. For purposes of scoping the TIA, the following mix of land uses are assumed, which represent a reasonable mix of industrial and business park uses that would be permitted by the Merrill Commerce Center Specific Plan:

- Industrial: 7,014,000 square feet of high-cube fulfillment center warehouse use
- Business Park: 1,441,000 square feet of a mix of uses including merchant wholesale, professional services, professional office, warehouse/storage, and research and development uses (as would fall under ITE Land Use Code 130).

- Total of 8,455,000 square feet

Access to the proposed Project would be provided via Grove Avenue (via Street A), Merrill Avenue, Eucalyptus Avenue, Walker Avenue, Baker Avenue, Vineyard Avenue, and Carpenter Avenue. Merrill Avenue will serve as the primary travel route for heavy trucks to and from the Project. Exhibit 2 illustrates the Project location.

## **PROPOSED ANALYSIS SCENARIOS**

The following analysis scenarios are proposed based on planned development phasing:

- Existing (2019)
- Existing plus Project, with analysis broken down for:
  - Phase 1 – Planning Areas 5/5A
  - Phase 1A – Planning Areas 4/4A
  - Phase 1 + Phase 2 – Planning Areas 3/3A and 6/6A
  - Phase 1 + Phase 2 + Phase 3 – Planning Areas 1/1A and 2
- Opening Year Cumulative (2022) Without Project
- Opening Year Cumulative (2022) With Project Phases 1 and 1A, broken down for:
  - Phase 1 – Planning Areas 5/5A
  - Phase 1A – Planning Areas 4/4A
- Opening Year Cumulative (2023) Without Project
- Opening Year Cumulative (2023) With Project (Planning Areas 3/A and 6/6A)
- Opening Year Cumulative (2024) Without Project
- Opening Year Cumulative (2024) With Project (Project Buildout – All 3 Phases)
- Horizon Year (2040) Without Project – With Limonite Avenue Extension
- Horizon Year (2040) With Project (Project Buildout – All 3 Phases) – With Limonite Avenue Extension

## **TRIP GENERATION**

Trip generation represents the amount of traffic that is attracted and produced by a development, and is based upon the specific land uses planned for a given project. Trip generation rates for the Project are shown in Table 1 for both passenger car equivalent (PCE) and actual vehicles.

The Specific Plan allows for the business park planning areas (1A, 3A, 4A, 5A, and 6A) to be developed with merchant wholesale, professional services, professional office, warehouse/storage, research and

development, and other similar related uses. Because the peak hour trip generation rates collected for the “business park” land use category by the Institute of Transportation Engineers (ITE) as provided in their Trip Generation Manual, 10<sup>th</sup> Edition, 2017 (ITE land use code 770) are based on limited data (i.e., a single surveyed site) that does not have the same physical or operational characteristics as the range of uses permitted in the Business Park planning areas of the Merrill Commerce Center Specific Plan, the trip generation rates for ITE land use code 130 (Industrial Park) have been used to derive site specific trip generation estimates for up to 1,441,000 square feet of business park uses proposed for the Project in planning areas 1A, 3A, 4A, 5A, and 6A. The ITE Trip Generation Handbook (3<sup>rd</sup> Edition, 2017) identifies a 13% mix of heavy trucks for ITE land use code 130, however, does not provide a breakdown of the 13% further by axle type. As such, the percentage of trucks, by axle type, were obtained from the South Coast Air Quality Management District (SCAQMD) Warehouse Truck Trip Study Data Results and Usage (2014) recommended truck mix. The SCAQMD has performed surveys of existing facilities and compiled the data to provide interim guidance on the mix of heavy trucks for these types of warehousing/storage facilities. Based on this guidance from the SCAQMD, the following truck fleet mix was utilized for the purposes of estimating the truck trip generation for the business park use (without cold storage): 16.7% of the total trucks as 2-axle trucks, 20.7% of the total trucks as 3-axle trucks, and 62.6% of the total trucks as 4+-axle trucks.

The ITE Trip Generation Manual (2017) has trip generation rates for high-cube fulfillment center use (ITE land use code 155), however, these rates are unreliable because they are based on limited data (i.e., one to two surveyed sites) and the ITE Trip Generation Manual recommends the use of local data sources where available. As such, the trip-generation statistics published in the DRAFT TUMF High-Cube Warehouse Trip Generation Study (WSP, November 6, 2018) which was commissioned by Western Riverside Council of Governments (WRCOG) in support of the Transportation Uniform Mitigation Fee (TUMF) update, has been utilized for the high-cube fulfillment center use. The WSP trip generation rates were published in November 2018 and are based on data collected at 11 local high-cube fulfillment center sites. However, the WSP study does not include a split for inbound and outbound vehicles, as such, the inbound and outbound splits per the ITE High-Cube Warehouse Vehicle Trip Generation Analysis (October 2016) have been utilized.

Finally, PCE factors were applied to the trip generation rates for heavy trucks (large 2-axles, 3-axles, 4+-axles) for both the Industrial and Business Park planning areas of the Merrill Commerce Center Specific Plan. PCEs allow the typical “real-world” mix of vehicle types to be represented as a single, standardized unit, such as the passenger car, to be used for the purposes of capacity and level of service analyses. The PCE factors are consistent with the recommended PCE factors in Appendix B of the San Bernardino County Congestion Management Program (CMP), 2016 Update.

The trip generation summary illustrating daily and peak hour trip generation estimates for the proposed Project in actual vehicles are shown on Table 2, and Table 3 shows the trip generation summary based on PCE. As shown on Table 2, the proposed Project is anticipated to generate a net total of 20,366 actual vehicle trip-ends per day with 1,467 AM peak hour trips and 1,775 PM peak hour trips. In comparison,

the proposed Project is anticipated to generate a net total of 25,674 PCE trip-ends per day, 1,806 PCE AM peak hour trips and 2,128 PCE PM peak hour trips (see Table 3).

## **TRIP DISTRIBUTION**

The Project trip distribution and assignment process represents the directional orientation of traffic to and from the Project site. The Existing plus Project and Opening Year Cumulative trip distribution patterns utilize the existing roadway system while the Horizon Year trip distribution patterns assumes future roadway connections based on the City of Ontario General Plan (and those of surrounding agencies).

Exhibit 3 illustrates the truck trip distribution patterns for Existing plus Project, Opening Year Cumulative and Horizon Year conditions. As shown on Exhibit 3, trucks are anticipated to utilize designated truck routes such as Merrill Avenue to Euclid Avenue (SR-83), Archibald Avenue, Ontario Ranch Road, and Limonite Avenue to reach regional State highways such as the SR-71, SR-60, and I-15 Freeways. These travel patterns are not anticipated to change with the addition of new future facilities for Horizon Year traffic conditions. Exhibit 4 illustrates the Existing plus Project and Opening Year Cumulative passenger car trip distribution patterns that are based on a San Bernardino Transportation Analysis Model (SBTAM) select zone run for a zone wholly or partially containing the Project, with modifications to utilize existing roadways.

Exhibit 5 illustrates the passenger car trip distribution patterns for Horizon Year (With Limonite Avenue Extension) traffic conditions. The passenger car trip distribution patterns are based on a SBTAM select zone run.

## **INTERSECTION ANALYSIS LOCATIONS**

Exhibit 6 depicts the recommended intersection analysis locations, based upon the Project trip generation and trip distribution patterns included as part of this letter. The recommended intersection analysis locations are based on the highest Project traffic contribution presented for either Opening Year Cumulative or Horizon Year scenarios (i.e., 50 peak hour trip criteria).

The San Bernardino County Transportation Authority (SBCTA) Congestion Management Program (CMP) intersections, where applicable, are illustrated on Exhibit 2. The general preparation of the traffic impact study for this Project will continue to be in conformance with the typical requirements of the San Bernardino County CMP.

## **FREEWAY OPERATIONS ANALYSIS**

Based on the Project's anticipated contribution to the near-by State Highway System and at the request of Caltrans District 8 on other recent projects in the area, the following State highway facilities should also be evaluated in the TIA:

***Basic Freeway Segments:***

- SR-71 Freeway, north of Edison Avenue
- SR-71 Freeway, south of Euclid Avenue (SR-83) / Butterfield Ranch Road
- SR-60 Freeway, west of Euclid Avenue (SR-83)
- SR-60 Freeway, between Euclid Avenue (SR-83) to Grove Avenue
- SR-60 Freeway, east of Grove Avenue
- SR-60 Freeway, west of Archibald Avenue
- SR-60 Freeway, east of Archibald Avenue
- I-15 Freeway, north of Cantu-Galleano Ranch Road
- I-15 Freeway, south of Limonite Avenue

***Merge/Diverge Ramp Junctions:***

- SR-71 Freeway Southbound Off-Ramp at Edison Avenue
- SR-71 Freeway Northbound On-Ramp at Edison Avenue
- SR-71 Freeway Southbound Loop On-Ramp at Euclid Avenue (SR-83)
- SR-71 Freeway Northbound Off-Ramp at Euclid Avenue (SR-83)
- SR-60 Freeway Westbound On-Ramp at Euclid Avenue (SR-83)
- SR-60 Freeway Eastbound Off-Ramp at Euclid Avenue (SR-83)
- SR-60 Freeway Westbound On-Ramp at Grove Avenue
- SR-60 Freeway Westbound Off-Ramp at Grove Avenue
- SR-60 Freeway Eastbound Off-Ramp at Grove Avenue
- SR-60 Freeway Eastbound On-Ramp at Grove Avenue
- SR-60 Freeway Westbound Off-Ramp at Archibald Avenue
- SR-60 Freeway Eastbound On-Ramp at Archibald Avenue
- I-15 Freeway Southbound Off-Ramp at Cantu-Galleano Ranch Road
- I-15 Freeway Northbound Loop On-Ramp at Cantu-Galleano Ranch Road
- I-15 Freeway Southbound On-Ramp at Limonite Avenue
- I-15 Freeway Northbound Off-Ramp at Limonite Avenue

<sup>4</sup> The Specific Plan allows for the Business Park area to be developed with merchant wholesale, professional services, professional office, warehouse/storage, and research and development uses. However, the Business Park (ITE Land Use Code 770) land use has trip generation rates for the peak hours is based on limited data (i.e., one surveyed site). As such, the trip generation rates for ITE Land Use Code 130 has been utilized for the business park portion of the Project.

PROJECT #: SC2074 LOCATION #: 50 CONTROL: SIGNAL

NOTES: Legend for movement types: AM, PM, MD, OTHER, and a signal diagram showing North, South, East, West, and U-turn directions.

Add U-Turns to Left Turns

Summary table for Northbound, Southbound, Eastbound, and Westbound lanes with total counts.

U-TURNS summary table with counts for NB, SB, EB, WB, and TTL.

RTOR summary table with counts for NRR, SRR, ERR, and WRR.

Main data table for AM (Morning) peak hour, showing hourly volumes and approach percentages for all movements.

U-TURNS data table for AM peak hour.

RTOR data table for AM peak hour.

Summary table for AM peak hour including VOLUMES, APP/DEPART, and PEAK HR FACTOR.

RTOR summary table for AM peak hour.

Main data table for PM (Evening) peak hour, showing hourly volumes and approach percentages.

U-TURNS data table for PM peak hour.

RTOR data table for PM peak hour.

Summary table for PM peak hour including VOLUMES, APP/DEPART, and PEAK HR FACTOR.

RTOR summary table for PM peak hour.

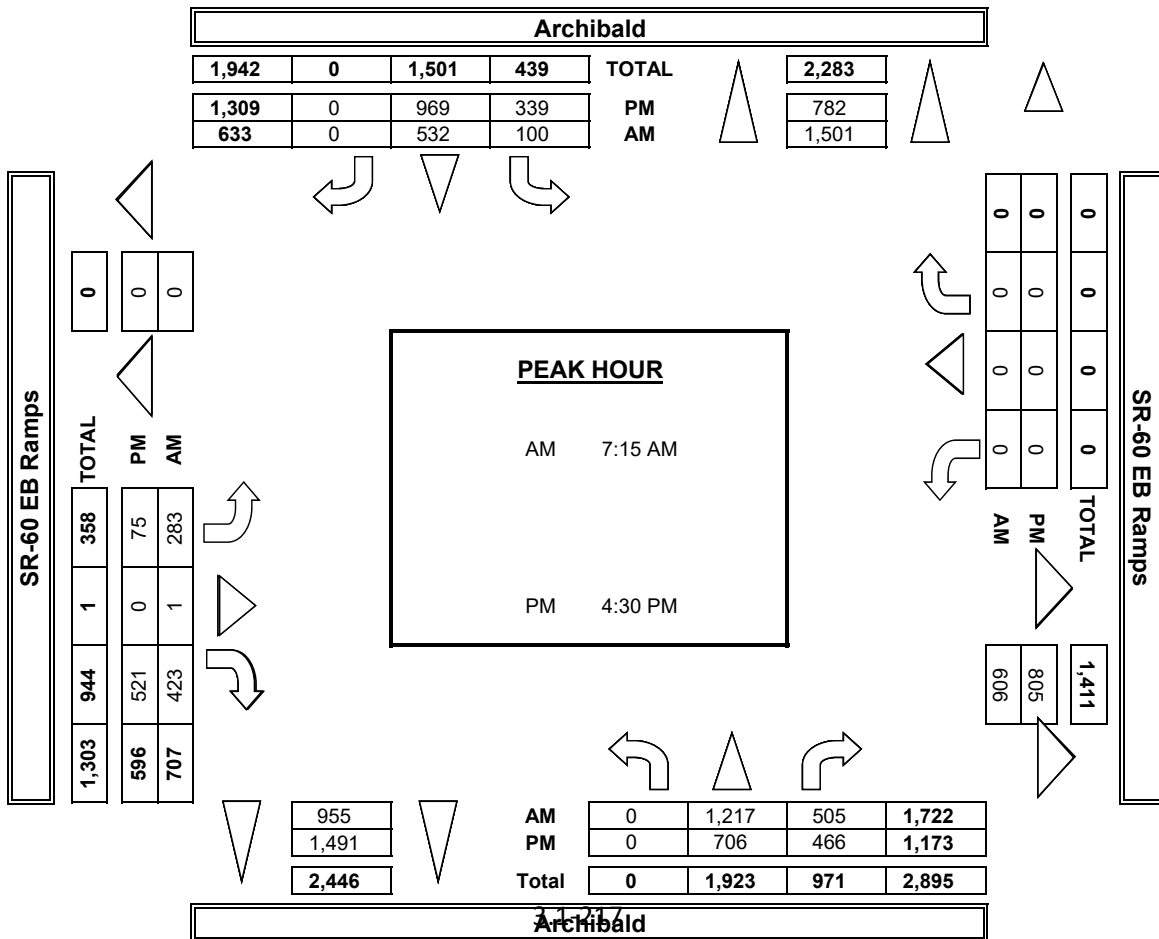

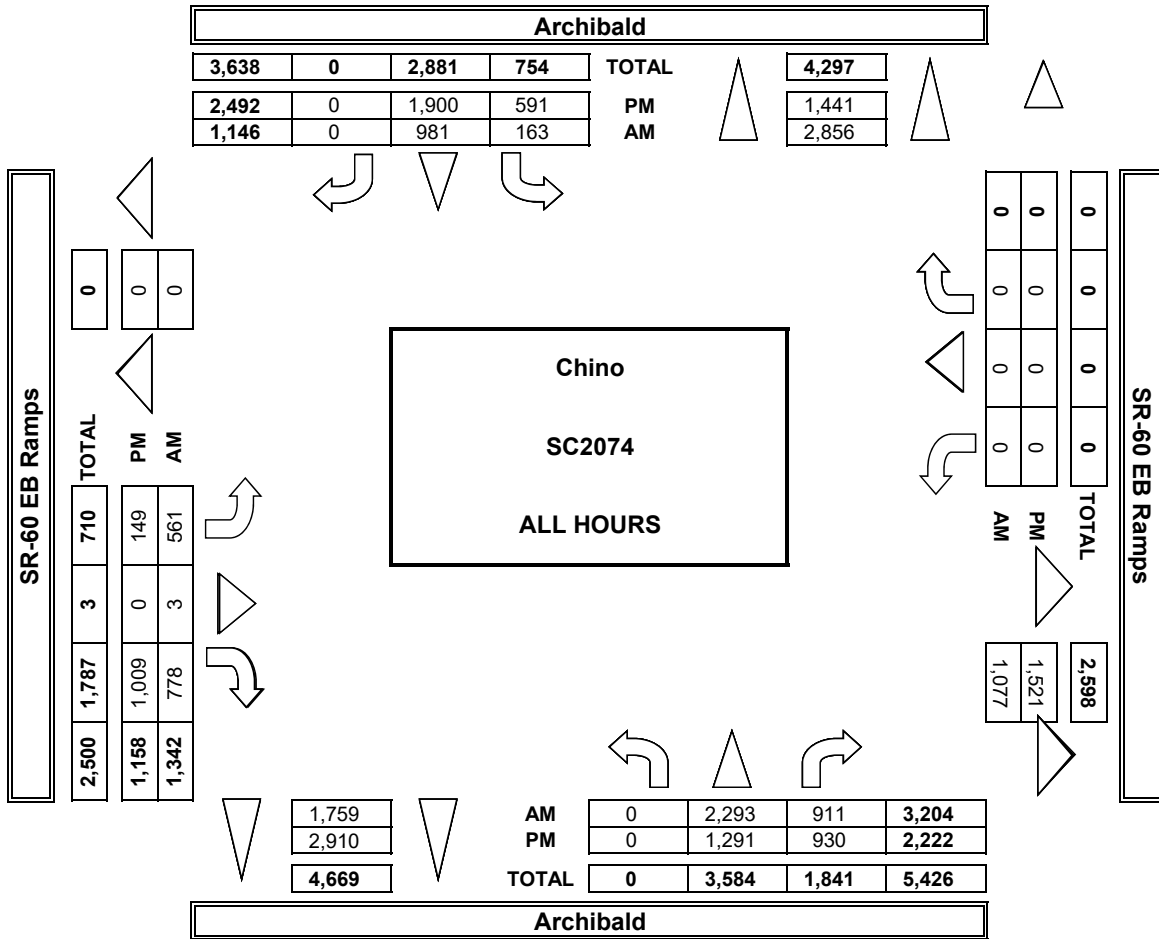

Hourly volume table for AM and PM peak hours.

ALL PED AND BIKE table showing counts for E Side, W Side, S Side, N Side, and Total.

PEDESTRIAN CROSSINGS table showing counts for E Side, W Side, S Side, N Side, and Total.

BICYCLE CROSSINGS table showing counts for ES, WS, SS, NS, and Total.

Notes

- User approved volume balancing among the lanes for turning movement.
- \* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
- Unsignalized Delay for [EBR] is excluded from calculations of the approach delay and intersection delay.

HCM 6th LOS	C

Notes

\* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Notes

- User approved volume balancing among the lanes for turning movement.
- \* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
- Unsignalized Delay for [WBR] is excluded from calculations of the approach delay and intersection delay.

HCM 6th Ctrl Delay	23.7
HCM 6th LOS	C

Notes

- User approved volume balancing among the lanes for turning movement.
- \* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
- Unsignalized Delay for [EBR] is excluded from calculations of the approach delay and intersection delay.
