Converse Project No. 19-16-123-52

Ms. Hernandez,

Converse Consultants (Converse) is pleased to submit the attached report that summarizes the activities and the results of a Phase I Environmental Site Assessment (Phase I ESA) that was conducted at the referenced property currently used as a mixed use commercial building.

A summary of the assessment is presented in the Executive Summary, as well as in Sections 8.0, 9.0, and 10.0 of the report. Recognized Environmental Conditions were identified during this assessment and additional assessment appears warranted.

We appreciate the opportunity to be of service. Should you have any questions or comments regarding this report, please contact Laura Tanaka at (626) 930-1261 or Norman Eke at (626) 930-1260.

# Executive Summary

---

The following is an Executive Summary of the Phase I Environmental Site Assessment (Phase I ESA) that was conducted by Converse Consultants (Converse). Please refer to the appropriate sections of the report for a complete discussion of these issues. In the event of a conflict between this Executive Summary and the report, or an omission in the Executive Summary, the report shall prevail.

This report presents the results of the Converse Phase I ESA performed at 9155 and 9375 East Riverside Drive, Assessor Parcel Numbers (APNs) 0218-101-01, -02, -07, and -08, and 0218-102-10, and -11, in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by the City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical within the scope of an ESA, Recognized Environmental Conditions (RECs) in connection with the Subject Property.

Converse has compiled and reviewed information that was obtained from interviews, document research, and on-site and area reconnaissance to identify potential environmental conditions at the Subject Property in conformance with the ASTM Standard E: 1527-21 Environmental Site Assessment Standard Practice (ASTM Standard: E1527-21). This Phase I ESA was conducted during the period of January 26, 2023 to March 2, 2023.

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The identified staining in the vicinity of the two (2) diesel fuel ASTs adjacent to the concrete-bermed hazardous waste storage area.
- The presence of five (5) dairy ponds in the southern/southeastern portion of the Subject Property is considered a REC due to the potential for the accumulation of hazardous wastes including metals, pesticides, and other wastes from hazardous materials and/or pesticide use related to onsite dairy farming and agricultural fields.
- The current and historical agricultural fields located on the Subject Property are considered a REC due to the potential for pesticide use.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Per the ASTM Section 12.8, Additional Investigation, to detect the presence of hazardous materials and petroleum products, it is our opinion that no further investigation is warranted to detect hazardous materials or petroleum products within the context of this Phase I ESA; however, the following Phase II recommendations have been made:

- Soil sampling in the vicinity of identified stained soil adjacent to ASTs in the hazardous materials storage area, in the locations of dairy waste ponds, and in areas of the Subject Property where current agricultural fields are present.
- Methane sampling across areas of the Subject Property where dairy waste ponds and cow pens were identified.

Prior to any planned redevelopment of the Subject Property, the two (2) drinking water wells will need to be abandoned in accordance with applicable regulations.

Business Environmental Risks (BERs) or non-scope items are discussed in Section 11.0 of the report.

Report Section		NFA	REC	CREC	HREC	OEC	Recommended Action/Comments

7.0	Interviews		X				The Subject Property owner stated that septic systems are located on the Subject Property. Information regarding the number and locations of the septic tanks were not provided by the Subject Property owner.

# 1.0 Introduction

---

## 1.1 Purpose and Scope of Services

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at 9155 and 9375 East Riverside Drive, APNs: 0218-101-01, -02, -07, and -08, and 0218-102-10, -11 in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical, Recognized Environmental Conditions (RECs) in connection with the Property. The term Recognized Environmental Conditions is defined in Section 1.1.1 of the American Society of Testing and Materials (ASTM) Standard Practice as the presence or likely presence of any hazardous substances or petroleum products in, at or on a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

This Phase I ESA was completed in accordance with our proposal dated January 26, 2023. Our work consisted of the following and was completed in general conformance with the scope and limitations of the ASTM Practice E1527-21 and complies with standards and practices set forth in 40 Code of Federal Regulations (CFR) Part 312 for AAI.

- Interviews with the Subject Property owner representatives
- Property and vicinity reconnaissance
- Review of regulatory agency records
- Description of physical setting
- Historical review
- Interviews with public agency personnel
- Preparation of this report

## 1.2 Non-Scope Considerations

There are a number of non-scope issues which are sometimes assessed concurrently with a Phase I ESA. Unless specifically agreed in the contract proposal documents, these non-scope considerations are not included as part of the Phase I ESA. Examples of non-scope issues include:

- Asbestos-containing Building Materials unrelated to release into the environment
- Biological Agent
- Cultural & Historic Resources
- Diffuse Anthropogenic Pollution
- Ecological Resources
- Endangered Species
- Health & Safety
- Indoor Air Quality unrelated to release of hazardous substances or petroleum products in the environment
- Industrial Hygiene
- Lead-based Paint unrelated to releases in the environment
- Lead in Drinking Water
- Mold or microbial growth conditions
- PCB-containing building materials (for example, interior fluorescent light ballasts, paint, and caulk)
- Polyfluoroalkyl Substances
- Naturally-occurring Radon
- Regulatory Compliance

- Substances not defined as hazardous substances unless or until such substances are classified as CERCLA hazardous substances.
- Wetlands

No Non-Scope issues were addressed in this report.

### **1.3 Significant Assumptions**

No assumptions were made for this assessment that need to be noted as significant.

### **1.4 Limitations and Expectations**

The following limiting conditions were encountered:

- Converse was not able to access the cow pens due to safety concerns, therefore, visual inspection of these areas was limited to observation from fence lines surrounding the cow pens.
- Converse was not provided access to the residential buildings located on the Subject Property.

### **1.5 Special Terms and Conditions**

No special terms or conditions were identified by the User.

### **1.6 Reliance**

This report is for the sole benefit and exclusive use of City of Ontario in accordance with the terms and conditions under which these services have been provided. Its preparation has been in accordance with generally accepted environmental practices. No other warranty, either express or implied, is made. The Scope of Services associated with the report was designed solely in accordance with the objectives, schedule, budget, and risk-management preferences of City of Ontario.

This report should not be regarded as a guarantee that no further contamination, beyond that which could be detected within the scope of this assessment, is present at the Subject Property. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation of the property at the time of the assessment. Also, events may occur after the Subject Property visit, which may result in contamination of the Subject Property. Additional information, which was not found or available to Converse at the time of report preparation, may result in a modification of the conclusions and recommendations presented.

Any reliance on this report by Third Parties shall be at the Third Party's sole risk. Should City of Ontario wish to identify any additional relying parties not previously identified, a completed Application of Authorization to Use (see Appendix A of this report) must be submitted to Converse Consultants.

## ***1.7 Continued Viability***

This report has continued viability of 180 days from the following:

- **Interviews:** February 3, 2023
- **Review of Government Records:** February 6, 2023
- **Visual Inspection:** February 3, 2023
- **Declaration of Environmental Professional (EP):** March 2, 2023
- **Lien Search:** Not Applicable

## 2.0 Property Description

Item	Comment
Current Use(s) of the Property	<p>The Subject Property is owned by The Ronald and Kristine Pietersma Family Trust and is operated as Legend Dairy Farms, a dairy business.</p> <p>A Subject Property location map and a field generated Subject Property plan are provided in Appendix B. Pertinent Property photographs are provided in Appendix C.</p>
Location and Legal Description	<p>The Subject Property is located at 9155 to 9375 East Riverside Drive in the City of Ontario, California 91761. The Subject Property is located at the southwest corner of the intersection of E Riverside Drive and Ontario Avenue. The Subject Property is located approximately 0.75-miles south of State Route 60.</p> <p>The Subject Property consists of six (6) parcels and is approximately 115-acres. The San Bernardino County County Assessor's Parcel Numbers (APNs) for the Subject Property are 0218-101-01, -02, -07, and -08, and 0218-102-10, and -11.</p>
Zoning Information	<p>According to the City of Ontario, Planning Department, the Subject Property is zoned in a specific plan area identified as Armstrong Ranch.</p>
Property Characteristics	<p>The Subject Property consists of six (6) parcels totaling approximately 115-acres. The Subject Property slopes gradually from north to south. The northern and northeastern portions of the Subject Property are developed with three (3) occupied residential buildings, one (1) vacant residential building, one (1) milking barn, three (3) storage/warehouse buildings, and one (1) grain storage structure.</p> <p>The central portion of the Subject Property are occupied by cow pens with shade structures.</p> <p>The southern portion of the Subject Property is occupied by five (5) dairy waste ponds followed by a vacant area and stormwater berm.</p>

Item	Comment
	The southwestern portion of the Subject Property is developed with an agricultural field
Description of Property Structure(s)	<p>The residential structures, milk barn, and warehouse/storage structures are single-story, wood-framed structures, with stucco and/or corrugated metal exterior finishes. The grain silo is an open-air structure with corrugated metal roof. The cow pens consist of steel fencing, corrugated metal shade structures with steel supports.</p> <p>The five (5) dairy waste ponds are unlined and bermed.</p>

**The following services were present at the Property at the time of the assessment.**

Item	Comments
Electricity:	Southern California Edison
Gas:	The Gas Company
Potable Water:	Potable water is supplied by two (2) onsite private water wells. These wells will need to be abandoned in accordance with applicable regulations should the Subject Property be redeveloped.
Sanitary Sewer:	The Subject Property residences are each connected to septic tanks.
Heating, Ventilation, Air Conditioning (HVAC):	Window-mounted air conditioning units.
Solid Waste:	City of Ontario

## 3.0 User Provided Information & Responsibilities

---

### 3.1 Requested Documents and Information

The ASTM E1527-21 specifies that the User, City of Ontario, provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity Use Limitations (AULs)
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

No information/documentation was provided by City of Ontario.

### 3.2 User Provided Information

Section 6 of ASTM E1527-21 outlines specific User's responsibilities. This information will help identify the possibility of RECs in connection with the Subject Property. The ASTM Standard provides a questionnaire to help the User to comply with the statutory requirements to perform tasks which would help identify RECs. In general, any Users should make Converse aware of information they have regarding the following:

- Environmental Cleanup Liens filed or recorded against the Subject Property
- Activity and land use limitations that are in place on the Subject Property or have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the Legal Liability Protections (LLP)
- Relationship of the purchase price to fair market value of the Subject Property if it were not contaminated
- Commonly known or reasonably ascertainable information about the Subject Property
- The degree or obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect this contamination by appropriate investigation.

The following information was requested from the User, City of Ontario, Economic Development Agency.

### *3.2.1 Environmental Cleanup Liens*

The User provided no information regarding environmental cleanup liens or title records.

### *3.2.2 Activity and Use Limitations*

The User did not have any information indicating they were aware of any AULs.

### *3.2.3 Specialized Knowledge or Experience*

The User did not provide any information indicating they had specialized knowledge or experience related to the Subject Property or nearby property.

### *3.2.4 Reason for Significantly Lower Purchase Price*

Converse has no information regarding the purchase price of the Subject Property or comparable properties. The User has not indicated to Converse that there is any conclusion that there was a lower purchase price because of known or suspected contamination at the Subject Property.

### *3.2.5 Commonly Known or Reasonably Ascertainable Information*

The User did not have any information about past uses, specific chemicals at the Subject Property, past spills, environmental cleanup or other reasonably ascertainable information regarding the Subject Property.

### *3.2.6 Obviousness of Contamination*

The User did not have any information based on their knowledge or experience that would be obvious indicators of contamination on the Subject Property.

Unless specifically stated otherwise in the Scope of Services, the purpose of this Phase I ESA was to qualify for the landowner liability protections to CERCLA Liability as described in ASTM E1527-21.

Business risk unrelated to the CERCLA innocent landowners defense are only assessed as specifically agreed in the Scope of Services and discussed in Section 11.0, Additional Non-Scope Services, of this report.

## **3.3 Continuing Obligations**

In order to assert a LLP, the User must satisfy a number of statutory requirements that are generally referred to as Continuing Obligations, which are outside the Scope of Services of the Phase I ESA. Examples of Continuing Obligations include providing legally required notices, stopping continuing releases and complying with land use restrictions. Failure to comply with these and other statutory post-acquisition requirements will jeopardize liability protection.

It is the responsibility of the User to comply with the Continuing Obligations requirements of ASTM E1527-21 and AAI. Anyone seeking LLP protections should take independent action beyond this Phase I ESA to perfect their position.

## 4.0 Owner Provided Information

---

The ASTM E1527-21 specifies that the Subject Property owner and the Key Site Manager provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Subject Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Subject Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded AULs
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

The Subject Property owner representative, Mr. Ron Pietersma, had none of the requested documents or information.

## 5.0 Records Review

### 5.1 Physical Setting

Item	Comments
Physical Setting:	The Subject Property is located approximately 764 feet above mean sea level with surface topography sloping towards the south/southwest (United States Geological Survey [USGS] Topographic Map, Guasti, Corona North, Prado Dam, and Ontario, California, 2018).
Geology:	The Subject Property is underlain by Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast (Division of Mines and Geology, Geologic Map of California, 2010).
Groundwater:	Information regarding regional groundwater was researched on the RWQCB Geotracker website. According to the website, the closest site to the Subject Property with recent groundwater information is located approximately 0.5-mile east of the Subject Property. According to an October 2011 closure report for the site, groundwater is located at depths greater than 150-feet beneath ground surface (bgs) and flows in a southwesterly direction.
Potable Water Supply:	Potable water is supplied by two (2) onsite private water wells.

### 5.2 Historical Review

#### 5.2.1 Aerial Photograph and Map Review

Available historical aerial photographs and maps, which were provided by Environmental Data Resources (EDR), were reviewed. A summary of the review is provided in the following table. Copies of the aerial photographs and maps are provided in Appendix D.

Historical Summary			
Resource and Year	Property	Adjoining Properties	General Vicinity
1897 Topographic Map	The Subject Property is undeveloped.	The southeastern adjoining property appears developed with a single residential structure. The remaining adjoining properties are undeveloped.	The general vicinity is primarily a mix of undeveloped land with sporadic residential developments.

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>
1900 and 1903 Topographic Maps	A possible residential structure is depicted in the southeastern portion of the Subject Property. Four (4) roadways are depicted crossing the Subject Property. The remainder of the Subject Property is depicted as undeveloped.	Roadways have been constructed north, east, south, and west of the Subject Property. There are no additional significant identifiable changes in uses on the adjoining properties.	The general vicinity has been further developed with roadways and additional sporadic residential uses.
1938 Aerial Photograph  1941 and 1942 Topographic Maps	The northern and southwestern portions of the Subject Property are developed for agricultural use. The remainder of the Subject Property appears to be vacant. There are no roadways visible on the Subject Property.	Adjoining properties are typically developed for agricultural and residential uses.	The general vicinity is primarily developed for agricultural and residential uses.
1944 Topographic Map	Three (3) structures are depicted along the southwestern boundary of the Subject Property.	There are no significant identifiable changes in use on the adjoining properties.	The general vicinity is primarily developed for agricultural and residential uses.
1948 Aerial Photograph  1950 Topographic Map	The northeastern portion of the Subject Property is developed with several farm buildings likely associated with onsite agricultural operations. A single structure is depicted in the south-central portion of	There are no significant identifiable changes in uses on the adjoining properties.	The general vicinity is primarily developed for agricultural and residential uses.

Resource and Year	Property	Adjoining Properties	General Vicinity
	<p>the Subject Property. The remainder of the Subject Property appears developed for agricultural use. The three (3) structures depicted along the southwestern boundary of the Subject Property in the 1944 Topographic Map are no longer present.</p>		
<p>1953 Aerial Photograph  1954 Topographic Map</p>	<p>The single building located in the south-central portion of the Subject Property has been razed and a new building has been constructed slightly north of the former building. A single possible residential structure is visible along the southern Subject Property boundary in the southwestern portion of the Subject Property. No additional significant identifiable changes were observed.</p>	<p>There are no significant identifiable changes in uses on the adjoining properties.</p>	<p>The general vicinity is primarily developed for agricultural and residential uses.</p>
<p>1966 Aerial Photograph and Topographic Map  1973 Topographic Map</p>	<p>The northeastern portion of the Subject Property appears developed with livestock pens and associated farm</p>	<p>The northern and northeastern adjoining property appears to be developed with the existing golf course. There are no</p>	<p>The general vicinity is a mix of agricultural uses, farming operations, and residential uses.</p>

### 5.2.2 Building Permit Review

Available building permits were reviewed at the City of Ontario, Department of Building & Safety. A chronological summary is provided below.

#### 9155 East Riverside Drive

March 5, 2010 - A building permit was issued for the installation of one (1) 5,000-gallon potable water storage tank located adjacent to the main residential structure in the north central portion of the Subject Property, and connected to the existing private water well in the northeast corner of the Subject Property.

#### 9375 East Riverside Drive

April 19, 2010 - A building permit was issued for the installation of three (3) 5,000-gallon aboveground water tanks.

### 5.2.3 City Directories

A city directory search was completed on the Subject Property by EDR for the Subject Property addresses 9155 and 9375 East Riverside Drive. The Subject Property address 9375 E Riverside Drive was not listed in the city directory abstract. The complete city directory is provided in Appendix D, Historical Research.

The Subject Property was identified under the following listings in the directories published during the years indicated:

#### 9155 East Riverside Drive

The Subject Property was identified as being occupied by George Deboer in 1999 and 2009.

#### Adjoining Properties

13213 South Ontario Avenue (eastern adjoining) - The site was identified as being occupied by Golden West Farms in 1994 and 1999, Golden West Farms and Flo's Airport Cafe in 2004, Golden West Farms in 2008, 2009, and 2014, and residential listing and Golden West Farms in 2017.

8929 Chino Avenue (southern adjoining) - The site was identified as being occupied by Fred De Boer in 1975, Pacific Coast Dairy in 1980, 1990, 1994, 1995, 1999, and 2003, and by residential listings from 2004 to 2017.

The remaining adjoining properties were identified as residential listings since as early as 1970.

#### *5.2.4 Data Failure*

Historical information regarding the Subject Property indicated the Subject Property was undeveloped land as early as 1897. Therefore, no historical data failure occurred during this assessment.

#### *5.2.5 Summary of Historical Property Use*

As early as 1897, the Subject Property was undeveloped. By 1900, the Subject Property appeared to be partially developed for residential use. The Subject Property was further developed for agricultural uses by 1938. The northeastern portion of the Subject Property was developed with agricultural buildings by 1948, with smaller residential and/or farm out buildings constructed at various locations across the Subject Property in the 1940s and early 1950s. By 1966, the northeastern portion of the Subject Property was further developed with cow pens while the remainder of the Subject Property was utilized for agricultural use. By 1985, the northern portion of the Subject Property was further developed with additional cow pens. By 1994, three (3) potential dairy ponds or stormwater retention ponds were located in the southern portion of the Subject Property. By 2002, the three (3) possible dairy ponds/retention ponds are no longer present at the Subject Property. In 2006, possible retention and/or livestock waste ponds were visible in the central and southern portions of the Subject Property. By 2015, the Subject Property appeared in its current configuration with residential and dairy farming structures in the northern and northeastern portion of the Subject Property, cow pens in the central portion of the Subject Property, dairy ponds in the south central portion of the Subject Property, and agricultural fields in the southwestern portion of the Subject Property.

#### *5.2.6 Summary of Past Uses of Adjoining Properties*

As early as 1897, the adjoining properties appeared to be primarily undeveloped with sporadic residential developments. By 1938, the adjoining properties were further developed for agricultural uses. By 1966, adjoining properties to the north and northeast were developed with the existing golf course. By 1985, the remaining adjoining properties were primarily developed for agricultural and/or dairy farming uses, with sporadic residential structures observed on the properties. By 1989, the existing stormwater retention basin was visible on the southeastern adjoining property. The adjoining properties have remained in agricultural, residential, and/or golf course uses since the 1980s.

#### *5.2.7 Summary of Past Uses of the Surrounding Area*

The surrounding area was primarily a mix of undeveloped and/or residential uses as early as 1897. The area was further developed for agricultural uses beginning in the 1930s. Additional commercial developments were observed in the surrounding area beginning in the 1980s. The surrounding area has remained a mix of agricultural, residential, and commercial uses since the 1980s.

### 5.3 Results of Environmental Records Sources Review

An EDR report of Standard Environmental Record Sources (Records) was prepared specifically for the Subject Property. The search included queries to the following databases for cases within specified ASTM search distances. A copy of the database report is provided in Appendix E.

#### 5.3.1 Property Listings

The Subject Property address 9155 East Riverside Drive was identified on the following databases in the EDR report: The Subject Property address 9375 East Riverside Drive was not identified in the databases.

Property Listings	
<b>Site Name:</b>	FRED DE BOER
<b>Databases:</b>	HWTS, HAZNET
<b>Address:</b>	9155 E RIVERSIDE DR
<b>Comments:</b>	The Subject Property was identified in the databases for the generation of waste-oil and mixed oil in 2019.

<b>Site Name:</b>	MARQUEZ DAIRY-RIVERSIDE DRIVE
<b>Databases:</b>	HWTS, CERS
<b>Address:</b>	9155 E RIVERSIDE DR
<b>Comments:</b>	The Subject Property is listed in the databases as a chemical storage facility. Violations issued at the Subject Property include failure to properly manage/label empty hazardous waste containers, and failure to complete and submit hazardous materials inventory.

<b>Site Name:</b>	LEGEND DAIRY FARMS
<b>Databases:</b>	ENF, CIWQS, NPDES
<b>Address:</b>	9155 RIVERSIDE DRIVE
<b>Comments:</b>	The site is listed in the databases as Legend Dairy Farms. The site is listed as having an active NPDES permit.

<b>Site Name:</b>	MARQUEZ DAIRY - RIVERSIDE
<b>Databases:</b>	CERS
<b>Address:</b>	9155 RIVERSIDE
<b>Comments:</b>	The site is listed in the database for violations. Violations were not described in the database.

<b>Site Name:</b>	MARQUEZ DAIRY LLC
<b>Databases:</b>	EMI, San Bern. Co. Permit, CERS, CIWQS, NPDES
<b>Address:</b>	9155 E RIVERSIDE DR
<b>Comments:</b>	The Subject Property is listed in the databases for various emissions from 2006 through 2012. The site is listed as having an active NPDES permit. The site is listed as inactive in the San Bern. Co. Permit database.

### 5.3.2 Adjoining Properties

The following adjoining properties were identified in the EDR report:

<b>Adjoining Properties</b>	
<b>Site Name:</b>	EDMUNDO SANCHEZ
<b>Databases:</b>	CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST
<b>Address:</b>	13115 ONTARIO AVE
<b>Distance:</b>	48
<b>Direction:</b>	ENE
<b>Elevation:</b>	Higher
<b>Comments:</b>	The site is listed in the databases for the operation of one (1) 550-gallon diesel fuel UST.

<b>Site Name:</b>	GH #5
<b>Databases:</b>	ENF, CERS, CIWQS, San Bern. Co. Permit
<b>Address:</b>	8929 CHINO AVE
<b>Distance:</b>	90
<b>Direction:</b>	SSW
<b>Elevation:</b>	Lower
<b>Comments:</b>	The southern adjoining dairy farm is listed in the databases as an active handler of hazardous wastes as of November 2022. The dairy is listed in the database as an enrollee in the NPDES permit program. Violations issued at the site included failure to manage empty containers greater than 5-gallons in capacity that previously held hazardous material/waste, failure to electronically update business plan, failure to update hazardous material inventory within 30 days, failure to manage contaminated containers, and failure to annually review and electronically certify that the business plan is complete. Violations appeared to have been returned to compliance.

<b>Site Name:</b>	J & B DAIRY
<b>Databases:</b>	San Bern. Co. Permit
<b>Address:</b>	9309 E RIVERSIDE DR
<b>Distance:</b>	118
<b>Direction:</b>	Northeast
<b>Elevation:</b>	Higher
<b>Comments:</b>	The site is listed in the database as an inactive hazardous waste generator as of 2007.

<b>Site Name:</b>	EDMUNDO SANCHEZ
<b>Databases:</b>	HIST UST
<b>Address:</b>	13115 S ONTARIO AVE
<b>Distance:</b>	379
<b>Direction:</b>	East
<b>Elevation:</b>	Higher
<b>Comments:</b>	The site is listed in the database for the operation of one (1) 550-gallon diesel fuel UST installed in 1974.

<b>Site Name:</b>	AG-SANCHEZ, EDMUNDO
<b>Databases:</b>	UST
<b>Address:</b>	13115 S ONTARIO AVE
<b>Distance:</b>	379
<b>Direction:</b>	East
<b>Elevation:</b>	Higher
<b>Comments:</b>	The site is listed in the database; however, no UST related information was provided.

### 5.3.3 Other Off-site Locations of Concern

Other off-site locations of concern identified by EDR within a maximum one-mile radius from the Subject Property included registered UST sites, hazardous waste generators, permitted hazardous materials handlers, ENVIROSTOR sites, and SWF/LF sites.

The potential for environmental concern to the Subject Property from these off-site locations appears to be low due to one or more of the following: type of regulatory listing; type of resource (soil) affected; distance from the Subject Property; status of the case; and/or potential responsible parties have been identified.

### 5.3.4 Orphan Listings

The EDR database report identified four (4) orphan listings. The locations of sites that were identified by address were found to be in the general vicinity of the Subject Property; however, due to distance were determined to have a low potential for environmental concern to the Subject Property.

Other orphan sites were identified only by street name. These street names were found in the general vicinity of the Subject Property; however, the specific site locations could not be determined. These orphan sites appeared to have a low potential for environmental impact to the Subject Property due to one or more of the following: type of regulatory listing; estimated distance from the Subject Property; and/or potential responsible parties have been identified.

## 5.4 Additional Environmental Record Sources

Requests for information or review of online databases were completed for the following regulatory agencies.

Converse submitted records requests for the six (6) APNs associated with the Subject Property parcels, as well as for the Subject Property addresses of 9155 and 9375 East Riverside Drive.

### Federal Agencies

Source	Comments
U.S. Department of Transportation, Pipeline and Hazardous Material Safety Administration (PHMSA)	The PHMSA online mapping system for gas transmission pipelines and hazardous liquid pipelines on the Subject Property or adjacent properties was reviewed ( <a href="https://www.npms.phmsa.dot.gov/PublicViewer/">https://www.npms.phmsa.dot.gov/PublicViewer/</a> ). No pipelines were identified on or adjoining the Subject Property.

### State Agencies

Source	Comments
California Environmental Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC)	No information regarding the Property was on file with DTSC. The Envirostor website ( <a href="http://www.envirostor.dtsc.ca.gov/public/">http://www.envirostor.dtsc.ca.gov/public/</a> ) was reviewed for information, and the Property was not listed in the database.
Cal/EPA, Regional Water Quality Control Board (RWQCB)	The RWQCB had no records on file regarding 9375 East Riverside Drive.  The RWQCB provided dozens of records pertaining to 9155 East Riverside Drive. The records included Annual Reports of Animal Waste

Source	Comments
	<p>Discharge (ARAWD) from as early as 1979 through the present. Various inspection reports from as early as 1979 through 2021 were also provided. Inspection reports noted the Subject Property as being occupied by Fred De Boer dairy from as early as 1979 to 2006, Marquez Dairy from 2007 to 2016 and Legend Dairy since that time. Violations issued at the Subject Property generally occurred during the period of time the Subject Property was occupied by Fred De Boer Dairy. Violations included discharge of manured water onto the surrounding streets, failure to submit ARAWDs, and failure to implement required repairs to dikes preventing manured water discharge. No items of environmental concern were noted.</p> <p>The Geotracker website (<a href="http://geotracker.waterboards.ca.gov/">http://geotracker.waterboards.ca.gov/</a>) was reviewed for information, and the Subject Property was not listed in the database.</p>
<p>California Department of Conservation, California Department of Conservation (DOC), Geologic Energy Management Division (CalGEM)</p>	<p>Converse reviewed the DOC CalGEM Online Well Finder (<a href="https://www.conservation.ca.gov/calgem/Pages/Wellfinder.aspx">https://www.conservation.ca.gov/calgem/Pages/Wellfinder.aspx</a>). According to the website, no oil or gas wells are located on the Subject Property or in the general vicinity of the Subject Property.</p>

### Local Agencies

Source	Comments
<p>South Coast Air Quality Management District (SCAQMD)</p>	<p>There were no agency records pertaining to the Subject Property on file with this agency.</p>
<p>San Bernardino County Fire Department, Certified Unified Program Agency (CUPA)</p>	<p>The following records were provided by the San Bernardino County Fire Department:</p> <p>April/May 2007 - Hazardous Waste Generator and Hazardous Materials Handler Inspection Reports. The report indicated the presence of one (1) 1,000-gallon diesel fuel AST, two (2) 350 pound bulk containers of corrosive powder cleaner, and six (6) 55-gallon drums of Dairy Du (sodium hypochlorite). No other reportable hazardous materials were noted on site. Vehicle servicing was reportedly conducted off site.</p>

Source	Comments
	<p>May 1, 2007 - CUPA Annual Permit for Marquez Dairy #2 indicating facility is a hazardous material handler.</p> <p>July 9, 2007 - Permit Information Fact Sheet. Sheet indicates there are no "active" USTs at the Subject Property.</p> <p>May 1, 2011 - CUPA Annual Permit for Marquez Dairy #2 indicating facility is a hazardous material handler and special generator.</p> <p>May 1, 2012 - CUPA Annual Permit for Marquez Dairy #2 indicating facility is a hazardous material handler and special generator.</p> <p>January 2, 2013 - Closure file for Marquez Dairy #2. Business is listed as no longer operating.</p> <p>February 7, 2013 - Closure Inspection Report. Report notes that all fuel tanks and chemicals have been removed.</p> <p>November 17, 2022 - CUPA Compliance Inspection Report. Report identifies tenant as Legend Dairy Farms #1. Hazardous materials identified during the inspection included two (2) 55-gallon drums of acid sanitizer, three (3) 55-gallon drums of teat post drip, one (1) 275-gallon tote of teat pre drip, and one (1) 55-gallon drum of teat pre drip. Violation issued for failure to submit complete and accurate hazardous material inventory information, failure to manage empty containers greater than 5-gallons that previously held hazardous materials/waste,</p>

Source	Comments
Methane	<p data-bbox="596 210 1456 373">According to the CalRecycle SWIS website (<a href="https://www2.calrecycle.ca.gov/SolidWaste/Site/Search">https://www2.calrecycle.ca.gov/SolidWaste/Site/Search</a>), a solid waste site is located approximately 0.12-miles south of the Subject Property at 13434 South Ontario Avenue.</p> <p data-bbox="596 436 1456 510">In addition, dairy waste ponds are located on the Subject Property, which present a potential methane concern.</p> <p data-bbox="596 573 1456 646">The address is located within the City of Ontario and is therefore subject to the City's methane code.</p>

## 6.0 Property Reconnaissance

### 6.1 Methodology

On February 3, 2023 Converse visited the Subject Property to evaluate present use and to identify observable environmental conditions at the Subject Property. Our methodology involved walking the perimeters, center lines, and accessible interior areas of the buildings while noting observed evidence of present and potential environmental concerns.

A field-generated map is provided in Appendix B. Pertinent Property photographs are provided in Appendix C.

### 6.2 Limiting Conditions

Converse's findings are based on the Subject Property conditions observed on Friday, February 3, 2023.

The following limiting conditions were encountered:

- Converse was not able to access the cow pens due to safety concerns, therefore, visual inspection of these areas was limited to observation from fence lines surrounding the cow pens.
- Converse was not provided access to the residential buildings located on the Subject Property.

### 6.3 Interior Observations of Property

During our Subject Property visit, Converse made the following observations of the interior of the Subject Property's building(s):

Interior Observations of Property		
Item or Condition	Observed Evidence?	Comments
Hazardous Substances & Petroleum Products:	Yes	Individual fuel containers (less than or equal to 5-gallons) were observed in the maintenance barn. No leaking or staining was observed.
Storage Tanks & Related Equipment:	No	
Odors:	No	
Indoor Air Quality release of hazardous substances or petroleum products	No	
Standing Surface Water or Other Pools of Liquid:	No	

Item or Condition	Observed Evidence?	Comments
Drums & Other Containers of Hazardous Substances, Petroleum Products, or Other Unidentified Contents:	Yes	See above.
Transformers or Equipment containing Polychlorinated Biphenyls (PCBs):	No	
Heating/Cooling System:	Yes	Window-mounted HVAC units were observed on the residential structures.
Stains or Corrosion on Floors, Walls, or Ceilings:	No	
Drains and Sumps:	No	

#### 6.4 Exterior Observations of Property

During our Property visit, Converse made the following observations of the exterior of the Property:

Exterior Observations		
Item or Condition	Observed Evidence?	Comments
Hazardous Substances & Petroleum Products:	Yes	<p>Two (2) 500-gallon diesel-fuel ASTs were observed on elevated racks adjacent to the concrete-bermed hazardous materials area in the northeastern portion of the Subject Property. Staining was observed on the ground beneath both of the ASTs.</p> <p>Two (2) additional approximate 500-gallon ASTs of unknown content, on elevated racks, were observed within the hazardous materials area. Two (2) approximate 250-gallon ASTs appearing to be for waste-oil were observed within the hazardous materials area. Three (3) 55-gallon drums of unknown content were also observed in the hazardous materials storage area. Converse noted that the hazardous materials storage area had approximately 1-foot of standing water likely from recent rains.</p>

Item or Condition	Observed Evidence?	Comments
Storage Tanks & Related Equipment:	Yes	See above.
Odors:	No	
Standing Surface Water or Other Pools of Liquid:	Yes	Approximately 1-foot of standing water likely from recent rains was observed in the hazardous materials storage area.
Drums & Other Containers of Hazardous Substances, Petroleum Products, or Other Unidentified Contents:	Yes	See above.
Transformers or Equipment containing Polychlorinated Biphenyls (PCBs):	No	
Pits, Ponds, or Lagoons:	Yes	Five (5) dairy waste ponds were observed in the southeastern portion of the Subject Property.
Stained Soil or Pavement:	Yes	Stained soil was observed beneath the two (2) 500-gallon diesel fuel ASTs observed adjacent to the hazardous waste storage area.
Stressed Vegetation (other than from insufficient water):	No	
Evidence of Mounds, Depressions or Filled or Graded Areas Suggesting Trash or Other Solid Waste Disposal:	No	
Waste Water or any discharge (including storm water) into a Drain, Ditch, or Stream on or Adjacent to the Property:	Yes	Five (5) dairy waste ponds were observed in the southeastern portion of the Subject Property.
Wells (active, inactive, or abandoned):	Yes	Two (2) private drinking water wells were observed in the northeastern portion of the Subject Property.
Septic Systems or Cesspools:	No	No septic systems were observed; however, the Subject Property owner indicated that each of the residential buildings located on the Subject Property was connected to a septic system.

Item or Condition	Observed Evidence?	Comments
Prior Structures:	No	
Roads, Tracks, Railroad Tracks or Spurs:	Yes	The Subject Property fronts onto East Riverside Drive to the north, Ontario Avenue to the east, and Chino Avenue to the south.
Suspect Asbestos containing Building Materials released into the environment	No	
Suspect Lead-based Paint released into the environment	No	
Suspect PCB Caulk, Paint or Ballasts released into the environment	No	

In addition to the above, the following items were also noted:

Agricultural fields were observed in the southern and southwestern portions of the Subject Property.

### **6.5 Current Uses of Adjoining Properties**

Based on our research and observations during our Subject Property visit, the Subject Property is bordered by the following:

Adjoining Property Use	
Direction	Current Development
North	East Riverside Drive followed by Whispering Lakes Golf Club (2525 E Riverside Drive).
Northeast	East Riverside Drive followed by Whispering Lakes Golf Club (2525 E Riverside Drive).
Northwest	East Riverside Drive followed by Sunrise Children's Center (2049 E Riverside Drive).
South	Chino Avenue followed by Dairy Farm and Residential Farm.
Southeast	Intersection of Ontario Avenue and Chino Avenue followed by stormwater basin.
Southwest	Chino Avenue followed by dairy farm.
East	Ontario Avenue followed by nursery, truck storage lot, and residential farm.
West	Agricultural fields.

## **6.6 Current Uses of Surrounding Area**

Based on our research and observations during our Subject Property visit, the surrounding area of the Subject Property consists of agricultural fields/residential farms, dairy farms, residential, and commercial developments.

## 7.0 Interviews

---

During the interviews, the owners and occupants were asked if they had any available documents that would be helpful. The documents that were requested are detailed in Section 4.0 of this report:

Interview:	Comments:
Property Owner:	According to Mr. Ron Pietersma, Subject Property owner, the Subject Property is an active dairy farm serviced by two (2) private drinking water wells. Mr. Pietersma stated that minor quantities of hazardous materials were used on site and stored in the northeastern portion of the Subject Property. Mr. Pietersma stated that, to the best of his knowledge, there were no USTs currently or historically operated at the Subject Property. In subsequent conversations, Mr. Pietersma stated that each of the residences located on the Subject Property was connected to a septic system. Mr. Pietersma did not respond to requests for additional information related to the nature/quantity of septic tanks on site.
Tenant/ Occupant:	The Subject Property is owner-occupied. See above.
State or Local Government Officials:	Other than the information provided in Section 5.4, no other information was provided by a government official.
Owners and Occupants of Neighboring Sites:	No interviews of owners or occupants of neighboring sites were conducted.

## 8.0 Findings & Opinions

---

A cursory summary of findings is provided below. However, details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

The Subject Property is owned by The Ronald and Kristine Pietersma Family Trust and is operated as Legend Dairy Farms, a dairy business.

As early as 1897, the Subject Property was undeveloped. By 1900, the Subject Property appeared to be partially developed for residential use. The Subject Property was further developed for agricultural uses by 1938. The northeastern portion of the Subject Property was developed with agricultural buildings by 1948, with smaller residential and/or farm out buildings constructed at various locations across the Subject Property in the 1940s and early 1950s. By 1966, the northeastern portion of the Subject Property was further developed with cow pens while the remainder of the Subject Property was utilized for agricultural use. By 1985, the northern portion of the Subject Property was further developed with additional cow pens. By 1994, three (3) potential dairy ponds or stormwater retention ponds were located in the southern portion of the Subject Property. By 2002, the three (3) possible dairy ponds/retention ponds are no longer present at the Subject Property. In 2006, possible retention and/or livestock waste ponds were visible in the central and southern portions of the Subject Property. By 2015, the Subject Property appeared in its current configuration with residential and dairy farming structures in the northern and northeastern portion of the Subject Property, cow pens in the central portion of the Subject Property, dairy ponds in the south central portion of the Subject Property, and agricultural fields in the southwestern portion of the Subject Property.

The following items were observed during the Subject Property reconnaissance:

- Individual fuel containers (less than or equal to 5-gallons) were observed in the maintenance barn. No leaking or staining was observed.
- Two (2) 500-gallon diesel-fuel ASTs were observed on elevated racks adjacent to the concrete-bermed hazardous materials area in the northeastern portion of the Subject Property. Staining was observed on the ground beneath both of the ASTs.
- Two (2) additional approximate 500-gallon ASTs of unknown content, on elevated racks, were observed within the hazardous materials area.
- Two (2) approximate 250-gallon ASTs appearing to be for waste-oil were observed within the hazardous materials area.
- Three (3) 55-gallon drums of unknown content were also observed in the hazardous materials storage area.
- Converse noted that the hazardous materials storage area had approximately 1-foot of standing water likely from recent rains.
- Five (5) dairy waste ponds were observed in the southeastern portion of the Subject Property.
- Two (2) private drinking water wells were observed in the northeastern portion of the Subject Property.

No septic systems were observed; however, the Subject Property owner indicated that each of the residential buildings located on the Subject Property was connected to a septic system.

San Bernardino County Fire Department Records indicated permits from as early as 2007 indicating dairy farm operations on the Subject Property. Records indicated that no USTs were permitted at the Subject Property since as early as 2007. Inspection records indicated the presence of minor quantities of hazardous wastes, including the operation of one (1) 1,000-gallon diesel fuel AST. No records suggesting any unauthorized releases were identified.

The Subject Property was identified in the HWTS, HAZNET, CERS, ENF, CIWQS, NPDES, EMI, and San Bern. Co. Permit databases in the regulatory database report for the generation of minor quantities of hazardous wastes, minor violations, various emissions, and for having an active NPDES permit.

The following adjoining properties were identified in the regulatory database report:

- 13115 Ontario Avenue - The site is located east of the Subject Property and was identified in the CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST, and UST databases for the operation of one (1) 550-gallon diesel fuel UST.
- 8929 Chino Avenue - The site is located south/southwest of the Subject Property and was identified in the ENF, CERS, CIWQS, and San Bern. Co. Permit databases. The site was issued minor violations, and was identified as having a NPDES permit.
- 9309 East Riverside Drive - The site is located east of the Subject Property. The site is located in the San Bern. Co. Permit database for the generation of hazardous wastes in 2007.

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The identified staining in the vicinity of the two (2) diesel fuel ASTs adjacent to the concrete-bermed hazardous waste storage area.
- The presence of five (5) dairy ponds in the southern/southeastern portion of the Subject Property is considered a REC due to the potential for the accumulation of hazardous wastes including metals, pesticides, and other wastes from hazardous materials and/or pesticide use related to onsite dairy farming and agricultural fields.
- The current and historical agricultural fields located on the Subject Property are considered a REC due to the potential for pesticide use.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** No significant data gap affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Per the ASTM Section 12.8, Additional Investigation, to detect the presence of hazardous materials and petroleum products, it is our opinion that no further investigation is warranted to detect hazardous materials or petroleum products within the context of this Phase I ESA; however, a Phase II recommendation has been made.

## 9.0 Conclusions & Recommendations

---

Converse has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-21 for 9155 and 9375 East Riverside Drive, APNs: 0218-101-01, -02, -07, and -08, and 0218-102-10, and -11, in the City of Ontario, San Bernardino County, California. Any exceptions to, or deletions from, this practice are described in the Limitations and Exceptions of Assessment section of this report. This assessment has revealed the following *recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps* in connection with the Subject Property:

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The identified staining in the vicinity of the two (2) diesel fuel ASTs adjacent to the concrete-bermed hazardous waste storage area.
- The presence of five (5) dairy ponds in the southern/southeastern portion of the Subject Property is considered a REC due to the potential for the accumulation of hazardous wastes including metals, pesticides, and other wastes from hazardous materials and/or pesticide use related to onsite dairy farming and agricultural fields.
- The current and historical agricultural fields located on the Subject Property are considered a REC due to the potential for pesticide use.

Based on the findings, additional assessment appears warranted and should include the following:

- Soil sampling in the vicinity of identified stained soil adjacent to ASTs in the hazardous materials storage area, in the locations of dairy waste ponds, and in areas of the Subject Property where current agricultural fields are present.
- Methane sampling across areas of the Subject Property where dairy waste ponds and cow pens were identified.

## 10.0 Deviations & Limitations

---

The following limiting conditions were encountered:

- Converse was not able to access the cow pens due to safety concerns, therefore, visual inspection of these areas was limited to observation from fence lines surrounding the cow pens.
- Converse was not provided access to the residential buildings located on the Subject Property.

## 11.0 Additional Non-Scope Services

---

There are environmental issues outside the scope of the ASTM E1527-21 that can be assessed in connection with a commercial real estate transaction. These are dealt with as non-scope considerations since they do not typically present a Superfund Liability. The specific level of inquiry (if any) is defined in the Proposal which contains a Scope of Work. These non-scope services are very client specific and not covered by the ASTM standard. They are frequently related to the business environmental risk which is defined in the standard as "risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate".

No non-scope issues were addressed during this assessment.

## 12.0 Signature of Environmental Professional

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in A§312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Norman S. Eke - Senior Vice President/Managing Officer

This Phase I ESA was completed by the above Environmental Professional. A complete list of preparers, and their responsibilities for this assessment, is provided in the following section (Section 13.0, List of Preparers).

## 13.0 List of Preparers

---

### **Norman S. Eke**

Senior Vice President

B.A., Liberal Studies, Environmental Studies Emphasis, University of California, Santa Barbara, 1988.

Cal/OSHA Certified Asbestos Consultant, #96-2093

NIOSH 582 Equivalent Training

Senior Vice President and Managing Officer of Converse's California Environmental offices. Mr. Eke has served as the Principal-in-Charge and Contract Administrator to deliver services to our public agency and private clients. Mr. Eke has 33 years of experience in the fields of Environmental Due Diligence including Phase I and Phase II Environmental Site Assessments, Asbestos surveys/specifications/abatement monitoring, Preliminary Endangerment Assessments and associated Supplemental Site Investigations and Removal Action Work Plans/Implementation, various forms of Remediation, Human Health Risk Assessment and Indoor Air Quality. Mr. Eke is a former Subcommittee Chairman for E.50-02 Real Assessment and Management of the ASTM E.50 Committee on Environmental Assessment, Risk Management, Corrective Action, which includes Phase I ESA standards.

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, and Report Review.

### **Spencer Wagner**

Senior Staff Environmental Scientist

B.A., Environmental Science and Policy, California State University, Long Beach, 2006

B.A., Geography, California State University, Long Beach, 2006

Certified Wood Destroying Organism (WDO) Inspector

Mr. Wagner has over 15 years' experience conducting Phase I and II Environmental Site Assessments throughout California. Mr. Wagner has completed Phase I ESAs on undeveloped land, residential properties, commercial/retail facilities, industrial facilities, and school sites. His Phase II ESA experience includes collection of soil matrix, soil vapor, indoor air and groundwater samples. Phase II projects worked on have included residential properties, commercial warehousing sites, school sites, dry cleaning facilities, automotive service sites, metal plating facilities and multi-tenant commercial properties

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, Historical Research, Regulatory Agency Interaction, Property Reconnaissance, Interviews, and Report Generation.

## 15.0 List of Acronyms

---

The following is a list of acronyms that may have been noted in the report. This is not an all inclusive list and may include acronyms that are not found in your report but are commonly utilized in environmental assessments. Additional acronyms pertaining to regulatory agency documents/listings can be found in the regulatory database report, which is provided as an appendix to this report.

**AAI** - All Appropriate Inquiries

**ACM** - Asbestos-containing Material

**APN** - Assessor's Parcel Number

**APCD** - Air Pollution Control District

**AQMD** - Air Quality Management District

**AST** - Aboveground Storage Tank

**ASTM** - American Society of Testing and Materials

**AUL** - Activity Use Limitation

**BER** - Business Environmental Risk

**BTEX** - Benzene, Toluene, Ethylbenzene, and Xylenes

**Cal/EPA** - California Environmental Protection Agency

**CalGEM** - (California Department of Conservation), Geologic Energy Management Division

**CERCLA** - Comprehensive Environmental Response, Compensation and Liability Act

**CFR** - Code of Federal Regulations

**CREC** - Controlled Recognized Environmental Condition Recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

**CUPA** - Certified Unified Protection Agencies

**de minimis condition** - A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a REC nor a CREC.

**DOC** - (California) Department of Conservation

**DPW** - (Los Angeles County) Department of Public Works

**DTSC** - Department of Toxic Substances Control

**DWP** - (City of Los Angeles) Department of Water and Power

**EDR** - Environmental Data Resources

**EHD** - Environmental Health Department

**EP** - Environmental Professional

**EPA** - United States Environmental Protection Agency

**ESA** - Environmental Site Assessment

**ERIS** - Environmental Risk Information Systems

**(x)FD** - (City/County)Fire Department

**HMS** - Hazardous Material Site

**HREC** - Historic Recognized Environmental Condition: A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

**HVAC** - Heating, Ventilation, Air Conditioning

**IAQ** - Indoor Air Quality

**LACSD** -Los Angeles County Sanitation Districts

**LBP** - Lead-based Paint

**LLP** - Landowner Liability Protections

**LQG** - Large Quantity Generator

**LUST** - Leaking Underground Storage Tank

**mg/kg** - milligram per kilogram

**mg/L** - milligram per Liter

**MSL** - Mean Sea Level

**MTBE** - Methyl Tertiary Butyl Ether

**ND** - None Detected

**NFA** - No Further Action

**NOV** - Notice of Violation

**OEC** - Other Potential Environmental Concerns

**PEC** - Potential Environmental Concern

**PFAS** - Perfluoroalkyl and Polyfluoroalkyl Substances

**PHMSA** - US Department of Transportation, Pipeline and Hazardous Materials Safety Administration

**PCB** - Polychlorinated biphenyls

**PCE** - Perchloroethylene or Tetrachloroethylene

**pCi/L** - picoCuries per Liter

**ppb** - parts per billion

**ppm** - parts per million

**PRP** - Potential Responsible Party

**RCRA** - Resources Conservation and Recovery Act

**REC** - Recognized Environmental Condition; (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

**RP** - Responsible Party

**RWQCB** - Regional Water Quality Control Board

**SCAQMD** - South Coast Air Quality Management District

**SDS** - Safety Data Sheets

**SQG** - Small Quantity Generator

**SVOC** - Semi-volatile Organic Compound

**TCE** - Trichloroethylene or Trichloroethene

**TPH** Total Petroleum Hydrocarbons

**µg/L** - micrograms per Liter

**USGS** - United States Geological Survey

**UST** - Underground Storage Tank

**VCP** - Voluntary Cleanup Program

**VOCs** - Volatile Organic Compounds

**Appendix A -  
Application for Authorization to Use**

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Converse Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Converse Consultants (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal NPL (Superfund) sites***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing  
SEMS..... Superfund Enterprise Management System

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS..... Corrective Action Report

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

### ***Lists of Federal RCRA generators***

RCRA-LQG..... RCRA - Large Quantity Generators  
RCRA-SQG..... RCRA - Small Quantity Generators  
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

## EXECUTIVE SUMMARY

US ENG CONTROLS..... Engineering Controls Sites List  
US INST CONTROLS..... Institutional Controls Sites List

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

### ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE..... State Response Sites

### ***Lists of state and tribal leaking storage tanks***

LUST..... Geotracker's Leaking Underground Fuel Tank Report  
INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

### ***Lists of state and tribal registered storage tanks***

FEMA UST..... Underground Storage Tank Listing  
INDIAN UST..... Underground Storage Tanks on Indian Land

### ***Lists of state and tribal voluntary cleanup sites***

INDIAN VCP..... Voluntary Cleanup Priority Listing

### ***Lists of state and tribal brownfield sites***

BROWNFIELDS..... Considered Brownfields Sites Listing

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

US BROWNFIELDS..... A Listing of Brownfields Sites

### ***Local Lists of Landfill / Solid Waste Disposal Sites***

WMUDS/SWAT..... Waste Management Unit Database  
SWRCY..... Recycler Database  
HAULERS..... Registered Waste Tire Haulers Listing  
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands  
ODI..... Open Dump Inventory  
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations  
IHS OPEN DUMPS..... Open Dumps on Indian Land

### ***Local Lists of Hazardous waste / Contaminated Sites***

US HIST CDL..... Delisted National Clandestine Laboratory Register  
HIST Cal-Sites..... Historical Calsites Database  
SCH..... School Property Evaluation Program  
CDL..... Clandestine Drug Labs  
Toxic Pits..... Toxic Pits Cleanup Act Sites  
US CDL..... National Clandestine Laboratory Register

### ***Local Land Records***

LIENS..... Environmental Liens Listing

## EXECUTIVE SUMMARY

LIENS 2 ..... CERCLA Lien Information  
DEED ..... Deed Restriction Listing

### **Records of Emergency Release Reports**

HMIRS ..... Hazardous Materials Information Reporting System  
CHMIRS ..... California Hazardous Material Incident Report System  
LDS ..... Land Disposal Sites Listing  
MCS ..... Military Cleanup Sites Listing  
SPILLS 90 ..... SPILLS 90 data from FirstSearch

### **Other Ascertainable Records**

FUDS ..... Formerly Used Defense Sites  
DOD ..... Department of Defense Sites  
SCRD DRYCLEANERS ..... State Coalition for Remediation of Drycleaners Listing  
US FIN ASSUR ..... Financial Assurance Information  
EPA WATCH LIST ..... EPA WATCH LIST  
2020 COR ACTION ..... 2020 Corrective Action Program List  
TSCA ..... Toxic Substances Control Act  
TRIS ..... Toxic Chemical Release Inventory System  
SSTS ..... Section 7 Tracking Systems  
ROD ..... Records Of Decision  
RMP ..... Risk Management Plans  
RAATS ..... RCRA Administrative Action Tracking System  
PRP ..... Potentially Responsible Parties  
PADS ..... PCB Activity Database System  
ICIS ..... Integrated Compliance Information System  
FTTS ..... FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)  
MLTS ..... Material Licensing Tracking System  
COAL ASH DOE ..... Steam-Electric Plant Operation Data  
COAL ASH EPA ..... Coal Combustion Residues Surface Impoundments List  
PCB TRANSFORMER ..... PCB Transformer Registration Database  
RADINFO ..... Radiation Information Database  
HIST FTTS ..... FIFRA/TSCA Tracking System Administrative Case Listing  
DOT OPS ..... Incident and Accident Data  
CONSENT ..... Superfund (CERCLA) Consent Decrees  
INDIAN RESERV ..... Indian Reservations  
FUSRAP ..... Formerly Utilized Sites Remedial Action Program  
UMTRA ..... Uranium Mill Tailings Sites  
LEAD SMELTERS ..... Lead Smelter Sites  
US AIRS ..... Aerometric Information Retrieval System Facility Subsystem  
US MINES ..... Mines Master Index File  
ABANDONED MINES ..... Abandoned Mines  
FINDS ..... Facility Index System/Facility Registry System  
ECHO ..... Enforcement & Compliance History Information  
UXO ..... Unexploded Ordnance Sites  
DOCKET HWC ..... Hazardous Waste Compliance Docket Listing  
FUELS PROGRAM ..... EPA Fuels Program Registered Listing  
PFAS NPL ..... Superfund Sites with PFAS Detections Information  
PFAS FEDERAL SITES ..... Federal Sites PFAS Information  
PFAS TSCA ..... PFAS Manufacture and Imports Information  
PFAS RCRA MANIFEST ..... PFAS Transfers Identified In the RCRA Database Listing  
PFAS ATSDR ..... PFAS Contamination Site Location Listing

## EXECUTIVE SUMMARY

PFAS WQP.....	Ambient Environmental Sampling for PFAS
PFAS NPDES.....	Clean Water Act Discharge Monitoring Information
PFAS ECHO.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS ECHO FIRE TRAINING.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS PART 139 AIRPORT.....	All Certified Part 139 Airports PFAS Information Listing
AQUEOUS FOAM NRC.....	Aqueous Foam Related Incidents Listing
PFAS.....	PFAS Contamination Site Location Listing
AQUEOUS FOAM.....	Former Fire Training Facility Assessments Listing
CA BOND EXP. PLAN.....	Bond Expenditure Plan
Cortese.....	"Cortese" Hazardous Waste & Substances Sites List
CUPA Listings.....	CUPA Resources List
DRYCLEANERS.....	Cleaner Facilities
EML.....	Emissions Inventory Data
Financial Assurance.....	Financial Assurance Information Listing
ICE.....	ICE
HWP.....	EnviroStor Permitted Facilities Listing
HWT.....	Registered Hazardous Waste Transporter Database
MINES.....	Mines Site Location Listing
MWMP.....	Medical Waste Management Program Listing
PEST LIC.....	Pesticide Regulation Licenses Listing
PROC.....	Certified Processors Database
Notify 65.....	Proposition 65 Records
UIC.....	UIC Listing
UIC GEO.....	UIC GEO (GEOTRACKER)
WASTEWATER PITS.....	Oil Wastewater Pits Listing

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

#### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 3 SWF/LF sites within

## EXECUTIVE SUMMARY

approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2021 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

## EXECUTIVE SUMMARY

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 08/16/2022 has revealed that there is 1 CIWQS site within approximately 0.001 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>LEGEND DAIRY FARMS</b>	<b>9155 RIVERSIDE DRIVE</b>	<b>0 - 1/8 (0.000 mi.)</b>	<b>A3</b>	<b>13</b>

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 01/05/2023 has revealed that there are 2 CERS sites within approximately 0.001 miles of the target property.

Name: LEGEND DAIRY FARMS #1  
Address: 9155 E RIVERSIDE DR  
City,State,Zip: ONTARIO, CA 91761  
Site ID: 595885  
CERS ID: 10883746  
CERS Description: Chemical Storage Facilities

**Violations:**  
Site ID: 595885  
Site Name: Legend Dairy Farms #1  
Violation Date: 11-17-2022  
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7  
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

**Violation Notes:** OBSERVATION: Observed empty 55-gallon drums in a containment structure and empty tanks throughout the facility which have been stored on site for an unknown amount of time. The contents of the tanks and containers were unknown and they were not labeled at the time of the inspection. CORRECTIVE ACTION: Submit a copy of a disposal receipt showing the removal of the empty tanks and containers or a signed statement as to how they have been sold, used, or otherwise managed.

**Violation Division:** San Bernardino County Fire Department  
**Violation Program:** HW  
**Violation Source:** CERS,

**Site ID:** 595885  
**Site Name:** Legend Dairy Farms #1  
**Violation Date:** 11-17-2022  
**Citation:** HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)  
**Violation Description:** Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.  
**Violation Notes:** OBSERVATION: Hazardous materials were observed on site at the time of the inspection that are not listed in the most current CERS inventory or are listed in lesser quantities. CORRECTIVE ACTION: Submit a signed

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 01/03/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/10/2023
	Data Release Frequency: Quarterly

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 01/03/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/10/2023
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/27/2022

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 08/25/2022  
Date Data Arrived at EDR: 09/06/2022  
Date Made Active in Reports: 12/05/2022  
Number of Days to Update: 90

Source: Environmental Protection Agency  
Telephone: 703-603-8704  
Last EDR Contact: 12/21/2022  
Next Scheduled EDR Contact: 04/10/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/27/2022  
Date Data Arrived at EDR: 11/01/2022  
Date Made Active in Reports: 11/15/2022

Last EDR Contact: 01/03/2023  
Next Scheduled EDR Contact: 04/24/2023  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: 800-424-9346
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 01/03/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/24/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 11/21/2022	Source: EPA
Date Data Arrived at EDR: 11/21/2022	Telephone: 800-424-9346
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2023
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2023
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2023
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/02/2022	Source: Department of the Navy
Date Data Arrived at EDR: 11/08/2022	Telephone: 843-820-7326
Date Made Active in Reports: 01/10/2023	Last EDR Contact: 11/01/2022
Number of Days to Update: 63	Next Scheduled EDR Contact: 02/20/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/15/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/17/2022	Telephone: 703-603-0695
Date Made Active in Reports: 10/24/2022	Last EDR Contact: 11/16/2022
Number of Days to Update: 68	Next Scheduled EDR Contact: 03/06/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/15/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/17/2022	Telephone: 703-603-0695
Date Made Active in Reports: 10/24/2022	Last EDR Contact: 11/16/2022
Number of Days to Update: 68	Next Scheduled EDR Contact: 03/06/2023
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/12/2022

Source: National Response Center, United States Coast Guard

Date Data Arrived at EDR: 12/14/2022

Telephone: 202-267-2180

Date Made Active in Reports: 12/19/2022

Last EDR Contact: 12/14/2022

Number of Days to Update: 5

Next Scheduled EDR Contact: 04/03/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 10/24/2022

Source: Department of Toxic Substances Control

Date Data Arrived at EDR: 10/24/2022

Telephone: 916-323-3400

Date Made Active in Reports: 01/12/2023

Last EDR Contact: 01/24/2023

Number of Days to Update: 80

Next Scheduled EDR Contact: 05/08/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/24/2022

Source: Department of Toxic Substances Control

	Data Release Frequency: Quarterly

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Brownfield lists***

##### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 02/23/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/10/2022	Telephone: 202-566-2777

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/29/2022  
Date Data Arrived at EDR: 08/18/2022

	Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 08/25/2022	Source: DTSC and SWRCB
Date Data Arrived at EDR: 08/25/2022	Telephone: 916-323-3400

## SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

## PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/08/2022  
Date Data Arrived at EDR: 08/08/2022  
Date Made Active in Reports: 10/21/2022

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

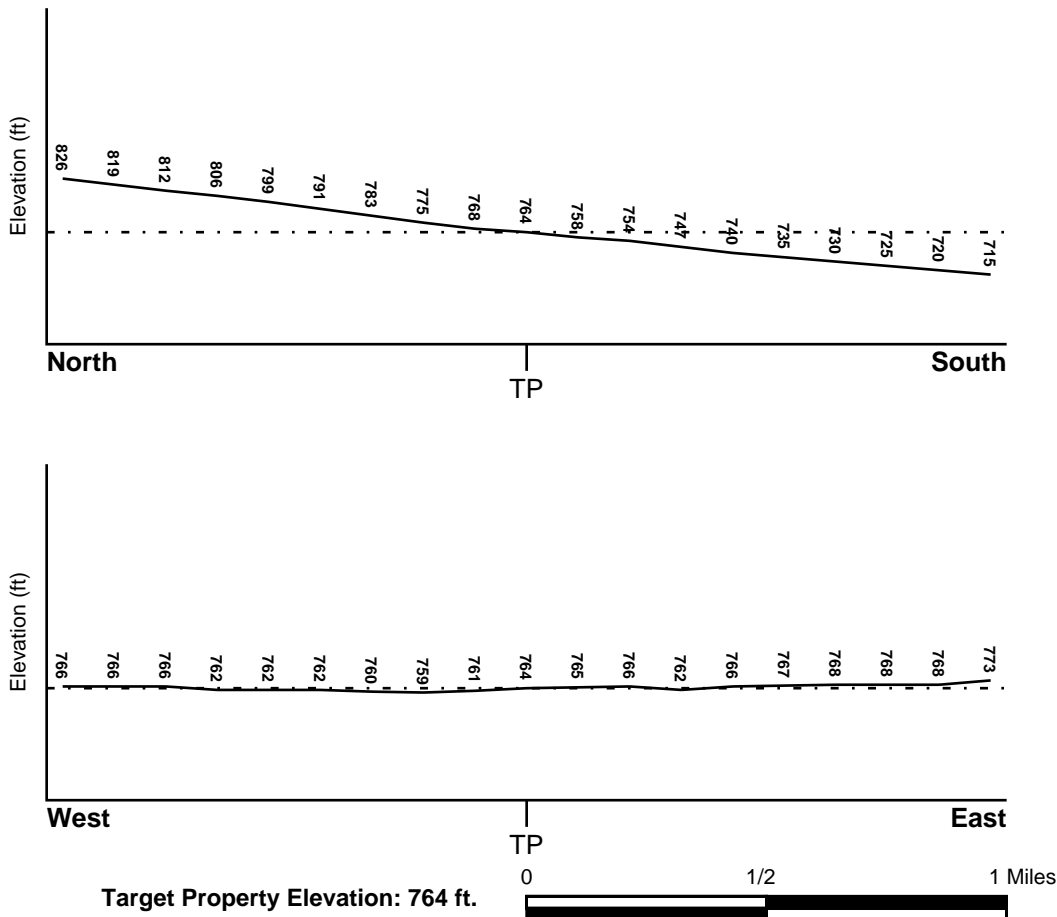

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8638H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8639H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	22 inches	59 inches	stratified loamy sand to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**Soil Map ID: 2**

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

**LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

# 1.0 Introduction

---

This Report presents the results of the Converse Consultants (Converse) *Phase II Environmental Site Assessment (ESA)* that was performed at 9155 and 9375 East Riverside Drive, Ontario, California, referred to as the Site in this Report. Converse was retained by the City of Ontario (*User*) to conduct the *Phase II ESA* at the Site. The location of the Site is shown on **Figure 1**, Site Location Map. The scope of this *Phase II ESA* was completed in accordance with the proposal prepared by Converse dated March 3, 2023 and approved by the User on September 7, 2023.

Converse generally followed the standard practices of the American Society for Testing Materials (ASTM) Designation: E1903-19 *Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process* (ASTM, E 1903-19). The purpose of conducting the *Phase II ESA* in accordance with ASTM E1903-19 is to acquire and evaluate information sufficient to achieve the objective(s) set forth in the “Statement of Objectives” developed by the *User* and Converse. The objectives of the assessment were to:

1. Evaluate environmental conditions related to hazardous materials use and storage (including observed staining), dairy waste ponds, and agricultural uses that were identified during a Phase I ESA conducted by Converse.
2. Identify if potential target analytes are present at concentrations greater than a threshold criteria.

The Phase II ESA included the following primary tasks:

- Conduct soil sampling in agricultural fields and onsite ponds, and around the hazardous materials storage area, to evaluate potential levels of contaminants related to historic and/or current onsite uses.
- Monitor for methane around the existing cow pens and dairy ponds to evaluate potential impacts related to the accumulation of organic waste from current dairy operations.

## 2.0 Background

---

### 2.1 *Site Description and Features*

#### 2.1.1 *Current Uses of the Site*

The Site is owned by The Ronald and Kristine Pietersma Family Trust and is operated as Legend Dairy Farms, a dairy business.

#### 2.1.2 *Location and Legal Description*

The Site is located at 9155 to 9375 East Riverside Drive in the City of Ontario, California 91761. The Site is located at the southwest corner of the intersection of E Riverside Drive and Ontario Avenue. The Site is located approximately 0.75-miles south of State Route 60. The Site consists of six (6) parcels and is approximately 115-acres.

The San Bernardino County Assessor's Parcel Numbers (APNs) for the Site are 0218-101-01, -02, -07, and -08, and 0218-102-10, and -11.

#### 2.1.3 *Site and Vicinity General Characteristics*

The Site consists of six (6) parcels totaling approximately 115-acres. The Site slopes gradually from north to south. The northern and northeastern portions of the Site are developed with three (3) occupied residential buildings, one (1) vacant residential building, one (1) milking barn, three (3) storage/warehouse buildings, and one (1) grain storage structure.

The central portion of the Site is occupied by cow pens with shade structures.

The southern portion of the Site is occupied by five (5) dairy waste ponds followed by an agricultural field and then a stormwater berm.

The southwestern portion of the Site is developed with an agricultural field.

### 2.2 *Physical Setting*

#### 2.2.1 *Topography*

The Site is located approximately 764-feet above mean sea level with surface topography sloping towards the south/southwest.

### *2.2.2 Geology*

The Site is underlain by alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated.

### *2.2.3 Hydrogeology*

Information regarding regional groundwater was researched on the RWQCB Geotracker website. According to the website, the closest location to the Site with recent groundwater information is located approximately 0.5-mile east of the Site. According to an October 2011 closure report for that site, groundwater is located at depths greater than 150-feet beneath ground surface (bgs) and flows in a southwesterly direction.

## **2.3 Site History and Land Use**

As early as 1897, the Site was undeveloped. By 1900, the Site appeared to be partially developed for residential use. The Site was further developed for agricultural uses by 1938. The northeastern portion of the Site was developed with agricultural buildings by 1948, with smaller residential and/or farm out buildings constructed at various locations across the Site in the 1940s and early 1950s. By 1966, the northeastern portion of the Site was further developed with cow pens while the remainder of the Site was utilized for agricultural use. By 1985, the northern portion of the Site was further developed with additional cow pens. By 1994, three (3) potential dairy ponds or stormwater retention ponds were located in the southern portion of the Site. By 2002, the three (3) possible dairy ponds/retention ponds are no longer present at the Site. In 2006, possible retention and/or livestock waste ponds were visible in the central and southern portions of the Site. By 2015, the Site appeared in its current configuration with residential and dairy farming structures in the northern and northeastern portion of the Site, cow pens in the central portion of the Site, dairy ponds in the south-central portion of the Site, and agricultural fields in the southern and southwestern portions of the Site.

## **2.4 Adjacent Property Land Use**

As early as 1897, the adjoining properties appeared to be primarily undeveloped with sporadic residential developments. By 1938, the adjoining properties were further developed for agricultural uses. By 1966, adjoining properties to the north and northeast were developed with the existing golf course. By 1985, the remaining adjoining properties were primarily developed for agricultural and/or dairy farming uses, with sporadic residential structures observed on the properties. By 1989, the existing stormwater retention basin was visible on the southeastern

adjoining property. The adjoining properties have remained in agricultural, residential, and/or golf course uses since the 1980s.

## **2.5 Summary of Previous Assessment Reports**

The following Recognized Environmental Conditions (RECs) pertaining to the Site were identified in the Converse Phase I ESA Report, dated March 2, 2023:

- The identified staining in the vicinity of the two (2) diesel above ground storage tanks (ASTs) adjacent to the concrete-berm hazardous waste storage area.
- The presence of five (5) dairy ponds in the southern/southeastern portion of the Site is considered a REC due to the potential for the accumulation of hazardous wastes including metals, pesticides, and other wastes related to onsite dairy farming and agricultural activities.
- The agricultural fields located on the Site are considered a REC due to the potential for pesticide use.

Based on these findings, additional assessment appears warranted and should include the following:

- Soil sampling in the vicinity of identified stained soil adjacent to ASTs in the hazardous materials storage area, in the locations of the dairy waste ponds, and in the areas of the Site where agricultural fields are present.
- Methane sampling across areas of the Site where dairy waste ponds and cow pens were identified.

## 3.0 Work Performed and Rationale

---

### 3.1 Scope of Assessment

A conceptual model was developed based on data obtained during the Phase I ESA conducted by Converse.

#### 3.1.1 Target Analytes

Data obtained during the *Phase I ESA* indicated that pesticides, metals, hydrocarbons, and volatile organic compounds (VOCs) could be present in soil beneath the Site. Converse also identified the potential for the presence of methane in subsurface vapor due to current and former dairy operations at the Site.

#### 3.1.2 Target Analytes First Entered the Environment

The RECs at the Site include onsite hazardous materials storage and stained soils, dairy waste ponds, agricultural uses, and potential methane in subsurface soil vapor. These data indicate that target analytes would have first entered the environment by releases to the surface soil and/or through the presence of organic wastes related to current and/or former onsite dairy operations, through application of pesticides to crops in the agricultural fields, and/or through spills and leaks of materials stored and used onsite.

#### 3.1.3 Environmental Media and Locations Most Likely to Have the Highest Concentrations of Target Analytes

Data obtained during the *Phase I ESA* identified the presence of hazardous materials storage and associated staining, dairy waste ponds, agricultural uses. Based on these findings, the environmental media most likely to have the highest concentrations of target analytes is soil. The presence of organic wastes from current and former onsite dairy operations create the potential for methane in subsurface soil vapor.

The Phase II ESA consisted of the following primary elements:

#### Soil Sampling:

Advance 80 borings at locations on the Site in the vicinity of the onsite ponds, agricultural fields, and the hazardous materials storage area. The approximate locations of all borings are indicated on Figure 2. The borings were completed at the following depths:

- 5 borings (P1 to P5) in the dairy ponds area to a depth of 1-foot bgs. Laboratory analyses of samples for pesticides, metals, and hydrocarbons.
- 5 borings (H1 to H5) to 12-foot bgs in the hazardous materials storage area. Laboratory analyses of samples for pesticides, metals, hydrocarbons, and volatile organic compounds (VOCs).
- 70 borings (A1A to A15F) a maximum depth of 2-foot bgs in the agricultural fields. Laboratory analyses of samples for pesticides and arsenic.

#### Methane Survey:

Advance 10 borings to a maximum depth of 15-foot bgs in the vicinity of the existing cow pens and dairy ponds, with vapor probes installed at depths of 5 and 15-foot bgs at each location. The first screening was conducted approximately 24 hours after probe installation, with a second round of monitoring approximately 48 hours after probe installation. No laboratory analytical samples were collected at these locations.

### **3.2 Soil Sample Collection**

Seventy five (75) borings were completed using direct push (Geoprobe®) drilling methods, with the other five borings (P1 to P5) completed using hand auger methods. Boring locations were chosen to evaluate the lateral and vertical extent of potential contamination in the specific areas of the dairy ponds, hazardous materials storage area, and the agricultural fields. Samples were collected in acetate sleeves or glass jars, with EnCore sample containers used to collect subsamples of soil from select samples in accordance with EPA Method 5035. A portion of each sample was also screened in the field for VOCs using a photo-ionization detector (PID). Samples were collected at specific depths dependent on boring location:

- Hazardous Materials Storage Area: Borings were completed to 12-foot bgs at five locations surrounding the concrete-bermed area where ASTs are located, and hazardous material are stored, as well as within or around the adjoining structure. Sample locations are indicated on Figure 2A. Samples were collected at depth of 0.5, 1, 2, 4, 8, and 12-foot bgs.
- Dairy Ponds: Borings were completed to 1-foot bgs at five locations, with one boring per dairy pond. These sample locations are indicated on Figure 2B. Samples were collected at depths of 0.5 and 1-foot bgs.
- Agricultural Fields: Borings were completed to 2-foot bgs at 70 locations in a grid pattern across the agricultural fields. These sample locations are

indicated on Figure 2B and 2C. Samples were collected at depths of 0.5, 1, and 2-foot bgs.

### **3.3 Methane Survey**

Ten (10) borings were advanced to a depth of 15-feet bgs, with five borings along the southern berm of the dairy ponds (one boring per pond) and five borings in the area of existing cow pens. These sample locations are indicated on Figure 2D.

Probe Installation: Vapor probes were installed at depths of 5 and 15-feet bgs. Probes consist of a ½ inch stainless-steel probe tip attached to ¼-inch diameter tubing. Six (6) inches of sand was initially placed in the bottom of the borehole and then the probe tip was placed in the borehole, followed by another six-inches of sand. 12-inches of granular bentonite was then placed, followed by hydrated bentonite chips up to the next probe interval. The borehole was sealed with hydrated bentonite chips up to 2 feet bgs. Probes were marked to identify the depth and boring number. Well boxes and lids were installed for the five borings in the cow pen area to protect probe tubing from damage.

Monitoring: Soil gas was evaluated for methane, hydrogen sulfide, fixed gases, and pressure within each probe installation. Field monitoring was conducted using a LANDTEC GEM 5000+ Gas Analyzer, which is an infrared gas analyzer that measures methane, carbon dioxide, and oxygen percent by volume, hydrogen sulfide in part per million volume (ppmv), static and differential pressure. Monitoring was conducted by connecting the device directly to the probe tubing. The pressure in the tubing was measured when the three-way valve on the tubing was opened. After recording pressure in each of the probes in the borehole, the pump of the meter was activated and allowed to run until the gas reading stabilized, indicating that the tubing had been purged and the readings were representative of the subsurface conditions.

### **3.4 Chemical Analytical Methods**

All samples were submitted to Enviro-Chem Inc. under chain of custody control. Depending on the sample location, specific analyses were requested to be run:

- Dairy Ponds: The laboratory was requested to prepare composite samples using a portion of the soil from each 0.5-foot sample from the 5 dairy pond borings, creating two composite samples of two and three discrete samples respectively. Composite samples were analyzed for organochlorine pesticides (OCPs) by EPA Method 8081. One discrete sample from 0.5-foot bgs per composite group was analyzed for arsenic by EPA Method 6010. Discrete samples from all samples collected from 1-foot bgs were analyzed

for Title 22 Metals by EPA Method 6010/7471, VOCs by EPA Method 8260B and for total petroleum hydrocarbons (TPH) in the gasoline, diesel, and oil ranges by EPA Method 8015M.

- Hazardous Materials Storage Area: Discrete samples collected from 0.5, 4, 8, 12-foot bgs were analyzed for the following:
  - TPH as Carbon Chain by EPA Method 8015M
  - Title 22 Metals by EPA Method 6010/7471
  - VOCs by EPA Method 8260B

Samples collected from 0.5 -foot bgs were also analyzed for the following:

- OCPs by EPA Method 8081

Samples collected from depths of 1 and 2-foot bgs were archived pending initial analytical results.

- Agricultural Fields: The laboratory was requested to prepare composite samples using a portion of the soil from each 0.5-foot sample from the 70 agricultural field borings, creating twenty-two (22) composite samples from three (3) discrete samples and one (1) composite sample from four (4) discrete samples.

Composite samples were analyzed for OCPs by EPA Method 8081. Additionally, one discrete sample from 0.5-foot depth per composite group was selected to be analyzed for arsenic by EPA Method 6010.

Samples collected from depths of 1 and 2-foot bgs were archived pending initial analytical results.

## 4.0 Presentation and Evaluation of Results

---

### 4.1 Subsurface Conditions

Soil samples were collected during the advancement of the borings. Soil types encountered were generally very fine-grained sands to silty sands with minor amounts of clay. Groundwater was not encountered in any of the borings, with moisture content of the soils ranging from dry to mildly moist.

### 4.2 Analytical and Monitoring Results

A summary of the analytical results is provided below. All samples collected were submitted to Enviro-Chem Inc., an ELAP-certified laboratory, under chain of custody control. Analytical results were compared to the RWQCB's Environmental Screen Levels (ESLs), or screenings (SLs) based on the Department of Toxic Substances Control (DTSC) Human Health Risk Assessment (HHRA) Notes 3 and 11. A copy of the laboratory analytical report is included in **Appendix A**, and a summary of the results is presented on **Table 1**.

#### 4.2.1 Soil Samples

##### Dairy Ponds

TPH, OCPs, and VOCs were reported as non-detect in all dairy pond samples analyzed.

Arsenic was reported in all dairy pond samples analyzed at concentrations ranging from 0.932 mg/kg to 3.03 milligrams per kilogram (mg/kg). These reported concentrations are below the upper bound ambient arsenic level in Southern California of 12 mg/kg.

Ten (10) additional metals were detected in the samples analyzed. All reported concentrations were less than their respective screening levels for both residential and commercial land uses, as well as their respective hazardous waste threshold limits.

##### Agricultural Fields

Two (2) OCPs were reported in one or more of the composite samples analyzed. Reported OCPs include chlordane and 4,4-DDE. Chlordane was reported in one composite sample collected (CA10DEF) at a concentration of 0.001 mg/kg, which is below the residential screening level of 0.48 mg/kg. 4,4-DDE was reported in ten (10) composite samples analyzed, ranging in concentrations from 0.001 mg/kg to 0.004 mg/kg. All reported

concentrations of 4,4,-DDE are below the residential screening level of 1.8 mg/kg. No other OCPs were identified in the agricultural field samples analyzed.

Arsenic was reported in all samples analyzed at concentrations ranging from 0.705 mg/kg to 9.85 mg/kg. All reported arsenic concentrations are below the upper bound ambient arsenic level in Southern California of 12 mg/kg.

#### Hazardous Materials Storage Area

TPH in the gasoline range (TPH-G) and VOCs were reported as non-detect in all samples analyzed.

TPH in the diesel range (TPH-D) was reported in six (6) of the samples analyzed, ranging in concentrations from 13.1 mg/kg to 1,480 mg/kg. Sample H5-0.5 (located in the storage shed to the southwest of the ASTs and berm area) reported TPH-D at 1,480 mg/kg, which exceeds commercial screening level of 1,219 mg/kg. All other reported concentration of TPH-D are less than the residential screening level of 255 mg/kg.

TPH in the oil range (TPH-O) was reported in five (5) of the samples analyzed at concentrations ranging from 111 mg/kg to 1,330 mg/kg. All reported concentrations are below the residential screening level of 12,000 mg/kg.

Four (4) OCPs were reported in sample H5-0.5: chlordane, 4,4-DDE, dieldrin, and endosulfan. All reported concentrations are less than their respective residential screening levels. No OCPs were detected in any of the other samples analyzed.

Arsenic was reported in all samples analyzed at concentrations ranging from 1.01 mg/kg to 3.97 mg/kg. These reported concentrations are below the upper bound ambient arsenic level in Southern California of 12 mg/kg.

Ten (10) additional metals were detected in each of the samples analyzed. All other reported metals concentrations are less than their respective residential screening levels, and with the exception of chromium, are also less than their respective hazardous waste threshold limits. Although all chromium concentrations are less than the Total Threshold Limit Concentration (TTLC) value, it is noted that concentrations six (6) samples exceeded the level of 50 mg/kg at which analysis of soluble concentrations may be warranted for waste classification purposes. It is noted that each of these samples were from depths of 8 or 12 feet bgs.

#### 4.2.2 Methane Monitoring

Monitoring of the probes was conducted on October 3 and 4, 2023. Differential pressure ranged from 0.01 to 0.07 inches of water. Methane was detected at a maximum concentration of 24.5% (245,000 ppmv) at location M4-15. Methane was also reported in other 15-foot probes located around the dairy ponds (M1 to M5) at concentrations between 23.1% (231,000 ppmv) and 8.5% (85,000 ppmv). Locations near the cow pens (M6 through M10) reported methane as non-detect except for a minimal detection of 0.1% in probes M7-5 and M7-15. The methane concentrations in the 15-foot probes in the vicinity of the dairy ponds exceed the City of Ontario Methane Design Guidelines threshold of 1.5% (15,000 ppmv).

Hydrogen sulfide was reported at a maximum concentration of 12 ppmv at location M2-15. Hydrogen sulfide concentrations from other probes ranged from 0 ppmv to 7 ppmv. All detectable concentrations were from probes located near the dairy ponds. Thresholds for hydrogen sulfide concentrations are not presented in the City's Methane Guidance.

### 4.3 Data Quality Assurance/Quality Control

#### 4.3.1 Hold Times

All soil samples were analyzed within appropriate hold times.

#### 4.3.2 Laboratory Quality Assurance

The laboratory provided data to estimate precision, accuracy, and bias. The laboratory reports indicate that the method blanks, laboratory spikes, and/or matrix spikes clearly met quality assurance objectives for soil.

#### 4.3.3 Reporting Limits

The following Practical Quantitation Limits (PQLs) were provided by the laboratory:

- TPH – between 10 and 50 mg/kg
- Arsenic – 0.5 mg/kg
- Metals – between 0.01 and 5.0 mg/kg
- VOCs – between 0.005 and 0.020 mg/kg
- OCPs – between 0.001 and 0.020 mg/kg

## 5.0 Interpretation and Conclusions

---

### 5.1 RECs and Potential Release Area(s)

Converse completed a Phase I ESA Report for the Site, dated March 2, 2023. That report identified the following RECs in connection with the Site:

- The identified staining in the vicinity of the two (2) diesel fuel ASTs adjacent to the concrete-bermed hazardous waste storage area.
- The presence of five (5) dairy ponds in the southern/southeastern portion of the Site is considered a REC due to the potential for the accumulation of hazardous wastes including metals, pesticides, and other wastes from hazardous materials and/or pesticide use related to onsite dairy farming and agricultural fields.
- The agricultural fields located on the Site are considered a REC due to the potential for pesticide use.

### 5.2 Conceptual Model Validation/Adequacy of Investigations

It is our opinion that the field and analytical data validated the conceptual model, and the investigation adequately evaluated the identified objectives of the *Phase II ESA*.

### 5.3 Absence, Presence, Degree, Extent of Target Analytes

No VOCs or TPH-G were reported in any soil samples analyzed.

TPH-D exceeded commercial screening level of 1,219 mg/kg in one sample (H5-0.5 at 1,480 mg/kg). All other reported TPH-D concentrations were less than the residential screening level of 255 mg/kg. Reported TPH-O concentrations did not exceed residential or commercial screening levels.

Four (4) OCPs were reported in one or more samples, but all concentrations are less than their respective residential screening levels.

All reported concentrations of metals are below their respective screening levels, and/or are considered to be generally representative of naturally occurring background concentrations. With the exception of chromium, all metals concentrations were also less than their respective hazardous waste threshold limits. The total chromium concentrations are less than the TTLC value, but some samples from 8 and 12 feet bgs exceeded the level at which analysis of soluble concentrations may be warranted for waste classification purposes.

Methane concentrations up to 245,000 ppmv were reported in the 15-foot probes in the vicinity of the dairy ponds, and these concentrations exceed the City of Ontario Methane Design Guidelines threshold of 15,000 ppmv. Hydrogen sulfide was also detected in the probes at concentrations up to 12 ppmv. The presence of elevated methane concentrations indicates that soils and sediment in and around the dairy ponds may not be suitable for future onsite use.

## **5.4 Other Concerns**

### *5.4.1 Significant Assumptions*

No significant assumptions were made during this assessment.

### *5.4.2 Limitations and Exceptions*

The initial scope of work called for dairy pond samples to be collected from the bottom of the ponds. However, all ponds had water in them at the time of sampling, making the bottoms inaccessible. Sample locations were subsequently relocated to the inner slope of the pond walls slightly above the water line.

No other limitations or exceptions were encountered during this *Phase II ESA*.

### *5.4.3 Special Terms and Conditions*

No special terms or conditions need to be noted in this Phase II ESA report.

## **5.5 Conclusions/Objectives Met**

Converse has performed a Phase II ESA at 9155 and 9375 East Riverside Drive, Ontario, California in conformance with the scope and limitations of ASTM, E1903-19 and the following objectives:

- Evaluate environmental conditions related to hazardous materials use and storage (including observed staining), dairy waste ponds, and agricultural uses that were identified during a Phase I ESA conducted by Converse.
- Identify if potential target analytes are present at concentrations greater than a threshold criteria.

Converse presents the following findings based on the results of this assessment:

- No VOCs or TPH-G were reported in any of the soil samples analyzed.
- Eleven (11) metals were reported in soil samples analyzed, with all reported concentrations being less than their respective residential screening levels and/or are considered to be generally representative of naturally occurring background concentrations.
- Four (4) OCPs (chlordane, 4,4-DDE, dieldrin, and endosulfin) were reported in one or more samples, with all reported OCP concentrations less than their respective residential screening levels.
- TPH-D was reported in six (6) samples at a maximum concentration of 1,480 mg/kg in sample H5-0.5. The maximum concentration exceeds the commercial screening level of 1,219 mg/kg, with all other reported TPH-D concentrations being less than the residential screening level of 255 mg/kg.
- TPH-O was reported in five (5) samples, with all concentrations less than the residential screening level.
- Methane was reported at concentrations up to 245,000 ppmv in the 15-foot probes in the vicinity of the dairy ponds, along with hydrogen sulfide concentrations up to 12 ppmv. These methane concentrations exceed the City of Ontario Methane Design Guidelines threshold of 15,000 ppmv.

Based on the findings of this assessment Converse concludes the following:

- Agricultural uses do not appear to have significantly impacted the soils in the fields on the southern portion of the Site.
- A relatively minor impact of TPH-D was identified in the hazardous material storage area. Soil at a depth of 0.5 feet bgs at location H5 was reported with TPH-D in excess of the commercial screening level. TPH-D was not detected in the deeper sample from 4-feet bgs at the same location, and concentrations in all other 0.5 foot samples were less than the residential screening level.
- Chromium concentrations that may warrant further analysis for waste profiling purposes in the vicinity of the hazardous materials storage area may be naturally occurring as they were only reported in samples from 8 and 12 feet bgs.
- Methane was detected at locations around the dairy ponds and cow pens at concentrations in excess of the City of Ontario Methane Design Guidelines threshold of 15,000 ppmv.

## 6.0 Recommendations

---

It is our opinion that no additional assessment is necessary to address the objectives of the Phase II ESA.

It is recommended that shallow soils impacted with THP-D in the vicinity of the hazardous material storage area (sample location H5) at concentrations exceeding the residential screening level be removed from the Site and disposed of at an appropriate facility.

It is noted that methane was detected at locations around the dairy ponds and cow pens, and that further testing, engineering controls, and/or remediation should be completed to comply with the City of Ontario Building Department's requirement for Methane Assessment for Projects in the New Model Colony.

It is noted that if soils are to be exported from the Site, further testing should be conducted to generate a waste profile, and that assessment may need to include the evaluation of soluble concentrations of both total and hexavalent chromium concentrations.

## 7.0 Reliance

---

This report is for the sole benefit and exclusive use of the City of Ontario in accordance with the terms and conditions that are presented in our proposal dated March 3, 2023 under which these services have been provided. The preparation of this report has been in accordance with generally accepted environmental practices. No other warranty, either express or implied, is made. This report should not be regarded as a guarantee that no further contamination beyond that which could be detected within the scope of this assessment is present at the Site.

This report should not be regarded as a guarantee that no further contamination, beyond that which could be detected within the scope of this assessment, is present at the Property. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation of the property at the time of the assessment. Also, events may occur after the Property visit, which may result in contamination of the Property. Additional information, which was not found or available to Converse at the time of report preparation, may result in a modification of the conclusions and recommendations presented.

Any reliance on this report by Third Parties shall be at the Third Party's sole risk. Should the City of Ontario wish to identify any additional relying parties not previously identified, a completed Application of Authorization to Use (see following page) must be submitted to Converse Consultants.

Dear Mr. Van Fleet:

The **analytical results** for the soil samples, received by our laboratory on October 5, 2023, are attached. The samples were received chilled, intact and accompanying chain of custody.

Enviro-Chem appreciates the opportunity to provide you and your company this and other services. Please do not hesitate to call us if you have any questions.

Sincerely,

Pearl Wong  
Quality Manager

This data package has been reviewed for technical correctness and completeness. Release of this data has been authorized by the Laboratory Manager or Manager's Designee, as verified by the above signature which applies to this PDF File as well as any associated electronic data deliverable files. The results contained in this report meet all requirements of ELAP and pertain only to those samples which were submitted for analysis. This report may be reproduced only in its entirety.

TOTAL THRESHOLD LIMIT CONCENTRATION ANALYSIS
UNIT: mg/Kg = MILLIGRAM PER KILOGRAM = PPM

Table with 7 columns: ELEMENT ANALYZED, SAMPLE RESULT, PQL, DF, TTLC LIMIT, STLC LIMIT, EPA METHOD. Row 1: Arsenic(As), 1.07, 0.5, 1, 500, 5.0, 6010B

COMMENTS

DF = Dilution Factor
PQL = Practical Quantitation Limit
Actual Detection Limit = PQL X DF
TTLC = Total Threshold Limit Concentration
STLC = Soluble Threshold Limit Concentration
\* = STLC analysis for the metal is recommended (if marked)
\*\*\* = The concentration exceeds the TTLC Limit, and the sample is defined as hazardous waste as per CCR-TITLE 22 (if marked)

Dear Mr. Van Fleet:

The **OCPs results** for the soil samples, received by our laboratory on October 5, 2023, are attached. The samples were received chilled, intact and accompanying chain of custody.

Enviro-Chem appreciates the opportunity to provide you and your company this and other services. Please do not hesitate to call us if you have any questions.

Sincerely,

Pearl Wong  
Quality Manager

This data package has been reviewed for technical correctness and completeness. Release of this data has been authorized by the Laboratory Manager or Manager's Designee, as verified by the above signature which applies to this PDF File as well as any associated electronic data deliverable files. The results contained in this report meet all requirements of ELAP and pertain only to those samples which were submitted for analysis. This report may be reproduced only in its entirety.

**RE: Missing and Duplicate samples**

1 message

**Michael A. Van Fleet** <mvanfleet@converseconsultants.com>Fri, Oct 6, 2023 at 12:22  
PM

To: Jessica Lin &lt;envirocheminc@gmail.com&gt;

Cc: Scott Morgan &lt;SMorgan@converseconsultants.com&gt;

Hi Jessica,

For A6D, yes, please assume that the one with 2.0 on the side is A6D-2.0.

For A1A, we believe the sample at the bottom of the photo is A1A-2 (based on it appearing to have less moisture).

We are unable to determine which A14D/Es should actually have been labeled at A15D/Es. For now make no changes to the A14D/E samples identified as being from 1 and 2 feet since they are being archived (we'll deal with them later if need be).

I think we can deal with the duplicate A14A-0.5 samples by modifying how we prepare our composite samples.

Please do not prepare composite samples CA14DEF and CA15DEF as requested on the COCs. Instead, please prepare the following composite samples:

CA14DE using portions of 4 discrete samples; both A14D-0.5 and both A14E-0.5

CA1415F using portions of 2 discrete samples; A14F-0.5 and A15F-0.5

Please let me know if you have any questions.

To: "Michael A. Van Fleet" <mvanfleet@converseconsultants.com>

Morning Michael

we finally finish sorted out the samples received yesterday and noticed a couple discrepancies

A1A-0.5 (x2) Missing A1A-1

A6D-0.5 (X2) Missing A6D-2.0

**(please note that one of the tube says 2.0 on the side. Can we Assume 2.0 should have been A6D-2.0?)**

A15D-0.5/1/2, A15E-0.5/1/2 Are missing but duplicate sets were received for A14D-0.5/1/2/A14E-0.5

Thanks

To: Jessica Lin <envirocheminc@gmail.com>

Sorry,

Forgot to add that both of the newly formed composites should be analyzed for OCP like the old ones would have been. For the arsenic analysis, please do not do it on the 2 misidentified samples, and instead do it on samples A14F-0.5 and A15F-0.5.

[Quoted text hidden]

A14F-0.5 = 231005-302  
A15F-0.5 = 231005-293

Converse Project No. 19-16-123-58

Ms. Hernandez,

Converse Consultants (Converse) is pleased to submit the attached report that summarizes the activities and the results of a Phase I Environmental Site Assessment (Phase I ESA) that was conducted at the referenced property.

A summary of the assessment is presented in the Executive Summary, as well as in Sections 8.0, 9.0, and 10.0 of the report. A Recognized Environmental Conditions was identified during this assessment and additional assessment appears warranted.

We appreciate the opportunity to be of service. Should you have any questions or comments regarding this report, please contact Spencer Wagner at (562) 505-5219 or Norman Eke at (626) 930-1260.

# Executive Summary

---

The following is an Executive Summary of the Phase I Environmental Site Assessment (Phase I ESA) that was conducted by Converse Consultants (Converse). Please refer to the appropriate sections of the report for a complete discussion of these issues. In the event of a conflict between this Executive Summary and the report, or an omission in the Executive Summary, the report shall prevail.

This report presents the results of the Converse Phase I ESA performed at Assessor Parcel Number (APN) 0218-111-09 in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by the City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical within the scope of an ESA, Recognized Environmental Conditions (RECs) in connection with the Subject Property.

Converse has compiled and reviewed information that was obtained from interviews, document research, and on-site and area reconnaissance to identify potential environmental conditions at the Property in conformance with the ASTM Standard E: 1527-21 Environmental Site Assessment Standard Practice (ASTM Standard: E1527-21). This Phase I ESA was conducted during the period of September 19, 2023 to October 20, 2023.

The Subject Property is owned by 15 Dairy Farm, LLC, and is part of a larger nursery that extends north of the Subject Property.

The Subject Property was undeveloped as early as 1897. The Subject Property appeared partially developed as part of a larger agricultural field from as early as 1938 to 1973. By 1975, the Subject Property appeared developed as part of a larger dairy farm operation located north of the Subject Property; however, no livestock pens, livestock operations, or waste water ponds were visible on the Subject Property. From 2009 to 2012, the Subject Property appeared to be vacant. By 2016, the Subject Property appeared developed as part of a larger nursery.

According to the RWQCB Geotracker database there is an area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area, the Plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the regulatory threshold 5 ug/l.

According to the CalRecycle SWIS website (<https://www2.calrecycle.ca.gov/SolidWaste/Site/Search>), a solid waste site is located approximately 0.40-miles south/southwest of the Subject Property at 13434 South Ontario Avenue.

The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."

The Subject Property is not listed in the regulatory database report.

The following adjoining properties are listed in the regulatory database report:

- 13115 Ontario Avenue (southern adjoining) - The site is listed in the CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST, and UST databases. The listings

appear related to the operation of a 550-gallon diesel fuel UST. The listings identified that the UST was installed in 1974.

- 9309 East Riverside Drive (northwestern, northern, northeastern, eastern, and western adjoining) - The site is listed in the San Bern Co. Permit database. The listing identified J&B Dairy as being an inactive hazardous waste facility as of 2007.

**Recognized Environmental Conditions (RECs):**

- The current and historical agricultural uses on the Subject Property.
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was not visible from the public right-of-way (Ontario Avenue).
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

The following environmental concerns were noted:

- The operation of a UST on the southern contiguous property is considered an environmental concern that does not appear to rise to the level of a REC based on the lack of information suggesting any unauthorized releases.

Based on the findings, Converse recommends assessment of shallow soils across the Subject Property for the presence of pesticides and metals historically used in agricultural operations.

No assessment related to the Archibald plume is deemed necessary based on the depth to groundwater and reported concentrations of TCE in the vicinity of the Subject Property are below the maximum contaminant level (MCL).

Any future redevelopment of the Subject Property should be in accordance with the City of Ontario Methane Ordinance.

It is recommended that the Site Reconnaissance be completed at the time of the Phase II Environmental Site Assessment.

# 1.0 Introduction

---

## 1.1 Purpose and Scope of Services

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at APN 0218-111-09 in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical, Recognized Environmental Conditions (RECs) in connection with the Property. The term Recognized Environmental Conditions is defined in Section 1.1.1 of the American Society of Testing and Materials (ASTM) Standard Practice as the presence or likely presence of any hazardous substances or petroleum products in, at or on a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

This Phase I ESA was completed in accordance with our proposal dated September 19, 2023. Our work consisted of the following and was completed in general conformance with the scope and limitations of the ASTM Practice E1527-21 and complies with standards and practices set forth in 40 Code of Federal Regulations (CFR) Part 312 for AAI.

- Interviews with the Property owner representatives
- Property and vicinity reconnaissance
- Review of regulatory agency records
- Description of physical setting
- Historical review
- Interviews with public agency personnel
- Preparation of this report

## 1.2 Non-Scope Considerations

There are a number of non-scope issues which are sometimes assessed concurrently with a Phase I ESA. Unless specifically agreed in the contract proposal documents, these non-scope considerations are not included as part of the Phase I ESA. Examples of non-scope issues include:

- Asbestos-containing Building Materials unrelated to release into the environment
- Biological Agent
- Cultural & Historic Resources
- Diffuse Anthropogenic Pollution
- Ecological Resources
- Endangered Species
- Health & Safety
- Indoor Air Quality unrelated to release of hazardous substances or petroleum products in the environment
- Industrial Hygiene
- Lead-based Paint unrelated to releases in the environment
- Lead in Drinking Water
- Mold or microbial growth conditions
- PCB-containing building materials (for example, interior fluorescent light ballasts, paint, and caulk)
- Polyfluoroalkyl Substances
- Naturally-occurring Radon
- Regulatory Compliance

- Substances not defined as hazardous substances unless or until such substances are classified as CERCLA hazardous substances.
- Wetlands

No Non-Scope issues were addressed in this report.

### **1.3 Significant Assumptions**

No assumptions were made for this assessment that need to be noted as significant.

### **1.4 Limitations and Expectations**

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property and the Subject Property was not observable from the public right-of-way (Ontario Avenue).
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

### **1.5 Special Terms and Conditions**

No special terms or conditions were identified by the User.

### **1.6 Reliance**

This report is for the sole benefit and exclusive use of City of Ontario in accordance with the terms and conditions under which these services have been provided. Its preparation has been in accordance with generally accepted environmental practices. No other warranty, either express or implied, is made. The Scope of Services associated with the report was designed solely in accordance with the objectives, schedule, budget, and risk-management preferences of City of Ontario.

This report should not be regarded as a guarantee that no further contamination, beyond that which could be detected within the scope of this assessment, is present at the Subject Property. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Subject Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation of the property at the time of the assessment. Also, events may occur after the Property visit, which may result in contamination of the Subject Property. Additional information, which was not found or available to Converse at the time of report preparation, may result in a modification of the conclusions and recommendations presented.

Any reliance on this report by Third Parties shall be at the Third Party's sole risk. Should City of Ontario wish to identify any additional relying parties not previously identified, a completed Application of Authorization to Use (see Appendix A of this report) must be submitted to Converse Consultants.

### ***1.7 Continued Viability***

This report has continued viability of 180 days from the following:

- **Interviews:** Converse was not provided with Subject Property owner contact information by the Client. No interview was completed.
- **Review of Government Records:** September 25, 2023
- **Visual Inspection:** October 18, 2023
- **Declaration of Environmental Professional (EP):** October 20, 2023
- **Lien Search:** Not Applicable

## 2.0 Property Description

Item	Comment
Current Use(s) of the Property	<p>The Subject Property is owned by 15 Dairy Farm, LLC, and is part of a larger nursery property that extends north of the Subject Property.</p> <p>A Subject Property location map and a field generated Subject Property plan are provided in Appendix B. Pertinent Property photographs are provided in Appendix C.</p>
Location and Legal Description	<p>The Subject Property is located at APN 0218-111-09, Ontario, California 91761. The Subject Property is located on the east side of Ontario Avenue, between East Riverside Drive and Chino Avenue. The Subject Property is located approximately 1.0-mile south of the Ontario (60) Freeway and approximately 2.9-miles west of Interstate 15.</p> <p>The Subject Property consists of one (1) parcel and is approximately 2,613 square feet.</p>
Zoning Information	<p>According to the City of Ontario, Planning Department, the Subject Property is zoned as LDR for low density residential.</p>
Property Characteristics	<p>The Subject Property is a square-shaped parcel consisting of approximately 0.06-acres. The Subject Property is generally level. No structures were visible on the Subject Property.</p>
Description of Property Structure(s)	<p>No structures were visible on the Subject Property.</p>

### The following services were present at the Property at the time of the assessment.

Item	Comments
Electricity:	Southern California Edison
Gas:	The Gas Company
Potable Water:	The Subject Property is serviced by the City of Ontario; however, it is possible that onsite water wells are also present based on the historical agricultural operations on the Subject Property.
Sanitary Sewer:	City of Ontario

Item	Comments
Heating, Ventilation, Air Conditioning (HVAC):	N/A
Solid Waste:	City of Ontario

## 3.0 User Provided Information & Responsibilities

---

### 3.1 Requested Documents and Information

The ASTM E1527-21 specifies that the User, City of Ontario, provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity Use Limitations (AULs)
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

No information/documentation was provided by City of Ontario.

### 3.2 User Provided Information

Section 6 of ASTM E1527-21 outlines specific User's responsibilities. This information will help identify the possibility of RECs in connection with the Subject Property. The ASTM Standard provides a questionnaire to help the User to comply with the statutory requirements to perform tasks which would help identify RECs. In general, any Users should make Converse aware of information they have regarding the following:

- Environmental Cleanup Liens filed or recorded against the Property
- Activity and land use limitations that are in place on the Property or have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the Legal Liability Protections (LLP)
- Relationship of the purchase price to fair market value of the Property if it were not contaminated
- Commonly known or reasonably ascertainable information about the Property
- The degree or obviousness of the presence or likely presence of contamination at the Property, and the ability to detect this contamination by appropriate investigation.

The following information was requested from the User, City of Ontario.

### *3.2.1 Environmental Cleanup Liens*

The User had no information regarding environmental cleanup liens or title records.

### *3.2.2 Activity and Use Limitations*

The User did not have any information indicating they were aware of any AULs.

### *3.2.3 Specialized Knowledge or Experience*

The User did not provide any information indicating they had specialized knowledge or experience related to the Subject Property or nearby property.

### *3.2.4 Reason for Significantly Lower Purchase Price*

Converse has no information regarding the purchase price of the Subject Property or comparable properties. The User has not indicated to Converse that there is any conclusion that there was a lower purchase price because of known or suspected contamination at the Subject Property.

### *3.2.5 Commonly Known or Reasonably Ascertainable Information*

The User did not have any information about past uses, specific chemicals at the Subject Property, past spills, environmental cleanup or other reasonably ascertainable information regarding the Subject Property.

### *3.2.6 Obviousness of Contamination*

The User did not have any information based on their knowledge or experience that would be obvious indicators of contamination on the Subject Property.

Unless specifically stated otherwise in the Scope of Services, the purpose of this Phase I ESA was to qualify for the landowner liability protections to CERCLA Liability as described in ASTM E1527-21.

Business risk unrelated to the CERCLA innocent landowners defense are only assessed as specifically agreed in the Scope of Services and discussed in Section 11.0, Additional Non-Scope Services, of this report.

## **3.3 Continuing Obligations**

In order to assert a LLP, the User must satisfy a number of statutory requirements that are generally referred to as Continuing Obligations, which are outside the Scope of Services of the Phase I ESA. Examples of Continuing Obligations include providing legally required notices, stopping continuing releases and complying with land use restrictions. Failure to comply with these and other statutory post-acquisition requirements will jeopardize liability protection.

It is the responsibility of the User to comply with the Continuing Obligations requirements of ASTM E1527-21 and AAI. Anyone seeking LLP protections should take independent action beyond this Phase I ESA to perfect their position.

## 4.0 Owner Provided Information

---

The ASTM E1527-21 specifies that the Property owner and the Key Site Manager provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded AULs
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

Converse was not provided with Subject Property owner contact information. No interview was completed.

## 5.0 Records Review

### 5.1 Physical Setting

Item	Comments
Physical Setting:	The Subject Property is located approximately 765 feet above mean sea level with surface topography sloping towards the south (United States Geological Survey [USGS] Topographic Map, Guasti and Corona North, California, 2018).
Geology:	The Subject Property is underlain by alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast (Division of Mines and Geology, Geologic Map of California, 2010).
Groundwater:	Information regarding regional groundwater was researched on the RWQCB Geotracker website. According to the website, the closest site to the Subject Property with recent groundwater information is located approximately 1.0-mile northeast of the Subject Property. According to an October 2001 closure report for the site, groundwater is located at depths greater than 150-feet beneath ground surface (bgs) and flows in a southwesterly direction.
Potable Water Supply:	Potable water is supplied by the Ontario Municipal Utilities Company.

### 5.2 Historical Review

#### 5.2.1 Aerial Photograph and Map Review

Available historical aerial photographs and maps, which were provided by Environmental Data Resources (EDR), were reviewed. A summary of the review is provided in the following table. Copies of the aerial photographs and maps are provided in Appendix D.

Historical Summary			
Resource and Year	Property	Adjoining Properties	General Vicinity
1897, 1900, and 1903 Topographic Maps	The Subject Property is depicted as undeveloped.	The adjoining properties are primarily depicted as undeveloped.	The general vicinity primarily undeveloped land with sporadic residential developments.
1938 Aerial Photograph 1941 and 1944	The Subject Property appears partially developed for agricultural use.	Adjoining properties appear to be a mix of undeveloped land, agricultural uses	The general vicinity appears to be a mix of undeveloped land, agricultural land, and residential farmsteads. By

2018 Topographic Map 2020 Aerial Photograph	There are no significant identifiable changes in use on the Subject Property.	The dairy farm located north of the northern adjoining portions of the nursery appear to be primarily developed as part of the nursery. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of dairy farms, agricultural uses, and residential and commercial uses.

### 5.2.2 Building Permit Review

Available building permits were requested from the City of Ontario, Department of Building & Safety. No building department records related to the Subject Property were on file with City of Ontario Department of Building & Safety.

### *5.2.3 City Directories*

As there is no physical address associated with the Subject Property, the Subject Property is not listed in the City Directory abstract.

The adjoining properties, where identified in the report, were predominantly noted to be listed under residential uses from as early as 1950.

### *5.2.4 Data Failure*

Historical information regarding the Subject Property indicated the Subject Property was undeveloped land as early as 1897. Therefore, no historical data failure occurred during this assessment.

### *5.2.5 Summary of Historical Property Use*

The Subject Property was undeveloped as early as 1897. The Subject Property appeared partially developed as part of a larger agricultural field from as early as 1938 to 1973. By 1975, the Subject Property appeared developed as part of a larger dairy farm operation located north of the Subject Property; however, no livestock pens, livestock operations, or waste ponds were visible on the Subject Property. From 2009 to 2012, the Subject Property appeared to be vacant. By 2016, the Subject Property appeared developed as part of a larger nursery.

### *5.2.6 Summary of Past Uses of Adjoining Properties*

Adjoining properties were typically undeveloped as early as 1897. By the 1930s, the adjoining properties consisted of a mix of undeveloped land, agricultural uses, and residential farmsteads. By 1975, the adjoining properties to the northwest, north, northeast, east, and west were developed as part of the larger dairy farm that included the Subject Property. By the same time, the remaining adjoining properties appeared developed for livestock farming. By the mid to late 2000s, the livestock farming operations had ceased on the southern adjoining property and the property appeared primarily utilized for truck parking/storage. At the same time, the dairy farm operations on the northwestern, northern, northeastern, eastern, and western adjoining properties had been consolidated to the northern most portions of the dairy farm. The portions of the dairy farm contiguous with the Subject Property appeared primarily vacant by this time. By 2015, the northwestern, northern, northeastern, eastern, and western adjoining properties appeared developed as part of the same agricultural fields as the Subject Property.

### *5.2.7 Summary of Past Uses of the Surrounding Area*

The general vicinity appeared to be a mix of undeveloped land, and sporadic residential uses as early as 1897. By the 1930s, the area was further developed with agricultural fields, and residential farmsteads. The area was further developed with dairy farming operations by the 1970s, with additional residential and commercial development of the area continuing through the early 2000s.

### 5.3 Results of Environmental Records Sources Review

An EDR report of Standard Environmental Record Sources (Records) was prepared specifically for the Property. The search included queries to the following databases for cases within specified ASTM search distances. A copy of the database report is provided in Appendix E.

#### 5.3.1 Property Listings

The Subject Property was not identified on the databases in the EDR report.

#### 5.3.2 Adjoining Properties

The following adjoining properties were identified in the EDR report:

Adjoining Properties	
<b>Site Name:</b>	EDMUNDO SANCHEZ
<b>Databases:</b>	CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST
<b>Address:</b>	13115 ONTARIO AVE
<b>Distance:</b>	216
<b>Direction:</b>	North-Northwest
<b>Elevation:</b>	Higher
<b>Comments:</b>	The listing is associated with the southern adjoining property. The listings relate to the operation of a 550-gallon diesel fuel UST at the site.

<b>Site Name:</b>	AG-SANCHEZ, EDMUNDO
<b>Databases:</b>	UST
<b>Address:</b>	13115 S ONTARIO AVE
<b>Distance:</b>	274
<b>Direction:</b>	Southeast
<b>Elevation:</b>	Lower
<b>Comments:</b>	The listing appears related to the 550-gallon diesel fuel UST. No additional pertinent information was provided.

<b>Site Name:</b>	EDMUNDO SANCHEZ
<b>Databases:</b>	HIST UST
<b>Address:</b>	13115 S ONTARIO AVE
<b>Distance:</b>	274
<b>Direction:</b>	Southeast
<b>Elevation:</b>	Lower

<b>Comments:</b>	The listing appears related to the 550-gallon diesel fuel UST. The listing identified that the UST was installed in 1974. No additional pertinent information was provided.
------------------	---

<b>Site Name:</b>	J & B DAIRY
<b>Databases:</b>	San Bern. Co. Permit
<b>Address:</b>	9309 E RIVERSIDE DR
<b>Distance:</b>	1283
<b>Direction:</b>	North
<b>Elevation:</b>	Higher
<b>Comments:</b>	The listing is related to the larger property located northwest, north, northeast, east, and west of the Subject Property. The listing identified J&B Dairy as being an inactive hazardous waste facility as of 2007.

### 5.3.3 Other Off-site Locations of Concern

Other off-site locations of concern identified by EDR within a maximum one-mile radius from the Subject Property included hazardous waste generators, permitted hazardous materials handlers, ENVIROSTOR/SCH sites, and a solid waste/landfill site.

The potential for environmental concern to the Subject Property from these off-site locations appears to be low due to one or more of the following: type of regulatory listing; distance from the Subject Property; and/or status of the case.

### 5.3.4 Orphan Listings

The EDR database report identified one (1) orphan listing only by street names. These street names were found in the general vicinity of the Subject Property; however, this orphan site appeared to have a low potential for environmental impact to the Subject Property due to the distance from the Subject Property.

## 5.4 Additional Environmental Record Sources

Information requests pertaining to the Subject Property were submitted to the following regulatory agencies.

### Federal Agencies

Source	Comments
U.S. Department of Transportation, Pipeline and Hazardous Material	The PHMSA online mapping system for gas transmission pipelines and hazardous liquid pipelines on the Subject Property or adjacent properties was reviewed ( <a href="https://www.npms.phmsa.dot.gov/PublicViewer/">https://www.npms.phmsa.dot.gov/PublicViewer/</a> ). No pipelines were identified on or adjoining the Subject Property.

Source	Comments
Safety Administration (PHMSA)	

### State Agencies

Source	Comments
California Environmental Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC)	No information regarding the Subject Property was on file with DTSC. The Envirostor website ( <a href="http://www.envirostor.dtsc.ca.gov/public/">http://www.envirostor.dtsc.ca.gov/public/</a> ) was reviewed for information, and the Subject Property was not listed in the database.
Cal/EPA, Regional Water Quality Control Board (RWQCB)	<p>The RWQCB had no records on file for the Subject Property.</p> <p>The Geotracker website (<a href="http://geotracker.waterboards.ca.gov/">http://geotracker.waterboards.ca.gov/</a>) was reviewed for information, and the Subject Property was not listed in the database.</p> <p>Converse noted in the database that there is in area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area, the plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. The Plume was first identified in 1986 when samples from several wells south of the 60 Freeway had detectable concentrations of volatile organic compounds (VOCs), with TCE detected at concentrations up to 75 micrograms per liter (ug/L). Subsequently, the RWQCB initiated an investigation to determine the extent and potential sources of the groundwater contamination in the area. Concentrations of TCE greater than the maximum contaminant level (MCL) of 5 ug/L were detected in samples from 92 of 167 private wells sampled between 1987 and 2005.</p> <p>Since 2005, the RWQCB, Chino Basin Watermaster (CBWM), the City of Ontario and others have collected and analyzed groundwater samples from existing private and municipal wells throughout the footprint of the Plume. Samples collected within the footprint of the Plume between 2007 and 2019 indicated that TCE concentrations were generally decreasing in the western area of the Plume and increasing in the southern area. These trends are associated</p>

Source	Comments
	<p>with a change in the direction of groundwater flow in the basin since 2000. Between 1960 and 2000, the dominant flow direction was to the southwest. Since 2000, however, the groundwater flow direction has been primarily to the south and has been influenced by both the declining agricultural production and the addition of groundwater extraction associated with the operation of the CDA desalter wells located in the southern part of the Chino Basin.</p> <p>Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the threshold 5 ug/l.</p>
<p>California Department of Conservation, California Department of Conservation (DOC), Geologic Energy Management Division (CalGEM)</p>	<p>Converse reviewed the DOC CalGEM Online Well Finder (<a href="https://maps.conservation.ca.gov/doggr/wellfinder/">https://maps.conservation.ca.gov/doggr/wellfinder/</a>). According to the website, no oil or gas wells are located on the Subject Property.</p>

### Local Agencies

Source	Comments
<p>South Coast Air Quality Management District (SCAQMD)</p>	<p>As there is no physical address associated with the Subject Property parcel, SCAQMD could not perform the requested records search.</p>
<p>San Bernardino County Fire Department, Certified Unified Program Agency (CUPA)</p>	<p>There were no agency records pertaining to the Subject Property on file with this agency.</p>
<p>Methane</p>	<p>According to the CalRecycle SWIS website (<a href="https://www2.calrecycle.ca.gov/SolidWaste/Site/Search">https://www2.calrecycle.ca.gov/SolidWaste/Site/Search</a>), a solid waste site is located approximately 0.40-miles south/southwest of the Subject Property at 13434 South Ontario Avenue.</p> <p>The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires</p>

Source	Comments
	sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."

## 6.0 Property Reconnaissance

---

### 6.1 Methodology

On October 2, 2023 Converse visited the Subject Property to evaluate present use and to identify observable environmental conditions at the Subject Property. As Converse was not provided access to the Subject Property, our methodology involved visual observation of the Subject Property from the public right-of-way (Ontario Avenue) west of the Subject Property.

A field-generated map is provided in Appendix B. Pertinent Property photographs are provided in Appendix C.

### 6.2 Limiting Conditions

Converse's findings are based on the Subject Property conditions observed on Wednesday, October 18, 2023.

Converse was not provided access to the Subject Property and the Subject Property was not observable from the public right-of-way (Ontario Avenue). Therefore, Converse was unable to make any specific observations of the Subject Property other than that the Subject Property is developed as part of a larger nursery.

### 6.3 Interior Observations of Property

Converse was not provided access to the Subject Property and therefore was not able to make observations of the Subject Property.

### 6.4 Exterior Observations of Property

Converse was not provided access to the Subject Property and therefore was not able to make observations of the Subject Property.

### 6.5 Current Uses of Adjoining Properties

Based on our research and observations during our Subject Property visit, the Subject Property is bordered by the following:

Adjoining Property Use	
Direction	Current Development
North	Nursery (9309 East Riverside Drive)
Northeast	Nursery (9309 East Riverside Drive)
East	Nursery (9309 East Riverside Drive)
Southeast	Truck and recreational vehicle storage yard (13115 Ontario Avenue)
South	Truck and recreational vehicle storage yard (13115 Ontario Avenue)
Southwest	Truck and recreational vehicle storage yard (13115 Ontario Avenue)
West	Nursery (9309 East Riverside Drive)
Northwest	Nursery (9309 East Riverside Drive)

## **6.6 Current Uses of Surrounding Area**

Based on our research and observations during our Subject Property visit, the surrounding area of the Subject Property consists of agricultural uses, dairy farms, residential, and commercial uses.

## 7.0 Interviews

---

During the interviews, the owners and occupants were asked if they had any available documents that would be helpful. The documents that were requested are detailed in Section 4.0 of this report:

<b>Interview:</b>	<b>Comments:</b>
Property Owner:	Converse was not provided contact information for the Subject Property owner. No owner interview was conducted.
Tenant/ Occupant:	Converse was not provided access to the Subject Property. No tenant/occupant interviews were conducted.
State or Local Government Officials:	Other than the information provided in Section 5.4, no other information was provided by a government official.
Owners and Occupants of Neighboring Sites:	No interviews of owners or occupants of neighboring sites were conducted.

## 8.0 Findings & Opinions

---

A cursory summary of findings is provided below. However, details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

The Subject Property is owned by 15 Dairy Farm, LLC, and consists of a portion of a larger nursery that extends north of the Subject Property.

The Subject Property was undeveloped as early as 1897. The Subject Property appeared partially developed as part of a larger agricultural field from as early as 1938 to 1973. By 1975, the Subject Property appeared developed as part of a larger dairy farm operation located north of the Subject Property; however, no livestock pens, livestock operations, or waste water ponds were visible on the Subject Property. From 2009 to 2012, the Subject Property appeared to be vacant. By 2016, the Subject Property appeared developed as part of a larger nursery.

According to the RWQCB Geotracker database there is an area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area, The Plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the regulatory threshold 5 ug/l.

According to the CalRecycle SWIS website (<https://www2.calrecycle.ca.gov/SolidWaste/Site/Search>), a solid waste site is located approximately 0.40-miles south/southwest of the Subject Property at 13434 South Ontario Avenue.

The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."

The Subject Property is not listed in the regulatory database report.

The following adjoining properties are listed in the regulatory database report:

- 13115 Ontario Avenue (southern adjoining) - The site is listed in the CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST, and UST databases. The listings appear related to the operation of a 550-gallon diesel fuel UST. The listings identified that the UST was installed in 1974.
- 9309 East Riverside Drive (northwestern, northern, northeastern, eastern, and western adjoining) - The site is listed in the San Bern Co. Permit database. The listing identified J&B Dairy as being an inactive hazardous waste facility as of 2007.

### **Recognized Environmental Conditions (RECs):**

- The current and historical agricultural uses on the Subject Property.
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was not visible from the public right-of-way (Ontario Avenue).
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

The following environmental concerns were noted:

- The operation of a UST on the southern contiguous property is considered an environmental concern that does not appear to rise to the level of a REC based on the lack of information suggesting any unauthorized releases.

Per the ASTM Section 12.8, Additional Investigation, to detect the presence of hazardous materials and petroleum products, it is our opinion that no additional investigation is warranted to detect hazardous materials or petroleum products within the context of this Phase I ESA. A site reconnaissance should be conducted at the time of the Phase II Environmental Site Assessment.

## 9.0 Conclusions & Recommendations

---

Converse has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-21 at Assessor Parcel Number (APN) 0218-111-09 in the City of Ontario, San Bernardino County, California. Any exceptions to, or deletions from, this practice are described in the Limitations and Exceptions of Assessment section of this report. This assessment has revealed the following *recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps* in connection with the Subject Property except for the following:

### **Recognized Environmental Conditions (RECs):**

- The current and historical agricultural uses on the Subject Property.
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was not visible from the public right-of-way (Ontario Avenue).
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed to significantly alter the recommendations included in this report.

The following environmental concerns were noted:

- The operation of a UST on the southern contiguous property is considered an environmental concern that does not appear to rise to the level of a REC based on the lack of information suggesting any unauthorized releases.

Based on the findings, Converse recommends assessment of shallow soils across the Subject Property for the presence of pesticides and metals historically used in agricultural operations.

No assessment related to the Archibald plume is deemed necessary based on the depth to groundwater and reported concentrations of TCE in the vicinity of the Subject Property are below the maximum contaminant level (MCL).

Any future redevelopment of the Subject Property should be in accordance with the City of Ontario Methane Ordinance.

It is recommended that the Site Reconnaissance be completed at the time of the Phase II Environmental Site Assessment.

## 10.0 Deviations & Limitations

---

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property and the Subject Property was not observable from the public right-of-way (Ontario Avenue).
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed to significantly alter the recommendations included in this report.

## 11.0 Additional Non-Scope Services

---

There are environmental issues outside the scope of the ASTM E1527-21 that can be assessed in connection with a commercial real estate transaction. These are dealt with as non-scope considerations since they do not typically present a Superfund Liability. The specific level of inquiry (if any) is defined in the Proposal which contains a Scope of Work. These non-scope services are very client specific and not covered by the ASTM standard. They are frequently related to the business environmental risk which is defined in the standard as "risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate".

No non-scope issues were addressed during this assessment.

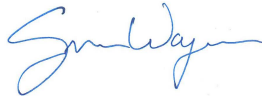

## 12.0 Signature of Environmental Professional

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in A§312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

**Site Assessor**

---

Spencer Wagner  
Project Environmental Scientist

**Senior Reviewer**

---

Norman S. Eke  
Senior Vice President/Managing Officer

Spencer Wagner - Project Environmental Scientist

Norman S. Eke - Senior Vice President/Managing Officer

This Phase I ESA was completed by the above Environmental Professional. A complete list of preparers, and their responsibilities for this assessment, is provided in the following section (Section 13.0, List of Preparers).

## 13.0 List of Preparers

---

### **Norman S. Eke**

Senior Vice President

B.A., Liberal Studies, Environmental Studies Emphasis, University of California, Santa Barbara, 1988.

Cal/OSHA Certified Asbestos Consultant, #96-2093

NIOSH 582 Equivalent Training

Senior Vice President and Managing Officer of Converse's California Environmental offices. Mr. Eke has served as the Principal-in-Charge and Contract Administrator to deliver services to our public agency and private clients. Mr. Eke has 33 years of experience in the fields of Environmental Due Diligence including Phase I and Phase II Environmental Site Assessments, Asbestos surveys/specifications/abatement monitoring, Preliminary Endangerment Assessments and associated Supplemental Site Investigations and Removal Action Work Plans/Implementation, various forms of Remediation, Human Health Risk Assessment and Indoor Air Quality. Mr. Eke is a former Subcommittee Chairman for E.50-02 Real Assessment and Management of the ASTM E.50 Committee on Environmental Assessment, Risk Management, Corrective Action, which includes Phase I ESA standards.

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, and Report Review.

### **Spencer Wagner**

Senior Staff Environmental Scientist

B.A., Environmental Science and Policy, California State University, Long Beach, 2006

B.A., Geography, California State University, Long Beach, 2006

Certified Wood Destroying Organism (WDO) Inspector

Mr. Wagner has over 17 years' experience conducting Phase I and II Environmental Site Assessments throughout California. Mr. Wagner has completed Phase I ESAs on undeveloped land, residential properties, commercial/retail facilities, industrial facilities, and school sites. His Phase II ESA experience includes collection of soil matrix, soil vapor, indoor air and groundwater samples. Phase II projects worked on have included residential properties, commercial warehousing sites, school sites, dry cleaning facilities, automotive service sites, metal plating facilities and multi-tenant commercial properties

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, Historical Research, Regulatory Agency Interaction, Property Reconnaissance, Interviews, and Report Generation.

## 15.0 List of Acronyms

---

The following is a list of acronyms that may have been noted in the report. This is not an all inclusive list and may include acronyms that are not found in your report but are commonly utilized in environmental assessments. Additional acronyms pertaining to regulatory agency documents/listings can be found in the regulatory database report, which is provided as an appendix to this report.

**AAI** - All Appropriate Inquiries

**ACM** - Asbestos-containing Material

**APN** - Assessor's Parcel Number

**APCD** - Air Pollution Control District

**AQMD** - Air Quality Management District

**AST** - Aboveground Storage Tank

**ASTM** - American Society of Testing and Materials

**AUL** - Activity Use Limitation

**BER** - Business Environmental Risk

**BTEX** - Benzene, Toluene, Ethylbenzene, and Xylenes

**Cal/EPA** - California Environmental Protection Agency

**CalGEM** - (California Department of Conservation), Geologic Energy Management Division

**CERCLA** - Comprehensive Environmental Response, Compensation and Liability Act

**CFR** - Code of Federal Regulations

**CREC** - Controlled Recognized Environmental Condition Recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

**CUPA** - Certified Unified Protection Agencies

**de minimis condition** - A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a REC nor a CREC.

**DOC** - (California) Department of Conservation

**DPW** - (Los Angeles County) Department of Public Works

**DTSC** - Department of Toxic Substances Control

**DWP** - (City of Los Angeles) Department of Water and Power

**EDR** - Environmental Data Resources

**EHD** - Environmental Health Department

**EP** - Environmental Professional

**EPA** - United States Environmental Protection Agency

**ESA** - Environmental Site Assessment

**ERIS** - Environmental Risk Information Systems

**(x)FD** - (City/County)Fire Department

**HMS** - Hazardous Material Site

**HREC** - Historic Recognized Environmental Condition: A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

**HVAC** - Heating, Ventilation, Air Conditioning

**IAQ** - Indoor Air Quality

**LACSD** -Los Angeles County Sanitation Districts

**LBP** - Lead-based Paint

**LLP** - Landowner Liability Protections

**LQG** - Large Quantity Generator

**LUST** - Leaking Underground Storage Tank

**mg/kg** - milligram per kilogram

**mg/L** - milligram per Liter

**MSL** - Mean Sea Level

**MTBE** - Methyl Tertiary Butyl Ether

**ND** - None Detected

**NFA** - No Further Action

**NOV** - Notice of Violation

**PEC** - Potential Environmental Concern

**PFAS** - Perfluoroalkyl and Polyfluoroalkyl Substances

**PHMSA** - US Department of Transportation, Pipeline and Hazardous Materials Safety Administration

**PCB** - Polychlorinated biphenyls

**PCE** - Perchloroethylene or Tetrachloroethylene

**pCi/L** - picoCuries per Liter

**ppb** - parts per billion

**ppm** - parts per million

**PRP** - Potential Responsible Party

**RCRA** - Resources Conservation and Recovery Act

**REC** - Recognized Environmental Condition; (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

**RP** - Responsible Party

**RWQCB** - Regional Water Quality Control Board

**SCAQMD** - South Coast Air Quality Management District

**SDS** - Safety Data Sheets

**SQG** - Small Quantity Generator

**SVOC** - Semi-volatile Organic Compound

**TCE** - Trichloroethylene or Trichloroethene

**TPH** Total Petroleum Hydrocarbons

**µg/L** - micrograms per Liter

**USGS** - United States Geological Survey

**UST** - Underground Storage Tank

**VCP** - Voluntary Cleanup Program

**VOCs** - Volatile Organic Compounds

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Converse Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

**Certification #** FF9B-40C3-9439  
**PO #** NA  
**Project** 19-16-123-58

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: FF9B-40C3-9439

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Converse Consultants (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**Search Results:**

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal NPL (Superfund) sites***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing  
SEMS..... Superfund Enterprise Management System

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS..... Corrective Action Report

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

### ***Lists of Federal RCRA generators***

RCRA-LQG..... RCRA - Large Quantity Generators  
RCRA-SQG..... RCRA - Small Quantity Generators  
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

## EXECUTIVE SUMMARY

US ENG CONTROLS..... Engineering Controls Sites List

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***Lists of state and tribal leaking storage tanks***

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Lists of state and tribal registered storage tanks***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***Lists of state and tribal voluntary cleanup sites***

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 04/24/2023 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Lists of Registered Storage Tanks***

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: OBSERVATION: Observed empty 55-gallon drums in a containment structure and empty tanks throughout the facility which have been stored on site for an unknown amount of time. The contents of the tanks and containers were unknown and they were not labeled at the time of the inspection. CORRECTIVE ACTION: Submit a copy of a disposal receipt showing the removal of the empty tanks and containers or a signed statement as to how they have been sold, used, or otherwise managed.

Violation Date: 11-17-2022  
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 01/09/2023. OBSERVATION: Hazardous materials were observed on site at the time of the inspection that are not listed in the most current CERS inventory or are listed in lesser quantities. CORRECTIVE ACTION: Submit a signed statement that an updated inventory has been submitted into CERS.

**WDS:**

Name: JOHN VAN VEEN DAIRY  
Address: 9581 CHINO AVE  
City: ONTARIO  
Facility ID: Santa Ana River 365447002  
Facility Type: Agricultural - Facility that treats and/or disposes of the wastes associated with confined and concentrated animal feeding, confined animal feeding, confined animal holding, confined and concentrated aquatic animal production facilities, and aquaculture. the treatment and/or disposal of agricultural return water is included in this category.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

NPDES Number: CAG018001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Subregion: 8

Facility Telephone: Not reported  
Facility Contact: Not reported  
Agency Name: VAN VEEN JOHN  
Agency Address: 9581 CHINO AVENUE  
Agency City,St,Zip: ONTARIO 91761  
Agency Contact: JOHN VAN VEEN  
Agency Telephone: Not reported  
Agency Type: Private  
SIC Code: 241  
SIC Code 2: Not reported  
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain

nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Primary Waste: STORMS  
Waste Type2: N  
Waste2: Stormwater Runoff  
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Secondary Waste: Solid Wastes  
Secondary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Design Flow: 0  
Baseline Flow: 0  
Reclamation: No reclamation requirements associated with this facility.  
POTW: The facility is not a POTW.  
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

Telephone 206-553-8665

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

Next Scheduled EDR Contact: 11/28/2011  
Data Release Frequency: No Update Planned

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/22/2023  
Date Data Arrived at EDR: 07/06/2023  
Date Made Active in Reports: 07/24/2023

Data Release Frequency: Quarterly

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2023  
Date Data Arrived at EDR: 06/23/2023  
Date Made Active in Reports: 09/20/2023  
Number of Days to Update: 89

Source: Environmental Protection Agency  
Telephone: 703-603-8704  
Last EDR Contact: 06/23/2023  
Next Scheduled EDR Contact: 10/09/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/22/2023  
Date Data Arrived at EDR: 07/06/2023  
Date Made Active in Reports: 07/24/2023

Last EDR Contact: 09/01/2023  
Next Scheduled EDR Contact: 10/23/2023  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: 800-424-9346
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/23/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 07/24/2023	Source: EPA
Date Data Arrived at EDR: 07/31/2023	Telephone: 800-424-9346
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895

Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/25/2023	Source: Department of the Navy
Date Data Arrived at EDR: 05/31/2023	Telephone: 843-820-7326
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 54	Next Scheduled EDR Contact: 11/20/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695

Last EDR Contact: 09/20/2023

Next Scheduled EDR Contact: 01/01/2024

Data Release Frequency: Quarterly

## ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 04/24/2023

Date Data Arrived at EDR: 04/25/2023

Date Made Active in Reports: 07/13/2023

Number of Days to Update: 79

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 07/25/2023

Next Scheduled EDR Contact: 11/06/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 04/24/2023

Date Data Arrived at EDR: 04/25/2023

Date Made Active in Reports: 07/13/2023

	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 04/17/2023	Source: CalEPA
Date Data Arrived at EDR: 04/18/2023	Telephone: 916-323-2514
Date Made Active in Reports: 07/11/2023	Last EDR Contact: 07/18/2023
Number of Days to Update: 84	Next Scheduled EDR Contact: 10/30/2023
	Data Release Frequency: Quarterly

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/22/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 05/23/2023	Telephone: 202-307-1000
Date Made Active in Reports: 07/10/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 48	Next Scheduled EDR Contact: 12/04/2023

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## Records of Emergency Release Reports

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 06/19/2023	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 06/23/2023	Telephone: 202-366-4555
Date Made Active in Reports: 09/20/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 89	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## CHMIRS: California Hazardous Material Incident Report System

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 04/15/2023	Source: Office of Emergency Services
Date Data Arrived at EDR: 04/28/2023	Telephone: 916-845-8400
Date Made Active in Reports: 07/14/2023	Last EDR Contact: 07/18/2023
Number of Days to Update: 77	Next Scheduled EDR Contact: 10/30/2023
	Data Release Frequency: Semi-Annually

## LDS: Land Disposal Sites Listing (GEOTRACKER)

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 06/05/2023	Source: State Water Quality Control Board
Date Data Arrived at EDR: 06/05/2023	Telephone: 866-480-1028
Date Made Active in Reports: 08/25/2023	Last EDR Contact: 09/06/2023
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/18/2023
	Data Release Frequency: Quarterly

## MCS: Military Cleanup Sites Listing (GEOTRACKER)

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 06/05/2023	Source: State Water Resources Control Board
Date Data Arrived at EDR: 06/05/2023	Telephone: 866-480-1028
Date Made Active in Reports: 08/25/2023	Last EDR Contact: 09/06/2023
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/18/2023
	Data Release Frequency: Quarterly

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch
Date Data Arrived at EDR: 01/03/2013	Telephone: N/A
Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 07/31/2023
Number of Days to Update: 88	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

Next Scheduled EDR Contact: 12/11/2023  
Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

Date of Government Version: 01/10/2022	Source: Los Angeles County Department of Public Works

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

## CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022  
Date Data Arrived at EDR: 11/16/2022  
Date Made Active in Reports: 02/06/2023

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Longitude (West): 117.601745 - 117° 36' 6.28"  
Universal Tranverse Mercator: Zone 11  
UTM X (Meters): 444438.7  
UTM Y (Meters): 3763855.2  
Elevation: 765 ft. above sea level

## USGS TOPOGRAPHIC MAP

Target Property Map: 12015973 GUASTI, CA  
Version Date: 2018  
  
Southeast Map: 12014834 CORONA NORTH, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

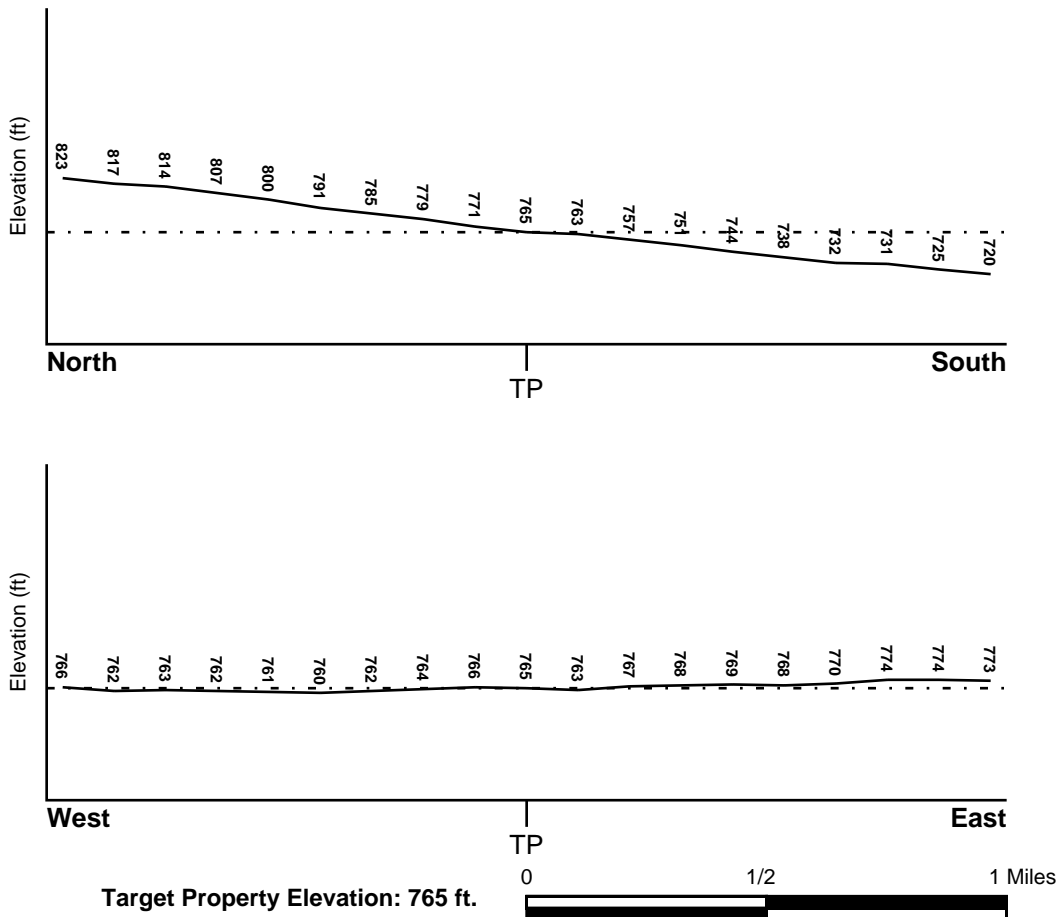

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8638H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8639H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### Soil Map ID: 2

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b><i>MAPLE EARLY EDUCATIO</i></b> Status: No Further Action Facility Id: 36010047	<b><i>2547 EAST RIVERSIDE</i></b>	<b><i>NE 1/4 - 1/2 (0.426 mi.)</i></b>	<b><i>8</i></b>	<b><i>11</i></b>

# GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

## TARGET PROPERTY ADDRESS

CITY OF ONTARIO - 15 DAIRY FARM, LLC  
APN 0218-111-09  
ONTARIO, CA 91761

## TARGET PROPERTY COORDINATES

Latitude (North): 34.015607 - 34° 0' 56.19"  
Longitude (West): 117.601745 - 117° 36' 6.28"  
Universal Tranverse Mercator: Zone 11  
UTM X (Meters): 444438.7  
UTM Y (Meters): 3763855.2  
Elevation: 765 ft. above sea level

## USGS TOPOGRAPHIC MAP

Target Property Map: 12015973 GUASTI, CA  
Version Date: 2018  
  
Southeast Map: 12014834 CORONA NORTH, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

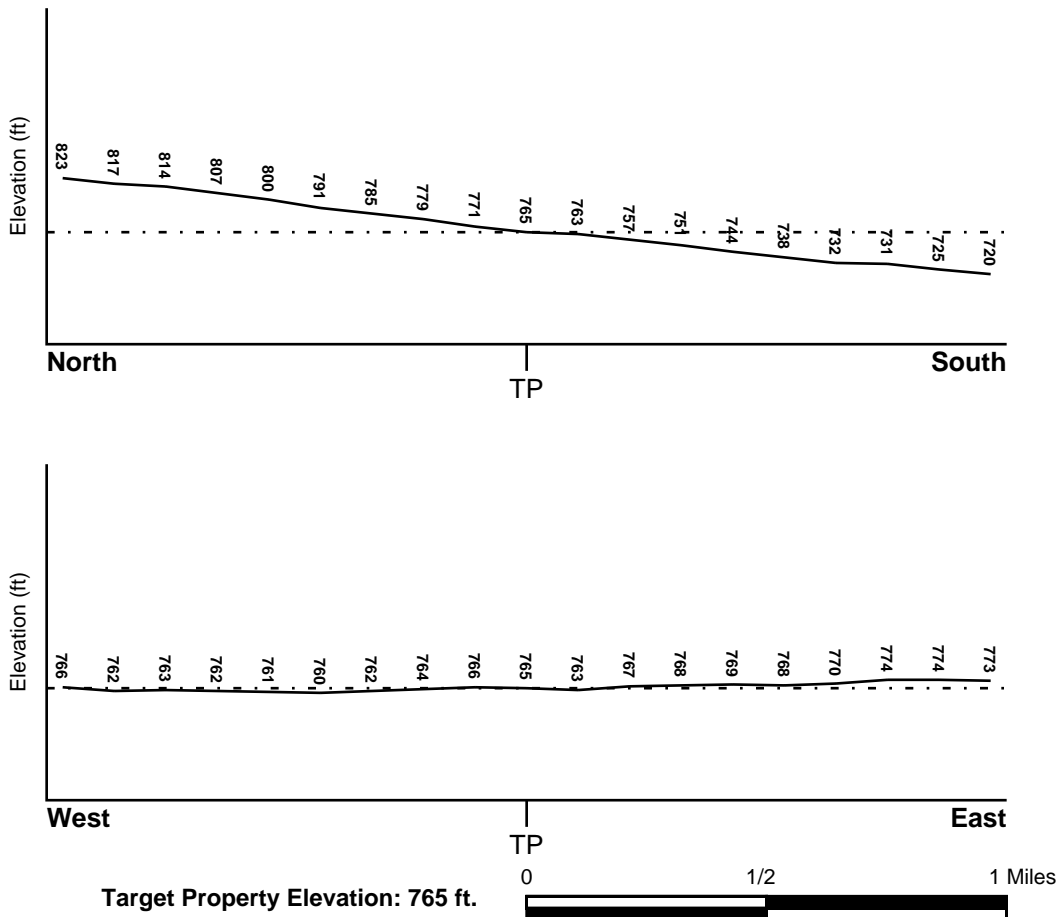

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8638H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8639H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

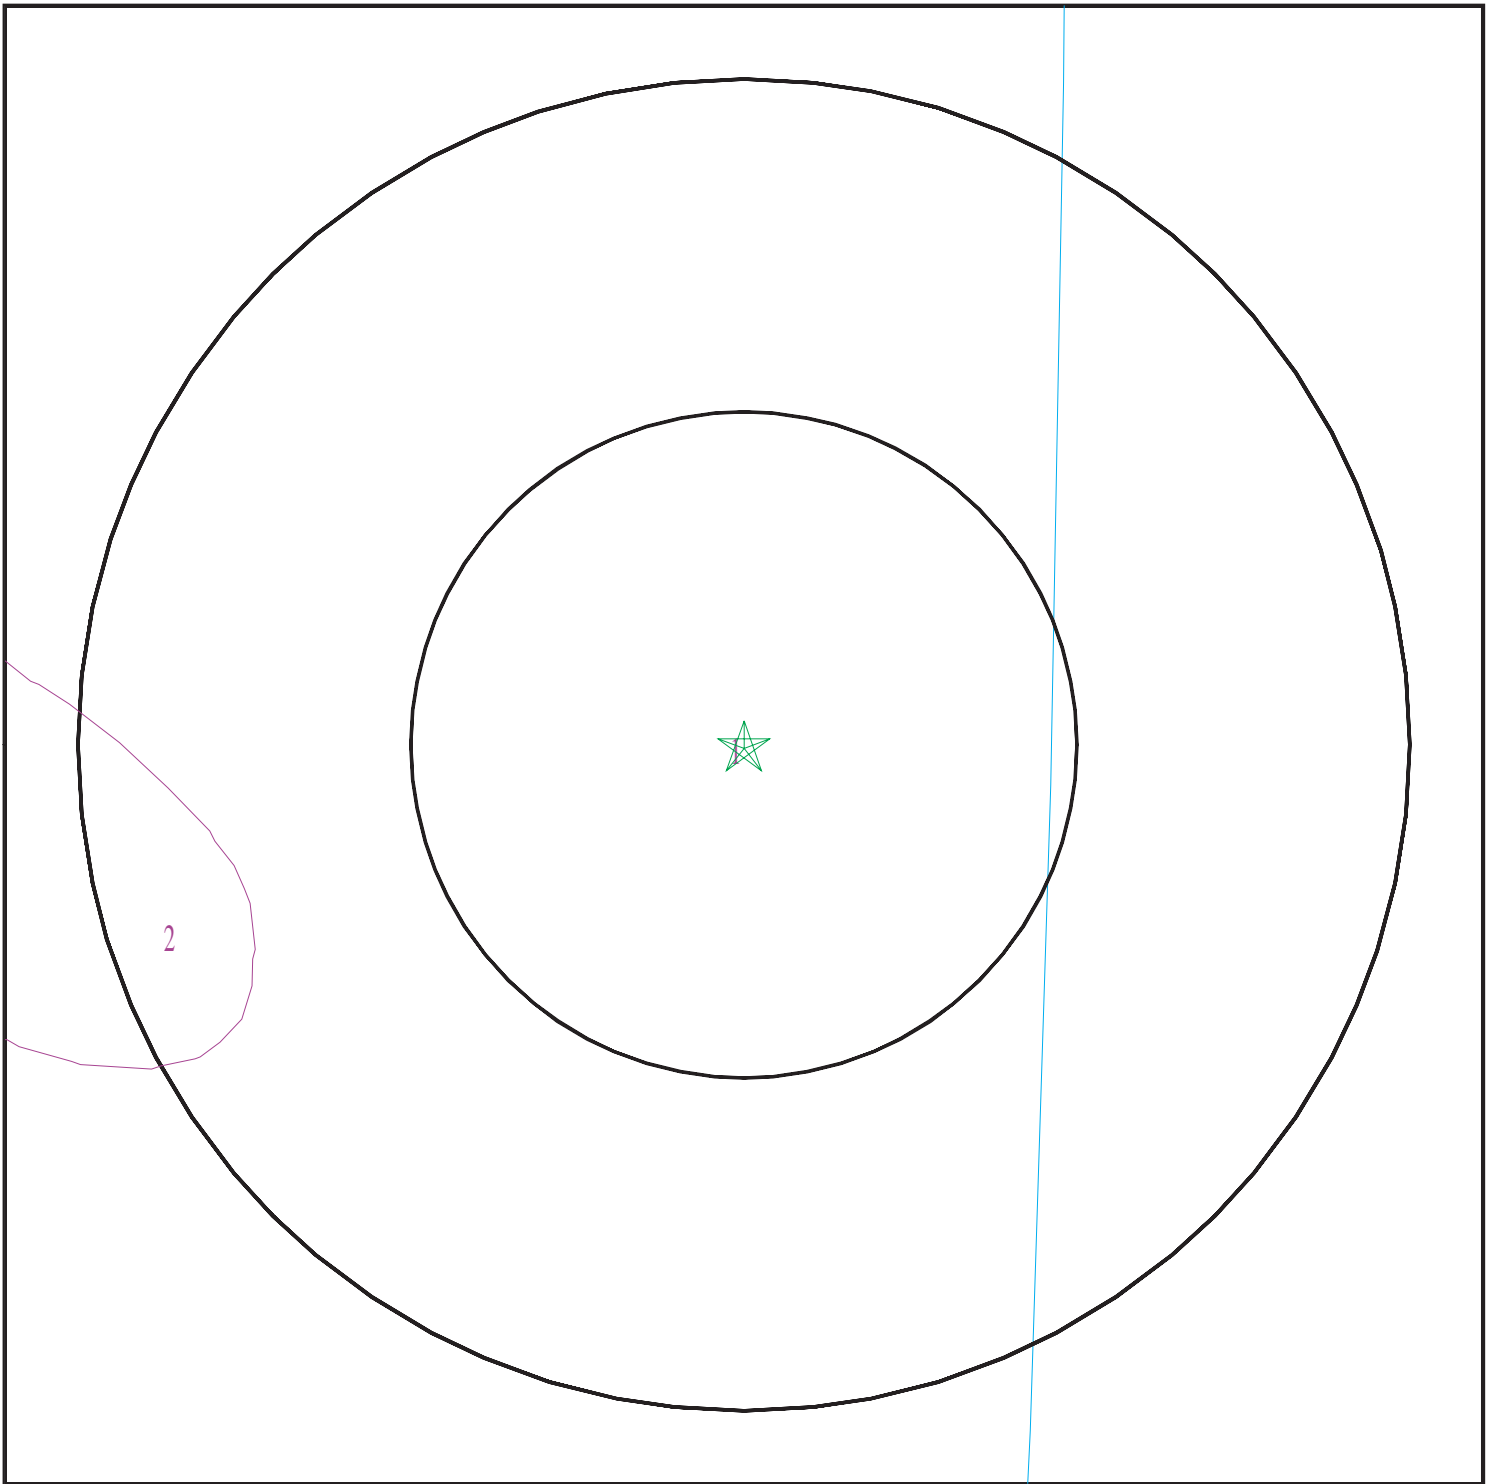

Era: Cenozoic  
System: Quaternary  
Series: Quaternary

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### Soil Map ID: 2

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	22 inches	59 inches	stratified loamy sand to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Ontario, California  
Converse Project No. 23-16-123-58

Ms. Hernandez,

Converse Consultants (Converse) is pleased to submit the attached report that summarizes the activities and the results of a Phase I Environmental Site Assessment (Phase I ESA) that was conducted at the referenced property.

A summary of the assessment is presented in the Executive Summary, as well as in Sections 8.0, 9.0, and 10.0 of the report. Recognized Environmental Conditions were identified during this assessment and additional assessment appears warranted.

We appreciate the opportunity to be of service. Should you have any questions or comments regarding this report, please contact Spencer Wagner at (562) 505-5219 or Norman Eke at (626) 930-1260.

# Executive Summary

---

The following is an Executive Summary of the Phase I Environmental Site Assessment (Phase I ESA) that was conducted by Converse Consultants (Converse). Please refer to the appropriate sections of the report for a complete discussion of these issues. In the event of a conflict between this Executive Summary and the report, or an omission in the Executive Summary, the report shall prevail.

This report presents the results of the Converse Phase I ESA performed at 9309 East Riverside Drive in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by the City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical within the scope of an ESA, Recognized Environmental Conditions (RECs) in connection with the Subject Property.

Converse has compiled and reviewed information that was obtained from interviews, document research, and on-site and area reconnaissance to identify potential environmental conditions at the Property in conformance with the ASTM Standard E: 1527-21 Environmental Site Assessment Standard Practice (ASTM Standard: E1527-21). This Phase I ESA was conducted during the period of September 19, 2023 to October 25, 2023.

The Subject Property was undeveloped as early as 1897, with a roadway bisecting the Subject Property from east to west. The Subject Property appeared developed for agricultural use across all or portions of the Subject Property from as early as 1938 to 1954. By 1966, the majority of the Subject Property appeared developed with a possible dairy farm that included out buildings, and livestock pens. A possible dairy waste pond was visible in the southeastern portion of the Subject Property in 1985 and 1989. The dairy pond was no longer present by 1994; however a large area north of the former dairy pond appeared covered with water. By 2015, remaining dairy operations appeared limited to only the northern portion of the Subject Property, and by 2020, the Subject Property appeared primarily developed with the existing nursery.

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural uses.
- The historical dairy farm and livestock farming operations, including the presence of potential waste ponds.
- The identification of a 500-gallon gasoline UST with no records of removal or abandonment.
- Inspection reports indicating leaking hazardous containers and an area of impacted soil.
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue and East Riverside Drive.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

The following environmental concerns were noted:

- The operation of a UST on the southern contiguous property is considered an environmental concern that does not appear to rise to the level of a REC based on the lack of information suggesting any unauthorized releases.

Based on the findings, Converse recommends the following additional assessment activities:

- Assessment of shallow soils across the Subject Property for the presence of pesticides and metals historically used in agricultural operations.
- Methane screening in the areas of the Subject Property historically occupied by possible dairy farm and livestock farming operations, including the possible waste ponds in the southeastern portion of the Subject Property.
- Subsurface sampling in the vicinity of the structures in the northern portion of the Subject Property where hazardous materials were likely stored according to historical inspection reports.
- Geophysical survey to determine whether any USTs are present at the Subject Property.
- Should USTs be discovered, subsurface sampling in the vicinity of the UST(s) is recommended to assess for any potential releases that have impacted subsurface soils.

No assessment related to the Archibald plume is deemed necessary based on the depth to groundwater and reported concentrations of TCE in the vicinity of the Subject Property are below the maximum contaminant level (MCL).

Any future redevelopment of the Subject Property should be in accordance with the City of Ontario Methane Ordinance.

It is recommended that the Site Reconnaissance be completed at the time of the Phase II Environmental Site Assessment.

# 1.0 Introduction

---

## 1.1 Purpose and Scope of Services

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at 9309 East Riverside Drive in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical, Recognized Environmental Conditions (RECs) in connection with the Property. The term Recognized Environmental Conditions is defined in Section 1.1.1 of the American Society of Testing and Materials (ASTM) Standard Practice as the presence or likely presence of any hazardous substances or petroleum products in, at or on a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

This Phase I ESA was completed in accordance with our proposal dated September 19, 2023. Our work consisted of the following and was completed in general conformance with the scope and limitations of the ASTM Practice E1527-21 and complies with standards and practices set forth in 40 Code of Federal Regulations (CFR) Part 312 for AAI.

- Interviews with the Property owner representatives
- Property and vicinity reconnaissance
- Review of regulatory agency records
- Description of physical setting
- Historical review
- Interviews with public agency personnel
- Preparation of this report

## 1.2 Non-Scope Considerations

There are a number of non-scope issues which are sometimes assessed concurrently with a Phase I ESA. Unless specifically agreed in the contract proposal documents, these non-scope considerations are not included as part of the Phase I ESA. Examples of non-scope issues include:

- Asbestos-containing Building Materials unrelated to release into the environment
- Biological Agent
- Cultural & Historic Resources
- Diffuse Anthropogenic Pollution
- Ecological Resources
- Endangered Species
- Health & Safety
- Indoor Air Quality unrelated to release of hazardous substances or petroleum products in the environment
- Industrial Hygiene
- Lead-based Paint unrelated to releases in the environment
- Lead in Drinking Water
- Mold or microbial growth conditions
- PCB-containing building materials (for example, interior fluorescent light ballasts, paint, and caulk)
- Polyfluoroalkyl Substances
- Naturally-occurring Radon
- Regulatory Compliance

- Substances not defined as hazardous substances unless or until such substances are classified as CERCLA hazardous substances.
- Wetlands

No Non-Scope issues were addressed in this report.

### **1.3 Significant Assumptions**

No assumptions were made for this assessment that need to be noted as significant.

### **1.4 Limitations and Expectations**

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property and observation of the Subject Property was limited to the public right-of-way on Ontario Avenue and East Riverside Drive.
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

### **1.5 Special Terms and Conditions**

No special terms or conditions were identified by the User.

### **1.6 Reliance**

This report is for the sole benefit and exclusive use of City of Ontario in accordance with the terms and conditions under which these services have been provided. Its preparation has been in accordance with generally accepted environmental practices. No other warranty, either express or implied, is made. The Scope of Services associated with the report was designed solely in accordance with the objectives, schedule, budget, and risk-management preferences of City of Ontario.

This report should not be regarded as a guarantee that no further contamination, beyond that which could be detected within the scope of this assessment, is present at the Property. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation of the property at the time of the assessment. Also, events may occur after the Property visit, which may result in contamination of the Property. Additional information, which was not found or available to Converse at the time of report preparation, may result in a modification of the conclusions and recommendations presented.

Any reliance on this report by Third Parties shall be at the Third Party's sole risk. Should City of Ontario wish to identify any additional relying parties not previously identified, a completed Application of Authorization to Use (see Appendix A of this report) must be submitted to Converse Consultants.

### ***1.7 Continued Viability***

This report has continued viability of 180 days from the following:

- **Interviews:** Converse was not provided with Subject Property owner contact information by the Client. No interview was completed.
- **Review of Government Records:** September 26, 2023
- **Visual Inspection:** October 18, 2023
- **Declaration of Environmental Professional (EP):** October 25, 2023
- **Lien Search:** Not Applicable

## 2.0 Property Description

Item	Comment
Current Use(s) of the Property	<p>The Subject Property is owned by 15 Dairy River, LLC, and is occupied by a nursery.</p> <p>A Subject Property location map and a field generated Subject Property plan are provided in Appendix B. Pertinent Subject Property photographs are provided in Appendix C.</p>
Location and Legal Description	<p>The Subject Property is located at 9309 East Riverside Drive, Ontario, California 91761. The Subject Property is located on the southeast corner of the intersection of East Riverside Drive and Ontario Avenue. The Subject Property is located approximately 0.75-miles south of Interstate 60, and 2.83-miles west of the Interstate 15.</p> <p>The Subject Property consists of five (5) parcels and is approximately 15-acres. The San Bernardino County Assessor's Parcel Numbers for the Subject Property are 0218-111-08, -11, -12, -49, and -50.</p>
Zoning Information	<p>According to the City of Ontario, Planning Department, the Subject Property is zoned as LDR for low density residential.</p>
Property Characteristics	<p>The Subject Property consists of five (5) parcels. The Subject Property is generally level, sloping slightly to the south. A residential structure and several open-air outbuildings were observed in the northwestern portion of the Subject Property. Views of the structures were limited to the public right-of-way on Ontario Avenue and East Riverside Drive. The remainder of the Subject Property included rows of potted plants of various sizes, and various shade/greenhouse structures.</p>
Description of Property Structure(s)	<p>Converse was not provided access to the Subject Property and therefore could not inspect the Subject Property structures. The single-family residential building in the northwestern portion of the Subject Property was a single-story structure with painted stucco exterior. The remaining outbuildings in the northwestern portion of the Subject Property appeared to be wood-framed with possible corrugated metal roofing.</p>

**The following services were present at the Property at the time of the assessment.**

Item	Comments
Electricity:	Southern California Edison
Gas:	The Gas Company
Potable Water:	The Subject Property is serviced by the City of Ontario; however, it is possible that onsite water wells are also present based on the historical agricultural operations on the Subject Property.
Sanitary Sewer:	City of Ontario
Heating, Ventilation, Air Conditioning (HVAC):	Converse was not provided access to the Subject Property and could not verify means of heating, ventilation, or air air conditioning.
Solid Waste:	City of Ontario

## 3.0 User Provided Information & Responsibilities

---

### 3.1 Requested Documents and Information

The ASTM E1527-21 specifies that the User, City of Ontario , provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity Use Limitations (AULs)
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

No information/documentation was provided by City of Ontario.

### 3.2 User Provided Information

Section 6 of ASTM E1527-21 outlines specific User's responsibilities. This information will help identify the possibility of RECs in connection with the Subject Property. The ASTM Standard provides a questionnaire to help the User to comply with the statutory requirements to perform tasks which would help identify RECs. In general, any Users should make Converse aware of information they have regarding the following:

- Environmental Cleanup Liens filed or recorded against the Property
- Activity and land use limitations that are in place on the Property or have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the Legal Liability Protections (LLP)
- Relationship of the purchase price to fair market value of the Property if it were not contaminated
- Commonly known or reasonably ascertainable information about the Property
- The degree or obviousness of the presence or likely presence of contamination at the Property, and the ability to detect this contamination by appropriate investigation.

The following information was requested from the User, City of Ontario.

### *3.2.1 Environmental Cleanup Liens*

The User had no information regarding environmental cleanup liens or title records.

### *3.2.2 Activity and Use Limitations*

The User did not have any information indicating they were aware of any AULs.

### *3.2.3 Specialized Knowledge or Experience*

The User did not have any information indicating they had specialized knowledge or experience related to the Subject Property or nearby property.

### *3.2.4 Reason for Significantly Lower Purchase Price*

Converse has no information regarding the purchase price of the Subject Property or comparable properties. The User has not indicated to Converse that there is any conclusion that there was a lower purchase price because of known or suspected contamination at the Subject Property.

### *3.2.5 Commonly Known or Reasonably Ascertainable Information*

The User did not have any information about past uses, specific chemicals at the Subject Property, past spills, environmental cleanup or other reasonably ascertainable information regarding the Subject Property.

### *3.2.6 Obviousness of Contamination*

The User did not have any information based on their knowledge or experience that would be obvious indicators of contamination on the Subject Property.

Unless specifically stated otherwise in the Scope of Services, the purpose of this Phase I ESA was to qualify for the landowner liability protections to CERCLA Liability as described in ASTM E1527-21.

Business risk unrelated to the CERCLA innocent landowners defense are only assessed as specifically agreed in the Scope of Services and discussed in Section 11.0, Additional Non-Scope Services, of this report.

## **3.3 Continuing Obligations**

In order to assert a LLP, the User must satisfy a number of statutory requirements that are generally referred to as Continuing Obligations, which are outside the Scope of Services of the Phase I ESA. Examples of Continuing Obligations include providing legally required notices, stopping continuing releases and complying with land use restrictions. Failure to comply with these and other statutory post-acquisition requirements will jeopardize liability protection.

It is the responsibility of the User to comply with the Continuing Obligations requirements of ASTM E1527-21 and AAI. Anyone seeking LLP protections should take independent action beyond this Phase I ESA to perfect their position.

## 4.0 Owner Provided Information

---

The ASTM E1527-21 specifies that the Property owner and the Key Site Manager provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded AULs
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

Converse was not provided with Subject Property Owner contact information. No Owner interview was conducted.

## 5.0 Records Review

### 5.1 Physical Setting

Item	Comments
Physical Setting:	The Subject Property is located approximately 772 feet above mean sea level with surface topography sloping towards the south (United States Geological Survey [USGS] Topographic Map, Guasti and Corona North, California, 2018).
Geology:	The Subject Property is underlain by alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast (Division of Mines and Geology, Geologic Map of California, 2010).
Groundwater:	Information regarding regional groundwater was researched on the RWQCB Geotracker website. According to the website, the closest site to the Subject Property with recent groundwater information is located approximately 1.0-mile northeast of the Subject Property. According to an October 2001 closure report for the site, groundwater is located at depths greater than 150-feet beneath ground surface (bgs) and flows in a southwesterly direction.
Potable Water Supply:	Potable water is supplied by the Ontario Municipal Utilities Company.

### 5.2 Historical Review

#### 5.2.1 Aerial Photograph and Map Review

Available historical aerial photographs and maps, which were provided by Environmental Data Resources (EDR), were reviewed. A summary of the review is provided in the following table. Copies of the aerial photographs and maps are provided in Appendix D.

Historical Summary			
Resource and Year	Property	Adjoining Properties	General Vicinity
1897, 1900, and 1903 Topographic Maps	A roadway appears to bisect the Subject Property from west to east. No other structures are depicted on the Subject Property.	The adjoining properties are primarily undeveloped.	The general vicinity consists of undeveloped land with sporadic residential developments.

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>
1938 Aerial Photograph  1941 and 1944 Topographic Maps	A roadway is no longer present on the Subject Property. The Subject Property appears partially developed for agricultural use.	The adjoining properties are a mix of undeveloped land, and/or agricultural uses with residential farmsteads.	The general vicinity is a mix of undeveloped land, agricultural uses, and residential farmsteads.
1948 Aerial Photograph  1949 Topographic Map  1953 Aerial Photograph  1954 Topographic Map	The northern half of the Subject Property appears vacant. The southern half of the Subject Property appears developed with agricultural fields.	The northern adjoining property appears to be vacant agricultural land. The northeastern adjoining property appears developed for livestock farming. Cucamonga Creek is located contiguous to the east and southeast of the Subject Property. The southern adjoining property appears developed for residential use. The southwestern and western adjoining properties appear developed for agricultural and livestock farming uses. The northwestern adjoining property appears developed for agricultural use.	The general vicinity is a mix of undeveloped land, vacant land, agricultural uses, livestock farming, and residential farmsteads.
1966 Aerial Photograph and Topographic Map	The majority of the Subject Property is developed with a livestock farming/possible dairy operations that	The northern and northwestern adjoining properties are developed with the existing golf course. The northeastern	The general vicinity is a mix of undeveloped land, vacant land, agricultural uses, livestock farming, and residential farmsteads.

Resource and Year	Property	Adjoining Properties	General Vicinity
	includes livestock pens, and buildings associated with the livestock farm/dairy operations. The southern portion of the Subject Property appears vacant.	adjoining property appears vacant. There are no significant identifiable changes in uses on the adjoining properties.	
1973 Topographic Map  1975 Aerial Photograph  1981 Topographic Map	Three additional structures are depicted in the northwestern portion of the Subject Property.	The southern adjoining property appears developed for livestock farming. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of undeveloped land, vacant land, agricultural uses, livestock farming, and residential farmsteads.
1985 Aerial Photograph	A possible dairy waste pond is located in the southeastern corner of the Subject Property.	The northwestern adjoining property appears to be vacant. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of undeveloped land, vacant land, livestock/dairy farms, agricultural uses, and residential uses.
1989 Aerial Photograph	The dairy pond in the southeast corner of the Subject Property appears dry. There are no other significant identifiable changes in uses on the remainder of the Subject Property.	The northeastern adjoining property appears to be under development with the existing community center. Dairy ponds are visible in the southern portion of the western/southwestern adjoining dairy farm. There are no significant identifiable changes in uses on the	The general vicinity is a mix of agricultural uses, dairy operations, residential, and commercial uses.

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>
		remaining adjoining properties.	
1994 Aerial Photograph	The dairy waste pond is no longer visible in the southeastern corner of the Subject Property. A large area of what appears to be standing water is visible north of the former dairy waste pond. There are no significant identifiable changes in use across the remainder of the Subject Property.	There are no significant identifiable changes in uses on the adjoining properties.	The general vicinity is a mix of agricultural uses, dairy operations, residential, and commercial uses.
2002 Aerial Photograph	There are no significant identifiable changes in uses on the Subject Property.	There are no significant identifiable changes in uses on the adjoining properties.	The general vicinity is a mix of agricultural uses, dairy operations, residential, and commercial uses.
2006, 2009, and 2012 Aerial Photographs  2012 Topographic Map	There are no significant identifiable changes in uses on the Subject Property.	Livestock farming operations on the southern adjoining property are no longer present. The property appears to be utilized for truck parking/truck storage. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of agricultural uses, dairy operations, residential, and commercial uses.
2015 Topographic Map  2016 Aerial Photograph	The livestock/dairy operations appear limited to the northern portion of the Subject Property. The southern portion of the	There are no significant identifiable changes in uses on the adjoining properties.	The general vicinity is a mix of agricultural uses, dairy operations, residential, and commercial uses.

Resource and Year	Property	Adjoining Properties	General Vicinity
2018 Topographic Map	Subject Property appears developed with a portion of the existing nursery.		
2020 Aerial Photograph	The majority of the Subject Property appears developed with the existing nursery.	There are no significant identifiable changes in uses on the adjoining properties.	The general vicinity is a mix of agricultural uses, dairy operations, residential, and commercial uses.

### 5.2.2 Building Permit Review

Available building permits were provided by the City of Ontario, Department of Building & Safety.

November 19, 2015 - Building permit issued for the installation of one (1) 100-amp electrical panel to service existing irrigation well.

### 5.2.3 City Directories

A city directory search was completed on the Subject Property by EDR. The complete city directory is provided in Appendix D, Historical Research.

The Subject Property was identified under the following listings in the directories published during the years indicated:

The Subject Property was identified as being occupied by Andy Schapp in 1960, 1970, and 1975, Ben Van Ingen in 1980 and 1985, Michael Gustafson in 1992 and 1995, Andy Schapp in 2003, Salvador Torrez in 2005, and Arturo Rios in 2008 and 2010.

Adjoining properties were not identified in the report.

### 5.2.4 Data Failure

Historical information regarding the Subject Property indicated the Subject Property was bisected by a roadway as early as 1897. Therefore, historical data failure occurred during this assessment. Remaining ASTM sources are deemed unlikely to yield significant new information.

### 5.2.5 Summary of Historical Property Use

The Subject Property was undeveloped as early as 1897, with a roadway bisecting the Subject Property from east to west. The Subject Property appeared developed for agricultural use across all or portions of the Subject Property from as early as 1938 to 1954. By 1966, the majority of the Subject Property appeared developed

with a possible dairy farm that included out buildings, and livestock pens. A possible dairy waste pond was visible in the southeastern portion of the Subject Property in 1985 and 1989. The dairy pond was no longer present by 1994; however a large area north of the former dairy pond appeared covered with water. By 2015, remaining dairy operations appeared limited to only the northern portion of the Subject Property, and by 2020, the Subject Property appeared primarily developed with the existing nursery.

### 5.2.6 Summary of Past Uses of Adjoining Properties

Adjoining properties were typically undeveloped as early as 1897. By 1938, adjoining properties consisted of undeveloped land, agricultural fields, and/or residential farmsteads. The northeastern adjoining property appeared developed for livestock farming as early as 1948 but appeared vacant by 1966. The northern/northwestern adjoining property was developed with the existing golf course by 1966. By 1966, the western and southwestern adjoining property was developed with the existing dairy and agricultural fields. The southern adjoining property was developed for livestock farming by 1973 and for truck storage/parking by 2006. The northeastern adjoining property was developed with the existing community center by 1989.

### 5.2.7 Summary of Past Uses of the Surrounding Area

The surrounding area was a mix of undeveloped land and sporadic residential developments as early as 1897. The area was further developed for agricultural uses beginning in the 1930s, with additional dairy farm operations and livestock farming in the 1940s through 1960s. The area was further developed for additional residential and commercial developments in the 1970s through 2000s.

## 5.3 Results of Environmental Records Sources Review

An EDR report of Standard Environmental Record Sources (Records) was prepared specifically for the Property. The search included queries to the following databases for cases within specified ASTM search distances. A copy of the database report is provided in Appendix E.

### 5.3.1 Property Listings

The Subject Property was identified on the following databases in the EDR report:

Property Listings	
<b>Site Name:</b>	J & B DAIRY
<b>Databases:</b>	FINDS
<b>Address:</b>	9309 RIVERSIDE
<b>Comments:</b>	The Subject Property is listed in the database. No additional information was provided.

<b>Site Name:</b>	J & B DAIRY
<b>Databases:</b>	San Bern. Co. Permit
<b>Address:</b>	9309 E RIVERSIDE DR
<b>Comments:</b>	The Subject Property is listed in the database as an inactive hazardous material handler and generator.

<b>Site Name:</b>	ANDY SCHAAP
<b>Databases:</b>	HWTS
<b>Address:</b>	9309 E RIVERSIDE DR
<b>Comments:</b>	The Subject Property is listed in the database as inactive.

<b>Site Name:</b>	J & B DAIRY
<b>Databases:</b>	CIWQS
<b>Address:</b>	9309 RIVERSIDE DRIVE
<b>Comments:</b>	The Subject Property is identified as an historical animal feeding facility that generated cow wastes.

### 5.3.2 Adjoining Properties

The following adjoining properties were identified in the EDR report:

<b>Adjoining Properties</b>	
<b>Site Name:</b>	EDMUNDO SANCHEZ
<b>Databases:</b>	CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST
<b>Address:</b>	13115 ONTARIO AVE
<b>Distance:</b>	0
<b>Direction:</b>	Southwest
<b>Elevation:</b>	Lower
<b>Comments:</b>	The listing is associated with the southern adjoining property. The listings relate to the operation of a 550-gallon diesel fuel UST at the site.

<b>Site Name:</b>	AG-SANCHEZ, EDMUNDO
<b>Databases:</b>	UST
<b>Address:</b>	13115 S ONTARIO AVE
<b>Distance:</b>	165
<b>Direction:</b>	South
<b>Elevation:</b>	Lower
<b>Comments:</b>	The listing appears related to the 550-gallon diesel fuel UST. No additional pertinent information was provided.

<b>Site Name:</b>	EDMUNDO SANCHEZ
<b>Databases:</b>	HIST UST
<b>Address:</b>	13115 S ONTARIO AVE
<b>Distance:</b>	165
<b>Direction:</b>	South
<b>Elevation:</b>	Lower
<b>Comments:</b>	The listing appears related to the 550-gallon diesel fuel UST. The listing identified that the UST was installed in 1974. No additional pertinent information was provided.

<b>Site Name:</b>	LEGEND DAIRY FARMS #1
<b>Databases:</b>	San Bern. Co. Permit, HWTS, CERS
<b>Address:</b>	9155 E RIVERSIDE DR
<b>Distance:</b>	1025
<b>Direction:</b>	West-Southwest
<b>Elevation:</b>	Lower
<b>Comments:</b>	The site is located west of the Subject Property and is listed in the databases as a hazardous materials handler and generator. Violations issued at the site include failure to properly manage empty containers greater than 5 gallons, and failure to electronically submit hazardous materials inventory. The site is listed as a dairy.

<b>Site Name:</b>	WHISPERING LAKES GOLF COURSE
<b>Databases:</b>	San Bern. Co. Permit, CERS HAZ WASTE, CERS
<b>Address:</b>	2525 RIVERSIDE DR
<b>Distance:</b>	1082
<b>Direction:</b>	East-Northeast
<b>Elevation:</b>	Higher
<b>Comments:</b>	The site is located north and northwest of the Subject Property, across East Riverside Drive, and is listed in the databases as an active hazardous waste generator. Violations issued at the facility include, but are not limited to, failure to submit hazardous materials inventory, failure to properly label hazardous water accumulation containers, failure to submit an emergency response plan, failure to send offsite accumulated hazardous wastes within 180 days, failure to properly manage used oil and fuel containers, and failure to inspect hazardous waste storage areas on a weekly basis. The violations appear to have been returned to compliance.

<b>Site Name:</b>	WHISPERING LAKES GOLF COURSE
<b>Databases:</b>	RCRA NonGen / NLR
<b>Address:</b>	2525 E RIVERSIDE DR
<b>Distance:</b>	1082
<b>Direction:</b>	East-Northeast
<b>Elevation:</b>	Higher
<b>Comments:</b>	The site is listed in the database. No violations were found.

### 5.3.3 Other Off-site Locations of Concern

Other off-site locations of concern identified by EDR within a maximum one-mile radius from the Subject Property included registered AST sites, CPS-SLIC sites, hazardous waste generators, permitted hazardous materials handlers, and Envirostor/Sch sites.

The potential for environmental concern to the Subject Property from these off-site locations appears to be low due to one or more of the following: type of regulatory listing; type of resource (soil) affected; distance from the Subject Property; status of the case; and/or potential responsible parties have been identified.

### 5.3.4 Orphan Listings

The EDR database report identified two (2) orphan listing only by street names. These street names were found in the general vicinity of the Subject Property; however, these orphan sites appeared to have a low potential for environmental impact to the Subject Property due to the distance from the Subject Property and/or type of listing.

## 5.4 Additional Environmental Record Sources

Information requests pertaining to the Subject Property were submitted to the following regulatory agencies.

### Federal Agencies

Source	Comments
U.S. Department of Transportation, Pipeline and Hazardous Material Safety Administration (PHMSA)	The PHMSA online mapping system for gas transmission pipelines and hazardous liquid pipelines on the Property or adjacent properties was reviewed ( <a href="https://www.npms.phmsa.dot.gov/PublicViewer/">https://www.npms.phmsa.dot.gov/PublicViewer/</a> ). No pipelines were identified on or adjoining the Subject Property.

### State Agencies

Source	Comments
<p>California Environmental Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC)</p>	<p>No information regarding the Property was on file with DTSC.</p> <p>The Envirostor website (<a href="http://www.envirostor.dtsc.ca.gov/public/">http://www.envirostor.dtsc.ca.gov/public/</a>) was reviewed for information, and the Subject Property was not listed in the database.</p>
<p>Cal/EPA, Regional Water Quality Control Board (RWQCB)</p>	<p>Records pertaining to the Subject Property were reviewed at the RWQCB's Riverside office. Records included Annual Reports of Animal Waste Discharge from 2008 through 2012, and Inspection Reports from 2011, 2012, and 2013.</p> <p>The Animal Waste Discharge Reports indicated 450 tons of manure was generated at the site in each of the years from 2008 through 2012.</p> <p>No violations were reported in the three (3) inspection reports reviewed.</p> <p>The RWQCB had no records on file for the Subject Property.</p> <p>The Geotracker website (<a href="http://geotracker.waterboards.ca.gov/">http://geotracker.waterboards.ca.gov/</a>) was reviewed for information, and the Subject Property was not listed in the database.</p> <p>Converse noted in the database that there is in area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area, the plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. The Plume was first identified in 1986 when samples from several wells south of the 60 Freeway had detectable concentrations of volatile organic compounds (VOCs), with TCE detected at concentrations up to 75 micrograms per liter (ug/L). Subsequently, the RWQCB initiated an investigation to determine the extent and potential sources of the groundwater contamination in the area. Concentrations of TCE greater than the maximum contaminant level (MCL) of 5 ug/L were detected in samples from 92 of 167 private wells sampled between 1987 and 2005.</p>

Source	Comments
	<p>Since 2005, the RWQCB, Chino Basin Watermaster (CBWM), the City of Ontario and others have collected and analyzed groundwater samples from existing private and municipal wells throughout the footprint of the Plume. Samples collected within the footprint of the Plume between 2007 and 2019 indicated that TCE concentrations were generally decreasing in the western area of the Plume and increasing in the southern area. These trends are associated with a change in the direction of groundwater flow in the basin since 2000. Between 1960 and 2000, the dominant flow direction was to the southwest. Since 2000, however, the groundwater flow direction has been primarily to the south and has been influenced by both the declining agricultural production and the addition of groundwater extraction associated with the operation of the CDA desalter wells located in the southern part of the Chino Basin.</p> <p>Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the threshold 5 ug/l.</p>
<p>California Department of Conservation, California Department of Conservation (DOC), Geologic Energy Management Division (CalGEM)</p>	<p>Converse reviewed the DOC CalGEM Online Well Finder (<a href="https://www.conservation.ca.gov/calgem/Pages/Wellfinder.aspx">https://www.conservation.ca.gov/calgem/Pages/Wellfinder.aspx</a>). According to the website, no oil or gas wells are located on the Subject Property.</p>

### Local Agencies

Source	Comments
<p>South Coast Air Quality Management District (SCAQMD)</p>	<p>There were no agency records pertaining to the Subject Property on file with this agency.</p>
<p>San Bernardino County Fire Department, Certified Unified Program Agency (CUPA)</p>	<p>There following is a summary of files provided the San Bernardino County Fire Department:</p> <p>January 21,1988 - Agricultural Hazardous Materials Inventory. J&amp;B Dairy Inc. is listed as the tenant. The form indicates the presence of a 500-gallon gasoline UST, 500-gallon diesel AST, and 55-gallon oil drum.</p>

Source	Comments
	<p>The form is also checked to indicate the operation of a 500-gallon UST.</p> <p>May 30, 2007 - Underground Storage Tank Inspection Report. The Report indicates that an Agricultural Hazardous Materials Inventory form from January 1988 declared the existence of one (1) 500-gallon gasoline UST, and one (1) 500-gallon diesel fuel AST. A violation was issued for unlawful abandonment of USTs. The report notes indicate that there was no information on file suggesting whether the UST had been removed or whether it remained at the site.</p> <p>July 5, 2007 - Hazardous Material Field Services Computer Database Update Authorization. The form indicates one (1) UST is present at the site. Notes on the form indicate that containers, drums, and tanks were observed but the inspector was unable to identify if all containers were empty. In addition, the handwritten notes states "(1) 500-gallon gasoline and (1) 500-gallon UST reported in 1988. No record of removal or testing".</p> <p>August 22, 2008 - Inspection Report. The report notes that various tanks and containers were observed at the site including one (1) 55-gallon drum of unknown contents, 30 small containers of possible paint, 18 55-gallon drums of unknown contents, two (2) apparent fuel storage tanks (one of which appeared to have leaked). Violations were issued for non-current hazardous waste generator and handler permits, failure to make hazardous waste determination, failure to obtain EPA ID Number, facility not operated/maintained to prevent release/fire, hazardous waste containers leaking, and hazardous waste not managed lawfully. The inspection report recommended corrections, including the removal of contaminated soil and submittal of a receipt documenting proper disposal of contaminated soil.</p> <p>September 3, 2008 - Underground Storage Tank Letter. The letter indicates that there are no records pertaining to the removal of a UST. The reports references the January 1988 form that states there is 500-gallon gasoline UST at the site, as well as a May 2007 inspection form that indicates that a UST was observed to be empty and stored aboveground. The letter further states that it will remain in the agency files "as a notice to future buyers of the possibility that USTs may have</p>

Source	Comments
	<p>been abandoned or removed without complete documentation or oversight from this Department. This letter does not constitute a release of liability for the site or declaration that the site is free from contamination. Should future projects or environmental investigation reveal contaminants on site, the property owner is responsible and held liable for site investigation and remedial action".</p> <p>November 18, 2008 - Hazardous Material Field Services Computer Database Update Authorization. The form indicates that one (1) active UST is present; however handwritten notes included on the form state "no UST identified during May 30, 2007 inspection. Inactivated tank".</p> <p>March 18, 2009 - Hazardous Material Field Services Computer Database Update Authorization. The form states that no USTs are present at the site.</p> <p>March 18, 2009 - Inspection Compliance Requirements Letter. Letter indicates that violations issued in August 2008 remain outstanding.</p>
Methane	<p>According to the CalRecycle SWIS website (<a href="https://www2.calrecycle.ca.gov/SolidWaste/Site/Search">https://www2.calrecycle.ca.gov/SolidWaste/Site/Search</a>), a solid waste site is located approximately 0.45-miles south/southwest of the Subject Property at 13434 South Ontario Avenue.</p> <p>The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."</p>

## 6.0 Property Reconnaissance

### 6.1 Methodology

On October 18, 2023 Converse visited the Subject Property to evaluate present use and to identify observable environmental conditions at the Subject Property. As Converse was not provided access to the Subject Property, our methodology involved visual observation of the Subject Property from the public right-of-ways on Ontario Avenue and East Riverside Drive.

A field-generated map is provided in Appendix B. Pertinent Property photographs are provided in Appendix C.

### 6.2 Limiting Conditions

Converse's findings are based on the Subject Property conditions observed on Wednesday, October 18, 2023.

Converse was not provided access to the Subject Property. Observation of the Subject Property was limited to viewing from Ontario Avenue, along the western boundary of the Subject Property and East Riverside Drive along the northern boundary.

### 6.3 Interior Observations of Property

Converse was not provided access to the Subject Property and therefore was unable to visually observe the interiors of the onsite buildings.

### 6.4 Exterior Observations of Property

Converse was not provided access to the Subject Property. Limited observations of the Subject Property were made from public right-of-way areas on Ontario Avenue and East Riverside Drive.

Exterior Observations		
Item or Condition	Observed Evidence?	Comments
Hazardous Substances & Petroleum Products:	No	
Storage Tanks & Related Equipment:	No	
Odors:	No	
Standing Surface Water or Other Pools of Liquid:	No	
Drums & Other Containers of Hazardous Substances, Petroleum Products, or	No	

Item or Condition	Observed Evidence?	Comments
Other Unidentified Contents:		
Transformers or Equipment containing Polychlorinated Biphenyls (PCBs):	No	
Pits, Ponds, or Lagoons:	No	
Stained Soil or Pavement:	No	
Stressed Vegetation (other than from insufficient water):	No	
Evidence of Mounds, Depressions or Filled or Graded Areas Suggesting Trash or Other Solid Waste Disposal:	No	
Waste Water or any discharge (including storm water) into a Drain, Ditch, or Stream on or Adjacent to the Property:	No	
Wells (active, inactive, or abandoned):	No	
Septic Systems or Cesspools:	No	
Prior Structures:	No	
Roads, Tracks, Railroad Tracks or Spurs:	Yes	The Subject Property is bound by Ontario to the west and East Riverside Drive to the north.
Suspect Asbestos containing Building Materials released into the environment	No	
Suspect Lead-based Paint released into the environment	No	
Suspect PCB Caulk, Paint or Ballasts released into the environment	No	

In addition to the above, the following observations were made:

- One (1) residential structure and several outbuildings which appeared to be occupied by the onsite nursery were observed in the northwestern portion of the Subject Property.

### **6.5 Current Uses of Adjoining Properties**

Based on our research and observations during our Subject Property visit, the Subject Property is bordered by the following:

<b>Adjoining Property Use</b>	
<b>Direction</b>	<b>Current Development</b>
North	East Riverside Drive followed by Whispering Lakes Golf Course (2525 East Riverside Drive).
Northeast	Intersection of East Riverside Drive and flood control channel followed by Westwind Community Center (2455 East Riverside Drive).
East	Flood control channel followed by residential neighborhood.
Southeast	Flood control channel followed by residential neighborhood.
South	Residential dwelling and truck storage/recreational vehicle storage facility.
Southwest	Ontario Avenue followed by dairy and agricultural fields.
West	Ontario Avenue followed by dairy and agricultural fields.
Northwest	Intersection of Ontario Avenue and East Riverside Drive followed by Whispering Lakes Golf Course (2525 East Riverside Drive).

### **6.6 Current Uses of Surrounding Area**

Based on our research and observations during our Subject Property visit, the surrounding area of the Subject Property consists of agricultural fields, dairy farms, residential and commercial businesses.

## 7.0 Interviews

---

During the interviews, the owners and occupants were asked if they had any available documents that would be helpful. The documents that were requested are detailed in Section 4.0 of this report:

<b>Interview:</b>	<b>Comments:</b>
Property Owner:	Converse was not provided contact information for the Subject Property owner. No owner interview was conducted.
Tenant/ Occupant:	Converse was not provided access to the Subject Property. No tenant/occupant interviews were conducted.
State or Local Government Officials:	Other than the information provided in Section 5.4, no other information was provided by a government official.
Owners and Occupants of Neighboring Sites:	No interviews of owners or occupants of neighboring sites were conducted.

## 8.0 Findings & Opinions

---

A cursory summary of findings is provided below. However, details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

The Subject Property is owned by 15 Dairy River, LLC, and is occupied by a nursery.

The Subject Property was undeveloped as early as 1897, with a roadway bisecting the Subject Property from east to west. The Subject Property appeared developed for agricultural use across all or portions of the Subject Property from as early as 1938 to 1954. By 1966, the majority of the Subject Property appeared developed with a possible dairy farm that included out buildings, and livestock pens. A possible dairy waste pond was visible in the southeastern portion of the Subject Property in 1985 and 1989. The dairy pond was no longer present by 1994; however a large area north of the former dairy pond appeared covered with water. By 2015, remaining dairy operations appeared limited to only the northern portion of the Subject Property, and by 2020, the Subject Property appeared primarily developed with the existing nursery.

Various records were provided by the San Bernardino County Fire Department. A summary of pertinent records is as follows:

- January 1998 - Agricultural Hazardous Materials Summary dated January 1998. The report indicated that J&B Dairy Inc. operated a 500-gallon gasoline UST and 500-gallon diesel AST.
- May 30, 2007 - Underground Storage Tank Inspection Report. The Report indicates that an Agricultural Hazardous Materials Inventory form from January 1988 declared the existence of one (1) 500-gallon gasoline UST, and one (1) 500-gallon diesel fuel AST. A violation was issued for unlawful abandonment of USTs. The report notes indicate that there was no information on file suggesting whether the UST had been removed or whether it remained at the site.
- July 5, 2007 - Hazardous Material Field Services Computer Database Update Authorization. The form indicates one (1) UST is present at the site. Notes on the form indicate that containers, drums, and tanks were observed but the inspector was unable to identify if all containers were empty. In addition, the handwritten notes states (1) 500-gallon gasoline and (1) 500-gallon UST reported in 1988. No record of removal or testing.
- August 22, 2008 - Inspection Report. The report notes that various tanks and containers were observed at the site including one (1) 55-gallon drum of unknown contents, 30 small containers of possible paint, 18 55-gallon drums of unknown contents, two (2) apparent fuel storage tanks (one of which appeared to have leaked). Violations were issued for non-current hazardous waste generator and handler permits, failure to make hazardous waste determination, failure to obtain EPA ID Number, facility not operated/maintained to prevent release/fire, hazardous waste containers leaking, and hazardous waste not managed lawfully. The inspection report recommended corrections, including the removal of contaminated soil and submittal of a receipt documenting proper disposal of contaminated soil.
- September 3, 2008 - Underground Storage Tank Letter. The letter indicates that there are no records pertaining to the removal of a UST. The report references the January 1988 form that states there is a 500-gallon gasoline UST at the site, as well as a May 2007 inspection form that indicates that a UST was observed to be empty and stored aboveground. The letter further states that it will remain in the agency files as a notice to future buyers of the possibility that USTs may have been abandoned or removed without complete documentation or oversight from the Department. This letter does not constitute a release of liability for the site or declaration that the site is free from contamination. Should future projects or environmental investigation reveal contaminants on site, the property owner is responsible and held liable for site investigation and remedial action.

- November 18, 2008 - Hazardous Material Field Services Computer Database Update Authorization. The form indicates that one (1) active UST is present; however handwritten notes included on the form state no UST identified during May 30, 2007 inspection. Inactivated tank.
- March 18, 2009 - Hazardous Material Field Services Computer Database Update Authorization. The form states that no USTs are present at the site.
- March 18, 2009 - Inspection Compliance Requirements Letter. Letter indicates that violations issued in August 2008 remain outstanding.

According to the RWQCB Geotracker database there is in area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area. The plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the regulatory threshold 5 ug/l.

The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."

The Subject Property was identified in the FINDS, San Bern. Co., HWTS, and CIWQS databases in the regulatory database report. The listings identify the site as an historical animal feeding facility that generated animal wastes, as well as a hazardous materials generator.

The following adjoining properties are listed in the regulatory database report:

- 2525 Riverside Drive (northern adjoining) - The site is listed in the San Bern. Co. Permit, CERS HAZ WASTE, CERS and RCRA Non Gen databases. The site is listed as an active hazardous waste generator. Violations issued at the facility include, but are not limited to, failure to submit hazardous materials inventory, failure to properly label hazardous water accumulation containers, failure to submit an emergency response plan, failure to send offsite accumulated hazardous wastes within 180 days, failure to properly manage used oil and fuel containers, and failure to inspect hazardous waste storage areas on a weekly basis. The violations appear to have been returned to compliance.
- 13115 Ontario Avenue (southern adjoining) - The site is listed in the CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST, and UST databases. The listings appear related to the operation of a 550-gallon diesel fuel UST. The listings identified that the UST was installed in 1974.
- 9155 East Riverside Drive (western adjoining) - The site is listed in the San Bern. Co. Permit, HWTS, and CERS databases. The listings indicate the site as a hazardous materials handler and generator. Violations issued at the site include failure to properly manage empty containers greater than 5 gallons, and failure to electronically submit hazardous materials inventory. The site is listed as a dairy.

According to the CalRecycle SWIS website (<https://www2.calrecycle.ca.gov/SolidWaste/Site/Search>), a solid waste site is located approximately 0.40-miles south/southwest of the Subject Property at 13434 South Ontario Avenue.

Based on the above, the following were or were not identified:

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural uses.

- The historical dairy farm and livestock farming operations, including the presence of potential waste ponds.
- The identification of a 500-gallon gasoline UST with no records of removal or abandonment.
- Inspection reports indicating leaking hazardous containers and an area of impacted soil.
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue and East Riverside Drive.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

The following environmental concerns were noted:

- The operation of a UST on the southern contiguous property is considered an environmental concern that does not appear to rise to the level of a REC based on the lack of information suggesting any unauthorized releases.

## 9.0 Conclusions & Recommendations

---

Converse has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-21 for 9309 East Riverside Drive, Ontario, San Bernardino County County, California. Any exceptions to, or deletions from, this practice are described in the Limitations and Exceptions of Assessment section of this report. This assessment has revealed no evidence of *recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps* in connection with the Subject Property except for the following:

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural uses.
- The historical dairy farm and livestock farming operations, including the presence of potential waste ponds.
- The identification of a 500-gallon gasoline UST with no records of removal or abandonment.
- Inspection reports indicating leaking hazardous containers and an area of impacted soil.
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue and East Riverside Drive.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

The following environmental concerns were noted:

- The operation of a UST on the southern contiguous property is considered an environmental concern that does not appear to rise to the level of a REC based on the lack of information suggesting any unauthorized releases.

Based on the findings, Converse recommends the following additional assessment activities:

- Assessment of shallow soils across the Subject Property for the presence of pesticides and metals historically used in agricultural operations.
- Methane screening in the areas of the Subject Property historically occupied by possible dairy farm and livestock farming operations, including the possible waste ponds in the southeastern portion of the Subject Property.
- Subsurface sampling in the vicinity of the structures in the northern portion of the Subject Property where hazardous materials were likely stored according to historical inspection reports.
- Geophysical survey to determine whether any USTs are present at the Subject Property.'
- Should USTs be discovered, subsurface sampling in the vicinity of the UST(s) is recommended to assess for any potential releases that have impacted subsurface soils.

No assessment related to the Archibald plume is deemed necessary based on the depth to groundwater and reported concentrations of TCE in the vicinity of the Subject Property are below the maximum contaminant level (MCL).

Any future redevelopment of the Subject Property should be in accordance with the City of Ontario Methane Ordinance.

It is recommended that the Site Reconnaissance be completed at the time of the Phase II Environmental Site Assessment.

## 10.0 Deviations & Limitations

---

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property and observation of the Subject Property was limited to the public right-of-way on Ontario Avenue and East Riverside Drive.
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

## 11.0 Additional Non-Scope Services

---

There are environmental issues outside the scope of the ASTM E1527-21 that can be assessed in connection with a commercial real estate transaction. These are dealt with as non-scope considerations since they do not typically present a Superfund Liability. The specific level of inquiry (if any) is defined in the Proposal which contains a Scope of Work. These non-scope services are very client specific and not covered by the ASTM standard. They are frequently related to the business environmental risk which is defined in the standard as "risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate".

No non-scope issues were addressed during this assessment.

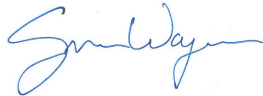

## 12.0 Signature of Environmental Professional

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in A§312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

**Site Assessor**

---

Spencer Wagner  
Project Environmental Scientist

**Senior Reviewer**

---

Norman S. Eke  
Senior Vice President/Managing Officer

Spencer Wagner - Project Environmental Scientist

Norman S. Eke - Senior Vice President/Managing Officer

This Phase I ESA was completed by the above Environmental Professional. A complete list of preparers, and their responsibilities for this assessment, is provided in the following section (Section 13.0, List of Preparers).

## 13.0 List of Preparers

---

### **Norman S. Eke**

Senior Vice President

B.A., Liberal Studies, Environmental Studies Emphasis, University of California, Santa Barbara, 1988.

Cal/OSHA Certified Asbestos Consultant, #96-2093

NIOSH 582 Equivalent Training

Senior Vice President and Managing Officer of Converse's California Environmental offices. Mr. Eke has served as the Principal-in-Charge and Contract Administrator to deliver services to our public agency and private clients. Mr. Eke has 33 years of experience in the fields of Environmental Due Diligence including Phase I and Phase II Environmental Site Assessments, Asbestos surveys/specifications/abatement monitoring, Preliminary Endangerment Assessments and associated Supplemental Site Investigations and Removal Action Work Plans/Implementation, various forms of Remediation, Human Health Risk Assessment and Indoor Air Quality. Mr. Eke is a former Subcommittee Chairman for E.50-02 Real Assessment and Management of the ASTM E.50 Committee on Environmental Assessment, Risk Management, Corrective Action, which includes Phase I ESA standards.

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, and Report Review.

### **Spencer Wagner**

Senior Staff Environmental Scientist

B.A., Environmental Science and Policy, California State University, Long Beach, 2006

B.A., Geography, California State University, Long Beach, 2006

Certified Wood Destroying Organism (WDO) Inspector

Mr. Wagner has over 17 years' experience conducting Phase I and II Environmental Site Assessments throughout California. Mr. Wagner has completed Phase I ESAs on undeveloped land, residential properties, commercial/retail facilities, industrial facilities, and school sites. His Phase II ESA experience includes collection of soil matrix, soil vapor, indoor air and groundwater samples. Phase II projects worked on have included residential properties, commercial warehousing sites, school sites, dry cleaning facilities, automotive service sites, metal plating facilities and multi-tenant commercial properties

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, Historical Research, Regulatory Agency Interaction, Property Reconnaissance, Interviews, and Report Generation.

## 15.0 List of Acronyms

---

The following is a list of acronyms that may have been noted in the report. This is not an all inclusive list and may include acronyms that are not found in your report but are commonly utilized in environmental assessments. Additional acronyms pertaining to regulatory agency documents/listings can be found in the regulatory database report, which is provided as an appendix to this report.

**AAI** - All Appropriate Inquiries

**ACM** - Asbestos-containing Material

**APN** - Assessor's Parcel Number

**APCD** - Air Pollution Control District

**AQMD** - Air Quality Management District

**AST** - Aboveground Storage Tank

**ASTM** - American Society of Testing and Materials

**AUL** - Activity Use Limitation

**BER** - Business Environmental Risk

**BTEX** - Benzene, Toluene, Ethylbenzene, and Xylenes

**Cal/EPA** - California Environmental Protection Agency

**CalGEM** - (California Department of Conservation), Geologic Energy Management Division

**CERCLA** - Comprehensive Environmental Response, Compensation and Liability Act

**CFR** - Code of Federal Regulations

**CREC** - Controlled Recognized Environmental Condition Recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

**CUPA** - Certified Unified Protection Agencies

**de minimis condition** - A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a REC nor a CREC.

**DOC** - (California) Department of Conservation

**DPW** - (Los Angeles County) Department of Public Works

**DTSC** - Department of Toxic Substances Control

**DWP** - (City of Los Angeles) Department of Water and Power

**EDR** - Environmental Data Resources

**EHD** - Environmental Health Department

**EP** - Environmental Professional

**EPA** - United States Environmental Protection Agency

**ESA** - Environmental Site Assessment

**ERIS** - Environmental Risk Information Systems

**(x)FD** - (City/County)Fire Department

**HMS** - Hazardous Material Site

**HREC** - Historic Recognized Environmental Condition: A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

**HVAC** - Heating, Ventilation, Air Conditioning

**IAQ** - Indoor Air Quality

**LACSD** -Los Angeles County Sanitation Districts

**LBP** - Lead-based Paint

**LLP** - Landowner Liability Protections

**LQG** - Large Quantity Generator

**LUST** - Leaking Underground Storage Tank

**mg/kg** - milligram per kilogram

**mg/L** - milligram per Liter

**MSL** - Mean Sea Level

**MTBE** - Methyl Tertiary Butyl Ether

**ND** - None Detected

**NFA** - No Further Action

**NOV** - Notice of Violation

**PEC** - Potential Environmental Concern

**PFAS** - Perfluoroalkyl and Polyfluoroalkyl Substances

**PHMSA** - US Department of Transportation, Pipeline and Hazardous Materials Safety Administration

**PCB** - Polychlorinated biphenyls

**PCE** - Perchloroethylene or Tetrachloroethylene

**pCi/L** - picoCuries per Liter

**ppb** - parts per billion

**ppm** - parts per million

**PRP** - Potential Responsible Party

**RCRA** - Resources Conservation and Recovery Act

**REC** - Recognized Environmental Condition; (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

**RP** - Responsible Party

**RWQCB** - Regional Water Quality Control Board

**SCAQMD** - South Coast Air Quality Management District

**SDS** - Safety Data Sheets

**SQG** - Small Quantity Generator

**SVOC** - Semi-volatile Organic Compound

**TCE** - Trichloroethylene or Trichloroethene

**TPH** Total Petroleum Hydrocarbons

**µg/L** - micrograms per Liter

**USGS** - United States Geological Survey

**UST** - Underground Storage Tank

**VCP** - Voluntary Cleanup Program

**VOCs** - Volatile Organic Compounds

**Appendix A -

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Converse Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Converse Consultants were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

**Search Results:****Coordinates:**

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## **TARGET PROPERTY SEARCH RESULTS**

The target property was identified in the following records. For more information on this property see page 9 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
J & B DAIRY 9309 RIVERSIDE ONTARIO, CA 91761	FINDS Registry ID:: 110064957202	N/A
J & B DAIRY 9309 E RIVERSIDE DR ONTARIO, CA 91761	San Bern. Co. Permit Facility Status: INACTIVE Facility Id: FA0009327	N/A
ANDY SCHAAP 9309 E RIVERSIDE DR ONTARIO, CA 91761	HWTS	N/A
J & B DAIRY 9309 RIVERSIDE DRIVE ONTARIO, CA 91761	CIWQS	N/A

## **DATABASES WITH NO MAPPED SITES**

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

NPL..... National Priority List  
 Proposed NPL..... Proposed National Priority List Sites  
 NPL LIENS..... Federal Superfund Liens

### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing

## EXECUTIVE SUMMARY

SEMS..... Superfund Enterprise Management System

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS..... Corrective Action Report

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

### ***Lists of Federal RCRA generators***

RCRA-LQG..... RCRA - Large Quantity Generators

RCRA-SQG..... RCRA - Small Quantity Generators

RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

US ENG CONTROLS..... Engineering Controls Sites List

US INST CONTROLS..... Institutional Controls Sites List

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

### ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE..... State Response Sites

### ***Lists of state and tribal leaking storage tanks***

LUST..... Geotracker's Leaking Underground Fuel Tank Report

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

### ***Lists of state and tribal registered storage tanks***

FEMA UST..... Underground Storage Tank Listing

AST..... Aboveground Petroleum Storage Tank Facilities

INDIAN UST..... Underground Storage Tanks on Indian Land

### ***Lists of state and tribal voluntary cleanup sites***

INDIAN VCP..... Voluntary Cleanup Priority Listing

### ***Lists of state and tribal brownfield sites***

BROWNFIELDS..... Considered Brownfields Sites Listing

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Brownfield lists***

US BROWNFIELDS..... A Listing of Brownfields Sites

## EXECUTIVE SUMMARY

### **Local Lists of Landfill / Solid Waste Disposal Sites**

WMUDS/SWAT.....	Waste Management Unit Database
SWRCY.....	Recycler Database
HAULERS.....	Registered Waste Tire Haulers Listing
INDIAN ODI.....	Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9.....	Torres Martinez Reservation Illegal Dump Site Locations
ODI.....	Open Dump Inventory
IHS OPEN DUMPS.....	Open Dumps on Indian Land

### **Local Lists of Hazardous waste / Contaminated Sites**

US HIST CDL.....	Delisted National Clandestine Laboratory Register
HIST Cal-Sites.....	Historical Calsites Database
SCH.....	School Property Evaluation Program
CDL.....	Clandestine Drug Labs
Toxic Pits.....	Toxic Pits Cleanup Act Sites
US CDL.....	National Clandestine Laboratory Register

### **Local Lists of Registered Storage Tanks**

CERS TANKS.....	California Environmental Reporting System (CERS) Tanks
-----------------	--

### **Local Land Records**

LIENS.....	Environmental Liens Listing
LIENS 2.....	CERCLA Lien Information
DEED.....	Deed Restriction Listing

### **Records of Emergency Release Reports**

HMIRS.....	Hazardous Materials Information Reporting System
CHMIRS.....	California Hazardous Material Incident Report System
LDS.....	Land Disposal Sites Listing
MCS.....	Military Cleanup Sites Listing
SPILLS 90.....	SPILLS 90 data from FirstSearch

### **Other Ascertainable Records**

FUDS.....	Formerly Used Defense Sites
DOD.....	Department of Defense Sites
SCRD DRYCLEANERS.....	State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR.....	Financial Assurance Information
EPA WATCH LIST.....	EPA WATCH LIST
2020 COR ACTION.....	2020 Corrective Action Program List
TSCA.....	Toxic Substances Control Act
TRIS.....	Toxic Chemical Release Inventory System
SSTS.....	Section 7 Tracking Systems
ROD.....	Records Of Decision
RMP.....	Risk Management Plans
RAATS.....	RCRA Administrative Action Tracking System
PRP.....	Potentially Responsible Parties
PADS.....	PCB Activity Database System
ICIS.....	Integrated Compliance Information System

## EXECUTIVE SUMMARY

FTTS.....	FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
MLTS.....	Material Licensing Tracking System
COAL ASH DOE.....	Steam-Electric Plant Operation Data
COAL ASH EPA.....	Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER.....	PCB Transformer Registration Database
RADINFO.....	Radiation Information Database
HIST FTTS.....	FIFRA/TSCA Tracking System Administrative Case Listing
DOT OPS.....	Incident and Accident Data
CONSENT.....	Superfund (CERCLA) Consent Decrees
INDIAN RESERV.....	Indian Reservations
FUSRAP.....	Formerly Utilized Sites Remedial Action Program
UMTRA.....	Uranium Mill Tailings Sites
LEAD SMELTERS.....	Lead Smelter Sites
US AIRS.....	Aerometric Information Retrieval System Facility Subsystem
US MINES.....	Mines Master Index File
ABANDONED MINES.....	Abandoned Mines
DOCKET HWC.....	Hazardous Waste Compliance Docket Listing
UXO.....	Unexploded Ordnance Sites
ECHO.....	Enforcement & Compliance History Information
FUELS PROGRAM.....	EPA Fuels Program Registered Listing
PFAS NPL.....	Superfund Sites with PFAS Detections Information
PFAS FEDERAL SITES.....	Federal Sites PFAS Information
PFAS TSCA.....	PFAS Manufacture and Imports Information
PFAS RCRA MANIFEST.....	PFAS Transfers Identified In the RCRA Database Listing
PFAS ATSDR.....	PFAS Contamination Site Location Listing
PFAS WQP.....	Ambient Environmental Sampling for PFAS
PFAS NPDES.....	Clean Water Act Discharge Monitoring Information
PFAS ECHO FIRE TRAINING.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS PART 139 AIRPORT.....	All Certified Part 139 Airports PFAS Information Listing
AQUEOUS FOAM NRC.....	Aqueous Foam Related Incidents Listing
PFAS.....	PFAS Contamination Site Location Listing
AQUEOUS FOAM.....	Former Fire Training Facility Assessments Listing
CA BOND EXP. PLAN.....	Bond Expenditure Plan
Cortese.....	"Cortese" Hazardous Waste & Substances Sites List
CUPA Listings.....	CUPA Resources List
DRYCLEANERS.....	Cleaner Facilities
EMI.....	Emissions Inventory Data
ENF.....	Enforcement Action Listing
Financial Assurance.....	Financial Assurance Information Listing
ICE.....	Inspection, Compliance and Enforcement
HIST CORTESE.....	Hazardous Waste & Substance Site List
HWP.....	EnviroStor Permitted Facilities Listing
HWT.....	Registered Hazardous Waste Transporter Database
HAZNET.....	Facility and Manifest Data
MINES.....	Mines Site Location Listing
MWMP.....	Medical Waste Management Program Listing
NPDES.....	NPDES Permits Listing
PEST LIC.....	Pesticide Regulation Licenses Listing
PROC.....	Certified Processors Database
Notify 65.....	Proposition 65 Records
HAZMAT.....	Hazardous Material Facilities
UIC.....	UIC Listing
UIC GEO.....	UIC GEO (GEOTRACKER)
WASTEWATER PITS.....	Oil Wastewater Pits Listing

## EXECUTIVE SUMMARY

WDS.....	Waste Discharge System
WIP.....	Well Investigation Program Case List
MILITARY PRIV SITES.....	MILITARY PRIV SITES (GEOTRACKER)
PROJECT.....	PROJECT (GEOTRACKER)
WDR.....	Waste Discharge Requirements Listing
CERS.....	CERS
NON-CASE INFO.....	NON-CASE INFO (GEOTRACKER)
OTHER OIL GAS.....	OTHER OIL & GAS (GEOTRACKER)
PROD WATER PONDS.....	PROD WATER PONDS (GEOTRACKER)
SAMPLING POINT.....	SAMPLING POINT (GEOTRACKER)
WELL STIM PROJ.....	Well Stimulation Project (GEOTRACKER)
PFAS TRIS.....	List of PFAS Added to the TRI
BIOSOLIDS.....	ICIS-NPDES Biosolids Facility Data
MINES MRDS.....	Mineral Resources Data System

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR MGP.....	EDR Proprietary Manufactured Gas Plants
EDR Hist Auto.....	EDR Exclusive Historical Auto Stations
EDR Hist Cleaner.....	EDR Exclusive Historical Cleaners

### EDR RECOVERED GOVERNMENT ARCHIVES

#### ***Exclusive Recovered Govt. Archives***

RGA LF.....	Recovered Government Archive Solid Waste Facilities List
RGA LUST.....	Recovered Government Archive Leaking Underground Storage Tank

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

## EXECUTIVE SUMMARY

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

## EXECUTIVE SUMMARY

### ***Lists of state and tribal leaking storage tanks***

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 3 CPS-SLIC sites within approximately 0.5 miles of the target property.

### ***Lists of state and tribal registered storage tanks***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***Lists of state and tribal voluntary cleanup sites***

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 04/24/2023 has revealed that there is 1 VCP

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Hazardous waste / Contaminated Sites**

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 04/17/2023 has revealed that there is 1 CERS HAZ WASTE site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>WHISPERING LAKES GOL</b>	<b>2525 RIVERSIDE DR</b>	<b>ENE 1/8 - 1/4 (0.205 mi.)</b>	<b>C12</b>	<b>27</b>

#### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

CA FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there is 1 CA FID UST site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
JESUS URENO EPA ID:: CAC002969633	2912 S COLONIAL AVE	NE 1/8 - 1/4 (0.203 mi.)	11	24
WHISPERING LAKES GOL EPA ID:: CAL000341755	2525 E RIVERSIDE DR	ENE 1/8 - 1/4 (0.205 mi.)	C13	34

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/05/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>BARSTOW WATER WASTE</b>	<b>2200 EAST RIVERSIDE</b>	<b>NW 1/8 - 1/4 (0.127 mi.)</b>	<b>8</b>	<b>15</b>

San Bern. Co. Permit: San Bernardino County Fire Department Hazardous Materials Division.

A review of the San Bern. Co. Permit list, as provided by EDR, and dated 05/09/2023 has revealed that there are 5 San Bern. Co. Permit sites within approximately 0.25 miles of the target property.

**Environmental Interest/Information System:**

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.

ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Name: LEGEND DAIRY FARMS #1  
Address: 9155 E RIVERSIDE DR  
City,State,Zip: ONTARIO, CA 91761  
Site ID: 595885  
CERS ID: 10883746  
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 595885  
Site Name: Legend Dairy Farms #1  
Violation Date: 11-17-2022  
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7

Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: OBSERVATION: Observed empty 55-gallon drums in a containment structure and empty tanks throughout the facility which have been stored on site for an unknown amount of time. The contents of the tanks and containers were unknown and they were not labeled at the time of the inspection. CORRECTIVE ACTION: Submit a copy of a disposal receipt showing the removal of the empty tanks and containers or a signed statement as to how they have been sold, used, or otherwise managed.

Violation Division: San Bernardino County Fire Department  
Violation Program: HW  
Violation Source: CERS,

Site ID: 595885  
Site Name: Legend Dairy Farms #1  
Violation Date: 11-17-2022  
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 01/09/2023. OBSERVATION: Hazardous materials were observed on site at the time of the inspection that are not listed in the most current CERS inventory or are listed in lesser quantities. CORRECTIVE ACTION: Submit a signed statement that an updated inventory has been submitted into CERS.

Violation Date: 07-18-2017  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.  
Violation Notes: Returned to compliance on 08/14/2017. The hazardous materials inventory needs to be updated. Update the maximum daily amount of diesel and gasoline to be 550 gallons each. Also update the quantity of liquid iron to be 110 gallons. Items that are listed at below 55 gallons can be removed from the inventory. Add a 55 gallon drum of used oil filters to the inventory. It was found that one map was submitted in the CERS system. Upload all three maps found on site into CERS. Ensure the map show the location of the hazardous waste and hazardous materials storage areas, evacuation staging area and fire extinguishers.

Violation Notes: Returned to compliance on 08/22/2017. Failure to determine if waste is hazardous waste (CCR 66262.11) It was found that the facility is washing batteries with a acid neutralizer to a wash down pit on the east side of the cart storage building. This goes directly to the ground. The concern is that lead containing waste could be discharged to the ground. Immediately discontinue this practice until it can be determined that the waste is non-hazardous either by using generator knowledge or analytical testing. The other option is to use a rag to wipe down the batteries after applying the cleaning solution. This waste would be properly managed by Prudential as part of their rag service.

Violation Division: San Bernardino County Fire Department  
Violation Program: HW  
Violation Source: CERS,

Site ID: 85855  
Site Name: WHISPERING LAKES GOLF COURSE  
Violation Date: 06-15-2020  
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 06/28/2020. OBSERVATION: The 180 day accumulation time limit for the used oil collection has been exceeded. CORRECTIVE ACTION: Dispose of the used oil using a licensed waste hauler and submit a copy of the hazardous waste manifest.

Violation Division: San Bernardino County Fire Department  
Violation Program: HW  
Violation Source: CERS,

Site ID: 85855  
Site Name: WHISPERING LAKES GOLF COURSE  
Violation Date: 06-15-2020  
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22

Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.

Violation Notes: Returned to compliance on 06/28/2020. OBSERVATION: The drum of used oil filters was found improperly labeled as "non-hazardous" waste. These must be labeled as either hazardous waste or as drained used oil filters. CORRECTIVE ACTION: Submit a signed certificate of compliance to indicate the used oil filters have been properly labeled.

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General  
Violation Notes: Returned to compliance on 08/22/2017. Failure to determine if waste is hazardous waste (CCR 66262.11) Due to the potential nature of the battery rinse water, a hazardous waste determination must be made to determine if the rinse water meets hazardous waste criteria. This can be done by laboratory analysis of the pH of the rinse water or by generator knowledge. If you choose laboratory analysis, provide send test results to this department. If you choose to make this

**WDS:**

Name: JOHN VAN VEEN DAIRY  
Address: 9581 CHINO AVE

MAP FINDINGS

**FORESTAR COUNTRYSIDE (Continued)**

**S102006286**

City: ONTARIO  
 Facility ID: Santa Ana River 365447002  
 Facility Type: Agricultural - Facility that treats and/or disposes of the wastes associated with confined and concentrated animal feeding, confined animal feeding, confined animal holding, confined and concentrated aquatic animal production facilities, and aquaculture. the treatment and/or disposal of agricultural return water is included in this category.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

NPDES Number: CAG018001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Subregion: 8

Facility Telephone: Not reported  
 Facility Contact: Not reported  
 Agency Name: VAN VEEN JOHN  
 Agency Address: 9581 CHINO AVENUE  
 Agency City,St,Zip: ONTARIO 91761  
 Agency Contact: JOHN VAN VEEN  
 Agency Telephone: Not reported  
 Agency Type: Private  
 SIC Code: 241  
 SIC Code 2: Not reported  
 Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Primary Waste: STORMS  
 Waste Type2: N  
 Waste2: Stormwater Runoff  
 Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Secondary Waste: Solid Wastes  
 Secondary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Design Flow: 0  
 Baseline Flow: 0  
 Reclamation: No reclamation requirements associated with this facility.  
 POTW: The facility is not a POTW.  
 Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Military DOD Site: No  
Facility Project Subtype: Not reported  
RWQCB Region: SANTA ANA RWQCB (REGION 8)  
Site History: A plume of groundwater contaminated by volatile organic chemicals (VOCs) is located south of Calif. State Highway 60 within the City of Ontario. In addition to VOCs, there are also other groundwater contaminants within the plume area that require treatment. The project will consist of three wells; a pipeline to convey the groundwater from the wells to a pipeline connected to Chino Desalter Authority (CDA) II; and three new decarbonators at CDA II. plume area that require treatment.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: No Update Planned

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/22/2023  
Date Data Arrived at EDR: 07/06/2023

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2023  
Date Data Arrived at EDR: 06/23/2023  
Date Made Active in Reports: 09/20/2023  
Number of Days to Update: 89

Telephone: 703-603-8704  
Last EDR Contact: 06/23/2023  
Next Scheduled EDR Contact: 10/09/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/22/2023  
Date Data Arrived at EDR: 07/06/2023

Last EDR Contact: 09/01/2023  
Next Scheduled EDR Contact: 10/23/2023  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: 800-424-9346
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/23/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 07/24/2023	Source: EPA
Date Data Arrived at EDR: 07/31/2023	Telephone: 800-424-9346
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/25/2023	Source: Department of the Navy
Date Data Arrived at EDR: 05/31/2023	Telephone: 843-820-7326
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 54	Next Scheduled EDR Contact: 11/20/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

## UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

Number of Days to Update: 84	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## Local Lists of Hazardous waste / Contaminated Sites

### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 05/22/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 05/23/2023	Telephone: 202-307-1000
Date Made Active in Reports: 07/10/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 48	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: No Update Planned

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 04/24/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 04/25/2023	Telephone: 916-323-3400
Date Made Active in Reports: 07/13/2023	Last EDR Contact: 07/25/2023
Number of Days to Update: 79	Next Scheduled EDR Contact: 11/06/2023
	Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2020	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/30/2022	Telephone: 916-255-6504
Date Made Active in Reports: 02/09/2023	Last EDR Contact: 09/15/2023
Number of Days to Update: 71	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Varies

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364
Date Made Active in Reports: 09/26/1995	Last EDR Contact: 01/26/2009

	Data Release Frequency: Quarterly

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/22/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 05/23/2023	Telephone: 202-307-1000

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## LDS: Land Disposal Sites Listing (GEOTRACKER)

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 06/05/2023	Source: State Water Quality Control Board
Date Data Arrived at EDR: 06/05/2023	Telephone: 866-480-1028
Date Made Active in Reports: 08/25/2023	Last EDR Contact: 09/06/2023
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/18/2023
	Data Release Frequency: Quarterly

## MCS: Military Cleanup Sites Listing (GEOTRACKER)

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 06/05/2023	Source: State Water Resources Control Board
Date Data Arrived at EDR: 06/05/2023	Telephone: 866-480-1028
Date Made Active in Reports: 08/25/2023	Last EDR Contact: 09/06/2023
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/18/2023
	Data Release Frequency: Quarterly

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch
Date Data Arrived at EDR: 01/03/2013	Telephone: N/A
Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 07/31/2023
Number of Days to Update: 88	Next Scheduled EDR Contact: 11/13/2023

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

Next Scheduled EDR Contact: 12/11/2023  
Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 05/09/2023

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

Date of Government Version: 03/30/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/30/2023	Telephone: 202-272-0167

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

## HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

Date of Government Version: 06/29/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/29/2023	Telephone: 916-440-7145
Date Made Active in Reports: 09/19/2023	Last EDR Contact: 06/29/2023
Number of Days to Update: 82	Next Scheduled EDR Contact: 10/16/2023
	Data Release Frequency: Quarterly

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Data Release Frequency: Varies

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

Date of Government Version: 01/10/2022

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

CITY OF ONTARIO - 15 DAIRY RIVER, LLC  
9309 E RIVERSIDE DR  
ONTARIO, CA 91761

### TARGET PROPERTY COORDINATES

Latitude (North): 34.01735 - 34° 1' 2.46"  
Longitude (West): 117.600998 - 117° 36' 3.59"  
Universal Tranverse Mercator: Zone 11  
UTM X (Meters): 444508.8  
UTM Y (Meters): 3764048.0  
Elevation: 772 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map: 12015973 GUASTI, CA  
Version Date: 2018  
  
South Map: 12014834 CORONA NORTH, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

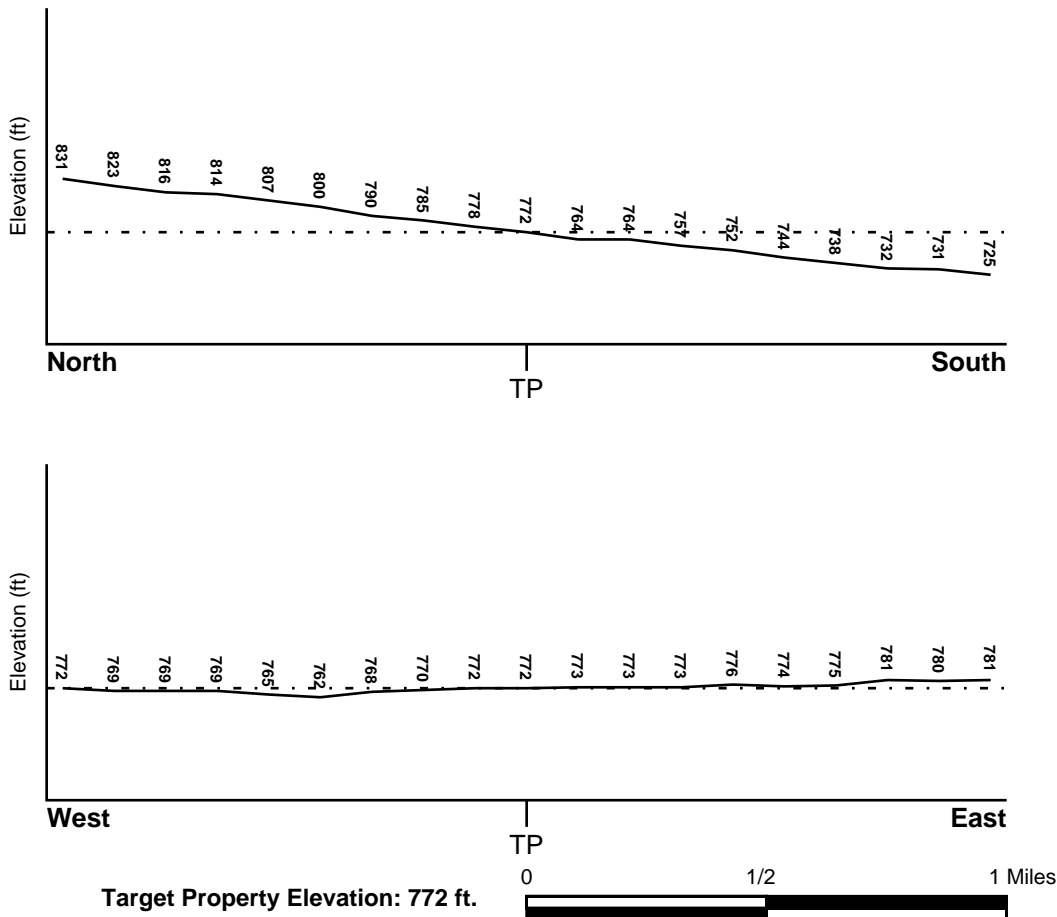

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8638H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8636J	FEMA FIRM Flood data
06071C8639H	FEMA FIRM Flood data

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Status:	Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

9309 E RIVERSIDE DR  
ONTARIO, CA 91761

#### COORDINATES

Latitude (North): 34.0173500 - 34° 1' 2.46"  
Longitude (West): 117.6009980 - 117° 36' 3.59"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 444508.8  
UTM Y (Meters): 3764048.0  
Elevation: 772 ft. above sea level

## EXECUTIVE SUMMARY

### TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 9 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
J & B DAIRY 9309 RIVERSIDE ONTARIO, CA 91761	FINDS Registry ID:: 110064957202	N/A
J & B DAIRY 9309 E RIVERSIDE DR ONTARIO, CA 91761	San Bern. Co. Permit Facility Status: INACTIVE Facility Id: FA0009327	N/A
ANDY SCHAAP 9309 E RIVERSIDE DR ONTARIO, CA 91761	HWTS	N/A
J & B DAIRY 9309 RIVERSIDE DRIVE ONTARIO, CA 91761	CIWQS	N/A

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

CITY OF ONTARIO - 15 DAIRY RIVER, LLC  
9309 E RIVERSIDE DR  
ONTARIO, CA 91761

## TARGET PROPERTY COORDINATES

Latitude (North): 34.01735 - 34° 1' 2.46"  
Longitude (West): 117.600998 - 117° 36' 3.59"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 444508.8  
UTM Y (Meters): 3764048.0  
Elevation: 772 ft. above sea level

## USGS TOPOGRAPHIC MAP

Target Property Map: 12015973 GUASTI, CA  
Version Date: 2018

South Map: 12014834 CORONA NORTH, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

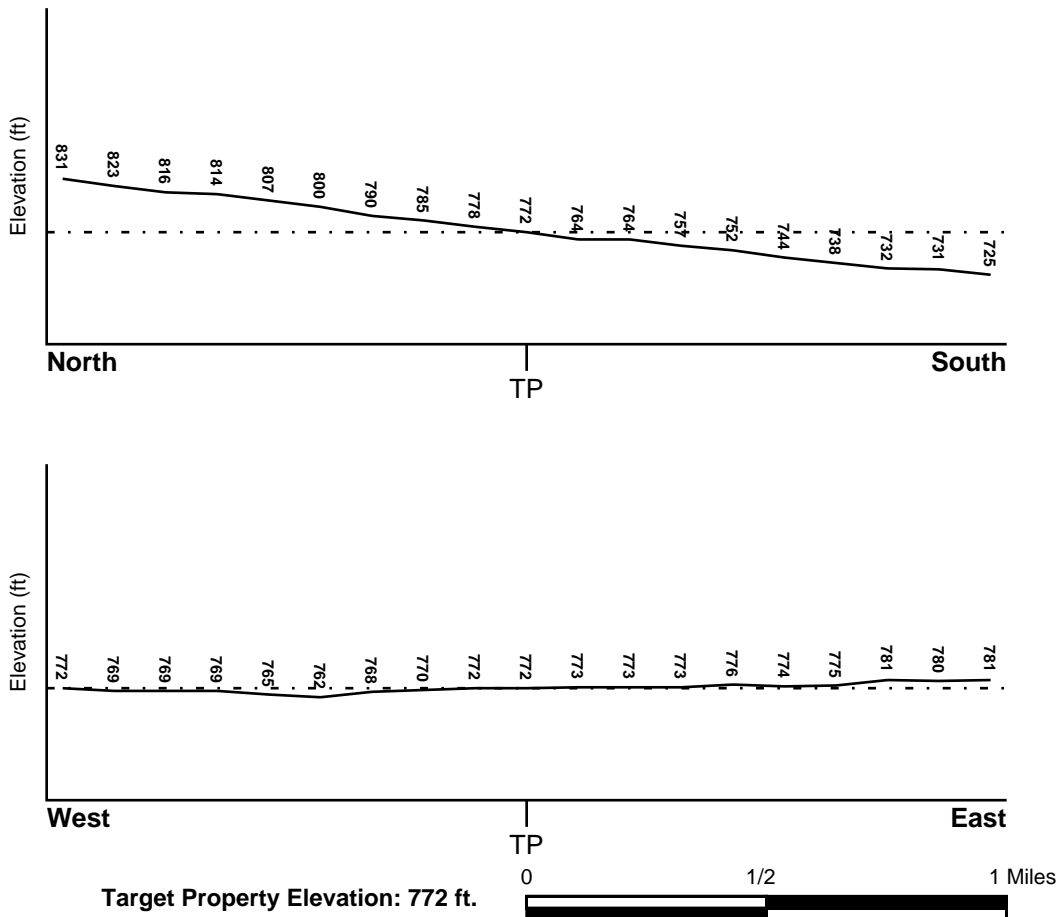

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
