Re: Limited Phase II Environmental Site Assessment
GH Dairy
8643 Eucalyptus Avenue
Ontario, San Bernardino County, CA
AECOM Project No. 60544486

Dear Mr. Casey:

AECOM is pleased to present Liberty Property Trust and Liberty Property Limited Partnership or their designee (collectively, Liberty, Client) with the findings of the Limited Phase II Environmental Site Assessment performed on GH Dairy at 8643 Eucalyptus Ave, Ontario, San Bernardino County, California (Subject Property). This letter report includes a summary of field activities, analytical results, and conclusions.

1.0 BACKGROUND

In April 2017, AECOM conducted a Phase I Environmental Site Assessment of the Subject Property, which consists of 37.3 acres of land consisting of a dairy farm. Specifically, the Subject Property is comprised of five distinct areas: Area 1 (the northern portion of the property) is improved with a residential structure, one milk barn and cow pen, and a covered drum and storage area (eastern portion), a small milk barn and two covered cow wash areas, (western portion); Area 2 (south of the northern portion of the property) consists of a fenced cattle corrals; Area 3 (south of the fenced cow area) consists of a manure piles; Area 4 (south of the manure piles) consists of a pasture that is used by the cattle for grazing; and Area 5 (south of the pasture) is comprised of a wastewater lagoon.

This assessment identified the following Recognized Environmental Conditions (RECs) in connection with the Subject Property:

- Based on the historical use of the Subject Property as agricultural land, since at least 1938 to the present, there is the potential for the Subject Property to contain pesticide and herbicide contamination. The historical use of pesticides/herbicides likely utilized over the years represents a REC to the Subject Property.
- The Subject Property is equipped with an underground wastewater system utilized to direct biological wastes (generated by in the milk barn during milking/cattle supporting activities; including the application of pesticides in order to prevent ticks, mites, and lice infestations)

to the pasture located in Area 4 of the Subject Property. The wastewater system works in conjunction with the flood irrigating of the pasture. Specifically, the site contact Mr. Gerben, stated that clean water flows from the well located north of residential structure which allows the generated wastes from the barn to gravity feed through underground 12" piping to the pasture and ultimately the wastewater lagoon located in Area 5 of the Subject Property. AECOM observed several large stand pipes containing valves within the pasture during site reconnaissance. On a weekly basis, the valves in the pasture are opened and the water and generated wastes are pumped from the well through the pipes to the pasture for flood irrigation. Based on the types of materials (specifically, pesticides used on the cattle in order to prevent ticks, mites, and lice infestations) that flow through the wastewater system, AECOM identifies the wastewater system and the associated wastewater lagoon as a REC to the Subject Property. In addition, if the wastewater system will no longer be utilized due to future construction on the property, AECOM recommends properly closing the wastewater system in accordance with state and local guidelines.

Based on the Phase I ESA, AECOM recommended completing a limited Phase II assessment of the Subject Property.

2.0 SOIL INVESTIGATION

On May 18, 2017, Ms. Sarah Vogel of AECOM conducted a Limited Phase II ESA on the Subject Property. Six soil borings (HA-1 through HA-6) were advanced via hand auger to approximately 12 inches below ground surface (bgs). AECOM collected four soil samples (HA-1 through HA-4) at randomly selected locations throughout the pasture and two soil samples (HA-5 and HA-6) at randomly selected locations throughout the wastewater lagoon area. See Figure 1 for a map identifying soil boring locations.

Soils encountered in the soil borings generally consisted of dark brown clayey silt. One soil grab sample was collected from the bottom of each boring (approximately 12 inches bgs).

Following collection, the soil samples were placed into laboratory-provided glassware, labeled, stored under iced conditions and transported under standard chain-of-custody protocol to TestAmerica Laboratories Inc. located in Pittsburgh, Pennsylvania for analysis of organochlorine pesticides via United States Environmental Protection Agency (USEPA) Method 8081, organophosphorus pesticides via USEPA Method 8141, herbicides by USEPA Method 8151, and RCRA eight metals (arsenic, barium, cadmium, chromium, lead, mercury, selenium, and silver).

Soil Sample Results

The soil sample results were compared to the California Human Health Screening Levels Residential Scenario and Commercial/Industrial Scenario Soil Screening Numbers.

Organophosphorous pesticides and herbicides were not detected above the laboratory reporting limits in the soil samples. Six organochlorine pesticides (4,4' -DDD, 4,4' -DDE, 4,4' -DDT, alpha-chlordane, dieldrin, and Heptachlor epoxide) were detected in the following soil samples:

- 4,4'-DDD was detected in two soil samples (HA-1 and HA-3) at concentrations of estimated values (J) 0.000721 mg/kg and 0.00021 mg/kg, respectively; however, both concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 2.3 mg/kg.
- 4,4-DDE was detected in all six soil samples at concentrations ranging from 0.000482 J mg/kg (HA-5) to 0.0103 mg/kg (HA-1); however, all concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 1.6 mg/kg.
- 4,4-DDT was detected in four soil samples (HA-1 through HA-4) at concentrations ranging from 0.00118 mg/kg (HA-2) to 0.00327 mg/kg (HA-1); however, all concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 1.6 mg/kg.
- alpha-Chlordane was detected in three soil samples (HA-1, HA-3, and HA-4) at concentrations ranging from 0.000256 J mg/kg (HA-3) to 0.000828 J mg/kg (HA-1); however, all concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 0.043 mg/kg.
- Dieldrin was detected in all six soil samples at concentrations ranging from 0.00313 mg/kg (HA-2) to 0.00918 mg/kg (HA-4); however, all concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 0.035 mg/kg.
- Heptachlor epoxide was detected in four soil samples (HA-1 through HA-4) at concentrations ranging from 0.000384 J mg/kg (HA-2) to 0.00137 J mg/kg (HA-1). A Residential Scenario Soil Screening Number is not established for heptachlor epoxide.

Seven metals (Arsenic, barium cadmium, chromium (III), chromium (VI), lead, and mercury) were detected in the following soil samples:

- Arsenic was detected in five of the six soil samples (HA-2 through HA-6) at concentrations ranging from an estimated value (J) of 0.84 mg/kg (HA-5) to 1.52 mg/kg (HA-6). The arsenic concentrations in all five soil samples were detected above the California Human Health Screening Levels Residential Scenario and the Commercial/Industrial Scenario Soil Screening Numbers of 0.07 mg/kg and 0.24 mg/kg, respectively.
- Barium was detected in all six soil samples at concentrations ranging from 93.5 mg/kg (HA-1) to 187 mg/kg (HA-3); however, all concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 5,200 mg/kg.
- Cadmium was detected in four soil samples (HA-1 through HA-4) at concentrations ranging from 0.557 J mg/kg (HA-1) to 0.266 mg/kg (HA-4); however, all concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 1.7 mg/kg.

- Chromium (III) was detected in all six soil samples at concentrations ranging from 12.9 mg/kg (HA-5) to 36.1 mg/kg (HA-1); however, all concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 100,000 mg/kg.
- Chromium (VI) was detected in four soil samples at concentrations ranging from 0.408 J mg/kg (HA-4) to 0.926 mg/kg (HA-1); however, all concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 17 mg/kg.
- Lead was detected in all six soil samples at concentrations ranging from 2.37 mg/kg (HA-5) to 7.44 mg/kg (HA-4); however, all concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 80 mg/kg.
- Mercury was detected in all six soil samples at concentrations ranging from 0.146 mg/kg (HA-5) to 0.851 mg/kg (HA-4); however, all concentrations were below the California Human Health Screening Levels Residential Scenario Soil Screening Number of 18 mg/kg.

All other results were detected below respective California Human Health Screening Level standards. Laboratory analytical results are summarized in Table 1 and the laboratory analytical report is included in Appendix A.

3.0 CONCLUSIONS/RECOMMENDATIONS

Based on the results of the investigation, AECOM makes the following conclusions and recommendations:

- Organophosphorous pesticides and herbicides were not detected above the laboratory reporting limits in any of the soil samples.
- 4,4'-DDD, 4,4-DDE, 4,4-DDT, alpha-Chlordane, dieldrin, and heptachlor epoxide were detected in various soil samples; however, all results were detected below their respective California Human Health Screening Levels Residential Scenario Soil Screening Number.
- Heptachlor epoxide was detected in four soil samples (HA-1 through HA-4); however, Scenario Soil Screening Numbers are not established for heptachlor epoxide.
- Barium, cadmium, chromium (III), chromium (VI), lead, and mercury were detected in various soil samples; however, all results were detected below their respective California Human Health Screening Levels Residential Scenario Soil Screening Number.
- Arsenic was detected in five of the six soil samples at concentrations above the California Human Health Screening Levels Residential Scenario of 0.07 mg/kg and the Commercial/Industrial Scenario of 0.24 mg/kg.

Based on published information, the concentrations of arsenic observed in the collected soil samples at the Subject Property lie within the range of naturally occurring background arsenic concentrations in southern California. The concentrations during AECOM's soil

sampling event ranged from 0.84 mg/kg to 1.52 mg/kg which are below the average within the range of natural background levels of arsenic in southern California ranging from 0.15 mg/kg to 19.63 mg/kg (*Determination of a Southern California Regional Background Arsenic Concentrations in Soil*).

AECOM did not observe obvious impacts in the Subject Property soils and the analytical data does not rise to concentrations warranting further investigation. Further, the residual concentrations are sufficiently low that no construction-related special handling is required. It should be understood that if soil is exported from the Subject Property for development, additional analytical characterization may be required to satisfy the environmental due diligence requirements of the receiving facility and the California Department of Toxic Substances Control.

4.0 LIMITATIONS

AECOM has performed the scope of work set forth in the proposal(s) related to this project, as they may have been amended (the "Proposals"), in specific reliance on the understandings and agreements reached between AECOM and Liberty Property Trust and Liberty Property Limited Partnership or their designee (collectively, Liberty, Client) as reflected in the Proposal and the written agreement between them (the "Agreement"). AECOM's scope of work was limited to that stated in the Proposal.

Opinions, Judgments and Third Party Rights: Opinions and judgments expressed herein, which are based on our understanding and interpretation of current regulatory standards, should not be construed as legal opinions. No third party shall have the right to rely on this report or other related project documentation without written consent from AECOM and Liberty.

AECOM's services in the development of this report were conducted, within the limits prescribed by the Agreement, in a manner consistent with that level of care and skill ordinarily exercised by members of the same professions currently practicing in the same locality under similar conditions and no other guaranty, warranty, or representation, either express or implied, is included or intended herein.

Client recognizes and agrees that:

- The information in the Report relates only to the properties specifically described in the Proposal and Report;
- The information and conclusions provided in the Report applies only to the Subject Property as it existed at the time of AECOM's site examination. Changes in applicable standards may occur because of changing environmental regulations or additional knowledge gained regarding a specific parameter. Accordingly, the findings of this report may be invalidated, wholly or in part, by changes beyond our control.
- The Report is intended to be used in their entirety and no excerpts may be taken to be representative of the findings of this investigation.

Narrative

Job Narrative 180-66504-1

Receipt

The samples were received on 5/19/2017 9:10 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.9° C.

Pesticides

The following samples were diluted due to the nature of the sample matrix: HA-1 (180-66504-1), HA-2 (180-66504-2), HA-3 (180-66504-3), HA-4 (180-66504-4), HA-5 (180-66504-5), HA-6 (180-66504-6), and HA-1-DUP (180-66504-7).. Elevated reporting limits (RLs) are provided. Sample extracts had a dark green color.

OPPs

The following samples were diluted due to the nature of the sample matrix: HA-1 (180-66504-1), HA-2 (180-66504-2), HA-3 (180-66504-3), HA-4 (180-66504-4), and HA-1-DUP (180-66504-7). Elevated reporting limits (RLs) are provided.

Herbicides

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Qualifiers

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
F1	MS and/or MSD Recovery is outside acceptance limits.
F2	MS/MSD RPD exceeds control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation These commonly used abbreviations may or may not be present in this report.

¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Login Sample Receipt Checklist

Client: AECOM, Inc.

Job Number: 180-66504-1

Login Number: 66504

List Source: TestAmerica Pittsburgh

List Number: 1

Creator: Watson, Debbie

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Job ID: 180-66504-2

Laboratory: TestAmerica Pittsburgh

Narrative

Job Narrative 180-66504-2

Receipt

The samples were received on 5/19/2017 9:10 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.9° C.

The client requested CR3 and CR6 analyses after the initial report was sent.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Definitions/Glossary

Client: AECOM, Inc.
Project/Site: Ontario, California Soil Samples

TestAmerica Job ID: 180-66504-2

Qualifiers

General Chemistry

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A
