**Sent:** Monday, October 25, 2004 10:31 AM  
**To:** King, Elizabeth  
**Subject:** RE: J & B Dairy, 9309 Riverside Ave., Ontario - Ag Tank

Thank you, that's exactly what I needed. I will add the 4102, which is just a placeholder for the UST, all UST facilities need to have it.

-----Original Message-----

**From:** King, Elizabeth  
**Sent:** Monday, October 25, 2004 10:28 AM  
**To:** Lara-Davis, Linda  
**Subject:** RE: J & B Dairy, 9309 Riverside Ave., Ontario - Ag Tank

here's how it should be done for an AG facility that still has a tank (as far as we know) like this one:

J & B Dairy  
9309 Riverside Ave.  
Ontario

**AR:** Active -- Check the box "Exempt from Billing"

**PE's:** 4104 (only one) -- Current Status "04" (active, exempt from billing)  
4260 -- Current Status "04" (active, exempt from billing)

Let me know if there is anything I left out.

Thanks!

Elizabeth

**Subject:** FW: J & B Dairy, 9309 Riverside Ave., Ontario - Ag Tank

I have created this facility in Envision. Please let me know which programs to add, and what status they should be under. We have several AG facilities, and when I look at them, they are not consistent. Some have no programs, some are exempt, and some are active with a closed AR.

Hazardous Materials/Waste Inventory continued

- (1) 55-gallon drum containing unknown contents (East of metal awning)

Old Milking parlor:

- approximately (30) various small containers of what appears to be paint
  - approximately (18) 55-gallon drums containing unknown contents
- \*Could not verify whether paint containers and drums were full or empty or see labeling as the building was filled with trash and debris.
- Observed (2) tanks (appear to be old fuel storage tanks) located along the West fence line, South of residence. Red rectangular tank appears to have leaked or is leaking (see photo 6 of narrative); contents unknown. A silver cylindrical tank (see photo 4 of narrative) was also observed; contents unknown.

**Correct the following violations:**

- 101. Hazardous Waste Generator Permit not current - CC 23.0602(b)(1):
- 201. Hazardous Material Handler permit not current - CC 23.0602(b)(3):

Facilities that handle hazardous materials in quantities of 55 gallons, 500 pounds, 200 cubic feet or greater and generate any amount of hazardous waste are required to have permits from this department. Although this is not an operating dairy, the hazardous materials and hazardous wastes observed during the 5/30/07 inspection necessitated permits. The invoice from 10/15/07 is still outstanding and has been referred for collections.

To correct this violation: Submit payment of permit fees immediately.

103. Failure to make Hazardous Waste determination - CCR 66262.11:

The generator of a waste must determine whether the waste being generated is a hazardous waste. Observed numerous 1-gallon and 5-gallon paint containers (beneath metal awning and old milking parlor) and approximately (18) 55-gallon drums of unknown contents (old milking parlor). Due to deteriorated labeling and presence of a large amount of trash and debris, I was unable to verify whether these containers were full or empty or any indication of what the drums contained. Also, observed (1) 55-gallon drum of unknown contents, label deteriorated but appears to be full (East of metal awning).

Containers that previously held a hazardous material or waste are considered contaminated containers and must be managed as such. If the containers hold hazardous waste, the hazardous waste must be disposed of by a licensed hazardous waste hauler. Enclosed are lists of drum recyclers and hazardous waste haulers.

**NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.**

INSPECTION  
DATE: **August 14, 2008**

FACILITY ID <b>FA0009327</b>	FACILITY NAME: <b>Former J &amp; B Dairy</b>	FACILITY LOCATION: <b>9309 E. Riverside Dr., Ontario</b>
Consent Granted by: <input checked="" type="checkbox"/> Inspect <input checked="" type="checkbox"/> Photograph	NAME <b>Andy Schaap, by phone 8/14/08</b>	TITLE <b>Property owner</b>

To correct this violation: Submit copies of receipts documenting proper disposal of empty containers (if applicable) and manifests documenting the identification and removal of hazardous waste(s).

**104. Failure to obtain EPA ID Number - CCR 66262.12(a):**

Facilities that generate hazardous waste are required to obtain an EPA ID Number to track the hazardous waste generated from their business. An EPA ID number has not been obtained.

To correct this violation: Submit enclosed application to the State Department of Toxics Control.

**106. Facility not operated/maintained to prevent release/fire - CCR 66265.31:**

**115. Hazardous Waste containers leaking - CCR 66265.173(b):**

**119. Hazardous Waste not managed lawfully - CHSC 25154:**

Facilities shall be maintained and operated to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment. A container holding hazardous waste shall not be opened, handled, transferred or stored in a manner which may rupture the container or cause it to leak. Leaking containers of hazardous waste is unlawful management. Observed (1) leaking 5-gallon container of what appears to be used oil (see photo 3 of narrative) and (1) apparent old fuel tank that is leaking or did leak (see photo 6 of narrative).

Recommendation: remove soil contaminated from leaking tank and container. Submit a copy of the receipt documenting proper disposal of contaminated soil.

To correct violations 106, 115 & 119: Submit copies of manifests for removal of contents of the 5-gallon container and tank.

**\*\*Submit the corrections requested above along with the signed Certificate of Compliance within 30 days.\*\***

CERTIFICATE OF COMPLIANCE

Page 1 of 1

Return Certification within 30 Days of Receipt to Inspector Leslie Heaviside

In the Matter of Respondent: Andy Schaap

Violation(s) cited on: August 22, 2008 FA #: FA0009327

Facility Name: Former J & B Dairy

Site Address: 9309 E. Riverside Dr, Ontario, California

Certificate of Compliance Date: September 21, 2008

I certify under penalty of law that:

- Respondent has corrected the violations specified in the above-entitled action.
- I have personally examined any documentation attached to this certification to establish that the violations have been corrected.
- Based on my examination of the attached documentation and inquiry of the individuals, who prepared or obtained them, I believe the information to be true, accurate and complete.
- I am authorized to file this certification on behalf of the Respondent.
- I am aware there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

MR. SCHAAP,

A recent review of our records indicates that the following violation(s) remain outstanding from the inspection conducted on August 14, 2008:

- Failure to obtain CUPA Hazardous Material Handler Permits
- Failure to obtain CUPA Hazardous Waste Generator Permits
- Failure to determine if waste is hazardous waste
- Failure to operate and maintain facility to prevent release/fire
- Hazardous Waste containers leaking
- Unlawful management of hazardous waste

**Failure to submit the signed and completed certificate of compliance with the previously requested documentation immediately may result in legal action.**

If you have any questions, please call me at (909) 386-8401 or email me at [LHEAVISIDE@SBCFIRE.ORG](mailto:LHEAVISIDE@SBCFIRE.ORG).

SUPPLEMENTAL INSPECTION REPORT

Page 2 of 3

INSPECTION DATE: 5/30/07

Table with 3 columns: FACILITY ID (FA0009327), FACILITY NAME (Former J&B Dairy), FACILITY LOCATION (9309 Riverside Avenue, Ontario)

OBSERVATIONS (Cont.)

A tank was observed above the conex-like container. Another approximately 500-gallon tank was observed near the former milk truck. Brush, wood debris, metal, containers were also observed on the property. Refer to accompanying photos.

DOCUMENT REVIEW

Permits: This facility was previously under permit with the San Bernardino County as "Hazardous Materials Handler - UST only, 4260" and for one "Underground Storage Tank, 4104" Refer to attached Underground Storage Tank Inspection Report.

VIOLATIONS

Note: Numbers on the left correspond to the violation listed on the Inspection Report. Citations are from the California Code of Regulations (CCR) Title 22 or the Health and Safety Code unless otherwise noted.

- 201. Hazardous Material Handler permit not obtained- CC 23.0602(b)(3)
101. Hazardous Waste Generator permit not obtained- CC 23.0602(b)(1)

Facilities that handle, use, or store hazardous materials in quantities at or exceeding 55 gallons, 500lbs or 200 cubic feet of compressed gas at any one time in the course of the year are required to obtain a Hazardous Materials Handler permit. Facilities that generate or store any amount of hazardous waste are required to obtain a Hazardous Waste Generator permit.

55-gallon drums and a drum labeled as formaldehyde were observed in the milking barn and shed. As a result, this facility must obtain and maintain a Hazardous Material Handler permit and Hazardous Waste Generator permit for the current year. At such time, the hazardous materials and hazardous waste have been removed/properly disposed, a re-inspection may be requested to inactivate the permits for the following year.

To correct violations:

Upon receipt of the invoice, pay permit fees. Permits will be generated and sent to the owners address. These permits are valid for one year from the date generated.

- 202/203- Business Plan not established/submitted/updated -CHSC 25503.5/25505
107- Contingency Plan not established- CCR 66265.51(a)

Any facility which handles 55 gallons, 500 pounds, or 200 cubic feet of a compressed gas, or generates any amount of hazardous waste, must establish/submit/update a Business Emergency Contingency Plan (BP). This plan must be updated no later than March 1st every year or within 30 days of a significant change. The BP form and an example are provided in enclosed packet.

NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

SUPPLEMENTAL INSPECTION REPORT

Page 3 of 3

INSPECTION DATE: 5/30/07

Table with 3 columns: FACILITY ID (FA0009327), FACILITY NAME (Former J&B Dairy), FACILITY LOCATION (9309 Riverside Avenue, Ontario)

To correct violations: Prepare and submit the original and one copy (2 total) of the BP to this Division. Retain one copy.

106. Facility not operated/maintained to prevent release/fire- CCR 66265.31

Facilities shall be maintained and operated to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

55-gallon drums, former paint containers, tanks, batteries, abandoned vehicles, brush, and wood debris were observed at the facility. It could not be determined in all cases if containers were empty or still contained hazardous materials such as formaldehyde, oil or paint; or hazardous waste such as used oil.

103. Hazardous waste determination not made - CCR 66262.11

A person who generates a waste shall determine if that waste is a hazardous waste through generator knowledge or analytical testing.

It is the generator's responsibility to determine the contents of the containers and to dispose of the waste or hazardous waste appropriately.

117. Contaminated containers not managed properly- CCR 66261.7

None of the 55-gallon containers in the milk barn had labels indicating former contents. If these containers were used to store hazardous materials or hazardous waste, such as used oil, then they must either be managed as a hazardous waste or contaminated container.

To manage as contaminated containers, the drums must be reclaimed for scrap value and the following information must be maintained and available for review for up to three (3) years: The name, street address, mailing address and telephone number of the facility where the empty containers have been shipped. The containers may also be reconditioned or remanufactured and may also be returned to the supplier to be refilled.

Containers under 5 gallons may be disposed at a solid waste landfill, provided the containers are empty.

If containers contain a hazardous waste additional requirements will apply. These would include the requirement to obtain an EPA ID number from the Department of Toxic Substance Control, proper labeling of each containers, transport off site by a register hazardous waste hauler, and proper recycling/disposal with documentation. An information packet is provided with this report describing these requirements.

To Correct Violations 103/106/117: Within 30 days, identify the contents of all containers on site and dispose appropriately. Provide a statement or photographic documentation that waste and debris which may present a threat of fire have been removed. Provide copy of disposal receipts to this Department.

Sign the white copy of the Certificate of Compliance and return with Compliance Documentation (the BP and Disposal Records) to the address on the provided envelope. If I can be of assistance, please feel free to contact me at 909 386-8401.

NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

CERTIFICATE OF COMPLIANCE

Page 1 of 1

Return Certification within 30 Days of Receipt to Inspector Theresa Congdon

In the Matter of Respondent: Andy and Maria Schaap

Violation(s) cited on: May 30, 2007 FA #: FA00009327

Facility Name: Former J&B Dairy

Site Address: 9309 Riverside Avenue, Ontario

Certificate of Compliance Date: June 28, 2007

I certify under penalty of law that:

- Respondent has corrected the violations specified in the above-entitled action.
I have personally examined any documentation attached to this certification to establish that the violations have been corrected.
Based on my examination of the attached documentation and inquiry of the individuals, who prepared or obtained them, I believe the information to be true, accurate and complete.
I am authorized to file this certification on behalf of the Respondent.
I am aware there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

UNDERGROUND STORAGE TANK INSPECTION REPORT

Facility Name: Former J&B Dairy Date: May 30, 2007

Street Address: 9309 Riverside Avenue Facility No. FA0009327

City: Ontario Zip Code: 91762 Program Record No.

Facility Contact: Andy Schaap (Owner) Facility Phone No. (505) 985 0781 Number of Tanks: 2

Refer to Title 23 of the California Code of Regulations (CCR) and Chapter 6.7 of the Health and Safety Code (CHSC). The following code sections are either in Violation (V) of, or in Compliance (C) with, the Underground Storage Tank laws and regulations, or compliance is not applicable, not addressed or unknown (N).

Table with columns: GENERAL REQUIREMENTS, MONITORING OF UST SYSTEMS, UNAUTHORIZED RELEASE AND ABANDONMENT, UNIFORM FIRE CODE REQUIREMENTS, OTHER REQUIREMENTS. Includes violation codes (V, C, N) and a narrative section on the right.

An inspection was conducted to determine the operational status of an underground storage tank at this agricultural facility.
A review of files maintained by the San Bernardino County Fire Department showed the following.
1/21/88 - An Agricultural Hazardous Materials Inventory signed by Ben Vanigen declared the existence of (1) 500-gallon gasoline underground storage tank (UST) and (1) 500-gallon diesel above ground storage tank (AST).
There is no other information in the file to indicate if this tank was removed or still remains.
This report will be referred to the San Bernardino County Fire Department Underground Storage Tank Division for further review.
Please contact this department if you have any further information regarding removal/disposition of the underground storage tanks.

NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

**Subject:** FW: J & B Dairy, 9309 Riverside Ave., Ontario - Ag Tank

Good morning Linda,

If there is no record of removal and the facility does not exist in EFW, it should be entered consistent with the other exempt AG tanks. I believe they are considered "active non-billable" but I could be wrong. Please follow up with Elizabeth to make sure any appropriate changes are made.

Ron

-----Original Message-----

**From:** King, Elizabeth  
**Sent:** Thursday, October 21, 2004 4:35 PM  
**To:** Williams, Susan; Ripley, Ron  
**Subject:** J & B Dairy, 9309 Riverside Ave., Ontario - Ag Tank

FYI

In conducting a record search for the subject address, I discovered an inactive (closed) ag handler file. It contains an agricultural hazardous material inventory dated 1/21/88. The box at the bottom stating "I have an underground tank" is checked and "Tank Size" is filled in as 500 gallons.

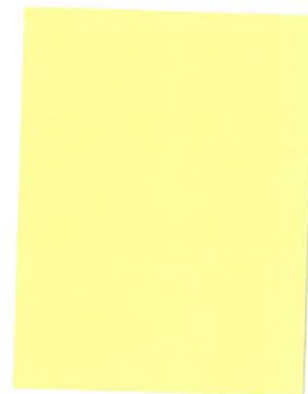

This address is not on your list of ag tanks removed and there is no record of removal in this inactive handler file.

(Also no ugsts ever entered in FDPM or Envision)

The file will be available for review by Jolynn Tofani of GeoKinetics. Following her review, it will be returned to the inactive shelves.

**SUBJECT: REQUEST FOR RECORDS INFORMATION**

**RE: 9309 Riverside Ave.  
Ontario, California**

This is to confirm that the San Bernardino County Hazardous Materials Division has located records that may pertain to the subject site, as described in your request for records search.

The following file(s) are available for your review. Please e-mail this office at [eking@fire.sbcounty.gov](mailto:eking@fire.sbcounty.gov) or call the number at the end of this letter to arrange an appointment.

**ACTIVE PERMITS:**

*(Regulatory files for facilities with annual operating permits to maintain underground storage tanks, storage hazardous materials, and/or generate hazardous waste. Files include permits, inspections, reports, test results, correspondence, and related materials. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities still in operation).*

No record of active permits/files

**INACTIVE PERMITS:**

*(Inactive regulatory files for formerly permitted facilities which maintained underground storage tanks, stored hazardous materials, and/or generated hazardous waste and/or facilities with underground storage tanks removed and/or materials and waste removed. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities no longer operating underground tanks).*

- PAYMENT OF \$71.00 MUST BE SUBMITTED WITH THIS REQUEST. A SEPARATE REQUEST MUST BE MADE FOR EACH SITE.
- You may fax or e-mail this form to and mail the original with payment. Your faxed or e-mailed request will be logged at the time it is received (any request received after 5:00 PM will be logged in on the following business morning). Check the box in the upper left corner of this form to indicate that you have sent the original form with the fee by separate mail. PLEASE NOTE THAT THE SEARCH WILL NOT BEGIN UNTIL THE PROPER FEE IS RECEIVED.
- A rate of \$71.00 per hour will be charged for any extended research.
- If no records exist, you will be notified in writing. If records are located, you will be notified in writing describing the records that exist for the site and what files are available for review, generally within ten working days. Upon receipt of the records availability notice, you may schedule an appointment to review the available files.
- Staff will copy a maximum of 20 pages at the time records are examined at a rate of 25 cents per page. If more copies are required, you may bring a personal copier or arrange a private copy service if preferred. You will not be required to be present at the copy service appointment.

REQUESTOR'S SIGNATURE

## REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT

The main focus of a REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT is to determine whether there exists in San Bernardino County Fire Department (County Fire) files any record relating to contamination or reports of spills at a particular site. A Certified Hazardous Materials Records Search Finding Report should reveal whether there are any facilities at the site that are subject to current or past regulatory activity by County Fire, such as underground storage tanks, hazardous material handlers, hazardous waste generators, and EPCRA or CalARP facilities, as well as any reports of spills, incidents, complaints, or cleanup activity, that can be a useful tool in providing a history of compliance or non-compliance.

Once County Fire has completed its records search, a Certified Hazardous Materials Records Search Finding Report will be prepared and issued, which will detail all County Fire records associated with a particular site by type, date, location, and status where applicable. (Any files identified in a Certified Hazardous Materials Records Search Finding Report can be made available for copies and/or review upon request.)

If the completed records search reveals no County Fire record of hazardous material activity at the site, a Certified Hazardous Materials Records Search Finding Report will be issued, noting that "no records" were identified.

Please provide a specific site address or location description. If a situs address does not exist or cannot be found, list another type of location identifier such as Assessor Parcel Number (preferable), cross streets or intersections (e.g., NWC 5<sup>th</sup> Ave. & Main St.), and/or legal description, and if possible attach a map to this request form.

**DISCLAIMER:** While all attempts are made to provide accurate, current, and reliable information, County Fire recognizes the possibility of human error. Therefore, County Fire, its officers, employees, agents and volunteers, make no representations as to the accuracy, completeness or suitability of a Certified Hazardous Materials Records Search Finding Report and provides a Certified Hazardous Materials Records Search Finding Report "as is", with no warranties, express or implied, including the implied warranty of fitness for a particular purpose. In no event shall County Fire be liable for any damages of any nature whatsoever, arising out of the issuance of a Certified Hazardous Materials Records Search Finding Report. County Fire therefore assumes no liability for damages incurred directly or indirectly as a result of any errors, omissions or discrepancies in a Certified Hazardous Materials Records Search Finding Report.

**RELEASE AND INDEMNIFICATION:** In consideration for the issuance of a Certified Hazardous Materials Records Search Finding Report, I hereby release and forever discharge County Fire, its officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability in connection with County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report, including, but not limited to, claims that may arise due to the active or passive negligence of County Fire, its officers, employees, agents and volunteers.

I am familiar with the provisions of California Civil Code Section 1542, which provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I hereby expressly waive any and all rights that I may have there under. I understand and acknowledge the significance and consequence of this specific waiver of California Civil Code Section 1542 and assume full responsibility for any injuries, damages, losses or liabilities that I may hereafter discover as possibly resulting from County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report.

In further consideration for County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report, I hereby agree, for myself, my heirs, administrators, executors and assigns, that I shall indemnify, defend (with counsel approved by County) and hold harmless County Fire, its officers, employees, agents and volunteers from any and all claims, demands, actions or suits arising out of or in connection with County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report brought by any third party.

\* \* \*

I have read the above terms and conditions, including the paragraphs entitled "DISCLAIMER" and "RELEASE AND INDEMNIFICATION", and by my signature below, I affirm that I understand these terms and conditions and accept them as part of my REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT.

I hereby request a Certified Hazardous Materials Records Search Finding Report for the location described on Page 1 of this application.

- I am including payment of the initial fee of \$130.00, for the first hour of research, by check or money order, payable to San Bernardino County Fire Dept. I understand that research exceeding one hour will be billed at the rate of \$130.00 for each additional hour spent by County Fire in completing this request.
- I have faxed or emailed this request and will forward payment along with the original request form within 48 hours.

**RE: UNDERGROUND STORAGE TANK AT FORMER J&B DAIRY LOCATED AT 9309  
RIVERSIDE DRIVE, ONTARIO CA**

This Department inspected the above referenced location in response to archived information indicating that this property previously or presently has hazardous materials (i.e., petroleum products) stored in underground storage tank(s). A summary of the information obtained during the inspection and information maintained by this Department in the facility file follows:

- On January 21, 1988, Ben Vanigen, the then owner of this property, disclosed the existence of a 500-gallon underground storage tank containing Gasoline.
- An inspection by this Department on May 30, 2007 indicates that there is an underground storage tank stored empty above grade. No UST was identified.
- This Department has no record of UST Removal Permit.

This letter will be placed in the facility file as a notice to future buyers of the possibility that USTs may have been abandoned or removed without complete documentation or oversight from this Department. This letter does not constitute a release of liability for the site or declaration that the site is free from contamination. Should future projects or environmental investigation reveal contaminants on site, the property owner is responsible and held liable for site investigation and remedial action.

Should you have any questions, please contact me at 909 386-8419.

Ms. Hernandez,

Converse Consultants (Converse) is pleased to submit the attached report that summarizes the activities and the results of a Phase I Environmental Site Assessment (Phase I ESA) that was conducted at the referenced property.

A summary of the assessment is presented in the Executive Summary, as well as in Sections 8.0, 9.0, and 10.0 of the report. Recognized Environmental Conditions were identified during this assessment and additional assessment appears warranted.

We appreciate the opportunity to be of service. Should you have any questions or comments regarding this report, please contact Spencer Wagner at (562) 505-5219 or Norman Eke at (626) 930-1260.

# Executive Summary

---

The following is an Executive Summary of the Phase I Environmental Site Assessment (Phase I ESA) that was conducted by Converse Consultants (Converse). Please refer to the appropriate sections of the report for a complete discussion of these issues. In the event of a conflict between this Executive Summary and the report, or an omission in the Executive Summary, the report shall prevail.

This report presents the results of the Converse Phase I ESA performed at Assessor Parcel Numbers (APNs) 0218-101-03, -04, -05, and -06 in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by the City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical within the scope of an ESA, Recognized Environmental Conditions (RECs) in connection with the Subject Property.

Converse has compiled and reviewed information that was obtained from interviews, document research, and on-site and area reconnaissance to identify potential environmental conditions at the Property in conformance with the ASTM Standard E: 1527-21 Environmental Site Assessment Standard Practice (ASTM Standard: E1527-21). This Phase I ESA was conducted during the period of September 19, 2023 to October 20, 2023.

The Subject Property is owned by JCLIN Investment, LP, and is currently developed with agricultural fields.

As early as 1897, the Subject Property was primarily undeveloped with two (2) roadways bisecting the Subject Property from north to south, and east to west. By 1938, the roadways were no longer present on the Subject Property, the northwestern portion of the Subject Property was developed with possible residential structures, and the remainder of the Subject Property was developed with agricultural fields. The residential structures in the northwestern portion of the Subject Property were razed by 1948, and the Subject Property has remained developed for agricultural use since that time.

The following items were noted in the northeast corner of the Subject Property:

- A possible agricultural well.
- A con-ex container

The Subject Property was not identified in the regulatory database report.

Two (2) possible drycleaners were identified as historically operating at the northern adjoining retail shopping center. Lewis Cleaners was identified as occupying 2955 South Vineyard Avenue from as early as 1986 to at least 1988. Family Dry Cleaners was identified as occupying 2929 South Vineyard Avenue from as early as 1978 to at least 1982.

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- Current and historical agricultural operations on the Subject Property are a REC based on the potential use of pesticides and metals.
- The identification of two (2) possible dry cleaners that operated on the northern adjoining property between 1978 and 1982, and 1986 and 1988 is considered a REC due to potential use of drycleaning solvents and the potential for impacts to the Subject Property through vapor encroachment.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property. Observation of the Subject Property was limited to visual observation from the East Riverside Avenue on the north side of the Subject Property.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

Based on the findings, additional assessment appears warranted and should include the following:

- Soil sampling in the vicinity of areas of the Subject Property where agricultural uses were identified.
- Soil vapor sampling in the northern portion of the Subject Property to evaluate whether historical offsite possible drycleaning activities have impacted the subsurface soil vapor beneath the Subject Property.
- Any future redevelopment of the Subject Property should be completed in accordance with the City of Ontario Methane Ordinance.
- A site reconnaissance should be completed at the time of the Phase II Environmental Site Assessment.

In addition, Converse also recommends that prior to redevelopment of the Subject Property, the possible agricultural well in the northeastern portion of the Subject Property should be abandoned in accordance with applicable regulatory requirements.

The interior of the con-ex container in the northeastern portion of the Subject Property should be evaluated for the presence of hazardous wastes or materials. Any hazardous wastes or materials that are present should be disposed of in accordance with applicable regulatory requirements.

# 1.0 Introduction

---

## 1.1 Purpose and Scope of Services

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at APN 0218101-03, -04 -05, and -06 in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical, Recognized Environmental Conditions (RECs) in connection with the Property. The term Recognized Environmental Conditions is defined in Section 1.1.1 of the American Society of Testing and Materials (ASTM) Standard Practice as the presence or likely presence of any hazardous substances or petroleum products in, at or on a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

This Phase I ESA was completed in accordance with our proposal dated September 19, 2023. Our work consisted of the following and was completed in general conformance with the scope and limitations of the ASTM Practice E1527-21 and complies with standards and practices set forth in 40 Code of Federal Regulations (CFR) Part 312 for AAI.

- Interviews with the Property owner representatives
- Property and vicinity reconnaissance
- Review of regulatory agency records
- Description of physical setting
- Historical review
- Interviews with public agency personnel
- Preparation of this report

## 1.2 Non-Scope Considerations

There are a number of non-scope issues which are sometimes assessed concurrently with a Phase I ESA. Unless specifically agreed in the contract proposal documents, these non-scope considerations are not included as part of the Phase I ESA. Examples of non-scope issues include:

- Asbestos-containing Building Materials unrelated to release into the environment
- Biological Agent
- Cultural & Historic Resources
- Diffuse Anthropogenic Pollution
- Ecological Resources
- Endangered Species
- Health & Safety
- Indoor Air Quality unrelated to release of hazardous substances or petroleum products in the environment
- Industrial Hygiene
- Lead-based Paint unrelated to releases in the environment
- Lead in Drinking Water
- Mold or microbial growth conditions
- PCB-containing building materials (for example, interior fluorescent light ballasts, paint, and caulk)
- Polyfluoroalkyl Substances
- Naturally-occurring Radon
- Regulatory Compliance

- Substances not defined as hazardous substances unless or until such substances are classified as CERCLA hazardous substances.
- Wetlands

No Non-Scope issues were addressed in this report.

### **1.3 Significant Assumptions**

No assumptions were made for this assessment that need to be noted as significant.

### **1.4 Limitations and Expectations**

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property. Observation of the Subject Property was limited to viewing from East Riverside Drive along the northern boundary of the Subject Property.
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

### **1.5 Special Terms and Conditions**

No special terms or conditions were identified by the User.

### **1.6 Reliance**

This report is for the sole benefit and exclusive use of City of Ontario in accordance with the terms and conditions under which these services have been provided. Its preparation has been in accordance with generally accepted environmental practices. No other warranty, either express or implied, is made. The Scope of Services associated with the report was designed solely in accordance with the objectives, schedule, budget, and risk-management preferences of City of Ontario.

This report should not be regarded as a guarantee that no further contamination, beyond that which could be detected within the scope of this assessment, is present at the Property. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation of the property at the time of the assessment. Also, events may occur after the Property visit, which may result in contamination of the Property. Additional information, which was not found or available to Converse at the time of report preparation, may result in a modification of the conclusions and recommendations presented.

Any reliance on this report by Third Parties shall be at the Third Party's sole risk. Should City of Ontario wish to identify any additional relying parties not previously identified, a completed Application of Authorization to Use (see Appendix A of this report) must be submitted to Converse Consultants.

### ***1.7 Continued Viability***

This report has continued viability of 180 days from the following:

- **Interviews:** Converse was not provided with contact information for the Subject Property. No interview was conducted.
- **Review of Government Records:** September 25, 2023
- **Visual Inspection:** October 18, 2023
- **Declaration of Environmental Professional (EP):** October 20, 2023
- **Lien Search:** Not Applicable

## 2.0 Property Description

Item	Comment
Current Use(s) of the Property	The Subject Property is owned by JCLIN Investment, LP, and is currently developed with agricultural fields.  A Subject Property location map and a field generated Subject Property plan are provided in Appendix B. Pertinent Property photographs are provided in Appendix C.
Location and Legal Description	The Subject Property is located at APNs 0218101-03, -04 -05, and -06, Ontario, California 91761. The Subject Property is located on the south side of East Riverside Drive, between South Whispering Lakes Lane, and Vineyard Avenue. The Subject Property is located approximately 3.4-miles south of the Ontario (60) Freeway and approximately 3.2-miles west of Interstate 15.  The Subject Property consists of four (4) parcels and is approximately 37-acres.
Zoning Information	According to the City of Ontario, Planning Department, the Subject Property's western two (2) parcels are zoned as MDR for medium residential land use, while the Subject Property's eastern two (2) parcels are zoned as LDR for low density residential.
Property Characteristics	The Property consists of four (4) square-shaped parcels consisting of approximately 37-acres. The Subject Property is generally level. No structures were visible on the Subject Property.
Description of Property Structure(s)	No structures were visible on the Subject Property.

**The following services were present at the Property at the time of the assessment.**

Item	Comments
Electricity:	Southern California Edison
Gas:	The Gas Company
Potable Water:	The Subject Property is serviced by the City of Ontario.  One (1) possible agricultural well was observed in the northeastern corner of the Subject Property.
Sanitary Sewer:	City of Ontario

Item	Comments
Heating, Ventilation, Air Conditioning (HVAC):	N/A
Solid Waste:	City of Ontario

## 3.0 User Provided Information & Responsibilities

---

### 3.1 Requested Documents and Information

The ASTM E1527-21 specifies that the User, City of Ontario, provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity Use Limitations (AULs)
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

No information/documentation was provided by City of Ontario.

### 3.2 User Provided Information

Section 6 of ASTM E1527-21 outlines specific User's responsibilities. This information will help identify the possibility of RECs in connection with the Property. The ASTM Standard provides a questionnaire to help the User to comply with the statutory requirements to perform tasks which would help identify RECs. In general, any Users should make Converse aware of information they have regarding the following:

- Environmental Cleanup Liens filed or recorded against the Property
- Activity and land use limitations that are in place on the Property or have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the Legal Liability Protections (LLP)
- Relationship of the purchase price to fair market value of the Property if it were not contaminated
- Commonly known or reasonably ascertainable information about the Property
- The degree or obviousness of the presence or likely presence of contamination at the Property, and the ability to detect this contamination by appropriate investigation.

The following information was requested from the User, City of Ontario.

### *3.2.1 Environmental Cleanup Liens*

The User had no information regarding environmental cleanup liens or title records.

### *3.2.2 Activity and Use Limitations*

The User did not have any information indicating they were aware of any AULs.

### *3.2.3 Specialized Knowledge or Experience*

The User did not have any information indicating they had specialized knowledge or experience related to the Subject Property or nearby property.

### *3.2.4 Reason for Significantly Lower Purchase Price*

Converse has no information regarding the purchase price of the Subject Property or comparable properties. The User has not indicated to Converse that there is any conclusion that there was a lower purchase price because of known or suspected contamination at the Subject Property.

### *3.2.5 Commonly Known or Reasonably Ascertainable Information*

The User did not have any information about past uses, specific chemicals at the Subject Property, past spills, environmental cleanup or other reasonably ascertainable information regarding the Subject Property.

### *3.2.6 Obviousness of Contamination*

The User did not have any information based on their knowledge or experience that would be obvious indicators of contamination on the Subject Property.

Unless specifically stated otherwise in the Scope of Services, the purpose of this Phase I ESA was to qualify for the landowner liability protections to CERCLA Liability as described in ASTM E1527-21.

Business risk unrelated to the CERCLA innocent landowners defense are only assessed as specifically agreed in the Scope of Services and discussed in Section 11.0, Additional Non-Scope Services, of this report.

## **3.3 Continuing Obligations**

In order to assert a LLP, the User must satisfy a number of statutory requirements that are generally referred to as Continuing Obligations, which are outside the Scope of Services of the Phase I ESA. Examples of Continuing Obligations include providing legally required notices, stopping continuing releases and complying with land use restrictions. Failure to comply with these and other statutory post-acquisition requirements will jeopardize liability protection.

It is the responsibility of the User to comply with the Continuing Obligations requirements of ASTM E1527-21 and AAI. Anyone seeking LLP protections should take independent action beyond this Phase I ESA to perfect their position.

## 4.0 Owner Provided Information

---

The ASTM E1527-21 specifies that the Property owner and the Key Site Manager provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded AULs
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

Converse was not provided with Subject Property Owner contact information.

## 5.0 Records Review

### 5.1 Physical Setting

Item	Comments
Physical Setting:	The Subject Property is located approximately 764 feet above mean sea level with surface topography sloping towards the south (United States Geological Survey [USGS] Topographic Map, Guasti, Corona North, Prado Dam, and Ontario, California, 2018).
Geology:	The Subject Property is underlain by alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast (Division of Mines and Geology, Geologic Map of California, 2010).
Groundwater:	Information regarding regional groundwater was researched on the RWQCB Geotracker website. According to the website, the closest site to the Subject Property with recent groundwater information is located approximately 0.95-mile northeast of the Subject Property. According to an October 2001 closure report for the site, groundwater is located at depths greater than 150-feet beneath ground surface (bgs) and flows in a southwesterly direction.
Potable Water Supply:	Potable water is supplied by the Ontario Municipal Utilities Company.

### 5.2 Historical Review

#### 5.2.1 Aerial Photograph and Map Review

Available historical aerial photographs and maps, which were provided by Environmental Data Resources (EDR), were reviewed. A summary of the review is provided in the following table. Copies of the aerial photographs and maps are provided in Appendix D.

Historical Summary			
Resource and Year	Property	Adjoining Properties	General Vicinity
1897, 1900, and 1903 Topographic Maps	Multiple roadways are located on the Subject Property. No structures are noted.	The adjoining properties are depicted as primarily undeveloped and/or developed with roadways.	The general vicinity is primarily a mix of undeveloped land with sporadic residential developments.
1938 Aerial Photograph	The Subject Property appears to be depicted	The adjoining properties are	The general vicinity is primarily developed for

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>
1941 and 1944 Topographic Maps	as developed for agricultural use.  Possible residential structures are located in the northwestern portion of the Subject Property.	developed for agricultural use.	agricultural use with sporadic residential uses.
1948 Aerial Photograph  1950 Topographic Map  1953 Aerial Photograph  1954 Topographic Map	The structures in the northwestern portion of the Subject Property have been razed.  There are no other significant identifiable changes to the Subject Property.	The eastern adjoining property appears to be a mix of agricultural fields and livestock farming/dairy uses.  There are no significant identifiable changes in uses on the adjoining properties.	The general vicinity is a mix of agricultural and residential uses.
1966 Aerial Photograph and Topographic Map	There are no significant identifiable changes in use on the Subject Property.	The northern adjoining property appears to be developed for residential use. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of agricultural and residential uses.
1973 Topographic Map  1975 Aerial Photograph  1976 Topographic Map  1981 Topographic Map	There are no identifiable changes to the Subject Property.	The western and southwestern adjoining properties appear developed for livestock farming/dairy uses.  There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is mix of agricultural, livestock farming, and residential uses.

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>
1985, 1989, 1990, 1994, 2002, 2006, and 2009 Aerial Photographs  2012 Aerial Photograph and Topographic Map	There are no significant identifiable changes in uses on the Subject Property.	The northern adjoining property has been developed for commercial and residential uses. A dairy waste pond appears to be located on the western adjoining property, adjacent to the southwestern corner of the Subject Property. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of agricultural, livestock farming, residential, and commercial uses.
2015 Topographic Map  2016 Aerial Photograph  2018 Topographic Map	There are no significant identifiable changes in uses on the Subject Property.	The dairy waste pond located on the western adjoining property is no longer visible. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of agricultural, livestock farming, residential and commercial uses.
2020 Aerial Photograph	There are no significant identifiable changes in uses on the Subject Property.	The former livestock farming/dairy operations on the western and southwestern adjoining properties are no longer present. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of livestock farming/dairy uses, agricultural uses, residential and commercial uses.

### *5.2.2 Building Permit Review*

Available building permits were requested from the City of Ontario, Department of Building & Safety. The City of Ontario had no permit records pertaining to the Subject Property APN.

### *5.2.3 City Directories*

City directories were requested from EDR. However, no information regarding the Subject Property was provided.

The address range of 2929 to 2959 S Vineyard Avenue associated with the northern adjacent shopping center was identified as being occupied by various retail and restaurant tenants from as early as 1992 through 2020. 2955 S Vineyard Avenue was identified as being occupied by Lewis Cleaners in 1985 and T&H Cleaner in 1995.

The address range 1919 to 1945 E Riverside Drive associated with the northern adjacent shopping center was identified as being occupied by various retail and restaurant tenants from as early as 1992 through 2020.

The address associated with the northern adjoining property located at 2049 E Riverside Drive was identified as being occupied by a church from as early as 1992 to 1995, and by the existing Kids First Learning Center from as early as 2005 to 2020.

The eastern adjoining property at 9155 E Riverside Drive was identified as being occupied by Deboer Dairy in 2005, Chino Valley Compost in 2010, and a residential tenant in 2020.

### *5.2.4 Data Failure*

Historical information regarding the Subject Property indicated the Subject Property was undeveloped land with two (2) roadways as early as 1897. Therefore, historical data failure occurred during this assessment. Remaining ASTM sources are deemed unlikely to yield significant new information.

### *5.2.5 Summary of Historical Property Use*

As early as 1897, the Subject Property was primarily undeveloped with two (2) roadways bisecting the Subject Property from north to south, and east to west. By 1938, the roadways were no longer present on the Subject Property, the northwestern portion of the Subject Property was developed with possible residential structures, and the remainder of the Subject Property was developed with agricultural fields. The residential structures in the northwestern portion of the Subject Property were razed by 1948, and the Subject Property has remained developed for agricultural use since that time.

### 5.2.6 Summary of Past Uses of Adjoining Properties

The adjoining properties were typically undeveloped and/or partially developed with roadways as early as 1897. By 1938, the adjoining properties were primarily developed for agricultural use. The eastern adjoining property was developed with a mix of livestock farming/dairy farm operations and agricultural fields by 1938. By 1966, the northern adjoining properties were primarily developed for residential uses. The adjoining properties to the west and southwest were developed for livestock farming/dairy farm operations by 1973. By 1985, the northern adjoining properties were developed with the existing commercial buildings. A dairy waste pond was noted on the western adjoining property, adjacent to the southwest corner of the Subject Property, from 1985 to at least 2012. By 2020, the livestock farming/dairy farm operations were no longer present on the western and southwestern adjoining properties. The properties appeared vacant and/or developed for residential uses and/or vehicle/container storage.

Historical city directories identified the presence of possible dry cleaner tenants on the northern adjoining property in 1985 and 1995.

### 5.2.7 Summary of Past Uses of the Surrounding Area

The general vicinity was primarily a mix of undeveloped land and sporadic residential developments as early as 1897. The area was further developed with agricultural uses in the 1930s. From the 1970s through 1980s, the area was primarily a mix of residential, agricultural, and livestock farming uses, with additional commercial development of the area in the late 1980s through the present.

## 5.3 Results of Environmental Records Sources Review

An EDR report of Standard Environmental Record Sources (Records) was prepared specifically for the Property. The search included queries to the following databases for cases within specified ASTM search distances. A copy of the database report is provided in Appendix E.

### 5.3.1 Property Listings

The Subject Property was not identified on the databases in the EDR report.

### 5.3.2 Adjoining Properties

Adjoining Properties	
<b>Site Name:</b>	LEWIS CLEANERS
<b>Databases:</b>	EDR Hist Cleaner
<b>Address:</b>	2955 S VINEYARD
<b>Distance:</b>	274
<b>Direction:</b>	Northwest
<b>Elevation:</b>	Higher

<b>Comments:</b>	The address is associated with the northern adjoining commercial property. The listing indicates that Lewis Cleaners occupied a tenant space at the address in 1986, 1987 and 1988.
------------------	---

<b>Site Name:</b>	FAMILY DRY CLEANERS
<b>Databases:</b>	EDR Hist Cleaner
<b>Address:</b>	2929 S VINEYARD
<b>Distance:</b>	296
<b>Direction:</b>	North-Northwest
<b>Elevation:</b>	Higher
<b>Comments:</b>	The address is associated with the northern adjoining commercial property. The listing indicates that Family Dry Cleaners occupied a tenant space at the from as early as 1978 to 1982.

<b>Site Name:</b>	LEGEND DAIRY FARMS #1
<b>Databases:</b>	San Bern. Co. Permit, HWTS, CERS
<b>Address:</b>	9155 E RIVERSIDE DR
<b>Distance:</b>	372
<b>Direction:</b>	East-Southeast
<b>Elevation:</b>	Higher
<b>Comments:</b>	The site is located east of the Subject Property. The listings indicate that Legend Dairy Farms, described as dairy cattle and milk production facility, is an active hazardous waste generator. Violations issued at the facility included, but are not limited to, failure to manage empty containers greater than 5 gallons, and failure to complete and electronically submit hazardous material inventory.

### 5.3.3 Other Off-site Locations of Concern

Other off-site locations of concern identified by EDR within a maximum one-mile radius from the Subject Property included hazardous waste generators, permitted hazardous materials handlers, solid waste facilities, ENVIROSTOR sites, and Voluntary Cleanup Program sites.

The potential for environmental concern to the Subject Property from these off-site locations appears to be low due to one or more of the following: type of regulatory listing; type of resource (soil) affected; location with respect to the direction of regional groundwater; distance from the Subject Property; and/or status of the case.

### 5.3.4 Orphan Listings

The EDR database report identified one (1) orphan listing only by street names. These street names were found in the general vicinity of the Subject Property;

however, these orphan sites appeared to have a low potential for environmental impact to the Subject Property due to the distance from the Subject Property.

#### 5.4 Additional Environmental Record Sources

Information requests pertaining to the Subject Property were submitted to the following regulatory agencies.

##### Federal Agencies

Source	Comments
U.S. Department of Transportation, Pipeline and Hazardous Material Safety Administration (PHMSA)	The PHMSA online mapping system for gas transmission pipelines and hazardous liquid pipelines on the Subject Property or adjacent properties was reviewed ( <a href="https://www.npms.phmsa.dot.gov/PublicViewer/">https://www.npms.phmsa.dot.gov/PublicViewer/</a> ). No pipelines were identified on or adjoining the Subject Property.

##### State Agencies

Source	Comments
California Environmental Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC)	No information regarding the Property was on file with DTSC. The Envirostor website ( <a href="http://www.envirostor.dtsc.ca.gov/public/">http://www.envirostor.dtsc.ca.gov/public/</a> ) was reviewed for information, and the Property was not listed in the database.
Cal/EPA, Regional Water Quality Control Board (RWQCB)	The RWQCB had no records on file regarding underground storage tank (UST) issues at the Property. The Geotracker website ( <a href="http://geotracker.waterboards.ca.gov/">http://geotracker.waterboards.ca.gov/</a> ) was reviewed for information, and the Property was not listed in the database.
California Department of Conservation, California Department of Conservation (DOC), Geologic Energy Management Division (CalGEM)	Converse reviewed the DOC CalGEM Online Well Finder ( <a href="https://maps.conservation.ca.gov/doggr/wellfinder/">https://maps.conservation.ca.gov/doggr/wellfinder/</a> ). According to the website, no oil or gas wells are located on the Subject Property.

### Local Agencies

Source	Comments
South Coast Air Quality Management District (SCAQMD)	<p>As there is no physical address associated with the Subject Property, the SCAQMD was unable to perform a records search.</p> <p>The SCAQMD FINDS database (<a href="https://scaqmdonline.maps.arcgis.com/apps/webappviewer/index.html?id=70dd0045e66243488b3f1ae32405cc0a">https://scaqmdonline.maps.arcgis.com/apps/webappviewer/index.html?id=70dd0045e66243488b3f1ae32405cc0a</a>) was researched for records related to the Subject Property. The Subject Property is not listed in the database.</p>
San Bernardino County Fire Department, Certified Unified Program Agency (CUPA)	<p>There are no records on file with this agency.</p>
Methane	<p>According to the CalRecycle SWIS website (<a href="https://www2.calrecycle.ca.gov/SolidWaste/Site/Search">https://www2.calrecycle.ca.gov/SolidWaste/Site/Search</a>), a solid waste site is located approximately 0.43-miles southeast of the Subject Property at 13434 South Ontario Avenue.</p> <p>The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."</p>

## 6.0 Property Reconnaissance

---

### 6.1 Methodology

On September 2, 2023 Converse visited the Subject Property to evaluate present use and to identify observable environmental conditions at the Subject Property. As Converse was not provided access to the Subject Property, the Subject Property was observed from East Riverside Drive, contiguous with the northern boundary of the Subject Property.

A field-generated map is provided in Appendix B. Pertinent Property photographs are provided in Appendix C.

### 6.2 Limiting Conditions

Converse's findings are based on the Property conditions observed on Wednesday, September 2, 2023.

Converse was not provided access to the Subject Property. Observation of the Subject Property was limited to viewing from East Riverside Drive along the northern boundary of the Subject Property.

### 6.3 Interior Observations of Property

The Subject Property was only observed from the northern adjoining E Riverside Drive as Converse was not provided access to the Subject Property. No structures were observed on the Subject Property.

### 6.4 Exterior Observations of Property

During our Subject Property visit, Converse made the following observations of the exterior of the Subject Property: Observations were limited as the Subject Property could only be viewed from East Riverside Drive, along the northern Subject Property boundary.

Exterior Observations		
Item or Condition	Observed Evidence?	Comments
Hazardous Substances & Petroleum Products:	No	
Storage Tanks & Related Equipment:	No	
Odors:	No	
Standing Surface Water or Other Pools of Liquid:	No	

Item or Condition	Observed Evidence?	Comments
Drums & Other Containers of Hazardous Substances, Petroleum Products, or Other Unidentified Contents:	No	
Transformers or Equipment containing Polychlorinated Biphenyls (PCBs):	No	
Pits, Ponds, or Lagoons:	No	
Stained Soil or Pavement:	No	
Stressed Vegetation (other than from insufficient water):	No	
Evidence of Mounds, Depressions or Filled or Graded Areas Suggesting Trash or Other Solid Waste Disposal:	No	
Waste Water or any discharge (including storm water) into a Drain, Ditch, or Stream on or Adjacent to the Property:	No	
Wells (active, inactive, or abandoned):	Yes	One (1) possible agricultural well was observed in the northeastern corner of the Subject Property. As the well was inaccessible to Converse staff, it is unclear as to the whether the well is active.
Septic Systems or Cesspools:	No	
Prior Structures:	No	
Roads, Tracks, Railroad Tracks or Spurs:	Yes	The Subject Property fronts onto East Riverside Drive to the north.
Suspect Asbestos containing Building Materials released into the environment	No	

Item or Condition	Observed Evidence?	Comments
Suspect Lead-based Paint released into the environment	No	
Suspect PCB Caulk, Paint or Ballasts released into the environment	No	

In addition to the above, Converse also observed the following:

- Used tires were observed discarded along the northern portion of the Subject Property, along the northern Subject Property boundary.
- Wind blown trash, and other debris were observed on the northern portion of the Subject Property, along the northern Subject Property boundary.
- A con-ex container was observed in the northeastern portion of the Subject Property. As Converse was not granted access to the Subject Property, the interior of the container could not be observed.

### **6.5 Current Uses of Adjoining Properties**

Based on our research and observations during our Subject Property visit, the Subject Property is bordered by the following:

Adjoining Property Use	
Direction	Current Development
North	East Riverside Drive followed by (west to east): commercial retail shopping center (2929-2959 South Vineyard Avenue, and 1919-1945 East Riverside Drive); residential neighborhood; and Sunrise Children Center (2049 East Riverside Drive).
Northeast	East Riverside Drive followed by Dog Park and Whispering Lakes Golf Course (2525 East Riverside Drive).
East	Dairy and agricultural fields (9155 East Riverside Drive).
Southeast	Dairy and agricultural fields (9155 East Riverside Drive).
South	Dairy and agricultural fields (9155 East Riverside Drive).
Southwest	Former dairy farm with agricultural fields.
West	RV Storage park and nursery.
Northwest	Intersection of East Riverside Drive and South Vineyard Avenue followed by mobile home park.

## **6.6 Current Uses of Surrounding Area**

Based on our research and observations during our Subject Property visit, the surrounding area of the Subject Property consists of dairy farms, agricultural fields, residential, and commercial uses.

## 7.0 Interviews

---

During the interviews, the owners and occupants were asked if they had any available documents that would be helpful. The documents that were requested are detailed in Section 4.0 of this report:

<b>Interview:</b>	<b>Comments:</b>
Property Owner:	Converse was not provided contact information for the Subject Property owner. No owner interview was conducted.
Tenant/ Occupant:	Converse was not provided access to the Subject Property. No tenant/occupant interviews were completed.
State or Local Government Officials:	Other than the information provided in Section 5.4, no other information was provided by a government official.
Owners and Occupants of Neighboring Sites:	No interviews of owners or occupants of neighboring sites were conducted.

## 8.0 Findings & Opinions

---

A cursory summary of findings is provided below. However, details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

The Subject Property is owned by JCLIN Investment, LP, and is currently developed with agricultural fields.

As early as 1897, the Subject Property was primarily undeveloped with two (2) roadways bisecting the Subject Property from north to south, and east to west. By 1938, the roadways were no longer present on the Subject Property, the northwestern portion of the Subject Property was developed with possible residential structures, and the remainder of the Subject Property was developed with agricultural fields. The residential structures in the northwestern portion of the Subject Property were razed by 1948, and the Subject Property has remained developed for agricultural use since that time.

The following items were observed during reconnaissance of the Subject Property from the northern contiguous right-of-way (East Riverside Drive):

- One (1) possible agricultural well was observed in the northeastern corner of the Subject Property. As the well was inaccessible to Converse staff, it is unclear as to whether the well is active.
- Used tires were observed discarded along the northern portion of the Subject Property, along the northern Subject Property boundary.
- Wind blown trash, and other debris were observed on the northern portion of the Subject Property, along the northern Subject Property boundary.
- A con-ex container was observed in the northeastern portion of the Subject Property. As Converse was not granted access to the Subject Property, the interior of the container could not be observed.

The Subject Property was not identified in the regulatory database report.

Two (2) possible drycleaners were identified as historically operating at the northern adjoining retail shopping center. Lewis Cleaners was identified as occupying 2955 South Vineyard Avenue from as early as 1986 to at least 1988. Family Dry Cleaners was identified as occupying 2929 South Vineyard Avenue from as early as 1978 to at least 1982.

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- Current and historical agricultural operations on the Subject Property are a REC based on the potential use of pesticides.
- The identification of two (2) possible dry cleaners that operated on the northern adjoining property between 1978 and 1982, and 1986 and 1988 is considered a REC due to potential use of drycleaning solvents and the potential for impacts to the Subject Property through vapor encroachment.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECs pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECs pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property. Observation of the Subject Property was limited to visual observation from the East Riverside Avenue on the north side of the Subject Property.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.
- 

Per the ASTM Section 12.8, Additional Investigation, to detect the presence of hazardous materials and petroleum products, it is our opinion that no additional investigation is warranted to detect hazardous materials or petroleum products within the context of this Phase I ESA. A site reconnaissance should be conducted at the time of the Phase II Environmental Site Assessment.

## 9.0 Conclusions & Recommendations

---

Converse has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-21 for Assessor Parcel Numbers (APNs) 0218-101-03, -04, -05, and -06 in the City of Ontario, San Bernardino County, California. Any exceptions to, or deletions from, this practice are described in the Limitations and Exceptions of Assessment section of this report. This assessment has revealed the following *recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps* in connection with the Subject Property except for the following:

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- Current and historical agricultural operations on the Subject Property are a REC based on the potential use of pesticides and metals.
- The identification of two (2) possible dry cleaners that operated on the northern adjoining property between 1978 and 1982, and 1986 and 1988 is considered a REC due to potential use of drycleaning solvents and the potential for impacts to the Subject Property through vapor encroachment.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property. Observation of the Subject Property was limited to visual observation from the East Riverside Avenue on the north side of the Subject Property.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

Based on the findings, additional assessment appears warranted and should include the following:

- Soil sampling in the vicinity of areas of the Subject Property where agricultural uses were identified.
- Soil vapor sampling in the northern portion of the Subject Property to evaluate whether historical offsite possible drycleaning activities have impacted the subsurface soil vapor beneath the Subject Property.
- Any future redevelopment of the Subject Property should be completed in accordance with the City of Ontario Methane Ordinance.
- A site reconnaissance should be completed at the time of the Phase II Environmental Site Assessment.

In addition, Converse also recommends that prior to redevelopment of the Subject Property, the possible agricultural well in the northeastern portion of the Subject Property should be abandoned in accordance with applicable regulatory requirements.

The interior of the con-ex container in the northeastern portion of the Subject Property should be evaluated for the presence of hazardous wastes or materials. Any hazardous wastes or materials that are present should be disposed of in accordance with applicable regulatory requirements.

## 10.0 Deviations & Limitations

---

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property. Observation of the Subject Property was limited to viewing from East Riverside Drive along the northern boundary of the Subject Property.
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed to significantly alter the recommendations included in this report.

## 11.0 Additional Non-Scope Services

---

There are environmental issues outside the scope of the ASTM E1527-21 that can be assessed in connection with a commercial real estate transaction. These are dealt with as non-scope considerations since they do not typically present a Superfund Liability. The specific level of inquiry (if any) is defined in the Proposal which contains a Scope of Work. These non-scope services are very client specific and not covered by the ASTM standard. They are frequently related to the business environmental risk which is defined in the standard as "risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate".

No non-scope issues were addressed during this assessment.

## 12.0 Signature of Environmental Professional

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Å§312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

**Site Assessor**

---

Spencer Wagner  
Project Environmental Scientist

**Senior Reviewer**

---

Norman S. Eke  
Senior Vice President/Managing Officer

Spencer Wagner - Project Environmental Scientist

Norman S. Eke - Senior Vice President/Managing Officer

This Phase I ESA was completed by the above Environmental Professional. A complete list of preparers, and their responsibilities for this assessment, is provided in the following section (Section 13.0, List of Preparers).

## 13.0 List of Preparers

---

### **Norman S. Eke**

Senior Vice President

B.A., Liberal Studies, Environmental Studies Emphasis, University of California, Santa Barbara, 1988.

Cal/OSHA Certified Asbestos Consultant, #96-2093

NIOSH 582 Equivalent Training

Senior Vice President and Managing Officer of Converse's California Environmental offices. Mr. Eke has served as the Principal-in-Charge and Contract Administrator to deliver services to our public agency and private clients. Mr. Eke has 33 years of experience in the fields of Environmental Due Diligence including Phase I and Phase II Environmental Site Assessments, Asbestos surveys/specifications/abatement monitoring, Preliminary Endangerment Assessments and associated Supplemental Site Investigations and Removal Action Work Plans/Implementation, various forms of Remediation, Human Health Risk Assessment and Indoor Air Quality. Mr. Eke is a former Subcommittee Chairman for E.50-02 Real Assessment and Management of the ASTM E.50 Committee on Environmental Assessment, Risk Management, Corrective Action, which includes Phase I ESA standards.

Principal area of responsibility for this ESA report: Project Management, and Report Review.

### **Spencer Wagner**

Senior Staff Environmental Scientist

B.A., Environmental Science and Policy, California State University, Long Beach, 2006

B.A., Geography, California State University, Long Beach, 2006

Certified Wood Destroying Organism (WDO) Inspector

Mr. Wagner has over 17 years' experience conducting Phase I and II Environmental Site Assessments throughout California. Mr. Wagner has completed Phase I ESAs on undeveloped land, residential properties, commercial/retail facilities, industrial facilities, and school sites. His Phase II ESA experience includes collection of soil matrix, soil vapor, indoor air and groundwater samples. Phase II projects worked on have included residential properties, commercial warehousing sites, school sites, dry cleaning facilities, automotive service sites, metal plating facilities and multi-tenant commercial properties

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, Historical Research, Regulatory Agency Interaction, Property Reconnaissance, Interviews, and Report Generation.

## 15.0 List of Acronyms

---

The following is a list of acronyms that may have been noted in the report. This is not an all inclusive list and may include acronyms that are not found in your report but are commonly utilized in environmental assessments. Additional acronyms pertaining to regulatory agency documents/listings can be found in the regulatory database report, which is provided as an appendix to this report.

**AAI** - All Appropriate Inquiries

**ACM** - Asbestos-containing Material

**APN** - Assessor's Parcel Number

**APCD** - Air Pollution Control District

**AQMD** - Air Quality Management District

**AST** - Aboveground Storage Tank

**ASTM** - American Society of Testing and Materials

**AUL** - Activity Use Limitation

**BER** - Business Environmental Risk

**BTEX** - Benzene, Toluene, Ethylbenzene, and Xylenes

**Cal/EPA** - California Environmental Protection Agency

**CalGEM** - (California Department of Conservation), Geologic Energy Management Division

**CERCLA** - Comprehensive Environmental Response, Compensation and Liability Act

**CFR** - Code of Federal Regulations

**CREC** - Controlled Recognized Environmental Condition Recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

**CUPA** - Certified Unified Protection Agencies

**de minimis condition** - A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a REC nor a CREC.

**DOC** - (California) Department of Conservation

**DPW** - (Los Angeles County) Department of Public Works

**DTSC** - Department of Toxic Substances Control

**DWP** - (City of Los Angeles) Department of Water and Power

**EDR** - Environmental Data Resources

**EHD** - Environmental Health Department

**EP** - Environmental Professional

**EPA** - United States Environmental Protection Agency

**ESA** - Environmental Site Assessment

**ERIS** - Environmental Risk Information Systems

**(x)FD** - (City/County)Fire Department

**HMS** - Hazardous Material Site

**HREC** - Historic Recognized Environmental Condition: A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

**HVAC** - Heating, Ventilation, Air Conditioning

**IAQ** - Indoor Air Quality

**LACSD** -Los Angeles County Sanitation Districts

**LBP** - Lead-based Paint

**LLP** - Landowner Liability Protections

**LQG** - Large Quantity Generator

**LUST** - Leaking Underground Storage Tank

**mg/kg** - milligram per kilogram

**mg/L** - milligram per Liter

**MSL** - Mean Sea Level

**MTBE** - Methyl Tertiary Butyl Ether

**ND** - None Detected

**NFA** - No Further Action

**NOV** - Notice of Violation

**PEC** - Potential Environmental Concern

**PFAS** - Perfluoroalkyl and Polyfluoroalkyl Substances

**PHMSA** - US Department of Transportation, Pipeline and Hazardous Materials Safety Administration

**PCB** - Polychlorinated biphenyls

**PCE** - Perchloroethylene or Tetrachloroethylene

**pCi/L** - picoCuries per Liter

**ppb** - parts per billion

**ppm** - parts per million

**PRP** - Potential Responsible Party

**RCRA** - Resources Conservation and Recovery Act

**REC** - Recognized Environmental Condition; (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

**RP** - Responsible Party

**RWQCB** - Regional Water Quality Control Board

**SCAQMD** - South Coast Air Quality Management District

**SDS** - Safety Data Sheets

**SQG** - Small Quantity Generator

**SVOC** - Semi-volatile Organic Compound

**TCE** - Trichloroethylene or Trichloroethene

**TPH** Total Petroleum Hydrocarbons

**µg/L** - micrograms per Liter

**USGS** - United States Geological Survey

**UST** - Underground Storage Tank

**VCP** - Voluntary Cleanup Program

**VOCs** - Volatile Organic Compounds

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Converse Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

APN 0218101-03, -04 -05, AND -06  
ONTARIO, CA 91761

#### COORDINATES

Latitude (North): 34.0177570 - 34° 1' 3.92"  
Longitude (West): 117.6087810 - 117° 36' 31.61"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 443790.4  
UTM Y (Meters): 3764097.5  
Elevation: 764 ft. above sea level

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal NPL (Superfund) sites***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing  
SEMS..... Superfund Enterprise Management System

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS..... Corrective Action Report

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

### ***Lists of Federal RCRA generators***

RCRA-LQG..... RCRA - Large Quantity Generators  
RCRA-SQG..... RCRA - Small Quantity Generators  
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

## EXECUTIVE SUMMARY

US ENG CONTROLS..... Engineering Controls Sites List  
US INST CONTROLS..... Institutional Controls Sites List

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

### ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE..... State Response Sites

### ***Lists of state and tribal leaking storage tanks***

LUST..... Geotracker's Leaking Underground Fuel Tank Report  
INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land  
CPS-SLIC..... Statewide SLIC Cases

### ***Lists of state and tribal registered storage tanks***

FEMA UST..... Underground Storage Tank Listing  
UST..... Active UST Facilities  
AST..... Aboveground Petroleum Storage Tank Facilities  
INDIAN UST..... Underground Storage Tanks on Indian Land

### ***Lists of state and tribal voluntary cleanup sites***

INDIAN VCP..... Voluntary Cleanup Priority Listing  
VCP..... Voluntary Cleanup Program Properties

### ***Lists of state and tribal brownfield sites***

BROWNFIELDS..... Considered Brownfields Sites Listing

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

US BROWNFIELDS..... A Listing of Brownfields Sites

### ***Local Lists of Landfill / Solid Waste Disposal Sites***

WMUDS/SWAT..... Waste Management Unit Database  
SWRCY..... Recycler Database  
HAULERS..... Registered Waste Tire Haulers Listing  
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands  
ODI..... Open Dump Inventory  
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations  
IHS OPEN DUMPS..... Open Dumps on Indian Land

### ***Local Lists of Hazardous waste / Contaminated Sites***

US HIST CDL..... Delisted National Clandestine Laboratory Register  
HIST Cal-Sites..... Historical Calsites Database  
SCH..... School Property Evaluation Program

## EXECUTIVE SUMMARY

CDL.....	Clandestine Drug Labs
Toxic Pits.....	Toxic Pits Cleanup Act Sites
CERS HAZ WASTE.....	California Environmental Reporting System Hazardous Waste
US CDL.....	National Clandestine Laboratory Register

### **Local Lists of Registered Storage Tanks**

SWEEPS UST.....	SWEEPS UST Listing
HIST UST.....	Hazardous Substance Storage Container Database
CERS TANKS.....	California Environmental Reporting System (CERS) Tanks
CA FID UST.....	Facility Inventory Database

### **Local Land Records**

LIENS.....	Environmental Liens Listing
LIENS 2.....	CERCLA Lien Information
DEED.....	Deed Restriction Listing

### **Records of Emergency Release Reports**

HMIRS.....	Hazardous Materials Information Reporting System
CHMIRS.....	California Hazardous Material Incident Report System
LDS.....	Land Disposal Sites Listing
MCS.....	Military Cleanup Sites Listing
SPILLS 90.....	SPILLS 90 data from FirstSearch

### **Other Ascertainable Records**

FUDS.....	Formerly Used Defense Sites
DOD.....	Department of Defense Sites
SCRD DRYCLEANERS.....	State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR.....	Financial Assurance Information
EPA WATCH LIST.....	EPA WATCH LIST
2020 COR ACTION.....	2020 Corrective Action Program List
TSCA.....	Toxic Substances Control Act
TRIS.....	Toxic Chemical Release Inventory System
SSTS.....	Section 7 Tracking Systems
ROD.....	Records Of Decision
RMP.....	Risk Management Plans
RAATS.....	RCRA Administrative Action Tracking System
PRP.....	Potentially Responsible Parties
PADS.....	PCB Activity Database System
ICIS.....	Integrated Compliance Information System
FTTS.....	FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
MLTS.....	Material Licensing Tracking System
COAL ASH DOE.....	Steam-Electric Plant Operation Data
COAL ASH EPA.....	Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER.....	PCB Transformer Registration Database
RADINFO.....	Radiation Information Database
HIST FTTS.....	FIFRA/TSCA Tracking System Administrative Case Listing
DOT OPS.....	Incident and Accident Data
CONSENT.....	Superfund (CERCLA) Consent Decrees
INDIAN RESERV.....	Indian Reservations
FUSRAP.....	Formerly Utilized Sites Remedial Action Program

## EXECUTIVE SUMMARY

UMTRA.....	Uranium Mill Tailings Sites
LEAD SMELTERS.....	Lead Smelter Sites
US AIRS.....	Aerometric Information Retrieval System Facility Subsystem
US MINES.....	Mines Master Index File
ABANDONED MINES.....	Abandoned Mines
FINDS.....	Facility Index System/Facility Registry System
ECHO.....	Enforcement & Compliance History Information

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
PACIFIC SOUTHWEST FA Database: SWF/LF (SWIS), Date of Government Version: 05/08/2023 Facility ID: 36-AA-0385 Operational Status: Closed Regulation Status: Unpermitted	13182 SO. BAKER ST.	WSW 1/4 - 1/2 (0.288 mi.)	C10	28

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that

## EXECUTIVE SUMMARY

there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
EDWARD ACOSTA EPA ID:: CAC003053506	2939 SPYGLASS COURT	NNE 0 - 1/8 (0.082 mi.)	4	13
LUIS MARTIN DEL CAMP EPA ID:: CAC003148061	1920 E. MERION DRIVE	NNW 0 - 1/8 (0.083 mi.)	5	16
SERGIO COVARRUBIAS EPA ID:: CAC003050002	2803 DORAL CT	NNW 1/8 - 1/4 (0.161 mi.)	B7	18
ALONS AND MELODY NEV EPA ID:: CAC003159274	2871 S. WHISPERING L	NNE 1/8 - 1/4 (0.175 mi.)	8	21

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash

## EXECUTIVE SUMMARY

& dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

City,State,Zip: ONTARIO, CA 91761  
Site ID: 595885  
CERS ID: 10883746  
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 595885  
Site Name: Legend Dairy Farms #1  
Violation Date: 11-17-2022  
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7

Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: OBSERVATION: Observed empty 55-gallon drums in a containment structure and empty tanks throughout the facility which have been stored on site for an unknown amount of time. The contents of the tanks and containers were unknown and they were not labeled at the time of the inspection. CORRECTIVE ACTION: Submit a copy of a disposal receipt showing the removal of the empty tanks and containers or a signed statement as to how they have been sold, used, or otherwise managed.

Violation Division: San Bernardino County Fire Department  
Violation Program: HW  
Violation Source: CERS,

Site ID: 595885  
Site Name: Legend Dairy Farms #1  
Violation Date: 11-17-2022  
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 01/09/2023. OBSERVATION: Hazardous materials were observed on site at the time of the inspection that are not listed in the most current CERS inventory or are listed in lesser quantities. CORRECTIVE ACTION: Submit a signed statement that an updated inventory has been submitted into CERS.

Secondary Waste: Solid Wastes  
Secondary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: No reclamation requirements associated with this facility.  
POTW: The facility is not a POTW.  
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: No Update Planned

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/22/2023

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2023

Telephone: 703-603-8704  
Last EDR Contact: 06/23/2023  
Next Scheduled EDR Contact: 10/09/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/22/2023  
Date Data Arrived at EDR: 07/06/2023

Next Scheduled EDR Contact: 10/23/2023  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: 800-424-9346
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/23/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 07/24/2023	Source: EPA
Date Data Arrived at EDR: 07/31/2023	Telephone: 800-424-9346
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/25/2023	Source: Department of the Navy
Date Data Arrived at EDR: 05/31/2023	Telephone: 843-820-7326
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 54	Next Scheduled EDR Contact: 11/20/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

Next Scheduled EDR Contact: 11/06/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

## UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## Local Lists of Hazardous waste / Contaminated Sites

### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 05/22/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 05/23/2023	Telephone: 202-307-1000
Date Made Active in Reports: 07/10/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 48	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: No Update Planned

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 04/24/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 04/25/2023	Telephone: 916-323-3400
Date Made Active in Reports: 07/13/2023	Last EDR Contact: 07/25/2023
Number of Days to Update: 79	Next Scheduled EDR Contact: 11/06/2023
	Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2020	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/30/2022	Telephone: 916-255-6504
Date Made Active in Reports: 02/09/2023	Last EDR Contact: 09/15/2023
Number of Days to Update: 71	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Varies

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364
Date Made Active in Reports: 09/26/1995	Last EDR Contact: 01/26/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/27/2009
	Data Release Frequency: No Update Planned

## CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 04/17/2023	Source: CalEPA
Date Data Arrived at EDR: 04/18/2023	Telephone: 916-323-2514
Date Made Active in Reports: 07/11/2023	Last EDR Contact: 07/18/2023
Number of Days to Update: 84	Next Scheduled EDR Contact: 10/30/2023
	Data Release Frequency: Quarterly

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/22/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 05/23/2023	Telephone: 202-307-1000
Date Made Active in Reports: 07/10/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 48	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Quarterly

## Local Lists of Registered Storage Tanks

### SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994	Source: State Water Resources Control Board
Date Data Arrived at EDR: 07/07/2005	Telephone: N/A
Date Made Active in Reports: 08/11/2005	Last EDR Contact: 06/03/2005

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 07/31/2023

	Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency

Number of Days to Update: 18	Next Scheduled EDR Contact: 12/11/2023
	Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 09/22/2023
Number of Days to Update: 84	Next Scheduled EDR Contact: 01/08/2024
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

Date of Government Version: 06/24/2020	Source: Department of Health & Human Services
Date Data Arrived at EDR: 03/17/2021	Telephone: 202-741-5770

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

Date of Government Version: 03/30/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/30/2023	Telephone: 202-272-0167

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Date of Government Version: 06/02/2023	Source: State Water Resources Control Board

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

## CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022  
Date Data Arrived at EDR: 11/16/2022  
Date Made Active in Reports: 02/06/2023  
Number of Days to Update: 82

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

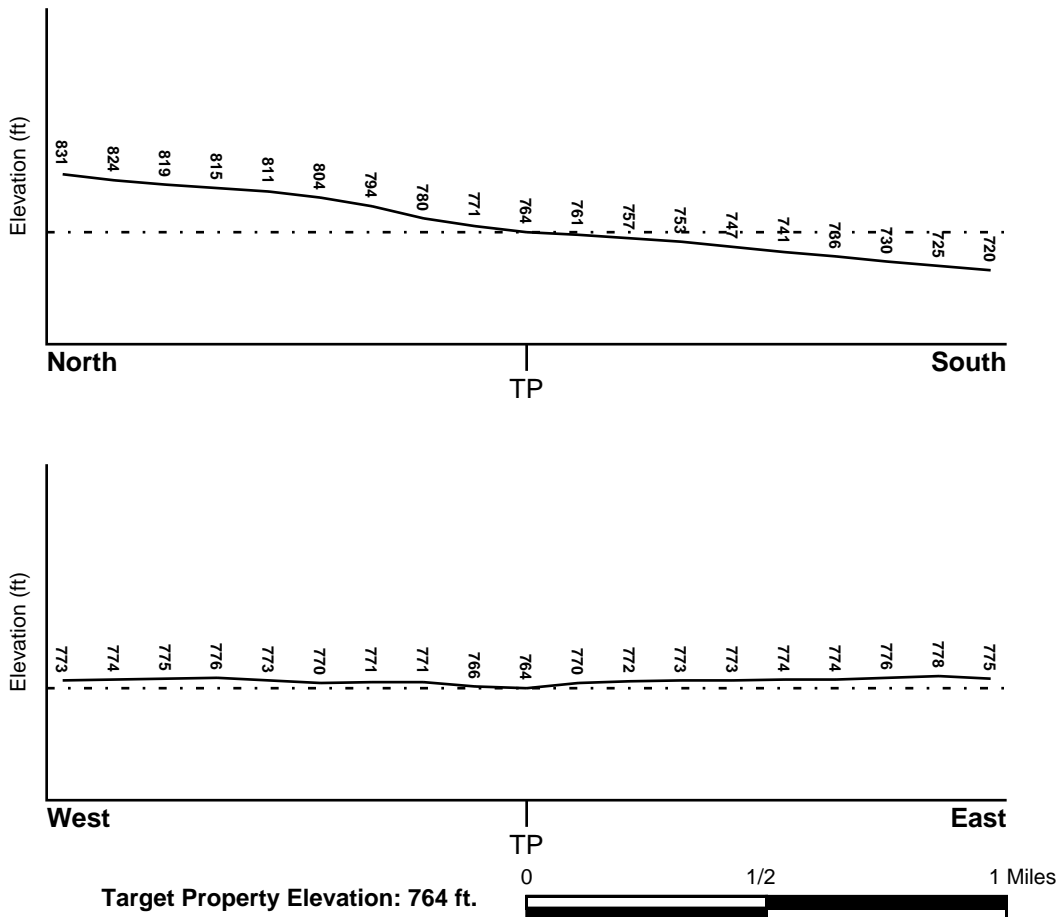

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

06071C8639H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	22 inches	59 inches	stratified loamy sand to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**Soil Map ID: 2**

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

**LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

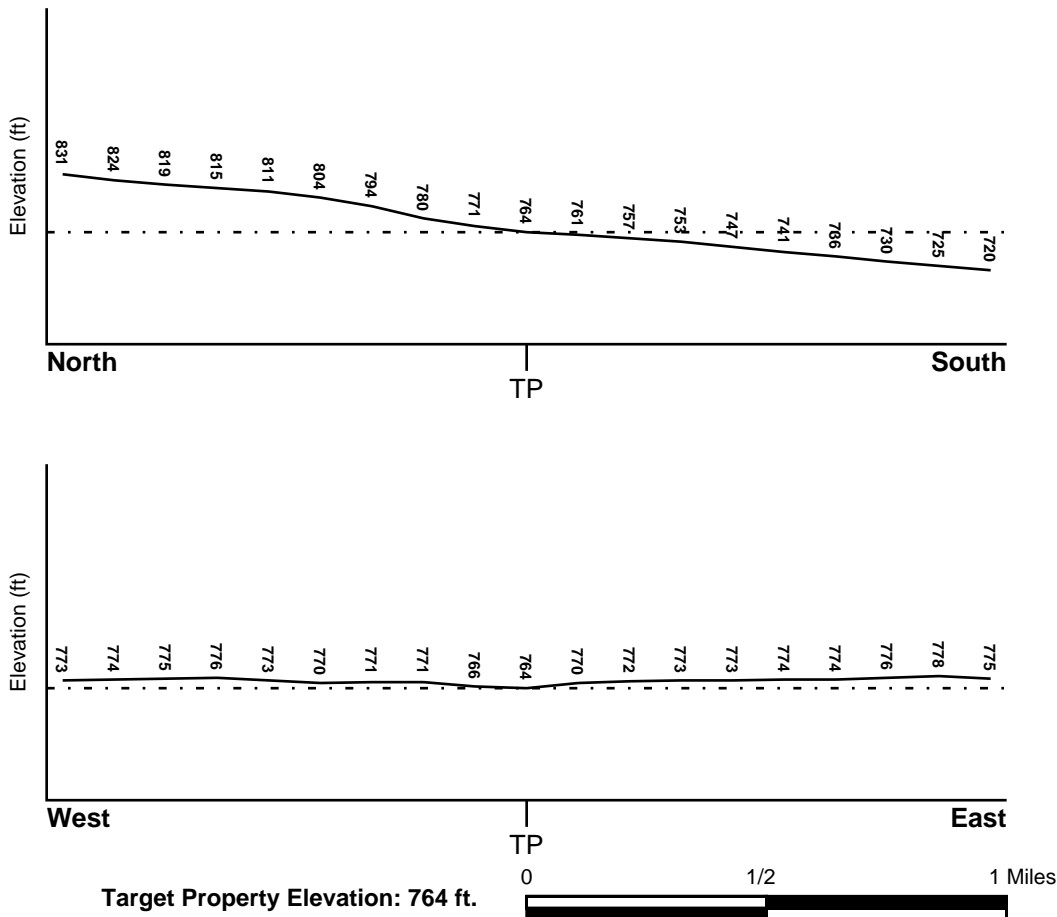

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

06071C8639H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	22 inches	59 inches	stratified loamy sand to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**Soil Map ID: 2**

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

**LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

**Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT**

City of Ontario - Ontario WF Farm LLC  
13213 Ontario Avenue  
Ontario, California  
Converse Project No. 19-16-123-58

Ms. Hernandez,

Converse Consultants (Converse) is pleased to submit the attached report that summarizes the activities and the results of a Phase I Environmental Site Assessment (Phase I ESA) that was conducted at the referenced property.

A summary of the assessment is presented in the Executive Summary, as well as in Sections 8.0, 9.0, and 10.0 of the report. Recognized Environmental Conditions were identified during this assessment and additional assessment appears warranted.

We appreciate the opportunity to be of service. Should you have any questions or comments regarding this report, please contact Spencer Wagner at (562) 505-5219 or Norman Eke at (626) 930-1260.

# Executive Summary

---

The following is an Executive Summary of the Phase I Environmental Site Assessment (Phase I ESA) that was conducted by Converse Consultants (Converse). Please refer to the appropriate sections of the report for a complete discussion of these issues. In the event of a conflict between this Executive Summary and the report, or an omission in the Executive Summary, the report shall prevail.

This report presents the results of the Converse Phase I ESA performed at 13213 Ontario Avenue, Ontario, San Bernardino, California, referred to as the Subject Property in this report. Converse was retained by the City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical within the scope of an ESA, Recognized Environmental Conditions (RECs) in connection with the Subject Property.

Converse has compiled and reviewed information that was obtained from interviews, document research, and on-site and area reconnaissance to identify potential environmental conditions at the Property in conformance with the ASTM Standard E: 1527-21 Environmental Site Assessment Standard Practice (ASTM Standard: E1527-21). This Phase I ESA was conducted during the period of September 19, 2023 to October 31, 2023.

The Subject Property is owned by Ontario WF Farm, LLC, and is occupied by a residence, and storage yard for landscaping equipment and mulch.

The Subject Property was undeveloped as early as 1897. A roadway bisected the northern portion of the Subject Property from as early as 1900 to 1903. The Subject Property appeared developed for agricultural use from as early as 1938 to 1976. A structure was noted in the northwestern portion of the Subject Property from as early as 1938 to at least 1954. By 1981, the northern portion of the Subject Property appeared vacant, and the remainder of the Subject Property appeared developed with a residential dwelling, horse corral, stables, and associated buildings, and livestock pens and associated structures. By 2016, the formerly vacant northern portion of the Subject Property was developed with agricultural fields. By 2020, the southwestern portion of the Subject Property appeared occupied by a possible nursery.

One (1) possible AST was observed in the northwestern portion of the Subject Property, adjacent to the north of the residence. Converse was not able to evaluate the AST and/or area surrounding the AST.

According to the RWQCB Geotracker database there is an area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area. The plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. Converse reviewed the data from the 2022 report which indicated that the southeasternmost corner of the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater 5 ug/l but less than 10 ug/l, which is greater than the regulatory threshold 5 ug/l.

The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural use (agricultural plots)
- The historical livestock farming

- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

The following environmental concern was noted:

- The presence of a possible AST in the northwestern portion of the Subject Property.

Based on the findings, Converse recommends assessment of shallow soils across the Subject Property for the presence of pesticides and metals historically used in agricultural operations. In addition, Converse recommends methane screening in the southern portion of the Subject Property historically occupied by possible livestock farming operations.

No assessment related to the Archibald plume is deemed necessary based on the depth to groundwater.

Any future redevelopment of the Subject Property should be in accordance with the City of Ontario Methane Ordinance.

It is recommended that the Site Reconnaissance be completed at the time of the Phase II Environmental Site Assessment, and that the possible AST in the northern portion of the Subject Property be evaluated for possible leaks.

# 1.0 Introduction

---

## 1.1 Purpose and Scope of Services

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at 13213 Ontario Avenue in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by the City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical, Recognized Environmental Conditions (RECs) in connection with the Property. The term Recognized Environmental Conditions is defined in Section 1.1.1 of the American Society of Testing and Materials (ASTM) Standard Practice as the presence or likely presence of any hazardous substances or petroleum products in, at or on a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

This Phase I ESA was completed in accordance with our proposal dated September 19, 2023. Our work consisted of the following and was completed in general conformance with the scope and limitations of the ASTM Practice E1527-21 and complies with standards and practices set forth in 40 Code of Federal Regulations (CFR) Part 312 for AAI.

- Interviews with the Property owner representatives
- Property and vicinity reconnaissance
- Review of regulatory agency records
- Description of physical setting
- Historical review
- Interviews with public agency personnel
- Preparation of this report

## 1.2 Non-Scope Considerations

There are a number of non-scope issues which are sometimes assessed concurrently with a Phase I ESA. Unless specifically agreed in the contract proposal documents, these non-scope considerations are not included as part of the Phase I ESA. Examples of non-scope issues include:

- Asbestos-containing Building Materials unrelated to release into the environment
- Biological Agent
- Cultural & Historic Resources
- Diffuse Anthropogenic Pollution
- Ecological Resources
- Endangered Species
- Health & Safety
- Indoor Air Quality unrelated to release of hazardous substances or petroleum products in the environment
- Industrial Hygiene
- Lead-based Paint unrelated to releases in the environment
- Lead in Drinking Water
- Mold or microbial growth conditions
- PCB-containing building materials (for example, interior fluorescent light ballasts, paint, and caulk)
- Polyfluoroalkyl Substances
- Naturally-occurring Radon
- Regulatory Compliance

- Substances not defined as hazardous substances unless or until such substances are classified as CERCLA hazardous substances.
- Wetlands

No Non-Scope issues were addressed in this report.

### **1.3 Significant Assumptions**

No assumptions were made for this assessment that need to be noted as significant.

### **1.4 Limitations and Expectations**

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property and observation of the Subject Property was limited to the public rights-of-way on Ontario Avenue and Chino Avenue.
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

### **1.5 Special Terms and Conditions**

No special terms or conditions were identified by the User.

### **1.6 Reliance**

This report is for the sole benefit and exclusive use of City of Ontario in accordance with the terms and conditions under which these services have been provided. Its preparation has been in accordance with generally accepted environmental practices. No other warranty, either express or implied, is made. The Scope of Services associated with the report was designed solely in accordance with the objectives, schedule, budget, and risk-management preferences of City of Ontario.

This report should not be regarded as a guarantee that no further contamination, beyond that which could be detected within the scope of this assessment, is present at the Subject Property. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Subject Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation of the property at the time of the assessment. Also, events may occur after the Subject Property visit, which may result in contamination of the Subject Property. Additional information, which was not found or available to Converse at the time of report

preparation, may result in a modification of the conclusions and recommendations presented.

Any reliance on this report by Third Parties shall be at the Third Party's sole risk. Should City of Ontario wish to identify any additional relying parties not previously identified, a completed Application of Authorization to Use (see Appendix A of this report) must be submitted to Converse Consultants.

## ***1.7 Continued Viability***

This report has continued viability of 180 days from the following:

- **Interviews:** Converse was not provided contact information for the Subject Property owner. No owner interview was conducted.
- **Review of Government Records:** September 26, 2023
- **Visual Inspection:** October 18, 2023
- **Declaration of Environmental Professional (EP):** October 31, 2023
- **Lien Search:** Not Applicable

## 2.0 Property Description

Item	Comment
Current Use(s) of the Property	<p>The Subject Property is owned by Ontario WF Farm, LLC, and is occupied by a residence, and storage yard for landscaping equipment and mulch.</p> <p>A Property location map and a field generated Property plan are provided in Appendix B. Pertinent Property photographs are provided in Appendix C.</p>
Location and Legal Description	<p>The Subject Property is located at 13213 Ontario Avenue, Ontario, California 91016. The Subject Property is located on the northeast corner of the intersection of Ontario Avenue and Chino Avenue. The Subject Property is located approximately 1.1-miles south of the Ontario (60) Freeway and approximately 2.85-miles west of Interstate 15.</p> <p>The Subject Property consists of two (2) parcels and is approximately 10-acres. The San Bernardino County Assessor's Parcel Numbers for the Subject Property are 0218-111-04 and -45.</p>
Zoning Information	<p>According to the City of Ontario, Planning Department, the Subject Property is zoned as LDR for low density residential.</p>
Property Characteristics	<p>The Subject Property consists of two (2) rectangular-shaped parcels totaling approximately 10-acres. The Property is generally level, sloping slightly to the south. The northern portion of the Subject Property was noted to be covered in vegetation and included various trucks that appear to be associated with landscaping operations. Along the western boundary of the Subject Property is a single-family residence with attached garage. The remainder of the Subject Property included truck-container storage, former corrals, and a large mulch pile.</p>
Description of Property Structure(s)	<p>Converse was not provided access to the Subject Property in order to evaluate the structures observed.</p> <p>A single-story single-family residential dwelling with attached garage was observed along the western Subject</p>

Item	Comment
	<p>Property boundary.</p> <p>Former corrals were observed in the southeastern corner of the Subject Property.</p>

**The following services were present at the Property at the time of the assessment.**

Item	Comments
Electricity:	Southern California Edison
Gas:	The Gas Company
Potable Water:	The Subject Property is serviced by the City of Ontario; however, it is possible that onsite water wells are also present based on the historical agricultural operations on the Subject Property.
Sanitary Sewer:	City of Ontario
Heating, Ventilation, Air Conditioning (HVAC):	As Converse was not provided access to the Subject Property, the heating, ventilation, and air conditioning components of the Subject Property buildings could not be observed.
Solid Waste:	City of Ontario

## 3.0 User Provided Information & Responsibilities

---

### 3.1 Requested Documents and Information

The ASTM E1527-21 specifies that the User, City of Ontario, provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity Use Limitations (AULs)
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

No information/documentation was provided by City of Ontario.

### 3.2 User Provided Information

Section 6 of ASTM E1527-21 outlines specific User's responsibilities. This information will help identify the possibility of RECs in connection with the Subject Property. The ASTM Standard provides a questionnaire to help the User to comply with the statutory requirements to perform tasks which would help identify RECs. In general, any Users should make Converse aware of information they have regarding the following:

- Environmental Cleanup Liens filed or recorded against the Subject Property
- Activity and land use limitations that are in place on the Subject Property or have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the Legal Liability Protections (LLP)
- Relationship of the purchase price to fair market value of the Subject Property if it were not contaminated
- Commonly known or reasonably ascertainable information about the Subject Property
- The degree or obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect this contamination by appropriate investigation.

The following information was requested from the User, City of Ontario.

### *3.2.1 Environmental Cleanup Liens*

The User did not have any information regarding environmental cleanup liens or title records.

### *3.2.2 Activity and Use Limitations*

The User did not have any information indicating they were aware of any AULs.

### *3.2.3 Specialized Knowledge or Experience*

The User did not provide any information indicating they had specialized knowledge or experience related to the Subject Property or nearby property.

### *3.2.4 Reason for Significantly Lower Purchase Price*

Converse has no information regarding the purchase price of the Subject Property or comparable properties. The User has not indicated to Converse that there is any conclusion that there was a lower purchase price because of known or suspected contamination at the Subject Property.

### *3.2.5 Commonly Known or Reasonably Ascertainable Information*

The User did not have any information about past uses, specific chemicals at the Subject Property, past spills, environmental cleanup or other reasonably ascertainable information regarding the Subject Property.

### *3.2.6 Obviousness of Contamination*

The User did not have any information based on their knowledge or experience that would be obvious indicators of contamination on the Subject Property.

Unless specifically stated otherwise in the Scope of Services, the purpose of this Phase I ESA was to qualify for the landowner liability protections to CERCLA Liability as described in ASTM E1527-21.

Business risk unrelated to the CERCLA innocent landowners defense are only assessed as specifically agreed in the Scope of Services and discussed in Section 11.0, Additional Non-Scope Services, of this report.

## **3.3 Continuing Obligations**

In order to assert a LLP, the User must satisfy a number of statutory requirements that are generally referred to as Continuing Obligations, which are outside the Scope of Services of the Phase I ESA. Examples of Continuing Obligations include providing legally required notices, stopping continuing releases and complying with land use restrictions. Failure to comply with these and other statutory post-acquisition requirements will jeopardize liability protection.

It is the responsibility of the User to comply with the Continuing Obligations requirements of ASTM E1527-21 and AAI. Anyone seeking LLP protections should take independent action beyond this Phase I ESA to perfect their position.

## 4.0 Owner Provided Information

---

The ASTM E1527-21 specifies that the Property owner and the Key Site Manager provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded AULs
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

Converse was not provided with Subject Property owner contact information. No interview was completed.

## 5.0 Records Review

### 5.1 Physical Setting

Item	Comments
Physical Setting:	The Subject Property is located approximately 761 feet above mean sea level with surface topography sloping towards the south (United States Geological Survey [USGS] Topographic Map, Guasti and Corona North, California, 2018).
Geology:	The Subject Property is underlain by alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast (Division of Mines and Geology, Geologic Map of California, 2010).
Groundwater:	Information regarding regional groundwater was researched on the RWQCB Geotracker website. According to the website, the closest site to the Subject Property with recent groundwater information is located approximately 1.0-mile northeast of the Subject Property. According to an October 2001 closure report for the site, groundwater is located at depths greater than 150-feet beneath ground surface (bgs) and flows in a southwesterly direction.
Potable Water Supply:	Potable water is supplied by the Ontario Municipal Utilities Company.

### 5.2 Historical Review

#### 5.2.1 Aerial Photograph and Map Review

Available historical aerial photographs and maps, which were provided by Environmental Data Resources (EDR), were reviewed. A summary of the review is provided in the following table. Copies of the aerial photographs and maps are provided in Appendix D.

Historical Summary			
Resource and Year	Property	Adjoining Properties	General Vicinity
1897 Topographic Map	The Subject Property is undeveloped.	The adjoining properties are undeveloped.	The general vicinity is primarily undeveloped with sporadic residential developments.
1900 and 1903	A roadway is depicted	The adjoining	The general vicinity is

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>
Topographic Maps	bisecting the northern portion of the Subject Property from west to east.	properties are depicted as undeveloped and/or partially developed with a roadway.	primarily undeveloped with sporadic residential developments.
1938 Aerial Photograph 1941 and 1944 Topographic Maps	A structure is located in the northwestern corner of the Subject Property. The remainder of the Subject Property appears developed for agricultural use.	The adjoining properties to the northeast/east, southwest and west appear partially developed for agricultural uses. The adjoining properties to the north, southeast, and south appear to be undeveloped.	The general vicinity is a mix of undeveloped land and agricultural land with sporadic residential developments.
1948 Aerial Photograph 1949 Topographic Map 1953 Aerial Photograph 1954 Topographic Map	There are no significant identifiable changes in uses on the Subject Property.	The northern adjoining property is developed with a residential dwelling. A flood control channel is located east and northeast of the Subject Property. The channel appears to drain to the southern and southeastern adjoining properties. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of undeveloped land and agricultural land with sporadic residential developments.
1966 Aerial Photograph and Topographic Map	There are no significant identifiable changes in uses on the Subject Property.	The northwestern and western adjoining property appears developed as part of a large livestock farming/dairy facility	The general vicinity is a mix of undeveloped land, agricultural uses, livestock farming operations, and residential uses.

<p>1981 Topographic Map</p> <p>1985, 1989, and 1994 Aerial Photographs</p>	<p>The northern portion of the Subject Property appears vacant. The remainder of the Subject Property is developed with a residential dwelling, horse corral, horse stables and associated out buildings, and livestock pens.</p>	<p>The southern and southeastern adjoining properties appear to be partially developed as catchment basins for the eastern and northeastern adjoining flood control channel.</p> <p>There are no significant identifiable changes in uses on the</p>	<p>The general vicinity is a mix of agricultural uses, livestock farming operations, and residential and commercial uses.</p>

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>
		remaining adjoining properties.	
2002 and 2006 Aerial Photograph	There are no significant identifiable changes in uses on the Subject Property.	The livestock farming operations on the northern adjoining property are no longer visible. The site appears developed with agricultural plots. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of agricultural uses, livestock farming operations, and residential and commercial uses.
2009 Aerial Photograph	There are no significant identifiable changes in uses on the Subject Property.	The agricultural plots on the northern adjoining property are no longer visible. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of agricultural uses, livestock farming operations, and residential and commercial uses.
2012 Aerial Photograph and Topographic Map	There are no significant identifiable changes in uses on the Subject Property.	The northern adjoining property appears developed as a truck and trailer parking facility.	The general vicinity is a mix of agricultural uses, livestock farming operations, and residential and commercial uses.
2015 Topographic Map 2016 Aerial Photograph	The northern formerly vacant portion of the Subject Property appears developed with agricultural fields. There are no significant identifiable changes in uses on the remainder of the Subject Property.	There are no significant identifiable changes in uses on the adjoining properties.	The general vicinity is a mix of agricultural uses, livestock farming operations, and residential and commercial uses.

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>
2020 Aerial Photograph	The southwestern portion of the Subject Property appears occupied by a possible nursery. There are no significant identifiable changes in uses across the remainder of the Subject Property.	There are no significant identifiable changes in uses on the adjoining properties.	The general vicinity is a mix of agricultural uses, livestock farming operations, and residential and commercial uses.

### *5.2.2 Building Permit Review*

Available building permits were provided by the City of Ontario, Department of Building & Safety. A chronological summary is provided below.

June 24, 2009 - Building permit for the installation of one (1) 5,000-gallon aboveground water storage tank and electric power pumping system issued to Paul Hughes.

December 12, 2019 - Building permit to demolish an existing exterior patio cover.

December 8, 2021 - Building permit for installation of a beam to exterior of stairs, one (1) 220-volt electrical outlet, and one (1) 40-gal water heater.

### *5.2.3 City Directories*

A city directory search was completed on the Subject Property by EDR. The complete city directory is provided in Appendix D, Historical Research.

The Subject Property was identified under a residential listing in 1980, by Golden West Farms from 1985 to 2017, and residential listings in 2020.

The adjoining properties, where identified, were occupied by residential uses from as early as 1970 through 2020.

### *5.2.4 Data Failure*

Historical information regarding the Subject Property indicated the Subject Property was undeveloped land as early as 1897. Therefore, no historical data failure occurred during this assessment.

### *5.2.5 Summary of Historical Property Use*

The Subject Property was undeveloped as early as 1897. A roadway bisected the northern portion of the Subject Property from as early as 1900 to 1903. The Subject Property appeared developed for agricultural use from as early as 1938 to 1976. A structure was noted in the northwestern portion of the Subject Property from as early as 1938 to at least 1954. By 1981, the northern portion of the Subject Property appeared vacant, and the remainder of the Subject Property appeared developed with a residential dwelling, horse corral, stables, and associated buildings, and livestock pens and associated structures. By 2016, the formerly vacant northern portion of the Subject Property was developed with agricultural fields. By 2020, the southwestern portion of the Subject Property appeared occupied by a possible nursery.

### *5.2.6 Summary of Past Uses of Adjoining Properties*

The adjoining properties were typically undeveloped as early as 1897. The properties were further developed for agricultural uses beginning in the 1930s and continuing through the 1950s. By 1948, the northeastern and eastern adjoining properties were developed with the existing flood control channel, and the southern and southeastern adjoining properties appeared to be spreading grounds for the water released from the flood control channel. The northwestern/western adjoining property and southwestern adjoining property were developed with the existing dairy farms/livestock farming, in addition to the agricultural uses already on the sites, by 1966. From as early as 1973 to 1994, the northern adjoining property appeared developed for livestock farming. The property was further developed with agricultural plots by 2002, and for the existing truck and trailer parking by 2012.

### *5.2.7 Summary of Past Uses of the Surrounding Area*

The surrounding area was generally undeveloped with sporadic residential developments in 1897. The area was further developed for agricultural uses in the 1930s, with additional livestock farming and dairy operations by the 1960s. The area was further developed with residential neighborhoods, and commercial developments beginning in the 1970s and continuing through the 2000s.

## **5.3 Results of Environmental Records Sources Review**

An EDR report of Standard Environmental Record Sources (Records) was prepared specifically for the Property. The search included queries to the following databases for cases within specified ASTM search distances. A copy of the database report is provided in Appendix E.

### *5.3.1 Property Listings*

The Subject Property was not identified on the databases in the EDR report.

### 5.3.2 Adjoining Properties

The following adjoining property was identified in the EDR report:

<b>Adjoining Properties</b>	
<b>Site Name:</b>	LEGEND DAIRY FARMS #1
<b>Databases:</b>	San Bern. Co. Permit, HWTS, CERS
<b>Address:</b>	9155 E RIVERSIDE DR
<b>Distance:</b>	1298
<b>Direction:</b>	Northwest
<b>Elevation:</b>	Higher
<b>Comments:</b>	The site is located west/northwest of the Subject Property and is listed in the databases as a hazardous materials handler and generator. Violations issued at the site include failure to properly manage empty containers greater than 5 gallons, and failure to electronically submit hazardous materials inventory. The site is listed as a dairy.

### 5.3.3 Other Off-site Locations of Concern

Other off-site locations of concern identified by EDR within a maximum one-mile radius from the Subject Property included registered AST sites, Hist UST sites, CPS-SLIC sites, hazardous waste generators, permitted hazardous materials handlers, and Envirostor/Sch sites.

The potential for environmental concern to the Subject Property from these off-site locations appears to be low due to one or more of the following: type of regulatory listing; type of resource (soil) affected; distance from the Subject Property; status of the case; and/or potential responsible parties have been identified.

### 5.3.4 Orphan Listings

The EDR database report identified three (3) orphan listing only by street names. These street names were found in the general vicinity of the Subject Property; however, these orphan sites appeared to have a low potential for environmental impact to the Subject Property due to the distance from the Subject Property and/or type of listing.

## 5.4 Additional Environmental Record Sources

Information requests pertaining to the Subject Property were submitted to the following regulatory agencies.

### Federal Agencies

Source	Comments
U.S. Department of Transportation, Pipeline and Hazardous Material Safety Administration (PHMSA)	The PHMSA online mapping system for gas transmission pipelines and hazardous liquid pipelines on the Subject Property or adjacent properties was reviewed ( <a href="https://www.npms.phmsa.dot.gov/PublicViewer/">https://www.npms.phmsa.dot.gov/PublicViewer/</a> ). No pipelines were identified on or adjoining the Subject Property.

### State Agencies

Source	Comments
California Environmental Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC)	No information regarding the Subject Property was on file with DTSC. The Envirostor website ( <a href="http://www.envirostor.dtsc.ca.gov/public/">http://www.envirostor.dtsc.ca.gov/public/</a> ) was reviewed for information, and the Subject Property was not listed in the database.
Cal/EPA, Regional Water Quality Control Board (RWQCB)	<p>The RWQCB had no records pertaining to the Subject Property. The Geotracker website (<a href="http://geotracker.waterboards.ca.gov/">http://geotracker.waterboards.ca.gov/</a>) was reviewed for information, and the Subject Property was not listed in the database.</p> <p>Converse noted in the database that there is in area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area, the plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. The Plume was first identified in 1986 when samples from several wells south of the 60 Freeway had detectable concentrations of volatile organic compounds (VOCs), with TCE detected at concentrations up to 75 micrograms per liter (ug/L). Subsequently, the RWQCB initiated an investigation to determine the extent and potential sources of the groundwater contamination in the area. Concentrations of TCE greater than the maximum contaminant level (MCL) of 5 ug/L were detected in samples from 92 of 167 private wells sampled between 1987 and 2005.</p> <p>Since 2005, the RWQCB, Chino Basin Watermaster (CBWM), the City of Ontario and others have collected and analyzed groundwater samples</p>

Source	Comments
	<p>from existing private and municipal wells throughout the footprint of the Plume. Samples collected within the footprint of the Plume between 2007 and 2019 indicated that TCE concentrations were generally decreasing in the western area of the Plume and increasing in the southern area. These trends are associated with a change in the direction of groundwater flow in the basin since 2000. Between 1960 and 2000, the dominant flow direction was to the southwest. Since 2000, however, the groundwater flow direction has been primarily to the south and has been influenced by both the declining agricultural production and the addition of groundwater extraction associated with the operation of the CDA desalter wells located in the southern part of the Chino Basin.</p> <p>Converse reviewed the data from the 2022 report which indicated that the majority of the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the threshold 5 ug/l. A small portion of the southeastern corner of the Subject Property falls within the iso-contour indicating TCE concentrations greater than 5-ug/l but less than 10 ug/l.</p>
California Department of Conservation, California Department of Conservation (DOC), Geologic Energy Management Division (CalGEM)	<p>Converse reviewed the DOC CalGEM Online Well Finder (<a href="https://www.conservation.ca.gov/calgem/Pages/Wellfinder.aspx">https://www.conservation.ca.gov/calgem/Pages/Wellfinder.aspx</a>).</p> <p>According to the website, no oil or gas wells are located on the Subject Property.</p>

### Local Agencies

Source	Comments
South Coast Air Quality Management District (SCAQMD)	<p>There were no agency records pertaining to the Subject Property on file with this agency.</p>
San Bernardino County Fire Department, Certified Unified	<p>There were no agency records pertaining to the Subject Property on file with this agency.</p>

Source	Comments
Program Agency (CUPA)	
Methane	<p>According to the CalRecycle SWIS website (<a href="https://www2.calrecycle.ca.gov/SolidWaste/Site/Search">https://www2.calrecycle.ca.gov/SolidWaste/Site/Search</a>), a solid waste site is located approximately 0.15-miles south/southwest of the Subject Property at 13434 South Ontario Avenue.</p> <p>The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."</p>

## 6.0 Property Reconnaissance

### 6.1 Methodology

On October 18, 2023 Converse visited the Subject Property to evaluate present use and to identify observable environmental conditions at the Subject Property. Converse was not provided access to the Subject Property, our methodology involved visual observation of the Subject Property from the public rights-of-way (Ontario Avenue and Chino Avenue) along the western and southern boundaries of the Subject Property.

A field-generated map is provided in Appendix B. Pertinent Property photographs are provided in Appendix C.

### 6.2 Limiting Conditions

Converse's findings are based on the Subject Property conditions observed on Wednesday, October 18, 2023.

Converse was not provided access to the Subject Property. Observation of the Subject Property was limited to viewing from Ontario Avenue, along the western boundary of the Subject Property, and Chino Avenue, along the southern boundary of the Subject Property.

### 6.3 Interior Observations of Property

Converse was not provided access to the Subject Property and therefore was unable to visually observe the interiors of the onsite buildings.

### 6.4 Exterior Observations of Property

Converse was not provided access to the Subject Property. Limited observations of the Subject Property were made from public rights-of-way on Ontario Avenue and Chino Avenue.

Exterior Observations		
Item or Condition	Observed Evidence?	Comments
Hazardous Substances & Petroleum Products:	Unknown	A steel AST was observed in the northwestern portion of the Subject, on the north side of the single-family residence. It is unclear what material is stored in the AST.
Storage Tanks & Related Equipment:	Unknown	A steel AST was observed in the northwestern portion of the Subject, on the north side of the single-family residence. It is unclear what material is stored in the AST.

Item or Condition	Observed Evidence?	Comments
Odors:	No	
Standing Surface Water or Other Pools of Liquid:	No	
Drums & Other Containers of Hazardous Substances, Petroleum Products, or Other Unidentified Contents:	No	
Transformers or Equipment containing Polychlorinated Biphenyls (PCBs):	No	
Pits, Ponds, or Lagoons:	No	
Stained Soil or Pavement:	No	
Stressed Vegetation (other than from insufficient water):	No	
Evidence of Mounds, Depressions or Filled or Graded Areas Suggesting Trash or Other Solid Waste Disposal:	No	
Waste Water or any discharge (including storm water) into a Drain, Ditch, or Stream on or Adjacent to the Property:	No	
Wells (active, inactive, or abandoned):	No	
Septic Systems or Cesspools:	No	
Prior Structures:	No	
Roads, Tracks, Railroad Tracks or Spurs:	Yes	The Subject Property fronts on Ontario Avenue to the west, and Chino Avenue to the south.
Suspect Asbestos containing Building Materials released into the environment	No	

Item or Condition	Observed Evidence?	Comments
Suspect Lead-based Paint released into the environment	No	
Suspect PCB Caulk, Paint or Ballasts released into the environment	No	

### **6.5 Current Uses of Adjoining Properties**

Based on our research and observations during our Subject Property visit, the Subject Property is bordered by the following:

Adjoining Property Use	
Direction	Current Development
North	Truck and trailer parking (13165 Ontario Avenue).
Northeast	Flood control channel
East	Flood control channel
Southeast	Chino Avenue followed by flood control basin.
South	Chino Avenue followed by flood control basin.
Southwest	Intersection of Chino Avenue and Ontario Avenue followed by livestock farming/horse corral, and equipment storage.
West	Ontario Avenue followed by dairy and agricultural fields (9155 East Riverside Drive).
Northwest	Ontario Avenue followed by dairy and agricultural fields (9155 East Riverside Drive).

### **6.6 Current Uses of Surrounding Area**

Based on our research and observations during our Subject Property visit, the surrounding area of the Subject Property consists of agricultural fields, dairy farms, residential and commercial businesses.

## 7.0 Interviews

---

During the interviews, the owners and occupants were asked if they had any available documents that would be helpful. The documents that were requested are detailed in Section 4.0 of this report:

<b>Interview:</b>	<b>Comments:</b>
Property Owner:	Converse was not provided contact information for the Subject Property owner. No owner interview was conducted.
Tenant/ Occupant:	Converse was not provided access to the Subject Property. No tenant/occupant interviews were conducted.
State or Local Government Officials:	Other than the information provided in Section 5.4, no other information was provided by a government official.
Owners and Occupants of Neighboring Sites:	No interviews of owners or occupants of neighboring sites were conducted.

## 8.0 Findings & Opinions

---

A cursory summary of findings is provided below. However, details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

The Subject Property is owned by Ontario WF Farm, LLC, and is occupied by a residence, and storage yard for landscaping equipment and mulch.

The Subject Property was undeveloped as early as 1897. A roadway bisected the northern portion of the Subject Property from as early as 1900 to 1903. The Subject Property appeared developed for agricultural use from as early as 1938 to 1976. A structure was noted in the northwestern portion of the Subject Property from as early as 1938 to at least 1954. By 1981, the northern portion of the Subject Property appeared vacant, and the remainder of the Subject Property appeared developed with a residential dwelling, horse corral, stables, and associated buildings, and livestock pens and associated structures. By 2016, the formerly vacant northern portion of the Subject Property was developed with agricultural fields. By 2020, the southwestern portion of the Subject Property appeared occupied by a possible nursery.

One (1) possible AST was observed in the northwestern portion of the Subject Property, adjacent to the north of the residence. Converse was not able to evaluate the AST and/or area surrounding the AST.

According to the RWQCB Geotracker database there is an area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area. The plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. Converse reviewed the data from the 2022 report which indicated that the southeasternmost corner of the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than 5 ug/l but less than 10 ug/l, which is greater than the regulatory threshold 5 ug/l.

The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."

The Subject Property was not identified in the regulatory database report.

The following adjoining property was identified in the regulatory database report:

- 9155 East Riverside Drive - The site is located west of the Subject Property and was listed in the San Bern. Co. Permit, HWTS, and CERS databases. The listings indicate the site as a hazardous materials handler and generator. Violations issued at the site include failure to properly manage empty containers greater than 5 gallons, and failure to electronically submit hazardous materials inventory. The site is listed as a dairy.

Based on the above, the following were identified:

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural use (agricultural plots)
- The historical livestock farming
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

The following environmental concern was noted:

- The presence of a possible AST in the northwestern portion of the Subject Property.

## 9.0 Conclusions & Recommendations

---

Converse has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-21 for 13213 Ontario Avenue, Ontario, San Bernardino County, California. Any exceptions to, or deletions from, this practice are described in the Limitations and Exceptions of Assessment section of this report. This assessment has revealed the following *recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps* in connection with the Subject Property except for the following:

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural use (agricultural plots)
- The historical livestock farming
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** No HRECS pertaining to the Subject Property were identified during this assessment.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

The following environmental concern was noted:

- The presence of a possible AST in the northwestern portion of the Subject Property.

Based on the findings, Converse recommends assessment of shallow soils across the Subject Property for the presence of pesticides and metals historically used in agricultural operations. In addition, Converse recommends methane screening in the southern portion of the Subject Property historically occupied by possible livestock farming operations.

No assessment related to the Archibald plume is deemed necessary based on the depth to groundwater.

Any future redevelopment of the Subject Property should be in accordance with the City of Ontario Methane Ordinance.

It is recommended that the Site Reconnaissance be completed at the time of the Phase II Environmental Site Assessment, and that the possible AST in the northern portion of the Subject Property be evaluated for possible leaks.

## 10.0 Deviations & Limitations

---

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property and observation of the Subject Property was limited to the public rights-of-way on Ontario Avenue and Chino Avenue.
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

## 11.0 Additional Non-Scope Services

---

There are environmental issues outside the scope of the ASTM E1527-21 that can be assessed in connection with a commercial real estate transaction. These are dealt with as non-scope considerations since they do not typically present a Superfund Liability. The specific level of inquiry (if any) is defined in the Proposal which contains a Scope of Work. These non-scope services are very client specific and not covered by the ASTM standard. They are frequently related to the business environmental risk which is defined in the standard as "risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate".

No non-scope issues were addressed during this assessment.

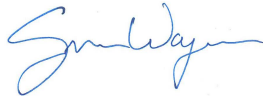

## 12.0 Signature of Environmental Professional

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in A§312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

**Site Assessor**

---

Spencer Wagner  
Project Environmental Scientist

**Senior Reviewer**

---

Norman S. Eke  
Senior Vice President/Managing Officer

Spencer Wagner - Project Environmental Scientist

Norman S. Eke - Senior Vice President/Managing Officer

This Phase I ESA was completed by the above Environmental Professional. A complete list of preparers, and their responsibilities for this assessment, is provided in the following section (Section 13.0, List of Preparers).

## 13.0 List of Preparers

---

### **Norman S. Eke**

Senior Vice President

B.A., Liberal Studies, Environmental Studies Emphasis, University of California, Santa Barbara, 1988.

Cal/OSHA Certified Asbestos Consultant, #96-2093

NIOSH 582 Equivalent Training

Senior Vice President and Managing Officer of Converse's California Environmental offices. Mr. Eke has served as the Principal-in-Charge and Contract Administrator to deliver services to our public agency and private clients. Mr. Eke has 33 years of experience in the fields of Environmental Due Diligence including Phase I and Phase II Environmental Site Assessments, Asbestos surveys/specifications/abatement monitoring, Preliminary Endangerment Assessments and associated Supplemental Site Investigations and Removal Action Work Plans/Implementation, various forms of Remediation, Human Health Risk Assessment and Indoor Air Quality. Mr. Eke is a former Subcommittee Chairman for E.50-02 Real Assessment and Management of the ASTM E.50 Committee on Environmental Assessment, Risk Management, Corrective Action, which includes Phase I ESA standards.

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, and Report Review.

### **Spencer Wagner**

Senior Staff Environmental Scientist

B.A., Environmental Science and Policy, California State University, Long Beach, 2006

B.A., Geography, California State University, Long Beach, 2006

Certified Wood Destroying Organism (WDO) Inspector

Mr. Wagner has over 17 years' experience conducting Phase I and II Environmental Site Assessments throughout California. Mr. Wagner has completed Phase I ESAs on undeveloped land, residential properties, commercial/retail facilities, industrial facilities, and school sites. His Phase II ESA experience includes collection of soil matrix, soil vapor, indoor air and groundwater samples. Phase II projects worked on have included residential properties, commercial warehousing sites, school sites, dry cleaning facilities, automotive service sites, metal plating facilities and multi-tenant commercial properties

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, Historical Research, Regulatory Agency Interaction, Property Reconnaissance, Interviews, and Report Generation.

## 15.0 List of Acronyms

---

The following is a list of acronyms that may have been noted in the report. This is not an all inclusive list and may include acronyms that are not found in your report but are commonly utilized in environmental assessments. Additional acronyms pertaining to regulatory agency documents/listings can be found in the regulatory database report, which is provided as an appendix to this report.

**AAI** - All Appropriate Inquiries

**ACM** - Asbestos-containing Material

**APN** - Assessor's Parcel Number

**APCD** - Air Pollution Control District

**AQMD** - Air Quality Management District

**AST** - Aboveground Storage Tank

**ASTM** - American Society of Testing and Materials

**AUL** - Activity Use Limitation

**BER** - Business Environmental Risk

**BTEX** - Benzene, Toluene, Ethylbenzene, and Xylenes

**Cal/EPA** - California Environmental Protection Agency

**CalGEM** - (California Department of Conservation), Geologic Energy Management Division

**CERCLA** - Comprehensive Environmental Response, Compensation and Liability Act

**CFR** - Code of Federal Regulations

**CREC** - Controlled Recognized Environmental Condition Recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

**CUPA** - Certified Unified Protection Agencies

**de minimis condition** - A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a REC nor a CREC.

**DOC** - (California) Department of Conservation

**DPW** - (Los Angeles County) Department of Public Works

**DTSC** - Department of Toxic Substances Control

**DWP** - (City of Los Angeles) Department of Water and Power

**EDR** - Environmental Data Resources

**EHD** - Environmental Health Department

**EP** - Environmental Professional

**EPA** - United States Environmental Protection Agency

**ESA** - Environmental Site Assessment

**ERIS** - Environmental Risk Information Systems

**(x)FD** - (City/County)Fire Department

**HMS** - Hazardous Material Site

**HREC** - Historic Recognized Environmental Condition: A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

**HVAC** - Heating, Ventilation, Air Conditioning

**IAQ** - Indoor Air Quality

**LACSD** -Los Angeles County Sanitation Districts

**LBP** - Lead-based Paint

**LLP** - Landowner Liability Protections

**LQG** - Large Quantity Generator

**LUST** - Leaking Underground Storage Tank

**mg/kg** - milligram per kilogram

**mg/L** - milligram per Liter

**MSL** - Mean Sea Level

**MTBE** - Methyl Tertiary Butyl Ether

**ND** - None Detected

**NFA** - No Further Action

**NOV** - Notice of Violation

**PEC** - Potential Environmental Concern

**PFAS** - Perfluoroalkyl and Polyfluoroalkyl Substances

**PHMSA** - US Department of Transportation, Pipeline and Hazardous Materials Safety Administration

**PCB** - Polychlorinated biphenyls

**PCE** - Perchloroethylene or Tetrachloroethylene

**pCi/L** - picoCuries per Liter

**ppb** - parts per billion

**ppm** - parts per million

**PRP** - Potential Responsible Party

**RCRA** - Resources Conservation and Recovery Act

**REC** - Recognized Environmental Condition; (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

**RP** - Responsible Party

**RWQCB** - Regional Water Quality Control Board

**SCAQMD** - South Coast Air Quality Management District

**SDS** - Safety Data Sheets

**SQG** - Small Quantity Generator

**SVOC** - Semi-volatile Organic Compound

**TCE** - Trichloroethylene or Trichloroethene

**TPH** Total Petroleum Hydrocarbons

**µg/L** - micrograms per Liter

**USGS** - United States Geological Survey

**UST** - Underground Storage Tank

**VCP** - Voluntary Cleanup Program

**VOCs** - Volatile Organic Compounds

**Appendix A -  
Application for Authorization to Use**

# Converse Consultants

Geotechnical Engineering, Environmental & Groundwater Science, Inspection & Testing Services

## Application for Authorization to Use

TO: Converse Consultants  
Environmental Department  
717 South Myrtle Avenue  
Monrovia, California 91016

Project Title & Date: \_\_\_\_\_

Project Address: \_\_\_\_\_

FROM: (Please identify name & address of person/entity applying for permission to use the referenced report.)

\_\_\_\_\_  
\_\_\_\_\_

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Converse Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

**Certification #** 1707-4A7B-B2EE  
**PO #** NA  
**Project** 19-16-123-58

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 1707-4A7B-B2EE

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Converse Consultants (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal NPL (Superfund) sites***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing  
SEMS..... Superfund Enterprise Management System

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS..... Corrective Action Report

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

### ***Lists of Federal RCRA generators***

RCRA-LQG..... RCRA - Large Quantity Generators  
RCRA-SQG..... RCRA - Small Quantity Generators  
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

Status: Certified  
Facility Id: 60002726

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>ARTESIA SAWDUST PROD</b> Database: SWF/LF (SWIS), Date of Government Version: 05/08/2023 Facility ID: 36-AA-0426 Facility ID: 36-AA-0447 Operational Status: Active Regulation Status: Notification	<b>13434 SOUTH ONTARIO</b>	<b>SSW 1/8 - 1/4 (0.196 mi.)</b>	<b>C5</b>	<b>15</b>

### ***Lists of state and tribal leaking storage tanks***

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***Lists of state and tribal registered storage tanks***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

### ***Lists of state and tribal voluntary cleanup sites***

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 04/24/2023 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas.

Violation Notes: Returned to compliance on 01/30/2023. OBSERVATION: Annual inspections of petroleum storage aboveground tanks are not being conducted. SPCC plan indicated annual inspections according STI SP001 standards to be conducted on all aboveground tanks. CORRECTIVE ACTION: Test or inspect each aboveground container for integrity based on industry standards (e.g STI SP001) on a regular schedule and/or after making equipment repairs. Submit a signed statement indicating aboveground containers are tested and inspected as required.

associated with confined and concentrated animal feeding, confined animal feeding, confined animal holding, confined and concentrated aquatic animal production facilities, and aquaculture. the treatment and/or disposal of agricultural return water is included in this category.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

NPDES Number: CAG018001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Subregion: 8

Facility Telephone: Not reported

Facility Contact: Not reported

Agency Name: VAN VEEN JOHN

Agency Address: 9581 CHINO AVENUE

Agency City,St,Zip: ONTARIO 91761

Agency Contact: JOHN VAN VEEN

Agency Telephone: Not reported

Agency Type: Private

SIC Code: 241

SIC Code 2: Not reported

Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Primary Waste: STORMS

Waste Type2: N

Waste2: Stormwater Runoff

Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Secondary Waste: Solid Wastes

Secondary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Design Flow: 0

Baseline Flow: 0

Reclamation: No reclamation requirements associated with this facility.

POTW: The facility is not a POTW.

Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**Violations:**

Site ID: 595885  
Site Name: Legend Dairy Farms #1  
Violation Date: 11-17-2022  
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7

Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: OBSERVATION: Observed empty 55-gallon drums in a containment structure and empty tanks throughout the facility which have been stored on site for an unknown amount of time. The contents of the tanks and containers were unknown and they were not labeled at the time of the inspection. CORRECTIVE ACTION: Submit a copy of a disposal receipt showing the removal of the empty tanks and containers or a signed statement as to how they have been sold, used, or otherwise managed.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

Telephone 206-553-8665

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/22/2023

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2023

Last EDR Contact: 06/23/2023  
Next Scheduled EDR Contact: 10/09/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/22/2023

Next Scheduled EDR Contact: 10/23/2023  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: 800-424-9346
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/23/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 07/24/2023	Source: EPA
Date Data Arrived at EDR: 07/31/2023	Telephone: 800-424-9346
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023

	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/25/2023	Source: Department of the Navy
Date Data Arrived at EDR: 05/31/2023	Telephone: 843-820-7326
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 54	Next Scheduled EDR Contact: 11/20/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/12/2023

Date Data Arrived at EDR: 06/20/2023

Date Made Active in Reports: 08/14/2023

Number of Days to Update: 55

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 09/20/2023

Next Scheduled EDR Contact: 01/01/2024

Data Release Frequency: Quarterly

## ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 04/24/2023

Date Data Arrived at EDR: 04/25/2023

Date Made Active in Reports: 07/13/2023

Number of Days to Update: 79

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 07/25/2023

Next Scheduled EDR Contact: 11/06/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 04/24/2023

Date Data Arrived at EDR: 04/25/2023

Date Made Active in Reports: 07/13/2023

Number of Days to Update: 79

	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 04/06/2023	Source: Environmental Protection Agency

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## IHS OPEN DUMPS: Open Dumps on Indian Land

A listing of all open dumps located on Indian Land in the United States.

Date of Government Version: 04/01/2014	Source: Department of Health & Human Services, Indian Health Service
Date Data Arrived at EDR: 08/06/2014	Telephone: 301-443-1452
Date Made Active in Reports: 01/29/2015	Last EDR Contact: 07/27/2023
Number of Days to Update: 176	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Varies

## Local Lists of Hazardous waste / Contaminated Sites

### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 05/22/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 05/23/2023	Telephone: 202-307-1000
Date Made Active in Reports: 07/10/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 48	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: No Update Planned

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 04/24/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 04/25/2023	Telephone: 916-323-3400
Date Made Active in Reports: 07/13/2023	Last EDR Contact: 07/25/2023
Number of Days to Update: 79	Next Scheduled EDR Contact: 11/06/2023
	Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2020	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/30/2022	Telephone: 916-255-6504
Date Made Active in Reports: 02/09/2023	Last EDR Contact: 09/15/2023
Number of Days to Update: 71	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Varies

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364
Date Made Active in Reports: 09/26/1995	Last EDR Contact: 01/26/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/27/2009
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 04/17/2023	Source: CalEPA
Date Data Arrived at EDR: 04/18/2023	Telephone: 916-323-2514
Date Made Active in Reports: 07/11/2023	Last EDR Contact: 07/18/2023
Number of Days to Update: 84	Next Scheduled EDR Contact: 10/30/2023
	Data Release Frequency: Quarterly

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/22/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 05/23/2023	Telephone: 202-307-1000
Date Made Active in Reports: 07/10/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 48	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Quarterly

## Local Lists of Registered Storage Tanks

### SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994	Source: State Water Resources Control Board
Date Data Arrived at EDR: 07/07/2005	Telephone: N/A
Date Made Active in Reports: 08/11/2005	Last EDR Contact: 06/03/2005
Number of Days to Update: 35	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### HIST UST: Hazardous Substance Storage Container Database

The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990	Source: State Water Resources Control Board
Date Data Arrived at EDR: 01/25/1991	Telephone: 916-341-5851
Date Made Active in Reports: 02/12/1991	Last EDR Contact: 07/26/2001
Number of Days to Update: 18	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### SAN FRANCISCO AST: Aboveground Storage Tank Site Listing

Aboveground storage tank sites

Date of Government Version: 04/28/2023	Source: San Francisco County Department of Public Health
Date Data Arrived at EDR: 04/28/2023	Telephone: 415-252-3896
Date Made Active in Reports: 07/14/2023	Last EDR Contact: 07/26/2023
Number of Days to Update: 77	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Varies

### CA FID UST: Facility Inventory Database

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 07/31/2023
Number of Days to Update: 88	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: 703-416-0223
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 12/11/2023
	Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 04/27/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/04/2022	Telephone: 202-564-8600

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 09/22/2023
Number of Days to Update: 84	Next Scheduled EDR Contact: 01/08/2024
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

Date of Government Version: 06/24/2020	Source: Department of Health & Human Services
Date Data Arrived at EDR: 03/17/2021	Telephone: 202-741-5770
Date Made Active in Reports: 11/08/2022	Last EDR Contact: 07/19/2023

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

Date of Government Version: 03/30/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/30/2023	Telephone: 202-272-0167
Date Made Active in Reports: 05/02/2023	Last EDR Contact: 07/05/2023

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

### PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

### AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2021	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 07/05/2022	Telephone: 916-255-1136
Date Made Active in Reports: 09/19/2022	Last EDR Contact: 07/07/2023
Number of Days to Update: 76	Next Scheduled EDR Contact: 10/16/2023

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

## CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## Private Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

## Daycare Centers: Licensed Facilities

UTM X (Meters): 444492.8  
UTM Y (Meters): 3763580.5  
Elevation: 761 ft. above sea level

## USGS TOPOGRAPHIC MAP

Target Property Map: 12015973 GUASTI, CA  
Version Date: 2018  
  
Southeast Map: 12014834 CORONA NORTH, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

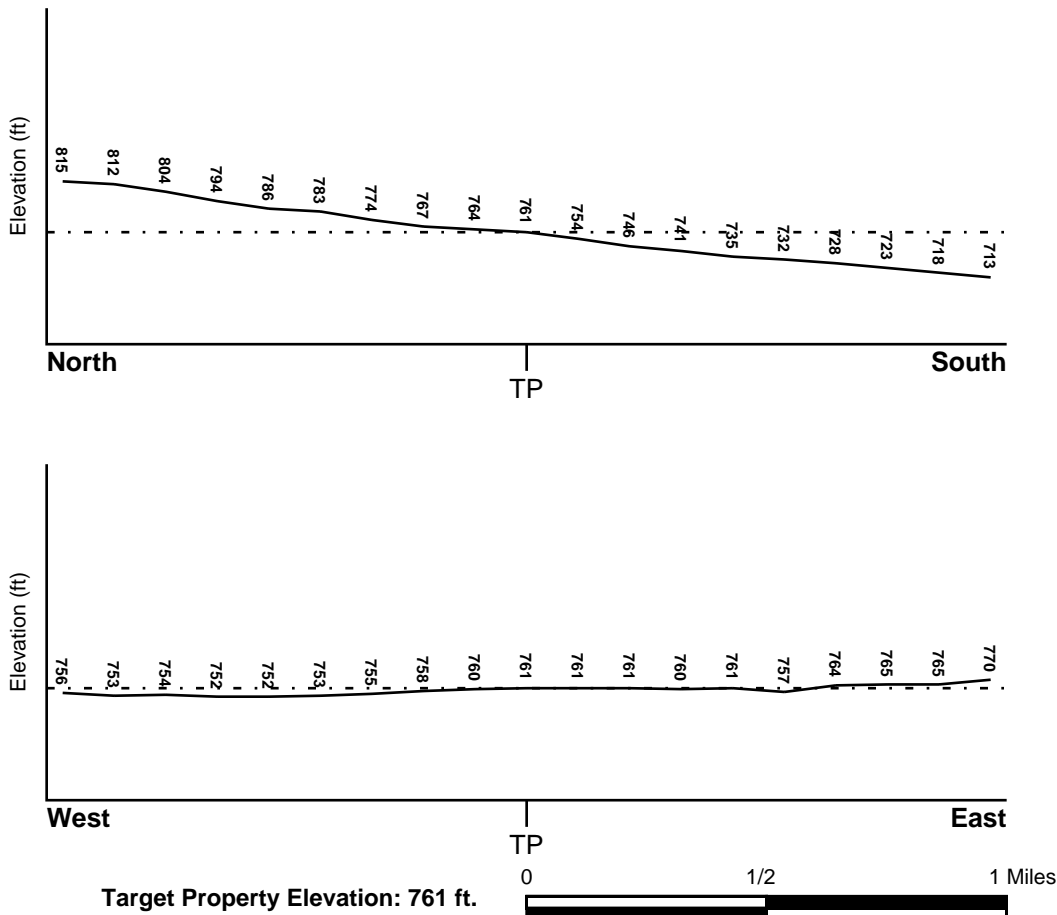

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8638H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8639H	FEMA FIRM Flood data
06071C9375H	FEMA FIRM Flood data

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Status:	Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

\* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### Soil Map ID: 2

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	22 inches	59 inches	stratified loamy sand to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

# GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

## TARGET PROPERTY ADDRESS

CITY OF ONTARIO - ONTARIO WF FARM LLC  
13213 ONTARIO AVENUE  
ONTARIO, CA 91761

## TARGET PROPERTY COORDINATES

Latitude (North): 34.013133 - 34° 0' 47.28"  
Longitude (West): 117.601142 - 117° 36' 4.11"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 444492.8  
UTM Y (Meters): 3763580.5  
Elevation: 761 ft. above sea level

## USGS TOPOGRAPHIC MAP

Target Property Map: 12015973 GUASTI, CA  
Version Date: 2018  
  
Southeast Map: 12014834 CORONA NORTH, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

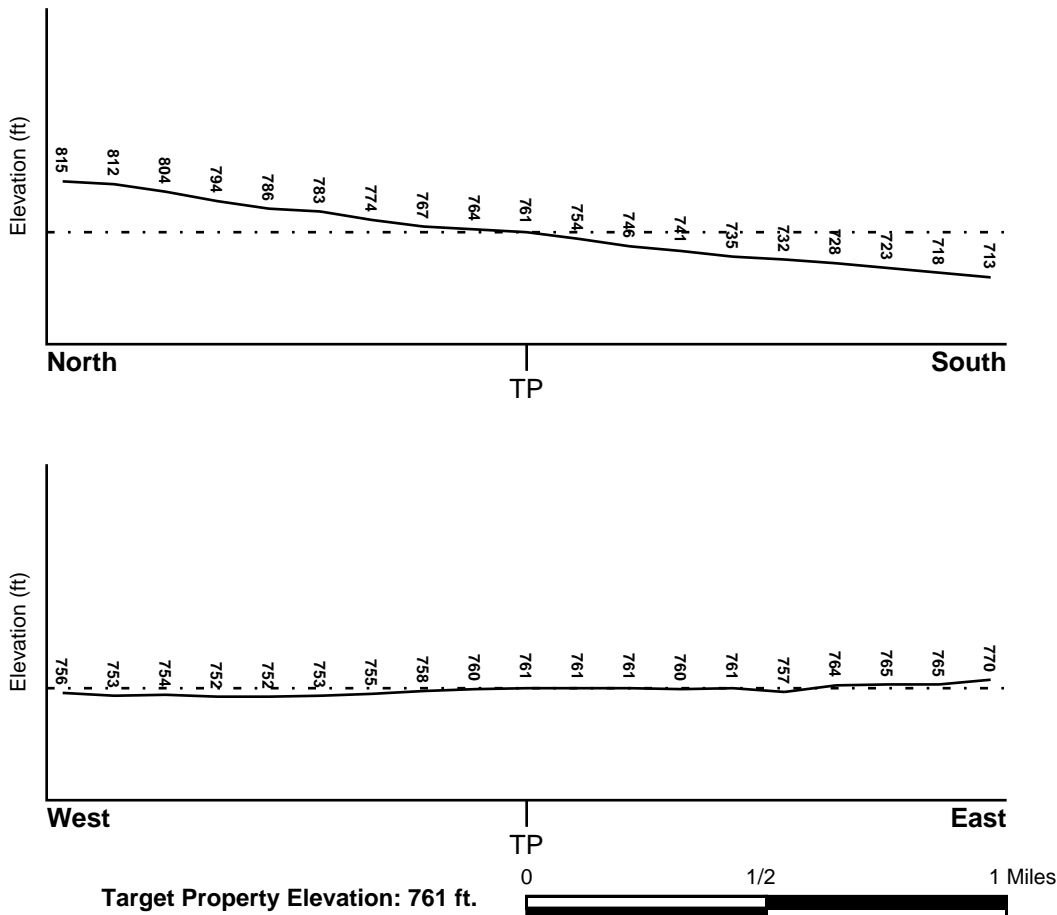

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8638H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8639H	FEMA FIRM Flood data
06071C9375H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

\* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### Soil Map ID: 2

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	22 inches	59 inches	stratified loamy sand to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Converse Project No. 19-16-123-58

Ms. Hernandez,

Converse Consultants (Converse) is pleased to submit the attached report that summarizes the activities and the results of a Phase I Environmental Site Assessment (Phase I ESA) that was conducted at the referenced property.

A summary of the assessment is presented in the Executive Summary, as well as in Sections 8.0, 9.0, and 10.0 of the report. Recognized Environmental Conditions were identified during this assessment and additional assessment appears warranted.

We appreciate the opportunity to be of service. Should you have any questions or comments regarding this report, please contact Spencer Wagner at (562) 505-5219 or Norman Eke at (626) 930-1260.

# Executive Summary

---

The following is an Executive Summary of the Phase I Environmental Site Assessment (Phase I ESA) that was conducted by Converse Consultants (Converse). Please refer to the appropriate sections of the report for a complete discussion of these issues. In the event of a conflict between this Executive Summary and the report, or an omission in the Executive Summary, the report shall prevail.

This report presents the results of the Converse Phase I ESA performed at 13165 South Ontario Avenue in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by the City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical within the scope of an ESA, Recognized Environmental Conditions (RECs) in connection with the Subject Property.

Converse has compiled and reviewed information that was obtained from interviews, document research, and on-site and area reconnaissance to identify potential environmental conditions at the Property in conformance with the ASTM Standard E: 1527-21 Environmental Site Assessment Standard Practice (ASTM Standard: E1527-21). This Phase I ESA was conducted during the period of September 19, 2023 to October 27, 2023.

The Subject Property is owned by Raymundo Flores, and is occupied by a residence and utilized for truck and trailer parking.

The Subject Property was undeveloped from as early as 1897 to at least 1944. By 1948, a residential structure was constructed in the western portion of the Subject Property while the eastern portion of the Subject Property remained undeveloped. From as early as 1985 to 1994, the eastern portion of the Subject Property was developed for livestock farming. By 2002, the western residential portion of the Subject Property was further occupied for truck and trailer parking, and the eastern portion was developed with agricultural plots. By 2009, the agricultural plots were no longer present in the eastern portion of the Subject Property, and by 2012 the Subject Property appeared primarily utilized for truck and trailer parking.

According to the RWQCB Geotracker database there is an area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area. The plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the regulatory threshold 5 ug/l.

The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."

According to records provided by the County of San Bernardino Fire Department for the northern adjoining property located at 13115 Ontario Avenue, a 550-gallon former fuel tank containing gasoline from 1975 and 1979, and diesel between 1979 and 1987, was reportedly unlawfully removed in 1984. Records indicated that permits for removal were not obtained at the time of removal. Violations pertaining to the unlawful abandonment were issued and soil sampling in the vicinity of the former UST was required. According to records, soil samples were collected in August 2000 from depths of 10, 15, 20, and 25-feet bgs at the former UST location. All samples were analyzed for gasoline and diesel. No reported concentrations of gasoline or diesel were reported in samples at levels above detection limits. Based on the findings, the San Bernardino County Fire Department, issued a concurrence that no additional assessment appeared warranted.

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural use (agricultural plots)
- The historical livestock farming
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** The following HRECs pertaining to the Subject Property were identified during this assessment.

- The case-closed designation related to the former operation of one (1) 550-gallon fuel UST on the northern adjoining property.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

Based on the findings, Converse recommends assessment of shallow soils across the eastern portion of the Subject Property for the presence of pesticides and metals historically used in agricultural operations. In addition, Converse recommends methane screening in the eastern portion of the Subject Property historically occupied by possible livestock farming operations.

No assessment related to the Archibald plume is deemed necessary based on the depth to groundwater and reported concentrations of TCE in the vicinity of the Subject Property are below the maximum contaminant level (MCL).

Any future redevelopment of the Subject Property should be in accordance with the City of Ontario Methane Ordinance.

It is recommended that the Site Reconnaissance be completed at the time of the Phase II Environmental Site Assessment.

# 1.0 Introduction

---

## 1.1 Purpose and Scope of Services

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at 13165 Ontario Avenue in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical, Recognized Environmental Conditions (RECs) in connection with the Subject Property. The term Recognized Environmental Conditions is defined in Section 1.1.1 of the American Society of Testing and Materials (ASTM) Standard Practice as the presence or likely presence of any hazardous substances or petroleum products in, at or on a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

This Phase I ESA was completed in accordance with our proposal dated September 19, 2023. Our work consisted of the following and was completed in general conformance with the scope and limitations of the ASTM Practice E1527-21 and complies with standards and practices set forth in 40 Code of Federal Regulations (CFR) Part 312 for AAI.

- Interviews with the Property owner representatives
- Property and vicinity reconnaissance
- Review of regulatory agency records
- Description of physical setting
- Historical review
- Interviews with public agency personnel
- Preparation of this report

## 1.2 Non-Scope Considerations

There are a number of non-scope issues which are sometimes assessed concurrently with a Phase I ESA. Unless specifically agreed in the contract proposal documents, these non-scope considerations are not included as part of the Phase I ESA. Examples of non-scope issues include:

- Asbestos-containing Building Materials unrelated to release into the environment
- Biological Agent
- Cultural & Historic Resources
- Diffuse Anthropogenic Pollution
- Ecological Resources
- Endangered Species
- Health & Safety
- Indoor Air Quality unrelated to release of hazardous substances or petroleum products in the environment
- Industrial Hygiene
- Lead-based Paint unrelated to releases in the environment
- Lead in Drinking Water
- Mold or microbial growth conditions
- PCB-containing building materials (for example, interior fluorescent light ballasts, paint, and caulk)
- Polyfluoroalkyl Substances
- Naturally-occurring Radon
- Regulatory Compliance

- Substances not defined as hazardous substances unless or until such substances are classified as CERCLA hazardous substances.
- Wetlands

No Non-Scope issues were addressed in this report.

### **1.3 Significant Assumptions**

No assumptions were made for this assessment that need to be noted as significant.

### **1.4 Limitations and Expectations**

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property and observation of the Subject Property was limited to the public right-of-way on Ontario Avenue.
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

### **1.5 Special Terms and Conditions**

No special terms or conditions were identified by the User.

### **1.6 Reliance**

This report is for the sole benefit and exclusive use of City of Ontario in accordance with the terms and conditions under which these services have been provided. Its preparation has been in accordance with generally accepted environmental practices. No other warranty, either express or implied, is made. The Scope of Services associated with the report was designed solely in accordance with the objectives, schedule, budget, and risk-management preferences of City of Ontario.

This report should not be regarded as a guarantee that no further contamination, beyond that which could be detected within the scope of this assessment, is present at the Property. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation of the property at the time of the assessment. Also, events may occur after the Property visit, which may result in contamination of the Property. Additional information, which was not found or available to Converse at the time of report preparation, may result in a modification of the conclusions and recommendations presented.

Any reliance on this report by Third Parties shall be at the Third Party's sole risk. Should City of Ontario wish to identify any additional relying parties not previously identified, a completed Application of Authorization to Use (see Appendix A of this report) must be submitted to Converse Consultants.

## ***1.7 Continued Viability***

This report has continued viability of 180 days from the following:

- **Interviews:** {InterviewDate}
- **Review of Government Records:** September 26, 2023
- **Visual Inspection:** October 18, 2023
- **Declaration of Environmental Professional (EP):** October 27, 2023
- **Lien Search:** Not Applicable

## 2.0 Property Description

Item	Comment
Current Use(s) of the Property	<p>The Subject Property is owned by Raymundo Flores, and is occupied by a residence and utilized for truck and trailer parking.</p> <p>A Subject Property location map and a field generated Subject Property plan are provided in Appendix B. Pertinent Property photographs are provided in Appendix C.</p>
Location and Legal Description	<p>The Subject Property is located at 13165 Ontario Avenue, Ontario, California 91761. The Subject Property is located on the east side of Ontario Avenue, between East Riverside Drive and Chino Avenue. The Subject Property is located approximately 1.0-mile south of the Ontario (60) Freeway and 2.85-miles west of Interstate 15.</p> <p>The Subject Property consists of one (1) parcel and is approximately 1.8-acres. The San Bernardino County Assessor's Parcel Number for the Subject Property is 0218-111-05.</p>
Zoning Information	<p>According to the City of Ontario, Planning Department, the Subject Property is zoned as LDR for low density residential.</p>
Property Characteristics	<p>The Subject Property is a rectangular-shaped parcel consisting of approximately 1.8-acres. The Subject Property is generally level, sloping slightly to the south. One (1) residential structure with a detached garage is located in the western portion of the Subject Property. The remainder of the Subject Property was not visible from the public right-of-way.</p>
Description of Property Structure(s)	<p>Converse was not provided access to the Subject Property in order to evaluate the structures observed.</p> <p>One (1) single-family residential structure with detached garage was visible in the western portion of the Subject Property.</p>

**The following services were present at the Property at the time of the assessment.**

Item	Comments
Electricity:	Southern California Edison
Gas:	The Gas Company
Potable Water:	The Subject Property is serviced by the City of Ontario; however, it is possible that onsite water wells are also present based on the historical agricultural operations on the Subject Property.
Sanitary Sewer:	City of Ontario
Heating, Ventilation, Air Conditioning (HVAC):	As Converse was not provided access to the Subject Property, the heating, ventilation, and air conditioning components of the Subject Property buildings could not be observed.
Solid Waste:	City of Ontario

## 3.0 User Provided Information & Responsibilities

---

### 3.1 Requested Documents and Information

The ASTM E1527-21 specifies that the User, City of Ontario, provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity Use Limitations (AULs)
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

No information/documentation was provided by City of Ontario.

### 3.2 User Provided Information

Section 6 of ASTM E1527-21 outlines specific User's responsibilities. This information will help identify the possibility of RECs in connection with the Subject Property. The ASTM Standard provides a questionnaire to help the User to comply with the statutory requirements to perform tasks which would help identify RECs. In general, any Users should make Converse aware of information they have regarding the following:

- Environmental Cleanup Liens filed or recorded against the Property
- Activity and land use limitations that are in place on the Property or have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the Legal Liability Protections (LLP)
- Relationship of the purchase price to fair market value of the Property if it were not contaminated
- Commonly known or reasonably ascertainable information about the Property
- The degree or obviousness of the presence or likely presence of contamination at the Property, and the ability to detect this contamination by appropriate investigation.

The following information was requested from the User, City of Ontario.

### *3.2.1 Environmental Cleanup Liens*

The User provided no information regarding environmental cleanup liens or title records.

### *3.2.2 Activity and Use Limitations*

The User did not have any information indicating they were aware of any AULs.

### *3.2.3 Specialized Knowledge or Experience*

The User did not have any information indicating they had specialized knowledge or experience related to the Subject Property or nearby property.

### *3.2.4 Reason for Significantly Lower Purchase Price*

Converse has no information regarding the purchase price of the Subject Property or comparable properties. The User has not indicated to Converse that there is any conclusion that there was a lower purchase price because of known or suspected contamination at the Subject Property.

### *3.2.5 Commonly Known or Reasonably Ascertainable Information*

The User did not have any information about past uses, specific chemicals at the Subject Property, past spills, environmental cleanup or other reasonably ascertainable information regarding the Subject Property.

### *3.2.6 Obviousness of Contamination*

The User did not have any information based on their knowledge or experience that would be obvious indicators of contamination on the Subject Property.

Unless specifically stated otherwise in the Scope of Services, the purpose of this Phase I ESA was to qualify for the landowner liability protections to CERCLA Liability as described in ASTM E1527-21.

Business risk unrelated to the CERCLA innocent landowners defense are only assessed as specifically agreed in the Scope of Services and discussed in Section 11.0, Additional Non-Scope Services, of this report.

## **3.3 Continuing Obligations**

In order to assert a LLP, the User must satisfy a number of statutory requirements that are generally referred to as Continuing Obligations, which are outside the Scope of Services of the Phase I ESA. Examples of Continuing Obligations include providing legally required notices, stopping continuing releases and complying with land use restrictions. Failure to comply with these and other statutory post-acquisition requirements will jeopardize liability protection.

It is the responsibility of the User to comply with the Continuing Obligations requirements of ASTM E1527-21 and AAI. Anyone seeking LLP protections should take independent action beyond this Phase I ESA to perfect their position.

## 4.0 Owner Provided Information

---

The ASTM E1527-21 specifies that the Property owner and the Key Site Manager provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded AULs
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

Converse was not provided with Subject Property owner contact information. No interview was completed.

## 5.0 Records Review

### 5.1 Physical Setting

Item	Comments
Physical Setting:	The Subject Property is located approximately 764 feet above mean sea level with surface topography sloping towards the south (United States Geological Survey [USGS] Topographic Map, Guasti and Corona North, California, 2018).
Geology:	The Subject Property is underlain by alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast (Division of Mines and Geology, Geologic Map of California, 2010).
Groundwater:	Information regarding regional groundwater was researched on the RWQCB Geotracker website. According to the website, the closest site to the Subject Property with recent groundwater information is located approximately 1.0-mile northeast of the Subject Property. According to an October 2001 closure report for the site, groundwater is located at depths greater than 150-feet beneath ground surface (bgs) and flows in a southwesterly direction.
Potable Water Supply:	Potable water is supplied by the Ontario Municipal Utilities Company.

### 5.2 Historical Review

#### 5.2.1 Aerial Photograph and Map Review

Available historical aerial photographs and maps, which were provided by Environmental Data Resources (EDR), were reviewed. A summary of the review is provided in the following table. Copies of the aerial photographs and maps are provided in Appendix D.

Historical Summary			
Resource and Year	Property	Adjoining Properties	General Vicinity
1897, 1900, and 1903 Topographic Maps	The Subject Property is undeveloped.	The adjoining properties are primarily undeveloped.	The general vicinity is primarily undeveloped with sporadic residential developments.
1938 Aerial Photograph	The Subject Property is undeveloped.	The adjoining properties are a mix of	The general vicinity consists of undeveloped land,

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>
1941 and 1944 Topographic Maps		undeveloped land and agricultural uses.	agricultural uses, and sporadic residential developments.
1948 Aerial Photograph  1949 Topographic Map  1953 Aerial Photograph  1966 Aerial Photograph and Topographic Map	The western portion of the Subject Property is developed with a single-family residence. The remainder of the Subject Property appears vacant.	The adjoining properties to the north and south appear developed with residential dwellings. The northeastern, eastern, and southeastern adjoining properties appear developed as part of a flood control channel. The northwestern, western, and southwestern adjoining properties are developed as part of a larger livestock farming and agricultural development and with a dairy and agricultural fields by 1966.	The general vicinity is a mix of undeveloped land, agricultural uses, livestock farming, and residential developments.
1975 Aerial Photograph  1976 and 1981 Topographic Maps	There are no significant identifiable changes in uses on the Subject Property.	The northern adjoining property appears developed for livestock farming. The southern adjoining property appears developed for agricultural use. There are no significant identifiable changes to the remaining adjoining properties.	The general vicinity consists of undeveloped land, agricultural uses, dairy/livestock farming operations, and residential uses.
1985, 1989, and	The residence in the	The southern adjoining	The general vicinity consists

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>

The eastern portion of the Subject Property appears developed for livestock farming.	property is developed with agricultural fields and livestock farming. There are no significant identifiable changes in uses on the adjoining property.	of agricultural uses, dairy/livestock farming operations, and residential and commercial uses.
2002 and 2006 Aerial Photographs	The residence remains in the western portion of the Subject Property. The western portion of the Subject Property is further occupied by truck and trailer parking. The eastern portion of the Subject Property is no longer occupied for livestock farming, but is now developed with agricultural plots.	The northern adjoining property appears developed primarily for truck and RV parking. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity consists of agricultural uses, dairy/livestock farming operations, and residential and commercial uses.
2009 Aerial Photograph	The agricultural plots in the eastern portion of the Subject Property are no longer visible.	There are no significant identifiable changes on the adjoining properties.	The general vicinity consists of agricultural uses, dairy/livestock farming operations, and residential and commercial uses.
2012 Aerial Photograph and Topographic Map  2015 Topographic Map  2016 Aerial Photograph  2018 Topographic Map	The Subject Property appears primarily developed for truck and trailer parking.	The livestock pens on the southern adjoining property remain in the southern portion of the site, however, no livestock are visible. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity consists of agricultural uses, dairy/livestock farming operations, and residential and commercial uses.

Resource and Year	Property	Adjoining Properties	General Vicinity
2020 Aerial Photograph	There are no significant identifiable changes in uses on the Subject Property.	The livestock pens are no longer present in the southern portion of the southern adjoining property. That area of the site is now developed with a possible nursery. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity consists of agricultural uses, dairy/livestock farming operations, and residential and commercial uses.

### 5.2.2 Building Permit Review

Available building permits were requested from the City of Ontario, Department of Building & Safety. No permit records pertaining to the Subject Property were on file with the Department of Building and Safety.

### 5.2.3 City Directories

A city directory search was completed on the Property by EDR. The complete city directory is provided in Appendix D, Historical Research.

The Subject Property was identified under residential listings from as early as 1970 to 2020.

The northern adjoining property, located at 13115 Ontario Avenue, was identified under residential listings from as early as 1956 to 2020.

The southern adjoining property, located at 13213 Ontario Avenue, was identified under a residential listing as early as 1980, by Golden West Farms and residential listings from as early as 1985 to 2017, and by a residential listing in 2020.

The remaining adjoining properties were not identified in the City Directory report.

### 5.2.4 Data Failure

Historical information regarding the Subject Property indicated the Subject Property was undeveloped land as early as 1897. Therefore, no historical data failure occurred during this assessment.

### *5.2.5 Summary of Historical Property Use*

The Subject Property was undeveloped from as early as 1897 to at least 1944. By 1948, a residential structure was constructed in the western portion of the Subject Property while the eastern portion of the Subject Property remained undeveloped. From as early as 1985 to 1994, the eastern portion of the Subject Property was developed for livestock farming. By 2002, the western residential portion of the Subject Property was further occupied for truck and trailer parking, and the eastern portion was developed with agricultural plots. By 2009, the agricultural plots were no longer present in the eastern portion of the Subject Property, and by 2012 the Subject Property appeared primarily utilized for truck and trailer parking.

### *5.2.6 Summary of Past Uses of Adjoining Properties*

The adjoining properties were typically undeveloped as early as 1897. The properties were further developed for agricultural uses beginning in the 1930s and continuing through the 1950s. By 1948, the northeastern, eastern, and southeastern adjoining properties were developed with the existing flood control channel, and the northern adjoining property was developed for agricultural uses. The northwestern/western/southwestern adjoining property was developed with the existing dairy farm, in addition to the agricultural uses already on site, by 1966. The southern adjoining property was developed for agricultural uses by 1975, with the addition of livestock farming uses by 1985. From as early as 1985 to 2002, the northern adjoining property appeared to be developed for livestock farming. From 2009 through the present, the northern adjoining property has been developed for truck, trailer and recreation vehicle parking. The livestock farming on the southern adjoining property appeared to have ceased by 2012, and that portion of the site was developed with a nursery by 2020.

### *5.2.7 Summary of Past Uses of the Surrounding Area*

The surrounding area was generally undeveloped with sporadic residential developments in 1897. The area was further developed for agricultural uses in the 1930s, with additional livestock farming and dairy operations by the 1960s. The area was further developed with residential neighborhoods, and commercial developments beginning in the 1970s and continuing through the 2000s.

## **5.3 Results of Environmental Records Sources Review**

An EDR report of Standard Environmental Record Sources (Records) was prepared specifically for the Property. The search included queries to the following databases for cases within specified ASTM search distances. A copy of the database report is provided in Appendix E.

### *5.3.1 Property Listings*

The Subject Property was not identified on the databases in the EDR report.

### 5.3.2 Adjoining Properties

The following adjoining properties were identified in the EDR report:

<b>Adjoining Properties</b>	
<b>Site Name:</b>	EDMUNDO SANCHEZ
<b>Databases:</b>	HIST UST
<b>Address:</b>	13115 S ONTARIO AVE
<b>Distance:</b>	164
<b>Direction:</b>	North-Northeast
<b>Elevation:</b>	Higher
<b>Comments:</b>	The listing appears related to the 550-gallon diesel fuel UST. The listing identified that the UST was installed in 1974. No additional pertinent information was provided.

<b>Site Name:</b>	AG-SANCHEZ, EDMUNDO
<b>Databases:</b>	UST
<b>Address:</b>	13115 S ONTARIO AVE
<b>Distance:</b>	164
<b>Direction:</b>	North-Northeast
<b>Elevation:</b>	Higher
<b>Comments:</b>	The listing appears related to the 550-gallon diesel fuel UST. No additional pertinent information was provided.

<b>Site Name:</b>	EDMUNDO SANCHEZ
<b>Databases:</b>	CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST
<b>Address:</b>	13115 ONTARIO AVE
<b>Distance:</b>	592
<b>Direction:</b>	North-Northwest
<b>Elevation:</b>	Higher
<b>Comments:</b>	The listings relate to the operation of a 550-gallon diesel fuel UST at the site.

<b>Site Name:</b>	LEGEND DAIRY FARMS #1
<b>Databases:</b>	San Bern. Co. Permit, HWTS, CERS
<b>Address:</b>	9155 E RIVERSIDE DR
<b>Distance:</b>	1218
<b>Direction:</b>	West-Northwest
<b>Elevation:</b>	Higher

<b>Comments:</b>	The site is located west of the Subject Property and is listed in the databases as a hazardous materials handler and generator. Violations issued at the site include failure to properly manage empty containers greater than 5 gallons, and failure to electronically submit hazardous materials inventory. The site is listed as a dairy.
------------------	--

### 5.3.3 Other Off-site Locations of Concern

Other off-site locations of concern identified by EDR within a maximum one-mile radius from the Subject Property included registered AST sites, CPS-SLIC sites, hazardous waste generators, permitted hazardous materials handlers, and Envirostor/Sch sites.

The potential for environmental concern to the Subject Property from these off-site locations appears to be low due to one or more of the following: type of regulatory listing; type of resource (soil) affected; distance from the Subject Property; status of the case; and/or potential responsible parties have been identified.

### 5.3.4 Orphan Listings

The EDR database report identified four (4) orphan listing only by street names. These street names were found in the general vicinity of the Subject Property; however, these orphan sites appeared to have a low potential for environmental impact to the Subject Property due to the distance from the Subject Property and/or type of listing.

## 5.4 Additional Environmental Record Sources

Information requests pertaining to the Subject Property were submitted to the following regulatory agencies.

### Federal Agencies

Source	Comments
U.S. Department of Transportation, Pipeline and Hazardous Material Safety Administration (PHMSA)	The PHMSA online mapping system for gas transmission pipelines and hazardous liquid pipelines on the Subject Property or adjacent properties was reviewed ( <a href="https://www.npms.phmsa.dot.gov/PublicViewer/">https://www.npms.phmsa.dot.gov/PublicViewer/</a> ). No pipelines were identified on or adjoining the Subject Property.

### State Agencies

Source	Comments
California Environmental	No information regarding the Subject Property was on file with DTSC. The Envirostor website ( <a href="http://www.envirostor.dtsc.ca.gov/public/">http://www.envirostor.dtsc.ca.gov/public/</a> ) was

Source	Comments
Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC)	reviewed for information, and the Subject Property was not listed in the database.
Cal/EPA, Regional Water Quality Control Board (RWQCB)	<p>The RWQCB had no records on file regarding the Subject Property. The Geotracker website (<a href="http://geotracker.waterboards.ca.gov/">http://geotracker.waterboards.ca.gov/</a>) was reviewed for information, and the Subject Property was not listed in the database.</p> <p>Converse noted in the database that there is in area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area, the plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. The Plume was first identified in 1986 when samples from several wells south of the 60 Freeway had detectable concentrations of volatile organic compounds (VOCs), with TCE detected at concentrations up to 75 micrograms per liter (ug/L). Subsequently, the RWQCB initiated an investigation to determine the extent and potential sources of the groundwater contamination in the area. Concentrations of TCE greater than the maximum contaminant level (MCL) of 5 ug/L were detected in samples from 92 of 167 private wells sampled between 1987 and 2005.</p> <p>Since 2005, the RWQCB, Chino Basin Watermaster (CBWM), the City of Ontario and others have collected and analyzed groundwater samples from existing private and municipal wells throughout the footprint of the Plume. Samples collected within the footprint of the Plume between 2007 and 2019 indicated that TCE concentrations were generally decreasing in the western area of the Plume and increasing in the southern area. These trends are associated with a change in the direction of groundwater flow in the basin since 2000. Between 1960 and 2000, the dominant flow direction was to the southwest. Since 2000, however, the groundwater flow direction has been primarily to the south and has been influenced by both the declining agricultural production and the addition of groundwater extraction associated with the operation of the CDA desalter wells located in the southern part of the Chino Basin.</p>

Source	Comments
	Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the threshold 5 ug/l.
California Department of Conservation, California Department of Conservation (DOC), Geologic Energy Management Division (CalGEM)	Converse reviewed the DOC CalGEM Online Well Finder ( <a href="https://www.conservation.ca.gov/calgem/Pages/Wellfinder.aspx">https://www.conservation.ca.gov/calgem/Pages/Wellfinder.aspx</a> ). According to the website, no oil or gas wells are located on the Subject Property.

### Local Agencies

Source	Comments
South Coast Air Quality Management District (SCAQMD)	There were no agency records pertaining to the Subject Property on file with this agency.
San Bernardino County Fire Deptment, Certified Unified Program Agency (CUPA)	<p>There were no agency records pertaining to the Subject Property on file with this agency.</p> <p>The following records pertaining to the northern adjoining property were reviewed:</p> <p>February 17, 2000 - Underground Storage Tank Inspection Report. According to the report, the facility was in violation for operating one (1) 550-gallon tank which was unlawfully closed or abandoned which was confirmed in a letter dated March 4, 1987 by the site owner Edmundo Sanchez. The inspection report required the site owner to apply for proper permits and complete soil sampling.</p> <p>August 16, 2000 - Application for Removal of Underground Storage Tank. The application is for the removal of one (1) 550-gallon UST that was reportedly used to store gasoline between 1975 and 1979, and diesel between 1979 and 1987. The UST was reportedly located in the west-central portion of the site.</p> <p>August 28, 2000 - Analytical report for soil. According to the report, four</p>

Source	Comments
	<p>(4) samples were collected. Samples were collected at apparent depths of 10, 15, 20, and 25-feet beneath ground surface (bgs). No reported concentrations of gasoline or diesel were reported in samples. Detection limits were identified as 10 milligrams per kilogram (mg/kg).</p> <p>October 16, 2000 - Removal of One Underground Storage Tank at 13115 Ontario Avenue, Ontario Letter. According to the letter, the Department received sample results and/or closure submitted by Advanced Environmental, dated August 31, 2000. The Department reviewed the reports and concluded that "the extent of contamination or lack thereof would indicate that no further investigation is warranted at this time." The letter noted that "this cannot be construed as a release of liability for the site or declaration that the site is free from contamination. Should further projects or environmental investigations reveal additional contaminants (at the) site you will be responsible and held liable for the investigation and remedial actions".</p>
Methane	<p>According to the CalRecycle SWIS website (<a href="https://www2.calrecycle.ca.gov/SolidWaste/Site/Search">https://www2.calrecycle.ca.gov/SolidWaste/Site/Search</a>), a solid waste site is located approximately 0.3-miles south/southwest of the Subject Property at 13434 South Ontario Avenue.</p> <p>The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."</p>

## 6.0 Property Reconnaissance

### 6.1 Methodology

On October 18, 2023 Converse visited the Subject Property to evaluate present use and to identify observable environmental conditions at the Subject Property. Converse was not provided access to the Subject Property, our methodology involved visual observation of the Subject Property from the public right-of-way (Ontario Avenue) along the western boundary of the Subject Property.

A field-generated map is provided in Appendix B. Pertinent Property photographs are provided in Appendix C.

### 6.2 Limiting Conditions

Converse's findings are based on the Subject Property conditions observed on Wednesday, October 18, 2023.

Converse was not provided access to the Subject Property. Observation of the Subject Property was limited to viewing from Ontario Avenue, along the western boundary of the Subject Property.

### 6.3 Interior Observations of Property

Converse was not provided access to the Subject Property and therefore was unable to visually observe the interiors of the onsite buildings.

### 6.4 Exterior Observations of Property

Converse was not provided access to the Subject Property. Limited observations of the Subject Property were made from public right-of-way area on Ontario Avenue.

Exterior Observations		
Item or Condition	Observed Evidence?	Comments
Hazardous Substances & Petroleum Products:	No	
Storage Tanks & Related Equipment:	No	
Odors:	No	
Standing Surface Water or Other Pools of Liquid:	No	

Item or Condition	Observed Evidence?	Comments
Drums & Other Containers of Hazardous Substances, Petroleum Products, or Other Unidentified Contents:	No	
Transformers or Equipment containing Polychlorinated Biphenyls (PCBs):	No	
Pits, Ponds, or Lagoons:	No	
Stained Soil or Pavement:	No	
Stressed Vegetation (other than from insufficient water):	No	
Evidence of Mounds, Depressions or Filled or Graded Areas Suggesting Trash or Other Solid Waste Disposal:	No	
Waste Water or any discharge (including storm water) into a Drain, Ditch, or Stream on or Adjacent to the Property:	No	
Wells (active, inactive, or abandoned):	No	
Septic Systems or Cesspools:	No	
Prior Structures:	No	
Roads, Tracks, Railroad Tracks or Spurs:	Yes	The Subject Property fronts onto Ontario Avenue to the west.
Suspect Asbestos containing Building Materials released into the environment	No	
Suspect Lead-based Paint released into the environment	No	

Item or Condition	Observed Evidence?	Comments
Suspect PCB Caulk, Paint or Ballasts released into the environment	No	

In addition to the above, the following observations were made:

- One (1) residential structure and one (1) detached residential garage were observed in the western portion of the Subject Property.

### **6.5 Current Uses of Adjoining Properties**

Based on our research and observations during our Subject Property visit, the Subject Property is bordered by the following:

Adjoining Property Use	
Direction	Current Development
North	Truck, trailer, and RV storage yard (13115 Ontario Avenue).
Northeast	Flood control channel followed by residential neighborhood.
East	Flood control channel followed by residential neighborhood.
Southeast	Flood control channel followed by residential neighborhood.
South	Mixed-use residential property with truck parking and former stables.
Southwest	Ontario Avenue followed by dairy and agricultural fields (9155 East Riverside Drive).
West	Ontario Avenue followed by dairy and agricultural fields (9155 East Riverside Drive).
Northwest	Ontario Avenue followed by dairy and agricultural fields (9155 East Riverside Drive).

### **6.6 Current Uses of Surrounding Area**

Based on our research and observations during our Subject Property visit, the surrounding area of the Subject Property consists of agricultural fields, dairy farms, residential and commercial businesses.

## 7.0 Interviews

---

During the interviews, the owners and occupants were asked if they had any available documents that would be helpful. The documents that were requested are detailed in Section 4.0 of this report:

<b>Interview:</b>	<b>Comments:</b>
Property Owner:	Converse was not provided contact information for the Subject Property owner. No owner interview was conducted.
Tenant/ Occupant:	Converse was not provided access to the Subject Property. No tenant/occupant interviews were conducted.
State or Local Government Officials:	Other than the information provided in Section 5.4, no other information was provided by a government official.
Owners and Occupants of Neighboring Sites:	No interviews of owners or occupants of neighboring sites were conducted.

## 8.0 Findings & Opinions

---

A cursory summary of findings is provided below. However, details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

The Subject Property is owned by Raymundo Flores, and is occupied by a residence and utilized for truck and trailer parking.

The Subject Property was undeveloped from as early as 1897 to at least 1944. By 1948, a residential structure was constructed in the western portion of the Subject Property while the eastern portion of the Subject Property remained undeveloped. From as early as 1985 to 1994, the eastern portion of the Subject Property was developed for livestock farming. By 2002, the western residential portion of the Subject Property was further occupied for truck and trailer parking, and the eastern portion was developed with agricultural plots. By 2009, the agricultural plots were no longer present in the eastern portion of the Subject Property, and by 2012 the Subject Property appeared primarily utilized for truck and trailer parking.

According to the RWQCB Geotracker database there is an area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area. The plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the regulatory threshold 5 ug/l.

The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."

The Subject Property was not identified in the regulatory database report.

The following adjoining properties were identified in the regulatory database report:

- 13115 Ontario Avenue - The site is located north of the Subject Property and was identified in the CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST, and UST databases. The listings appear related to the operation of the 550-gallon diesel fuel UST.
- 9155 East Riverside Drive - The site is located west of the Subject Property and was listed in the San Bern. Co. Permit, HWTS, and CERS databases. The listings indicate the site as a hazardous materials handler and generator. Violations issued at the site include failure to properly manage empty containers greater than 5 gallons, and failure to electronically submit hazardous materials inventory. The site is listed as a dairy.

According to records provided by the County of San Bernardino Fire Department for the northern adjoining property located at 13115 Ontario Avenue, a 550-gallon former fuel tank containing gasoline from 1975 and 1979, and diesel between 1979 and 1987, was reportedly unlawfully removed in 1984. Records indicated that permits for removal were not obtained at the time of removal. Violations pertaining to the unlawful abandonment were issued and soil sampling in the vicinity of the former UST was required. According to records, soil samples were collected in August 2000 from depths of 10, 15, 20, and 25-feet bgs at the former UST location. All samples were analyzed for gasoline and diesel. No reported concentrations of gasoline or diesel were reported in samples at levels above detection limits. Based on the findings, the San Bernardino County Fire Department, issued a concurrence that no additional assessment appeared warranted.

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural use (agricultural plots)
- The historical livestock farming
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** The following HRECs pertaining to the Subject Property were identified during this assessment.

- The case-closed designation related to the former operation of one (1) 550-gallon fuel UST on the northern adjoining property.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

## 9.0 Conclusions & Recommendations

---

Converse has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-21 for 13165 Ontario Avenue, Ontario, San Bernardino County, California. Any exceptions to, or deletions from, this practice are described in the Limitations and Exceptions of Assessment section of this report. This assessment has revealed the following *recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps* in connection with the Subject Property except for the following:

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural use (agricultural plots)
- The historical livestock farming
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECS pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** The following HRECs pertaining to the Subject Property were identified during this assessment.

- The case-closed designation related to the former operation of one (1) 550-gallon fuel UST on the northern adjoining property.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

Based on the findings, Converse recommends assessment of shallow soils across the eastern portion of the Subject Property for the presence of pesticides and metals historically used in agricultural operations. In addition, Converse recommends methane screening in the eastern portion of the Subject Property historically occupied by possible livestock farming operations.

No assessment related to the Archibald plume is deemed necessary based on the depth to groundwater and reported concentrations of TCE in the vicinity of the Subject Property are below the maximum contaminant level (MCL).

Any future redevelopment of the Subject Property should be in accordance with the City of Ontario Methane Ordinance.

It is recommended that the Site Reconnaissance be completed at the time of the Phase II Environmental Site Assessment.

## 10.0 Deviations & Limitations

---

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property, limiting observation of the Subject Property to the public right-of-way (Ontario Avenue).
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

## 11.0 Additional Non-Scope Services

---

There are environmental issues outside the scope of the ASTM E1527-21 that can be assessed in connection with a commercial real estate transaction. These are dealt with as non-scope considerations since they do not typically present a Superfund Liability. The specific level of inquiry (if any) is defined in the Proposal which contains a Scope of Work. These non-scope services are very client specific and not covered by the ASTM standard. They are frequently related to the business environmental risk which is defined in the standard as "risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate".

No non-scope issues were addressed during this assessment.

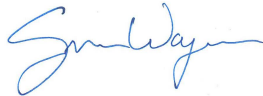

## 12.0 Signature of Environmental Professional

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in A§312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

### **Norman S. Eke**

Senior Vice President

B.A., Liberal Studies, Environmental Studies Emphasis, University of California, Santa Barbara, 1988.

Cal/OSHA Certified Asbestos Consultant, #96-2093

NIOSH 582 Equivalent Training

Senior Vice President and Managing Officer of Converse's California Environmental offices. Mr. Eke has served as the Principal-in-Charge and Contract Administrator to deliver services to our public agency and private clients. Mr. Eke has 33 years of experience in the fields of Environmental Due Diligence including Phase I and Phase II Environmental Site Assessments, Asbestos surveys/specifications/abatement monitoring, Preliminary Endangerment Assessments and associated Supplemental Site Investigations and Removal Action Work Plans/Implementation, various forms of Remediation, Human Health Risk Assessment and Indoor Air Quality. Mr. Eke is a former Subcommittee Chairman for E.50-02 Real Assessment and Management of the ASTM E.50 Committee on Environmental Assessment, Risk Management, Corrective Action, which includes Phase I ESA standards.

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, and Report Review.

### **Spencer Wagner**

Senior Staff Environmental Scientist

B.A., Environmental Science and Policy, California State University, Long Beach, 2006

B.A., Geography, California State University, Long Beach, 2006

Certified Wood Destroying Organism (WDO) Inspector

Mr. Wagner has over 17 years' experience conducting Phase I and II Environmental Site Assessments throughout California. Mr. Wagner has completed Phase I ESAs on undeveloped land, residential properties, commercial/retail facilities, industrial facilities, and school sites. His Phase II ESA experience includes collection of soil matrix, soil vapor, indoor air and groundwater samples. Phase II projects worked on have included residential properties, commercial warehousing sites, school sites, dry cleaning facilities, automotive service sites, metal plating facilities and multi-tenant commercial properties

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, Historical Research, Regulatory Agency Interaction, Property Reconnaissance, Interviews, and Report Generation.

## 15.0 List of Acronyms

---

The following is a list of acronyms that may have been noted in the report. This is not an all inclusive list and may include acronyms that are not found in your report but are commonly utilized in environmental assessments. Additional acronyms pertaining to regulatory agency documents/listings can be found in the regulatory database report, which is provided as an appendix to this report.

**AAI** - All Appropriate Inquiries

**ACM** - Asbestos-containing Material

**APN** - Assessor's Parcel Number

**APCD** - Air Pollution Control District

**AQMD** - Air Quality Management District

**AST** - Aboveground Storage Tank

**ASTM** - American Society of Testing and Materials

**AUL** - Activity Use Limitation

**BER** - Business Environmental Risk

**BTEX** - Benzene, Toluene, Ethylbenzene, and Xylenes

**Cal/EPA** - California Environmental Protection Agency

**CalGEM** - (California Department of Conservation), Geologic Energy Management Division

**CERCLA** - Comprehensive Environmental Response, Compensation and Liability Act

**CFR** - Code of Federal Regulations

**CREC** - Controlled Recognized Environmental Condition Recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

**CUPA** - Certified Unified Protection Agencies

**de minimis condition** - A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a REC nor a CREC.

**DOC** - (California) Department of Conservation

**DPW** - (Los Angeles County) Department of Public Works

**DTSC** - Department of Toxic Substances Control

**DWP** - (City of Los Angeles) Department of Water and Power

**EDR** - Environmental Data Resources

**EHD** - Environmental Health Department

**EP** - Environmental Professional

**EPA** - United States Environmental Protection Agency

**ESA** - Environmental Site Assessment

**ERIS** - Environmental Risk Information Systems

**(x)FD** - (City/County)Fire Department

**HMS** - Hazardous Material Site

**HREC** - Historic Recognized Environmental Condition: A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

**HVAC** - Heating, Ventilation, Air Conditioning

**IAQ** - Indoor Air Quality

**LACSD** -Los Angeles County Sanitation Districts

**LBP** - Lead-based Paint

**LLP** - Landowner Liability Protections

**LQG** - Large Quantity Generator

**LUST** - Leaking Underground Storage Tank

**mg/kg** - milligram per kilogram

**mg/L** - milligram per Liter

**MSL** - Mean Sea Level

**MTBE** - Methyl Tertiary Butyl Ether

**ND** - None Detected

**NFA** - No Further Action

**NOV** - Notice of Violation

**PEC** - Potential Environmental Concern

**PFAS** - Perfluoroalkyl and Polyfluoroalkyl Substances

**PHMSA** - US Department of Transportation, Pipeline and Hazardous Materials Safety Administration

**PCB** - Polychlorinated biphenyls

**PCE** - Perchloroethylene or Tetrachloroethylene

**pCi/L** - picoCuries per Liter

**ppb** - parts per billion

**ppm** - parts per million

**PRP** - Potential Responsible Party

**RCRA** - Resources Conservation and Recovery Act

**REC** - Recognized Environmental Condition; (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

**RP** - Responsible Party

**RWQCB** - Regional Water Quality Control Board

**SCAQMD** - South Coast Air Quality Management District

**SDS** - Safety Data Sheets

**SQG** - Small Quantity Generator

**SVOC** - Semi-volatile Organic Compound

**TCE** - Trichloroethylene or Trichloroethene

**TPH** Total Petroleum Hydrocarbons

**µg/L** - micrograms per Liter

**USGS** - United States Geological Survey

**UST** - Underground Storage Tank

**VCP** - Voluntary Cleanup Program

**VOCs** - Volatile Organic Compounds

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Converse Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

**Certification #** C132-4A04-B528  
**PO #** NA  
**Project** 19-16-123-58

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: C132-4A04-B528

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Converse Consultants (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal NPL (Superfund) sites***

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

### ***Lists of state and tribal leaking storage tanks***

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Lists of state and tribal registered storage tanks***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

### ***Lists of state and tribal voluntary cleanup sites***

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 04/24/2023 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

#### ***Local Lists of Registered Storage Tanks***

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: OBSERVATION: Observed empty 55-gallon drums in a containment structure and empty tanks throughout the facility which have been stored on site for an unknown amount of time. The contents of the tanks and containers were unknown and they were not labeled at the time of the inspection. CORRECTIVE ACTION: Submit a copy of a disposal receipt showing the removal of the empty tanks and containers or a signed statement as to how they have been sold, used, or otherwise managed.

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 01/09/2023. OBSERVATION: Hazardous materials were observed on site at the time of the inspection that are not listed in the most current CERS inventory or are listed in lesser quantities. CORRECTIVE ACTION: Submit a signed statement that an updated inventory has been submitted into CERS.

Agency Contact: JOHN VAN VEEN  
Agency Telephone: Not reported  
Agency Type: Private  
SIC Code: 241  
SIC Code 2: Not reported  
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).  
Primary Waste: STORMS  
Waste Type2: N  
Waste2: Stormwater Runoff  
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).  
Secondary Waste: Solid Wastes  
Secondary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: No reclamation requirements associated with this facility.  
POTW: The facility is not a POTW.  
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

Telephone 206-553-8665

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/22/2023

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2023

Last EDR Contact: 06/23/2023  
Next Scheduled EDR Contact: 10/09/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/22/2023

Next Scheduled EDR Contact: 10/23/2023  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: 800-424-9346

	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023

	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/25/2023	Source: Department of the Navy
Date Data Arrived at EDR: 05/31/2023	Telephone: 843-820-7326
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 54	Next Scheduled EDR Contact: 11/20/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/12/2023

Date Data Arrived at EDR: 06/20/2023

Date Made Active in Reports: 08/14/2023

Number of Days to Update: 55

Last EDR Contact: 07/25/2023

Next Scheduled EDR Contact: 11/06/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 04/24/2023

Date Data Arrived at EDR: 04/25/2023

Date Made Active in Reports: 07/13/2023

Number of Days to Update: 79

	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 04/06/2023	Source: Environmental Protection Agency

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 04/24/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 04/25/2023	Telephone: 916-323-3400
Date Made Active in Reports: 07/13/2023	Last EDR Contact: 07/25/2023
Number of Days to Update: 79	Next Scheduled EDR Contact: 11/06/2023
	Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2020	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/30/2022	Telephone: 916-255-6504
Date Made Active in Reports: 02/09/2023	Last EDR Contact: 09/15/2023
Number of Days to Update: 71	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Varies

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364

## CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 04/17/2023	Source: CalEPA
Date Data Arrived at EDR: 04/18/2023	Telephone: 916-323-2514
Date Made Active in Reports: 07/11/2023	Last EDR Contact: 07/18/2023
Number of Days to Update: 84	Next Scheduled EDR Contact: 10/30/2023
	Data Release Frequency: Quarterly

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/22/2023	Source: Drug Enforcement Administration

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000

Number of Days to Update: 88	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 07/20/2023	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 09/01/2023	Telephone: 301-415-7169
Date Made Active in Reports: 09/20/2023	Last EDR Contact: 07/12/2023
Number of Days to Update: 19	Next Scheduled EDR Contact: 10/30/2023
	Data Release Frequency: Quarterly

## COAL ASH DOE: Steam-Electric Plant Operation Data

A listing of power plants that store ash in surface ponds.

Date of Government Version: 12/31/2021	Source: Department of Energy
Date Data Arrived at EDR: 04/14/2023	Telephone: 202-586-8719
Date Made Active in Reports: 07/10/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 87	Next Scheduled EDR Contact: 12/11/2023
	Data Release Frequency: Varies

## COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 01/12/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/05/2019	Telephone: N/A
Date Made Active in Reports: 11/11/2019	Last EDR Contact: 08/28/2023
Number of Days to Update: 251	Next Scheduled EDR Contact: 12/11/2023
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 09/13/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/06/2019	Telephone: 202-566-0517
Date Made Active in Reports: 02/10/2020	Last EDR Contact: 08/03/2023
Number of Days to Update: 96	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Varies

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 09/22/2023
Number of Days to Update: 84	Next Scheduled EDR Contact: 01/08/2024
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

Date of Government Version: 03/30/2023	Source: Environmental Protection Agency

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

## HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

Date of Government Version: 06/29/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/29/2023	Telephone: 916-440-7145

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Date of Government Version: 06/02/2023	Source: State Water Resources Control Board

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

## CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Longitude (West): 117.601113 - 117° 36' 4.01"  
Universal Tranverse Mercator: Zone 11  
UTM X (Meters): 444496.3  
UTM Y (Meters): 3763723.5  
Elevation: 764 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map: 12015973 GUASTI, CA  
Version Date: 2018

Southeast Map: 12014834 CORONA NORTH, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

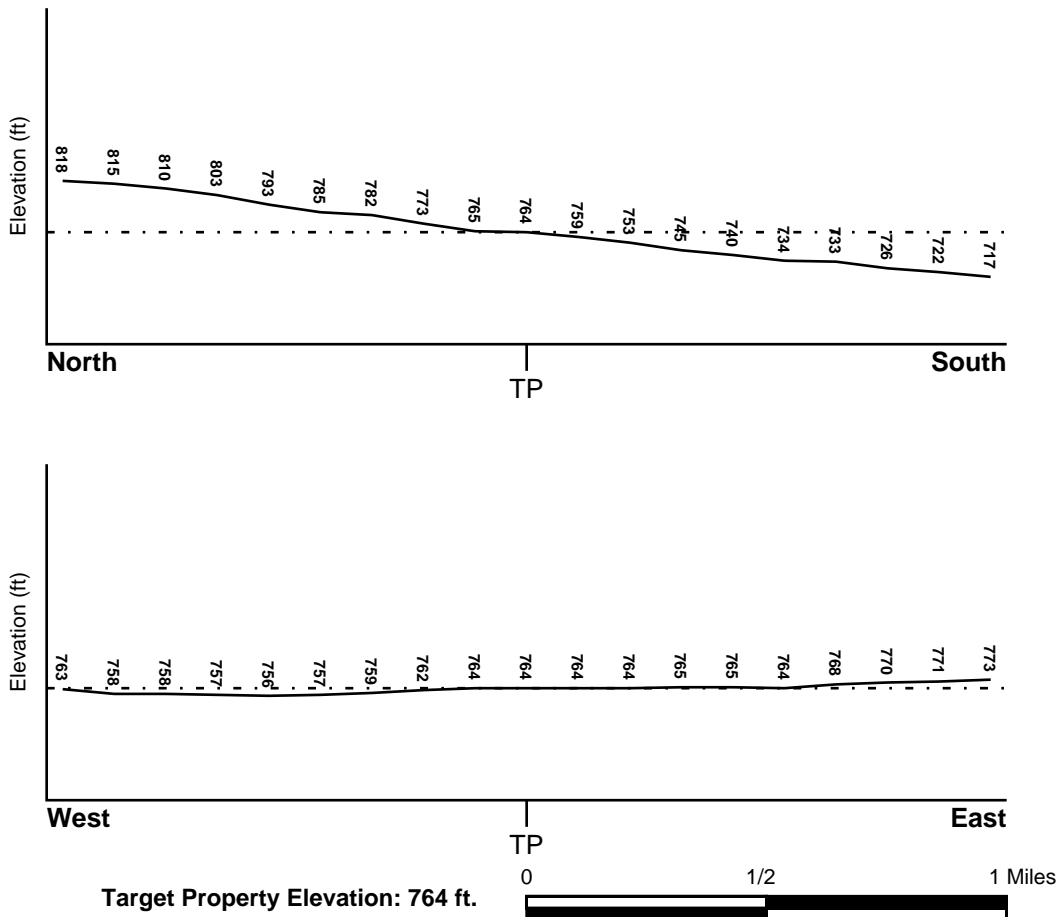

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8638H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8639H	FEMA FIRM Flood data
06071C9375H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### Soil Map ID: 2

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	22 inches	59 inches	stratified loamy sand to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

## GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

CITY OF ONTARIO - RAYMUNDO FLORES  
13165 S ONTARIO AVE  
ONTARIO, CA 91761

### TARGET PROPERTY COORDINATES

Latitude (North): 34.014422 - 34° 0' 51.92"  
Longitude (West): 117.601113 - 117° 36' 4.01"  
Universal Tranverse Mercator: Zone 11  
UTM X (Meters): 444496.3  
UTM Y (Meters): 3763723.5  
Elevation: 764 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map: 12015973 GUASTI, CA  
Version Date: 2018  
  
Southeast Map: 12014834 CORONA NORTH, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

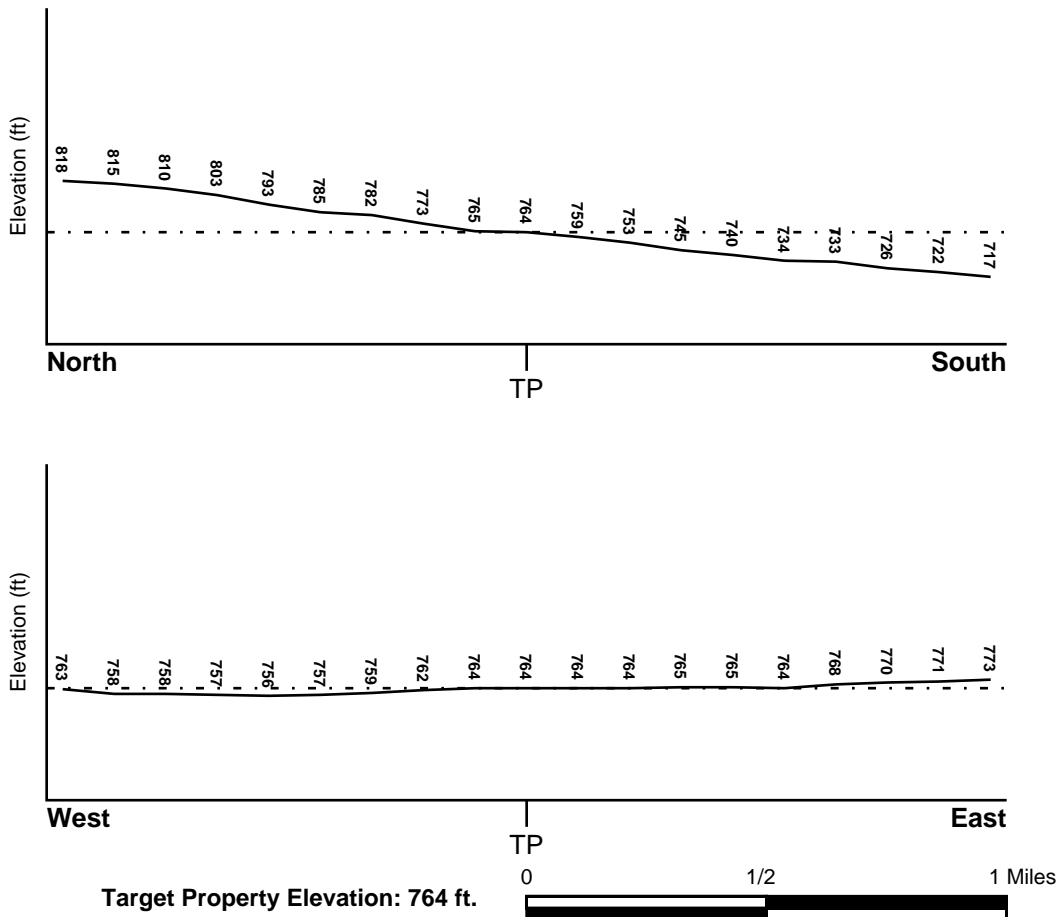

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8638H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8639H	FEMA FIRM Flood data
06071C9375H	FEMA FIRM Flood data

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Status:	Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

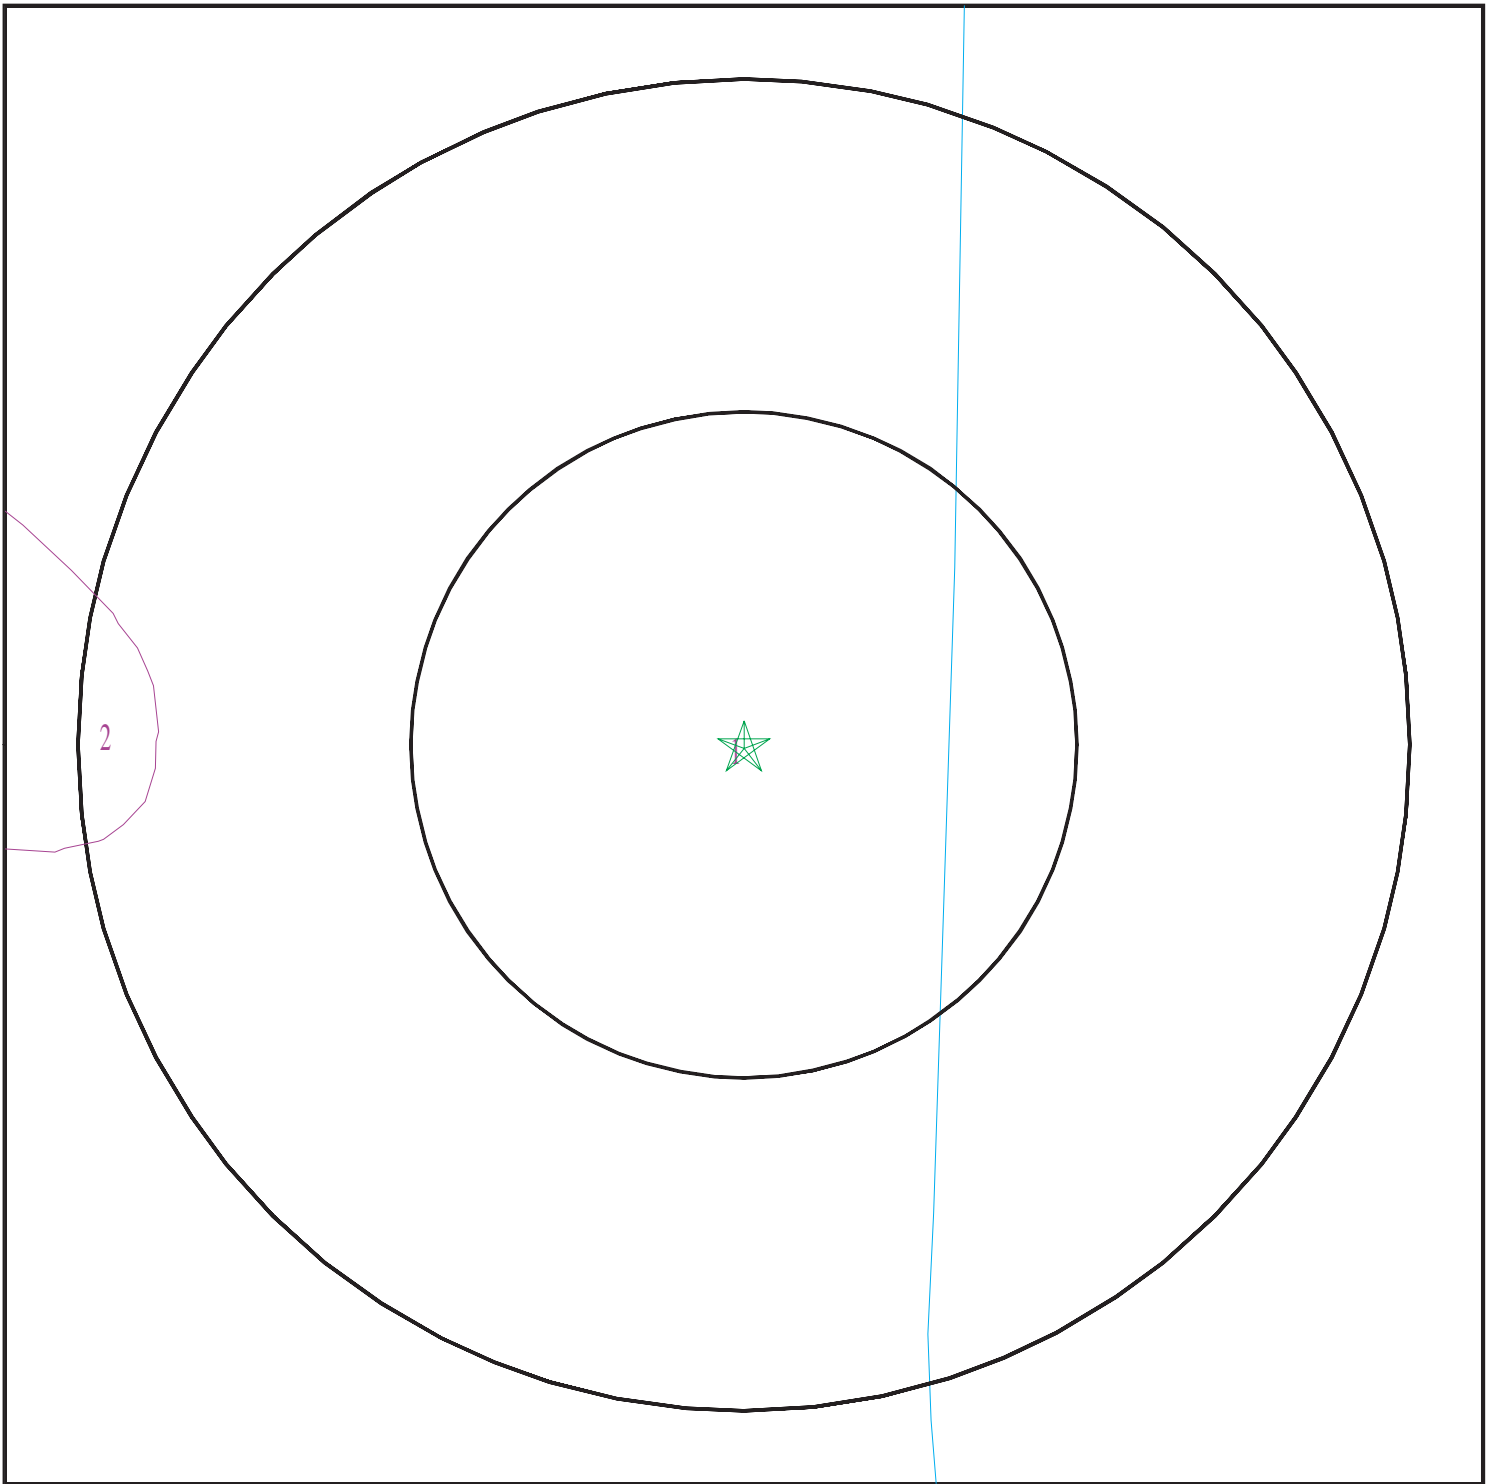

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q ( <i>decoded above as Era, System &amp; Series</i> )

### **GEOLOGIC AGE IDENTIFICATION**

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### Soil Map ID: 2

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	22 inches	59 inches	stratified loamy sand to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

# Instructions for Completing the Underground Storage Tank - Facility Form

## GENERAL INFORMATION

This form was formerly known as SWRCB Form A.

Complete the UST - Facility page for all new permits, permit changes or any facility information changes. This page must be submitted within 30 days of permit or facility information changes, unless approval is required before making any changes. Submit one UST - Facility page per facility, regardless of the number of tanks located at the site.

As part of the application, the tank owner must submit a scaled facility plot plan to the local agency showing the location of the USTs with respect to buildings and landmarks, a description of the tank and piping leak detection monitoring program, and, for tanks containing petroleum, documentation showing compliance with state financial responsibility requirements.

## FORM INSTRUCTIONS

Check the box that indicates the reason for submittal. Only one form per facility is required.

## INSTRUCTIONS

### *I. Facility /Site Information*

1. Enter your Facility ID Number, if known. Otherwise, leave blank. This number is assigned by the CUPA and is the last 6 digits of the facility's establishment number (which appears on the CUPA permit.)
3. Enter the name of the business, as it appears on the Business Activities Form.  
Enter the physical address (no PO Boxes) for the site as it appears on the Business Activities Form. It should be the same address as the location address on business emergency/contingency plan.
401. Enter the nearest cross street (including Suffix - Ave., Ln., St., etc.) The cross street must be one that appears in a Thomas Guide.
402. Check the box that most closely describes the facility owner. NOTE: if the facility owner is a government agency you must enter the name of the agency point of contact in item 406.
403. Check the box that best describes the type of facility at which the UST(s) are located.
404. Enter the number of USTs on site. Do NOT include above ground storage tanks.
405. If the facility or site is located on an Indian Reservation or Indian Trust Lands check the "YES" box.

### *II. Property Owner Identification*

407. Enter the name of the legal owner of the property. If there are more than one property owner, enter the primary owner and list all additional owners on a separate sheet of paper and attach it to this form.
408. Enter the phone number where the primary property owner can be contacted.
- 409 - Enter the mailing address for the primary property owner. If there are more than one property owner, list all additional owner addresses
412. on a separate sheet of paper and attach it to this form.
413. Check the box that best describes the property owner.

### *III. Tank Owner Information*

414. Enter the name of the UST owner. The UST owner is the person or entity that legally owns the UST system, not necessarily the person or entity that operates the UST system.
415. Enter the phone number where the UST system owner can be contacted.
- 416 - Enter the mailing address for the UST owner.
- 419.
420. Check the box that best describes the UST owner.

### *IV. Board of Equalization UST Storage Fee Account Number*

This is the number that the State Board of Equalization (BOE) assigns you in order to assess the fuel you have in your UST(s). You are required to have this number prior to submitting your application. If you do not have a BOE number or if you have any questions regarding the fee or exemptions call BOE at (916) 323-9555.

### *V. Petroleum UST Financial Responsibility*

Check the box with best identifies the mechanism used by the UST owner and/or operator to meet the Federal and State financial responsibility requirements. USTs owned by federal and state agencies and non-petroleum USTs are exempt from this requirement.

### *VI. Legal Notification and Mailing Address*

Check the box(es) that indicates where you want any legal notifications and mailings to be sent.

**IF YOU HAVE ANY QUESTIONS CONTACT YOU DISTRICT INSPECTOR AT (909) 387-3080**

# Instructions for Completing the Underground Storage Tank - Tank Page 1

## GENERAL INFORMATION

- This form was formerly known as SWRCB Form B
- One form must be completed for EACH Underground Storage Tank (UST). For compartmentalized tanks, each compartment is considered a separate tank and requires completion of separate tank pages.
- A monitoring plan must be submitted with your UST pages.

## DEFINITIONS

The following definitions of specific terms from CCR Title 23 and CHSC §25281 are included to assist you in completing this form:

- "Owner" means the owner of an underground storage tank. This is often the property owner.
- "Operator" means any person in control of, or having daily responsibility for, the daily operation of an underground storage tank system.

## FORM INSTRUCTIONS

Check the box that indicates the reason for submittal.

## INSTRUCTIONS

### *Facility /Site Information*

1. Enter your Facility ID Number, if known. Otherwise, leave blank. This number is assigned by the CUPA and is the last 6 digits of the facility's establishment number (which appears on the CUPA permit.)
3. Enter the name of the business, as it appears on the Business Activities Form.  
Enter the physical address (no PO Boxes) for the site as it appears on the Business Activities Form. It should be the same address as the location address on business emergency/contingency plan.
431. Indicate where the UST is located within the site if the UST is not in an immediately obvious location.
432. Enter any additional description or information regarding the UST that may further identify it.

### *I. Tank Description*

432. Enter the identification number of the UST as assigned by the owner. This ID number must correspond to the ID number listed in your Business Emergency / Contingency Plan.
433. Enter the name of the company that made the UST.
434. Indicate whether the UST is compartmentalized or a "split-tank". Each compartment is considered a separate UST. If "YES", submit a separate tank form for each compartment.
435. Indicate the date that the UST was installed.
436. Indicate the fluid capacity of the UST in gallons.
437. Indicate the number of compartments. There must be a separate tank form for each compartment.

### *II. Tank Contents*

439. Check the box that best describes the stored substance.
440. Only if you checked box 1 in item 439. Check the box that best describes the type of petroleum product stored in the UST.
441. Only if you checked a box other than 1 in item 439 - Enter the common chemical name of the substance stored in the UST.
442. Only if you checked a box other than 1 in item 439 - Enter the Chemical Abstract Service (CAS) number for the substance stored in the UST. You may find the CAS number listed in the Material Safety Data Sheet provided by your supplier.

### *III. Tank Construction*

443. Check the box that best describes the type of UST construction.
444. Check the box that best describes the material that the primary (inner) UST is made of.
445. Check the box that best describes the material that the secondary (outer) UST is made of.
446. Check the box that best describes the material used to line the primary (inner) UST, if applicable.
448. Check ALL the boxes that best describe the corrosion protection installed on your UST.
- 450.- Check ALL the boxes that describe the spill protection installed on your UST and enter the type of protection and date  
451. installed.
452. Check ALL the boxes that describe the overfill protection installed on your UST and enter the date installed.

### *IV. Tank Leak Detection*

453. For **SINGLE WALL USTs ONLY** - Check ALL the boxes that describe the leak detection used or installed on your UST.
454. For **DOUBLE WALL USTs ONLY** - Check ALL the boxes that describe the leak detection used or installed on your UST.

### *V. Tank Closure Information*

455. Enter the date that the UST was last used.
456. Enter the estimated quantity of hazardous materials left in the tank.
457. Indicate whether the UST was filled with an inert material at the time of closure in place.

Department of Environmental  
Health Services  
385 N Arrowhead  
San Bernardino, Ca 92415

This underground storage tank with a capacity of 550 gallons is in Agricultural property located on 13115 Ontario Ave. Ontario, Ca 91761. It has not been in use but I would like to use it in the near future.

Sincerely,

A handwritten signature in blue ink that reads "Edmundo Sanchez". The signature is written in a cursive style with a large, stylized initial 'E'.

Edmundo Sanchez

## F A R M   B U R E A U   N E W S L E T T E R

UNDERGROUND STORAGE TANKS. Some farmers may have been billed in error. Environmental Health Services does not have all farm tanks correctly categorized. Send the bill back for correction. EHS still charges a \$20 yearly "permit to operate" on all underground tanks. Tanks within city limits of cities which adopted the original ordinance have \$95.00 on the first and \$45.00 on each additional. Upland, Ontario and Rancho Cucamonga didn't adopt an ordinance and are under state law. Agricultural constituents may want to request their city councils amend ordinances.

FARM BUREAU BYLAW AMENDMENT. October, 1986 the Board of Directors recommended changing the number of directors from twenty-one (21) to twenty-two (22) and scheduling the Women's Committee Chairman as a voting director at large. The number of directors may be changed at the next annual members meeting, Bylaw Amendments, Article XX, Section 2.

PROPOSED NATIVE TREE AND PLANT ORDINANCE. The county wants to preserve unique trees and plant resources in unincorporated areas and on property under private or public ownership. A current ordinance requires a permit to cut native trees of certain diameter and height. The new one adds eucalyptus and others, plus increases the fine schedule for unauthorized removal. A "tree expert" will determine in writing whether a permit should be issued. Farm Bureau is requesting agriculture be exempt from the provisions since the very nature of farming is usually aesthetically pleasing to urban citizens.

CALIFORNIA FARM BUREAU FEDERATION is proceeding with other agricultural groups in the development of a statewide agricultural "designated entity" to receive, process and forward to the Immigration and Naturalization Service legalization applications for illegal aliens under the new immigration law. The "designated entity" would assure a measure of confidentiality and reduce the level of intimidation against aliens. It would also assure that an adequate supply of special agricultural workers become legalized and could create loyalty and goodwill towards employers by workers. A sample format to establish an alien's case for legalization is available to members from Farm Bureau, call (714) 875-5945.

FARM BUREAU'S ANNUAL MEETING IS SCHEDULED MAY 19, 1987, SALVATORE'S, FONTANA.

CALIFORNIA WOMEN FOR AGRICULTURE will have Henry Voss, President, California Farm Bureau Federation, speaking on "How Will Prop. 65 Affect Me" at their Ag Week celebration dinner, March 18, 1987, Holiday Inn, 1200 University Avenue, Riverside. For reservations send your check, \$20 per person to Alice Daniels, 1203 California Street, Redlands, California 92374.

PAUL HARVEY, POPULAR RADIO BROADCASTER, spoke about Farm Bureau on a recent daily radio program. On Farm Bureau policy, Harvey said, "Suddenly I realized I am reading what dues-paying, grassroots Americans have always believed in and died for. In this document I read specific guidelines on family, national security, law enforcement and property rights. I am reading an American Manifesto-what we stand for-and what we will not stand for.

The Farm Bureau has everything it needs--except the numbers. As our nation's farm population dwindles, so has its clout in Washington. Then I realized you don't have to be a practicing farmer to belong to the Farm Bureau and to support its objectives. Imagine what would happen if our Bureau leadership speaking not for 3.3 million--but for 50 million Americans--could confront the compromisers."

Harvey recommended that Farm Bureau let city folks contribute to help the organization "out-maneuver, out-legislate, out-shout the homegrown ingrates and the hyphenated intruders who refuse to repledge their allegiance". "We don't need another 'organization', our nation already has too many organizations. What we need is to breathe fire into the belly of this most respected one--before the ugly crack in that grand old handmade bell gets any wider".

SUPER SWEETS, a new type sweet corn, stays fresher, is twice as high in sugar and a bit more expensive should be available this year.

## REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT

The main focus of a REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT is to determine whether there exists in San Bernardino County Fire Department (County Fire) files any record relating to contamination or reports of spills at a particular site. A Certified Hazardous Materials Records Search Finding Report should reveal whether there are any facilities at the site that are subject to current or past regulatory activity by County Fire, such as underground storage tanks, hazardous material handlers, hazardous waste generators, and EPCRA or CalARP facilities, as well as any reports of spills, incidents, complaints, or cleanup activity, that can be a useful tool in providing a history of compliance or non-compliance.

Once County Fire has completed its records search, a Certified Hazardous Materials Records Search Finding Report will be prepared and issued, which will detail all County Fire records associated with a particular site by type, date, location, and status where applicable. (Any files identified in a Certified Hazardous Materials Records Search Finding Report can be made available for copies and/or review upon request.)

If the completed records search reveals no County Fire record of hazardous material activity at the site, a Certified Hazardous Materials Records Search Finding Report will be issued, noting that "no records" were identified.

Please provide a specific site address or location description. If a situs address does not exist or cannot be found, list another type of location identifier such as Assessor Parcel Number (preferable), cross streets or intersections (c.g., NWC 5<sup>th</sup> Ave. & Main St.), and/or legal description, and if possible attach a map to this request form.

**DISCLAIMER:** While all attempts are made to provide accurate, current, and reliable information, County Fire recognizes the possibility of human error. Therefore, County Fire, its officers, employees, agents and volunteers, make no representations as to the accuracy, completeness or suitability of a Certified Hazardous Materials Records Search Finding Report and provides a Certified Hazardous Materials Records Search Finding Report "as is", with no warranties, express or implied, including the implied warranty of fitness for a particular purpose. In no event shall County Fire be liable for any damages of any nature whatsoever, arising out of the issuance of a Certified Hazardous Materials Records Search Finding Report. County Fire therefore assumes no liability for damages incurred directly or indirectly as a result of any errors, omissions or discrepancies in a Certified Hazardous Materials Records Search Finding Report.

**RELEASE AND INDEMNIFICATION:** In consideration for the issuance of a Certified Hazardous Materials Records Search Finding Report, I hereby release and forever discharge County Fire, its officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability in connection with County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report, including, but not limited to, claims that may arise due to the active or passive negligence of County Fire, its officers, employees, agents and volunteers.

I am familiar with the provisions of California Civil Code Section 1542, which provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I hereby expressly waive any and all rights that I may have there under. I understand and acknowledge the significance and consequence of this specific waiver of California Civil Code Section 1542 and assume full responsibility for any injuries, damages, losses or liabilities that I may hereafter discover as possibly resulting from County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report.

In further consideration for County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report, I hereby agree, for myself, my heirs, administrators, executors and assigns, that I shall indemnify, defend (with counsel approved by County) and hold harmless County Fire, its officers, employees, agents and volunteers from any and all claims, demands, actions or suits arising out of or in connection with County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report brought by any third party.

\* \* \*

I have read the above terms and conditions, including the paragraphs entitled "DISCLAIMER" and "RELEASE AND INDEMNIFICATION", and by my signature below, I affirm that I understand these terms and conditions and accept them as part of my REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT.

I hereby request a Certified Hazardous Materials Records Search Finding Report for the location described on Page 1 of this application.

- I am including payment of the initial fee of \$130.00, for the first hour of research, by check or money order, payable to San Bernardino County Fire Dept. I understand that research exceeding one hour will be billed at the rate of \$130.00 for each additional hour spent by County Fire in completing this request.
- I have faxed or emailed this request and will forward payment along with the original request form within 48 hours.

REQUEST FOR RECORDS RESEARCH

For Office Use Only
Reference No.: 06032705
Amount Paid: 71.00
Receipt No.: 28583
Date: 3-28-06

If this request is being faxed or e-mailed, please check the box below and indicate the amount to be mailed separately with the original form:

[X] This request is being faxed or e-mailed. The original form will be mailed on 2/22/2006 along with a check or money order made payable to San Bernardino County Fire Department for the amount of: \$ 71.00

SITE INFORMATION
Facility Name / Owner Name: Hillcrest Homes-Sanchez Job #2461
Site Address: 13115 S. Ontario Avenue
City/Community: Ontario, California 91761

SPECIFIC RECORDS REQUESTED
Record Type: [X] ALL RECORDS
Active Permit Records, Inactive/Closed Permit Records, Hazardous Waste Generator, Hazardous Materials Handler, Underground Storage Tank, Aboveground Storage Tank
Risk Management Plan (RMP)/ CalARP, Hazardous Materials Handler Business Plan, Underground Storage Tank Removal Records, Site Remediation, Hazmat Incident/Emergency Response

Records are searched by site location. If no site address exists, please provide other identifying location information, such as an Assessor's Parcel Number, address range (125-135 E. Main St.), street corner (NW Corner Main St. & Elm Ave.), legal description (Township, Range, Section), and/or a map.

NOTE: To obtain records information for sites within the City of Victorville, contact the Victorville City Fire Department at (760) 955-5229.

REQUESTOR INFORMATION
NAME: Jennifer Wedner
TITLE: Project Coordinator
COMPANY: GeoKinetics
MAILING ADDRESS: 77 Bunsen, Irvine, CA 92618
TELEPHONE: 949/502.5353
FAX: 949/502.5354
EMAIL ADDRESS: Jennifer@appliedgeokinetics.com

PURPOSE OF REQUEST
[1] Phase I site assessment or due diligence AT THE SITE
[2] Environmental consultant or engineer involved with remediation AT THE SITE
[3] Phase I site assessment or due diligence NEARBY
[4] Environmental consultant or engineer involved with remediation NEARBY
[5] Proposed School Site
[6] Proposed Drinking Water Well
[7] Owner or operator of the above facility or property
[8] General interest/Community awareness
[9] Potential buyer
[10] Real Estate Agent, Lender, Appraiser
[11] Legal reasons
[12] Other:

- PAYMENT OF \$71.00 MUST BE SUBMITTED WITH THIS REQUEST. A SEPARATE REQUEST MUST BE MADE FOR EACH SITE.
This form can be faxed or e-mailed. However, the original form must be mailed or delivered in person with the appropriate payment.
A rate of \$71.00 per hour will be charged for any extended research.
If no records exist, you will be notified in writing. If records are identified, you will be notified in writing or by phone once they are located and retrieved, generally within two to three weeks, with a description of records that exist for the site and files that are available for review.
We will copy up to a maximum of 30 pages at the time records are examined at a rate of 25 cents per page.

**SUBJECT: REQUEST FOR RECORDS INFORMATION**

**RE: 13115 Ontario Ave.  
Ontario, California**

This is to confirm that the San Bernardino County Hazardous Materials Division has located records that may pertain to the subject site, as described in your request for records search. These records may or may not be within the search area outlined in the map provided with your search request, but could pertain to nearby or adjacent properties.

The following file(s) are available for your review. Please e-mail this office at [eking@fire.sbcounty.gov](mailto:eking@fire.sbcounty.gov) or call the number at the end of this letter to arrange an appointment.

**ACTIVE PERMITS:**

*(Regulatory files for facilities with annual operating permits to maintain underground storage tanks, storage hazardous materials, and/or generate hazardous waste. Files include permits, inspections, reports, test results, correspondence, and related materials. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities still in operation).*

There are no record of active permits/files

**INACTIVE PERMITS:**

*(Inactive regulatory files for formerly permitted facilities which maintained underground storage tanks, stored hazardous materials, and/or generated hazardous waste and/or facilities with underground storage tanks removed and/or materials and waste removed. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities no longer operating underground tanks).*

**SUBJECT: REMOVAL OF ONE UNDERGROUND STORAGE TANK  
AT 13115 ONTARIO AVE, ONTARIO**

The Department has received the sample results and/or closure report submitted by Advanced Environmental, dated August 31, 2000. After review of the reports prepared by you or your agent, it has been determined that the extent of contamination or lack thereof would indicate that no further investigation is warranted at this time.

**It is important to note that this can not be construed as a release of liability for the site or declaration that the site is free from contamination. Should further projects or environmental investigations reveal additional contaminants site you will be responsible and held liable for the investigation and remedial actions.**

If you have any questions, please call (909) 387-3082.

## **SUBJECT: AGRICULTURAL UNDERGROUND STORAGE TANKS**

San Bernardino County Fire Department recently mailed information to all owners of agricultural underground storage tank(s) (AUST). The purpose of this follow up letter and the attached AUST certificate of compliance is to obtain current information regarding the status of existing AUSTs. In 1984, State Law exempted AUSTs from regulation if they contained motor vehicle fuels (gas, diesel, and heating oil). In 1987, State Law was amended to exempt AUST's 1100 gallons in capacity or less. AUSTs larger than 1100 or any size AUST containing waste or materials other than motor vehicle fuels are not exempt and are required to meet all current UST regulations.

Your cooperation and assistance is appreciated. Please complete the attached AUST certificate of compliance and return it within 30 days to:

COUNTY FIRE DEPARTMENT  
HAZARDOUS MATERIALS DIVISION  
FIELD SERVICES/ENVIRONMENTAL PROTECTION  
385 NORTH ARROWHEAD AVE, 2<sup>ND</sup> FLOOR  
SAN BERNARDINO, CA 92415-0153

If you have any questions or if you need further assistance, please contact your local inspector at (909) 387-3082.

Refer to Title 23 of the California Code of Regulations (CCR), Chapters 6.7 of the Health and Safety Code (CHSC). The following Code sections are either in Violation (V) of, or in Compliance (C) with, the Underground Storage Tank laws and regulations, or compliance is Not Applicable, Not Addressed or Unknown (N).

GENERAL REQUIREMENTS		V	C	N	NARRATIVE/CORRECTIONS
1. Failure to obtain UST Permits	CHSC 25284(a)	X			File Review shows this Facility is currently in violation. Our records show (1) 550 gallon tank which was unlawfully closed or abandoned, this being confirmed by a letter dated March 4, 1987 by Edmundo Sanchez.
2. Failure to pay Permit Fees	CHSC 25287(a)	X			
3. No Form A and B submitted	CHSC 25286(a)	X			
4. Monitoring/Maintenance Records unavailable	CCR 2712(b)	X			
5. Failure to correct prior UST Violations	CCR 2712(f)	X			
6. No Owner/Operator Agreement	CHSC 25293(b)	X			
7. No Certification of Financial Responsibility	CHSC 25292.2(a)	X			
8. Failure to report Change in Ownership	CCR 2712(d)	X			
9. Failure to properly monitor UST	CHSC 25293	X			
10. Failure to establish/implement a Business Plan	CHSC 25503.5	X			
11. Failure to submit/update a Business Plan	CHSC 25505	X			
<b>MONITORING OF EXISTING UST SYSTEM (PRE 1984)</b>					CHSC 25292(d) This tank must be removed with proper permits from this office and sampling to occur thereafter. Please call re: any questions about your tank removal and your compliance. Craig Stephens Env. Spec. II
<b>Monitoring in General:</b>					
15. No Leak-Detection/Monitoring Plan	CCR 2641(a)			X	
16. Failure to establish a Response Plan	CCR 2641(h)			X	
17. Failure to install Monitoring System	CHSC 25292(a)			X	
18. Failure to conduct Annual Precision Tests	CHSC 25292(b)			X	
Precision Test Results not submitted	CCR 2643(g)			X	
20. Monitoring Devices not maintained annually	CCR 2641(j)			X	
<b>Piping:</b>					
25. Pressurized Piping not tested annually	CHSC 25292(e)			X	
26. No in-line Leak Detector Installed (Press/Pipe)	CHSC 25292(e)			X	
27. Suction Piping not tested every 3 years	CCR 2643(d)			X	
28. Gravity Piping not tested every 2 years	CCR 2643(e)			X	
<b>Inventory Reconciliation:</b>					
30. No Monthly Inventory Reconciliation	CCR 2646(c)			X	
31. No Annual Inventory Reconciliation	CCR 2646(g)			X	
32. Failure to calibrate Meters Annually	CCR 2646(i)			X	
33. Failure to conduct Manual Tank Gauging	CCR 2645(b)			X	
<b>MONITORING OF NEW UST SYSTEMS (1984 to Present)</b>					
35. No Leak-Detection/Monitoring Plan	CCR 2632(b)			X	
36. Failure to establish a Response Plan	CCR 2632(d)(2)			X	
37. Failure to annually certify Monitoring System	CCR 2630(d)			X	
38. Pressurized Piping not maintained/tested	CCR 2636(f)			X	
39. Failure to provide Overfill/Spill Protection	CHSC 25291(c)			X

13115 Ontario Avenue  
Ontario, California  
Converse Project No. 19-16-123-58

Ms. Hernandez,

Converse Consultants (Converse) is pleased to submit the attached report that summarizes the activities and the results of a Phase I Environmental Site Assessment (Phase I ESA) that was conducted at the referenced property.

A summary of the assessment is presented in the Executive Summary, as well as in Sections 8.0, 9.0, and 10.0 of the report. Recognized Environmental Conditions were identified during this assessment and additional assessment appears warranted.

We appreciate the opportunity to be of service. Should you have any questions or comments regarding this report, please contact Spencer Wagner at (562) 505-5219 or Norman Eke at (626) 930-1260.

# Executive Summary

---

The following is an Executive Summary of the Phase I Environmental Site Assessment (Phase I ESA) that was conducted by Converse Consultants (Converse). Please refer to the appropriate sections of the report for a complete discussion of these issues. In the event of a conflict between this Executive Summary and the report, or an omission in the Executive Summary, the report shall prevail.

This report presents the results of the Converse Phase I ESA performed at 13115 Ontario Avenue in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by the City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical within the scope of an ESA, Recognized Environmental Conditions (RECs) in connection with the Subject Property.

Converse has compiled and reviewed information that was obtained from interviews, document research, and on-site and area reconnaissance to identify potential environmental conditions at the Subject Property in conformance with the ASTM Standard E: 1527-21 Environmental Site Assessment Standard Practice (ASTM Standard: E1527-21). This Phase I ESA was conducted during the period of September 19, 2023 to October 26, 2023.

The Subject Property is owned by Sanchez Family Trust, operated as truck and recreation vehicle storage facility.

The Subject Property was undeveloped as early as 1897. The Subject Property was developed for residential use by 1938. The Subject Property was further developed with agricultural uses by 1948. An additional structure was constructed on the Subject Property by 1966. From as early as 1985 to 2002, the Subject Property appeared to be developed for livestock farming. From 2009 through the present, the Subject Property has been developed for truck, trailer and recreation vehicle parking.

According to records provided by the County of San Bernardino Fire Department, a 550-gallon former fuel tank containing gasoline from 1975 and 1979, and diesel between 1979 and 1987, was reportedly unlawfully removed in 1984. Records indicated that permits for removal were not obtained at the time of removal. Violations pertaining to the unlawful abandonment were issued and soil sampling in the vicinity of the former UST was required. According to records, soil samples were collected in August 2000 from depths of 10, 15, 20, and 25-feet bgs at the former UST location. All samples were analyzed for gasoline and diesel. No reported concentrations of gasoline or diesel was reported in samples at levels above detection limits. Based on the findings the San Bernardino County Fire Department issued a concurrence that no additional assessment appeared warranted.

According to the RWQCB Geotracker database there is in area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area. The plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the regulatory threshold 5 ug/l.

The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."

Based on the above, the following were noted:

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural uses.
- The historical livestock farming operations.
- The former possible waste ponds along the southern boundary of the northern contiguous property.
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECs pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** The following HRECs pertaining to the Subject Property were identified during this assessment.

- The case-closed designation related to the former operation of one (1) 550-gallon fuel UST.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue and East Riverside Drive.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

Based on the findings, Converse recommends additional assessment of shallow soils across the Subject Property for the presence of pesticides and metals historically used in agricultural operations. In addition, Converse recommends methane screening in the areas of the Subject Property historically occupied by possible livestock farming operations, and along the northern boundary of the Subject Property due to historical possible waste ponds on the northern contiguous property.

No assessment related to the Archibald plume is deemed necessary based on the depth to groundwater and reported concentrations of TCE in the vicinity of the Subject Property are below the maximum contaminant level (MCL).

Any future redevelopment of the Subject Property should be in accordance with the City of Ontario Methane Ordinance.

It is recommended that the Site Reconnaissance be completed at the time of the Phase II Environmental Site Assessment.

# 1.0 Introduction

---

## 1.1 Purpose and Scope of Services

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at 13115 Ontario Avenue in the City of Ontario, San Bernardino County, California, referred to as the Subject Property in this report. Converse was retained by City of Ontario to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical, Recognized Environmental Conditions (RECs) in connection with the Subject Property. The term Recognized Environmental Conditions is defined in Section 1.1.1 of the American Society of Testing and Materials (ASTM) Standard Practice as the presence or likely presence of any hazardous substances or petroleum products in, at or on a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

This Phase I ESA was completed in accordance with our proposal dated September 19, 2023. Our work consisted of the following and was completed in general conformance with the scope and limitations of the ASTM Practice E1527-21 and complies with standards and practices set forth in 40 Code of Federal Regulations (CFR) Part 312 for AAI.

- Interviews with the Property owner representatives
- Property and vicinity reconnaissance
- Review of regulatory agency records
- Description of physical setting
- Historical review
- Interviews with public agency personnel
- Preparation of this report

## 1.2 Non-Scope Considerations

There are a number of non-scope issues which are sometimes assessed concurrently with a Phase I ESA. Unless specifically agreed in the contract proposal documents, these non-scope considerations are not included as part of the Phase I ESA. Examples of non-scope issues include:

- Asbestos-containing Building Materials unrelated to release into the environment
- Biological Agent
- Cultural & Historic Resources
- Diffuse Anthropogenic Pollution
- Ecological Resources
- Endangered Species
- Health & Safety
- Indoor Air Quality unrelated to release of hazardous substances or petroleum products in the environment
- Industrial Hygiene
- Lead-based Paint unrelated to releases in the environment
- Lead in Drinking Water
- Mold or microbial growth conditions
- PCB-containing building materials (for example, interior fluorescent light ballasts, paint, and caulk)
- Polyfluoroalkyl Substances
- Naturally-occurring Radon
- Regulatory Compliance

- Substances not defined as hazardous substances unless or until such substances are classified as CERCLA hazardous substances.
- Wetlands

No Non-Scope issues were addressed in this report.

### **1.3 Significant Assumptions**

No assumptions were made for this assessment that need to be noted as significant.

### **1.4 Limitations and Expectations**

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property, limiting observation of the Subject Property to the public right-of-way (Ontario Avenue).
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

### **1.5 Special Terms and Conditions**

No special terms or conditions were identified by the User.

### **1.6 Reliance**

This report is for the sole benefit and exclusive use of City of Ontario in accordance with the terms and conditions under which these services have been provided. Its preparation has been in accordance with generally accepted environmental practices. No other warranty, either express or implied, is made. The Scope of Services associated with the report was designed solely in accordance with the objectives, schedule, budget, and risk-management preferences of City of Ontario.

This report should not be regarded as a guarantee that no further contamination, beyond that which could be detected within the scope of this assessment, is present at the Subject Property. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Subject Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation of the property at the time of the assessment. Also, events may occur after the Subject Property visit, which may result in contamination of the Subject Property. Additional information, which was not found or available to Converse at the time of report preparation, may result in a modification of the conclusions and recommendations presented.

Any reliance on this report by Third Parties shall be at the Third Party's sole risk. Should City of Ontario wish to identify any additional relying parties not previously identified, a completed Application of Authorization to Use (see Appendix A of this report) must be submitted to Converse Consultants.

## ***1.7 Continued Viability***

This report has continued viability of 180 days from the following:

- **Interviews:** Converse was not provided with Subject Property owner contact information by the Client. No interview was completed.
- **Review of Government Records:** September 25, 2023
- **Visual Inspection:** October 18, 2023
- **Declaration of Environmental Professional (EP):** October 26, 2023
- **Lien Search:** Not Applicable

## 2.0 Property Description

Item	Comment
Current Use(s) of the Property	<p>The Subject Property is owned by Sanchez Family Trust, operated as truck and recreation vehicle storage facility.</p> <p>A Property location map and a field generated Property plan are provided in Appendix B. Pertinent Property photographs are provided in Appendix C.</p>
Location and Legal Description	<p>The Subject Property is located at 13115 Ontario Avenue, Ontario, California 91761. The Subject Property is located on the east side of Ontario Avenue, between East Riverside Drive, and Chino Avenue. The Subject Property is located approximately 1.0-mile south of the Ontario (60) Freeway and 2.85-miles west of Interstate 15.</p> <p>The Subject Property consists of one (1) parcel and is approximately 4.0-acres. The San Bernardino County Assessor's Parcel Number for the Property is 0218-111-06.</p>
Zoning Information	<p>According to the City of Ontario, Planning Department, the Subject Property is zoned as LDR for low density residential.</p>
Property Characteristics	<p>The Subject Property is a rectangular-shaped parcel consisting of approximately 4.0-acres. The Subject Property is generally level, sloping slightly to the south. One (1) possible residential structure, and multiple outbuildings were observed in the northern/northwestern portion of the Subject Property.</p> <p>The southern portion of the lot appeared to be developed for truck, trailer, and recreational vehicle parking.</p>
Description of Property Structure(s)	<p>Converse was not provided access to the Subject Property in order to evaluate the structures observed.</p> <p>One (1) possible two-story residential building was observed in the northern portion of the Subject Property. Additional single-story residential garage and storage/outbuildings were observed in the vicinity of the possible residential structure.</p>

**The following services were present at the Property at the time of the assessment.**

Item	Comments
Electricity:	Southern California Edison
Gas:	The Gas Company
Potable Water:	The Subject Property is serviced by the City of Ontario; however, it is possible that onsite water wells are also present based on the historical agricultural operations on the Subject Property.
Sanitary Sewer:	City of Ontario
Heating, Ventilation, Air Conditioning (HVAC):	As Converse was not provided access to the Subject Property, the heating, ventilation, and air conditioning components of the Subject Property buildings could not be observed.
Solid Waste:	City of Ontario

## 3.0 User Provided Information & Responsibilities

---

### 3.1 Requested Documents and Information

The ASTM E1527-21 specifies that the User, City of Ontario, provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity Use Limitations (AULs)
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

No information/documentation was provided by City of Ontario.

### 3.2 User Provided Information

Section 6 of ASTM E1527-21 outlines specific User's responsibilities. This information will help identify the possibility of RECs in connection with the Subject Property. The ASTM Standard provides a questionnaire to help the User to comply with the statutory requirements to perform tasks which would help identify RECs. In general, any Users should make Converse aware of information they have regarding the following:

- Environmental Cleanup Liens filed or recorded against the Property
- Activity and land use limitations that are in place on the Property or have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the Legal Liability Protections (LLP)
- Relationship of the purchase price to fair market value of the Property if it were not contaminated
- Commonly known or reasonably ascertainable information about the Property
- The degree or obviousness of the presence or likely presence of contamination at the Property, and the ability to detect this contamination by appropriate investigation.

The following information was requested from the User, City of Ontario.

### *3.2.1 Environmental Cleanup Liens*

The User had no information regarding environmental cleanup liens or title records.

### *3.2.2 Activity and Use Limitations*

The User did not have any information indicating they were aware of any AULs.

### *3.2.3 Specialized Knowledge or Experience*

The User did not have any information indicating they had specialized knowledge or experience related to the Subject Property or nearby property.

### *3.2.4 Reason for Significantly Lower Purchase Price*

Converse has no information regarding the purchase price of the Subject Property or comparable properties. The User has not indicated to Converse that there is any conclusion that there was a lower purchase price because of known or suspected contamination at the Subject Property.

### *3.2.5 Commonly Known or Reasonably Ascertainable Information*

The User did not have any information about past uses, specific chemicals at the Subject Property, past spills, environmental cleanup or other reasonably ascertainable information regarding the Subject Property.

### *3.2.6 Obviousness of Contamination*

The User did not have any information based on their knowledge or experience that would be obvious indicators of contamination on the Subject Property.

Unless specifically stated otherwise in the Scope of Services, the purpose of this Phase I ESA was to qualify for the landowner liability protections to CERCLA Liability as described in ASTM E1527-21.

Business risk unrelated to the CERCLA innocent landowners defense are only assessed as specifically agreed in the Scope of Services and discussed in Section 11.0, Additional Non-Scope Services, of this report.

## **3.3 Continuing Obligations**

In order to assert a LLP, the User must satisfy a number of statutory requirements that are generally referred to as Continuing Obligations, which are outside the Scope of Services of the Phase I ESA. Examples of Continuing Obligations include providing legally required notices, stopping continuing releases and complying with land use restrictions. Failure to comply with these and other statutory post-acquisition requirements will jeopardize liability protection.

It is the responsibility of the User to comply with the Continuing Obligations requirements of ASTM E1527-21 and AAI. Anyone seeking LLP protections should take independent action beyond this Phase I ESA to perfect their position.

## 4.0 Owner Provided Information

---

The ASTM E1527-21 specifies that the Subject Property owner and the Key Site Manager provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded AULs
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

Converse was not provided with Subject Property owner contact information. No interview was completed.

## 5.0 Records Review

### 5.1 Physical Setting

Item	Comments
Physical Setting:	The Subject Property is located approximately 764 feet above mean sea level with surface topography sloping towards the south (United States Geological Survey [USGS] Topographic Map, Guasti and Corona North, California, 2018).
Geology:	The Subject Property is underlain by alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast (Division of Mines and Geology, Geologic Map of California, 2010).
Groundwater:	Information regarding regional groundwater was researched on the RWQCB Geotracker website. According to the website, the closest site to the Subject Property with recent groundwater information is located approximately 1.0-mile northeast of the Subject Property. According to an October 2001 closure report for the site, groundwater is located at depths greater than 150-feet beneath ground surface (bgs) and flows in a southwesterly direction.
Potable Water Supply:	Potable water is supplied by the Ontario Municipal Utilities Company.

### 5.2 Historical Review

#### 5.2.1 Aerial Photograph and Map Review

Available historical aerial photographs and maps, which were provided by Environmental Data Resources (EDR), were reviewed. A summary of the review is provided in the following table. Copies of the aerial photographs and maps are provided in Appendix D.

Historical Summary			
Resource and Year	Property	Adjoining Properties	General Vicinity
1897, 1900, 1903 Topographic Maps	The Subject Property is depicted as undeveloped.	The adjoining properties are depicted as undeveloped.	The general vicinity is primarily undeveloped with sporadic residential developments.
1938 Aerial Photograph  1941 and 1944	A possible residential structure is visible in the northwestern portion of the Subject	The adjoining properties are a mix of undeveloped land and agricultural uses.	The general vicinity consists of undeveloped land, agricultural land, and residential uses.

<b>Resource and Year</b>	<b>Property</b>	<b>Adjoining Properties</b>	<b>General Vicinity</b>
Topographic Maps	Property. The remainder of the Subject Property appears primarily undeveloped.		
1948 Aerial Photograph 1949 Topographic Map 1953 Aerial Photograph 1954 Topographic Map	The Subject Property appears to be a mix of undeveloped land and agricultural plots. The residential structure remains in the northwestern portion of the Subject Property.	The northern, northwestern, western, and southwestern adjoining properties are developed for agricultural uses. The southern adjoining property is developed for agricultural and residential use. The northeastern, eastern, and southeastern adjoining properties are developed with a flood control channel.	The general vicinity is a mix of undeveloped land, agricultural uses, and residential developments.
1966 and 1975 Aerial Photographs 1976 and 1981 Topographic Maps	An additional structure has been constructed in the northern portion of the Subject Property. There are no other significant identifiable changes to the Subject Property.	The northwestern/western/southwestern adjoining property appears to be further developed with a dairy. The northern adjoining property appears to be a mix of agricultural uses and livestock farming. There are no significant identifiable changes in uses on the remaining adjoining properties.	The general vicinity is a mix of undeveloped land, agricultural uses, and residential developments.
1985 and 1989 Aerial Photographs	The Subject Property appears developed for livestock farming.	A possible waste pond associated with livestock farming is	The general vicinity appears to be a agricultural uses, livestock farming and/or

		remaining adjoining properties.	
2015 Topographic Map 2016 Aerial Photograph 2018 Topographic Map	There are no significant identifiable changes in uses on the Subject Property.	The northern adjoining property appears to be occupied by livestock farming and nursery operations. There are no significant identifiable changes in use on the remaining adjoining properties.	The general vicinity appears to be agricultural uses, livestock farming and/or dairy operations, and residential and commercial uses.
2020 Aerial Photograph	There are no significant identifiable changes in uses on the Subject Property.	The northern adjoining property appears to be primarily occupied by nursery operations. There are no significant identifiable changes in use on the remaining adjoining properties.	The general vicinity appears to be agricultural uses, livestock farming and/or dairy operations, and residential and commercial uses.

### 5.2.2 Building Permit Review

Available building permits were requested from the City of Ontario, Department of Building & Safety. The City had no records on file pertaining to the Subject Property.

### 5.2.3 City Directories

A city directory search was completed on the Property by EDR. The complete city directory is provided in Appendix D, Historical Research.

The Subject Property was identified under various individual's names between 1956 and 2020.

The adjacent properties, where identified, were identified as likely residential uses from as early as 1970 to 2020.

#### *5.2.4 Data Failure*

Historical information regarding the Subject Property indicated the Subject Property was undeveloped land as early as 1897. Therefore, no historical data failure occurred during this assessment.

#### *5.2.5 Summary of Historical Property Use*

The Subject Property was undeveloped as early as 1897. The Subject Property was developed for residential use by 1938. The Subject Property was further developed with agricultural uses by 1948. An additional structure was constructed on the Subject Property by 1966. From as early as 1985 to 2002, the Subject Property appeared to be developed for livestock farming. From 2009 through the present, the Subject Property has been developed for truck, trailer and recreation vehicle parking.

#### *5.2.6 Summary of Past Uses of Adjoining Properties*

The adjoining properties were typically undeveloped as early as 1897. The properties were further developed for agricultural uses beginning in the 1930s and continuing through the 1950s. By 1948, the northeastern, eastern, and southeastern adjoining properties were developed with the existing flood control channel. The northwestern/western/southwestern adjoining property was developed with the existing dairy farm, in addition to the agricultural uses already on site, by 1966. The northern adjoining property was developed for livestock farming, in addition to the agricultural uses already on site, by 1966. A possible waste pond associated with livestock farming operations on the northern adjoining property was visible in the southeastern portion of the site in 1985 and 1989. The southern adjoining property was utilized for the existing truck and trailer parking by 2012.

#### *5.2.7 Summary of Past Uses of the Surrounding Area*

The surrounding area was generally undeveloped with sporadic residential developments in 1897. The area was further developed for agricultural uses in the 1930s, with additional livestock farming and dairy operations by the 1960s. The area was further developed with residential neighborhoods, and commercial developments beginning in the 1970s and continuing through the 2000s.

### **5.3 Results of Environmental Records Sources Review**

An EDR report of Standard Environmental Record Sources (Records) was prepared specifically for the Property. The search included queries to the following databases for cases within specified ASTM search distances. A copy of the database report is provided in Appendix E.

#### *5.3.1 Property Listings*

The Subject Property was identified on the following databases in the EDR report:

Property Listings	
<b>Site Name:</b>	EDMUNDO SANCHEZ
<b>Databases:</b>	CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST
<b>Address:</b>	13115 ONTARIO AVE
<b>Comments:</b>	The listings relate to the operation of a 550-gallon diesel fuel UST at the site.

<b>Site Name:</b>	AG-SANCHEZ, EDMUNDO
<b>Databases:</b>	UST
<b>Address:</b>	13115 S ONTARIO AVE
<b>Comments:</b>	The listing appears related to the 550-gallon diesel fuel UST. No additional pertinent information was provided.

<b>Site Name:</b>	EDMUNDO SANCHEZ
<b>Databases:</b>	HIST UST
<b>Address:</b>	13115 S ONTARIO AVE
<b>Comments:</b>	The listing appears related to the 550-gallon diesel fuel UST. The listing identified that the UST was installed in 1974. No additional pertinent information was provided.

### 5.3.2 Adjoining Properties

The following adjoining properties were identified in the EDR report:

Adjoining Properties	
<b>Site Name:</b>	LEGEND DAIRY FARMS #1
<b>Databases:</b>	San Bern. Co. Permit, HWTS, CERS
<b>Address:</b>	9155 E RIVERSIDE DR
<b>Distance:</b>	1075
<b>Direction:</b>	West-Northwest
<b>Elevation:</b>	Higher
<b>Comments:</b>	The site is located west of the Subject Property and is listed in the databases as a hazardous materials handler and generator. Violations issued at the site include failure to properly manage empty containers greater than 5 gallons, and failure to electronically submit hazardous materials inventory. The site is listed as a dairy.

### 5.3.3 Other Off-site Locations of Concern

Other off-site locations of concern identified by EDR within a maximum one-mile radius from the Subject Property included registered AST sites, CPS-SLIC sites,

hazardous waste generators, permitted hazardous materials handlers, and Envirostor/Sch sites.

The potential for environmental concern to the Subject Property from these off-site locations appears to be low due to one or more of the following: type of regulatory listing; type of resource (soil) affected; distance from the Subject Property; status of the case; and/or potential responsible parties have been identified.

#### 5.3.4 Orphan Listings

The EDR database report identified three (3) orphan listing only by street names. These street names were found in the general vicinity of the Subject Property; however, these orphan sites appeared to have a low potential for environmental impact to the Subject Property due to the distance from the Subject Property and/or type of listing.

### 5.4 Additional Environmental Record Sources

Information requests pertaining to the Subject Property were submitted to the following regulatory agencies.

#### Federal Agencies

Source	Comments
U.S. Department of Transportation, Pipeline and Hazardous Material Safety Administration (PHMSA)	The PHMSA online mapping system for gas transmission pipelines and hazardous liquid pipelines on the Property or adjacent properties was reviewed ( <a href="https://www.npms.phmsa.dot.gov/PublicViewer/">https://www.npms.phmsa.dot.gov/PublicViewer/</a> ). No pipelines were identified on or adjoining the Subject Property.

#### State Agencies

Source	Comments
California Environmental Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC)	No information regarding the Subject Property was on file with DTSC. The Envirostor website ( <a href="http://www.envirostor.dtsc.ca.gov/public/">http://www.envirostor.dtsc.ca.gov/public/</a> ) was reviewed for information, and the Property was not listed in the database.
Cal/EPA, Regional Water Quality Control Board (RWQCB)	The RWQCB had no records on file for the Subject Property. The Geotracker website ( <a href="http://geotracker.waterboards.ca.gov/">http://geotracker.waterboards.ca.gov/</a> ) was reviewed for information, and the Subject Property was not listed in the database.

Source	Comments
	<p>Converse noted in the database that there is in area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area, the plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. The Plume was first identified in 1986 when samples from several wells south of the 60 Freeway had detectable concentrations of volatile organic compounds (VOCs), with TCE detected at concentrations up to 75 micrograms per liter (ug/L). Subsequently, the RWQCB initiated an investigation to determine the extent and potential sources of the groundwater contamination in the area. Concentrations of TCE greater than the maximum contaminant level (MCL) of 5 ug/L were detected in samples from 92 of 167 private wells sampled between 1987 and 2005.</p> <p>Since 2005, the RWQCB, Chino Basin Watermaster (CBWM), the City of Ontario and others have collected and analyzed groundwater samples from existing private and municipal wells throughout the footprint of the Plume. Samples collected within the footprint of the Plume between 2007 and 2019 indicated that TCE concentrations were generally decreasing in the western area of the Plume and increasing in the southern area. These trends are associated with a change in the direction of groundwater flow in the basin since 2000. Between 1960 and 2000, the dominant flow direction was to the southwest. Since 2000, however, the groundwater flow direction has been primarily to the south and has been influenced by both the declining agricultural production and the addition of groundwater extraction associated with the operation of the CDA desalter wells located in the southern part of the Chino Basin.</p> <p>Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the threshold 5 ug/l.</p>
<p>California Department of Conservation, California Department of Conservation</p>	<p>Converse reviewed the DOC CalGEM Online Well Finder (<a href="https://maps.conservation.ca.gov/calGEM/wellfinder/v2/#/">https://maps.conservation.ca.gov/calGEM/wellfinder/v2/#/</a>). According to the website, no oil or gas wells are located on the Subject Property.</p>

Source	Comments
(DOC), Geologic Energy Management Division (CalGEM)	

### Local Agencies

Source	Comments
South Coast Air Quality Management District (SCAQMD)	There were no agency records pertaining to the Property on file with this agency.
San Bernardino County Fire Department, Certified Unified Program Agency (CUPA)	<p>The San Bernardino County Fire Department provided several records pertaining to the Subject Property. A summary is as follows:</p> <p>February 17, 2000 - Underground Storage Tank Inspection Report. According to the report, the facility was in violation for operating one (1) 550-gallon tank which was unlawfully closed or abandoned which was confirmed in a letter dated March 4, 1987 by the site owner Edmundo Sanchez. The inspection report required the site owner to apply for proper permits and complete soil sampling.</p> <p>August 16, 2000 - Application for Removal of Underground Storage Tank. The application is for the removal of one (1) 550-gallon UST that was reportedly used to store gasoline between 1975 and 1979, and diesel between 1979 and 1987. The UST was reportedly located in the west-central portion of the site.</p> <p>August 28, 2000 - Analytical report for soil. According to the report, four (4) samples were collected. Samples were collected at apparent depths of 10, 15, 20, and 25-feet beneath ground surface (bgs). No reported concentrations of gasoline or diesel were reported in samples. Detection limits were identified as 10 milligrams per kilogram (mg/kg).</p> <p>October 16, 2000 - Removal of One Underground Storage Tank at 13115 Ontario Avenue, Ontario Letter. According to the letter, the Department received sample results and/or closure submitted by Advanced Environmental, dated August 31, 2000. The Department reviewed the reports and concluded that "the extent of contamination or lack thereof would indicate that no further investigation is warranted at this time." The letter noted that "this cannot be construed as a release</p>

Source	Comments
	<p>of liability for the site or declaration that the site is free from contamination. Should further projects or environmental investigations reveal additional contaminants (at the) site you will be responsible and held liable for the investigation and remedial actions".</p> <p>May 15, 2007 - Underground Storage Tank Inspection Report. The inspection report indicates that a 500 gallon UST was removed from the site in August 2000 and samples were collected by Advanced Environmental. The samples results were non-detect, and a letter of underground storage tank removal dated 10/16/2000 stated no further investigation was warranted.</p>
Methane	<p>According to the CalRecycle SWIS website (<a href="https://www2.calrecycle.ca.gov/SolidWaste/Site/Search">https://www2.calrecycle.ca.gov/SolidWaste/Site/Search</a>), a solid waste site is located approximately 0.45-miles south/southwest of the Subject Property at 13434 South Ontario Avenue.</p> <p>The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."</p>

## 6.0 Property Reconnaissance

### 6.1 Methodology

On October 18, 2023 Converse visited the Subject Property to evaluate present use and to identify observable environmental conditions at the Subject Property. As Converse was not provided access to the Subject Property, our methodology involved visual observation of the Subject Property from the public right-of-way (Ontario Avenue) along the western boundary of the Subject Property.

A field-generated map is provided in Appendix B. Pertinent Property photographs are provided in Appendix C.

### 6.2 Limiting Conditions

Converse's findings are based on the Subject Property conditions observed on Wednesday, October 18, 2023.

Converse was not provided access to the Subject Property. Observation of the Subject Property was limited to viewing from Ontario Avenue, along the western boundary of the Subject Property.

### 6.3 Interior Observations of Property

Converse was not provided access to the Subject Property and therefore was unable to visually observe the interiors of the onsite buildings.

### 6.4 Exterior Observations of Property

Converse was not provided access to the Subject Property. Limited observations of the Subject Property were made from public right-of-way area on Ontario Avenue.

Exterior Observations		
Item or Condition	Observed Evidence?	Comments
Hazardous Substances & Petroleum Products:	No	
Storage Tanks & Related Equipment:	No	
Odors:	No	
Standing Surface Water or Other Pools of Liquid:	No	

Item or Condition	Observed Evidence?	Comments
Drums & Other Containers of Hazardous Substances, Petroleum Products, or Other Unidentified Contents:	No	
Transformers or Equipment containing Polychlorinated Biphenyls (PCBs):	No	
Pits, Ponds, or Lagoons:	No	
Stained Soil or Pavement:	No	
Stressed Vegetation (other than from insufficient water):	No	
Evidence of Mounds, Depressions or Filled or Graded Areas Suggesting Trash or Other Solid Waste Disposal:	No	
Waste Water or any discharge (including storm water) into a Drain, Ditch, or Stream on or Adjacent to the Property:	No	
Wells (active, inactive, or abandoned):	No	
Septic Systems or Cesspools:	No	
Prior Structures:	No	
Roads, Tracks, Railroad Tracks or Spurs:	Yes	The Subject Property fronts onto Ontario Avenue to the west.
Suspect Asbestos containing Building Materials released into the environment	No	
Suspect Lead-based Paint released into the environment	No	

Item or Condition	Observed Evidence?	Comments
Suspect PCB Caulk, Paint or Ballasts released into the environment	No	

In addition to the above, the following observations were made:

- One (1) residential structure and several outbuildings were observed in the northwestern portion of the Subject Property.

### **6.5 Current Uses of Adjoining Properties**

Based on our research and observations during our Subject Property visit, the Subject Property is bordered by the following:

Adjoining Property Use	
Direction	Current Development
North	Nursery (9303 East Riverside Drive)
Northeast	Flood control channel followed by residential neighborhood.
East	Flood control channel followed by residential neighborhood.
Southeast	Flood control channel followed by residential neighborhood.
South	Residence and truck and trailer parking property (13165 Ontario Avenue).
Southwest	Ontario Avenue followed by dairy and agricultural fields (9155 East Riverside Drive).
West	Ontario Avenue followed by dairy and agricultural fields (9155 East Riverside Drive).
Northwest	Ontario Avenue followed by dairy and agricultural fields (9155 East Riverside Drive).

### **6.6 Current Uses of Surrounding Area**

Based on our research and observations during our Subject Property visit, the surrounding area of the Subject Property consists of agricultural fields, dairy farms, residential and commercial businesses.

## 7.0 Interviews

---

During the interviews, the owners and occupants were asked if they had any available documents that would be helpful. The documents that were requested are detailed in Section 4.0 of this report:

<b>Interview:</b>	<b>Comments:</b>
Property Owner:	Converse was not provided contact information for the Subject Property owner. No owner interview was conducted.
Tenant/ Occupant:	Converse was not provided access to the Subject Property. No tenant/occupant interviews were conducted.
State or Local Government Officials:	Other than the information provided in Section 5.4, no other information was provided by a government official.
Owners and Occupants of Neighboring Sites:	No interviews of owners or occupants of neighboring sites were conducted.

## 8.0 Findings & Opinions

---

A cursory summary of findings is provided below. However, details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

The Subject Property is owned by Sanchez Family Trust, operated as truck and recreation vehicle storage facility.

The Subject Property was undeveloped as early as 1897. The Subject Property was developed for residential use by 1938. The Subject Property was further developed with agricultural uses by 1948. An additional structure was constructed on the Subject Property by 1966. From as early as 1985 to 2002, the Subject Property appeared to be developed for livestock farming. From 2009 through the present, the Subject Property has been developed for truck, trailer and recreation vehicle parking.

According to records provided by the County of San Bernardino Fire Department, a 550-gallon former fuel tank containing gasoline from 1975 and 1979, and diesel between 1979 and 1987, was reportedly unlawfully removed in 1984. Records indicated that permits for removal were not obtained at the time of removal. Violations pertaining to the unlawful abandonment were issued and soil sampling in the vicinity of the former UST was required. According to records, soil samples were collected in August 2000 from depths of 10, 15, 20, and 25-feet bgs at the former UST location. All samples were analyzed for gasoline and diesel. No reported concentrations of gasoline or diesel was reported in samples at levels above detection limits. Based on the findings, the San Bernardino County Fire Department, issued a concurrence that no additional assessment appeared warranted.

According to the RWQCB Geotracker database there is in area of groundwater contaminated with trichloroethylene (TCE) in the vicinity of the Subject Property. The area is described as the South Archibald TCE Plume. According to the December 2022 Annual Groundwater Monitoring Report for the impacted area. The plume is generally east of Grove Avenue, north of Schleisman Road, west of Haven Avenue and south of the 60 Freeway. Converse reviewed the data from the 2022 report which indicated that the Subject Property is located within a portion of the Plume where groundwater samples had reported concentrations of TCE greater than non-detect but less than the regulatory threshold 5 ug/l.

The Subject Property is located within the City of Ontario and is therefore subject to City of Ontario methane ordinances. According to Land Use Policy LU-2.9 of the City's Policy Plan, the City "requires sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks."

The Subject Property was identified in the CA FID UST, SWEEPS UST, San Bern. Co. Permit, HIST UST, and UST databases. The listings appear related to the operation of the 550-gallon diesel fuel UST.

The western adjoining property located at 9155 East Riverside Drive was listed in the San Bern. Co. Permit, HWTS, and CERS databases. The listings indicate the site as a hazardous materials handler and generator. Violations issued at the site include failure to properly manage empty containers greater than 5 gallons, and failure to electronically submit hazardous materials inventory. The site is listed as a dairy.

According to the CalRecycle SWIS website (<https://www2.calrecycle.ca.gov/SolidWaste/Site/Search>), a solid waste site is located approximately 0.40-miles south/southwest of the Subject Property at 13434 South Ontario Avenue.

Based on the above, the following were noted:

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural uses.
- The historical livestock farming operations.
- The former possible waste ponds along the southern boundary of the northern contiguous property.
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECs pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** The following HRECs pertaining to the Subject Property were identified during this assessment.

- The case-closed designation related to the former operation of one (1) 550-gallon fuel UST.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue and East Riverside Drive.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

## 9.0 Conclusions & Recommendations

---

Converse has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-21 for 13115 Ontario Avenue, Ontario, San Bernardino County, California. Any exceptions to, or deletions from, this practice are described in the Limitations and Exceptions of Assessment section of this report. This assessment has revealed the following *recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps* in connection with the Subject Property except for the following:

**Recognized Environmental Conditions (RECs):** The following RECs pertaining to the Subject Property were identified during this assessment.

- The historical agricultural uses.
- The historical livestock farming operations.
- The former possible waste ponds along the southern boundary of the northern contiguous property.
- The presence of the Subject Property within the South Archibald TCE Plume.

**Controlled Recognized Environmental Conditions (CRECs):** No CRECs pertaining to the Subject Property were identified during this assessment.

**Historical Recognized Environmental Conditions (HRECs):** The following HRECs pertaining to the Subject Property were identified during this assessment.

- The case-closed designation related to the former operation of one (1) 550-gallon fuel UST.

**Significant Data Gaps:** The following data gaps were identified during this assessment.

- Converse was not provided access to the Subject Property and the Subject Property was limited to the public right-of-way on Ontario Avenue and East Riverside Drive.
- Converse was not provided with contact information for the Subject Property owner; therefore, information related to the Subject Property was limited to review of the historical photos and maps, the regulatory database report, and agency records where available.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

Based on the findings, Converse recommends the following additional assessment of shallow soils across the Subject Property for the presence of pesticides and metals historically used in agricultural operations. In addition, Converse recommends methane screening in the areas of the Subject Property historically occupied by possible livestock farming operations, and along the northern boundary of the Subject Property due to historical possible waste ponds on the northern contiguous property.

No assessment related to the Archibald plume is deemed necessary based on the depth to groundwater and reported concentrations of TCE in the vicinity of the Subject Property are below the maximum contaminant level (MCL).

Any future redevelopment of the Subject Property should be in accordance with the City of Ontario Methane Ordinance.

It is recommended that the Site Reconnaissance be completed at the time of the Phase II Environmental Site Assessment.

## 10.0 Deviations & Limitations

---

The following deviations and/or limitations from the ASTM Standard were encountered during this assessment:

- Converse was not provided access to the Subject Property, limiting observation of the Subject Property to the public right-of-way (Ontario Avenue).
- Converse was not provided contact information for the Subject Property owner. No owner interview or occupant interviews were completed during the course of this assessment.

These limitations are deemed significant; however, based on the known historical property uses, the review of historical information, regulatory database report, and regulatory records, and the proposed additional assessment across the Subject Property, these limitations are not deemed likely to significantly alter the recommendations included in this report.

## 11.0 Additional Non-Scope Services

---

There are environmental issues outside the scope of the ASTM E1527-21 that can be assessed in connection with a commercial real estate transaction. These are dealt with as non-scope considerations since they do not typically present a Superfund Liability. The specific level of inquiry (if any) is defined in the Proposal which contains a Scope of Work. These non-scope services are very client specific and not covered by the ASTM standard. They are frequently related to the business environmental risk which is defined in the standard as "risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate".

No non-scope issues were addressed during this assessment.

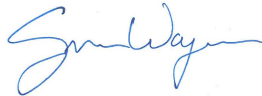

## 12.0 Signature of Environmental Professional

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in A§312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

**Site Assessor**

---

Spencer Wagner  
Project Environmental Scientist

**Senior Reviewer**

---

Norman S. Eke  
Senior Vice President/Managing Officer

Spencer Wagner - Project Environmental Scientist

Norman S. Eke - Senior Vice President/Managing Officer

This Phase I ESA was completed by the above Environmental Professional. A complete list of preparers, and their responsibilities for this assessment, is provided in the following section (Section 13.0, List of Preparers).

## 13.0 List of Preparers

---

### **Norman S. Eke**

Senior Vice President

B.A., Liberal Studies, Environmental Studies Emphasis, University of California, Santa Barbara, 1988.

Cal/OSHA Certified Asbestos Consultant, #96-2093

NIOSH 582 Equivalent Training

Senior Vice President and Managing Officer of Converse's California Environmental offices. Mr. Eke has served as the Principal-in-Charge and Contract Administrator to deliver services to our public agency and private clients. Mr. Eke has 33 years of experience in the fields of Environmental Due Diligence including Phase I and Phase II Environmental Site Assessments, Asbestos surveys/specifications/abatement monitoring, Preliminary Endangerment Assessments and associated Supplemental Site Investigations and Removal Action Work Plans/Implementation, various forms of Remediation, Human Health Risk Assessment and Indoor Air Quality. Mr. Eke is a former Subcommittee Chairman for E.50-02 Real Assessment and Management of the ASTM E.50 Committee on Environmental Assessment, Risk Management, Corrective Action, which includes Phase I ESA standards.

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, and Report Review.

### **Spencer Wagner**

Senior Staff Environmental Scientist

B.A., Environmental Science and Policy, California State University, Long Beach, 2006

B.A., Geography, California State University, Long Beach, 2006

Certified Wood Destroying Organism (WDO) Inspector

Mr. Wagner has over 17 years' experience conducting Phase I and II Environmental Site Assessments throughout California. Mr. Wagner has completed Phase I ESAs on undeveloped land, residential properties, commercial/retail facilities, industrial facilities, and school sites. His Phase II ESA experience includes collection of soil matrix, soil vapor, indoor air and groundwater samples. Phase II projects worked on have included residential properties, commercial warehousing sites, school sites, dry cleaning facilities, automotive service sites, metal plating facilities and multi-tenant commercial properties

Principal area of responsibility for this ESA report: Project Management, Client Point of Contact, Historical Research, Regulatory Agency Interaction, Property Reconnaissance, Interviews, and Report Generation.

## 15.0 List of Acronyms

---

The following is a list of acronyms that may have been noted in the report. This is not an all inclusive list and may include acronyms that are not found in your report but are commonly utilized in environmental assessments. Additional acronyms pertaining to regulatory agency documents/listings can be found in the regulatory database report, which is provided as an appendix to this report.

**AAI** - All Appropriate Inquiries

**ACM** - Asbestos-containing Material

**APN** - Assessor's Parcel Number

**APCD** - Air Pollution Control District

**AQMD** - Air Quality Management District

**AST** - Aboveground Storage Tank

**ASTM** - American Society of Testing and Materials

**AUL** - Activity Use Limitation

**BER** - Business Environmental Risk

**BTEX** - Benzene, Toluene, Ethylbenzene, and Xylenes

**Cal/EPA** - California Environmental Protection Agency

**CalGEM** - (California Department of Conservation), Geologic Energy Management Division

**CERCLA** - Comprehensive Environmental Response, Compensation and Liability Act

**CFR** - Code of Federal Regulations

**CREC** - Controlled Recognized Environmental Condition Recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

**CUPA** - Certified Unified Protection Agencies

**de minimis condition** - A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a REC nor a CREC.

**DOC** - (California) Department of Conservation

**DPW** - (Los Angeles County) Department of Public Works

**DTSC** - Department of Toxic Substances Control

**DWP** - (City of Los Angeles) Department of Water and Power

**EDR** - Environmental Data Resources

**EHD** - Environmental Health Department

**EP** - Environmental Professional

**EPA** - United States Environmental Protection Agency

**ESA** - Environmental Site Assessment

**ERIS** - Environmental Risk Information Systems

**(x)FD** - (City/County)Fire Department

**HMS** - Hazardous Material Site

**HREC** - Historic Recognized Environmental Condition: A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

**HVAC** - Heating, Ventilation, Air Conditioning

**IAQ** - Indoor Air Quality

**LACSD** -Los Angeles County Sanitation Districts

**LBP** - Lead-based Paint

**LLP** - Landowner Liability Protections

**LQG** - Large Quantity Generator

**LUST** - Leaking Underground Storage Tank

**mg/kg** - milligram per kilogram

**mg/L** - milligram per Liter

**MSL** - Mean Sea Level

**MTBE** - Methyl Tertiary Butyl Ether

**ND** - None Detected

**NFA** - No Further Action

**NOV** - Notice of Violation

**PEC** - Potential Environmental Concern

**PFAS** - Perfluoroalkyl and Polyfluoroalkyl Substances

**PHMSA** - US Department of Transportation, Pipeline and Hazardous Materials Safety Administration

**PCB** - Polychlorinated biphenyls

**PCE** - Perchloroethylene or Tetrachloroethylene

**pCi/L** - picoCuries per Liter

**ppb** - parts per billion

**ppm** - parts per million

**PRP** - Potential Responsible Party

**RCRA** - Resources Conservation and Recovery Act

**REC** - Recognized Environmental Condition; (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

**RP** - Responsible Party

**RWQCB** - Regional Water Quality Control Board

**SCAQMD** - South Coast Air Quality Management District

**SDS** - Safety Data Sheets

**SQG** - Small Quantity Generator

**SVOC** - Semi-volatile Organic Compound

**TCE** - Trichloroethylene or Trichloroethene

**TPH** Total Petroleum Hydrocarbons

**µg/L** - micrograms per Liter

**USGS** - United States Geological Survey

**UST** - Underground Storage Tank

**VCP** - Voluntary Cleanup Program

**VOCs** - Volatile Organic Compounds

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Converse Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Converse Consultants (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

13115 ONTARIO AVENUE  
ONTARIO, CA 91761

#### COORDINATES

Latitude (North): 34.0150740 - 34° 0' 54.26"  
Longitude (West): 117.6011100 - 117° 36' 3.99"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 444497.0  
UTM Y (Meters): 3763795.8  
Elevation: 764 ft. above sea level

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

Operational Status: Active  
Regulation Status: Notification

### ***Lists of state and tribal leaking storage tanks***

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 2 CPS-SLIC sites within approximately 0.5 miles of the target property.

### ***Lists of state and tribal voluntary cleanup sites***

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 04/24/2023 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: OBSERVATION: Observed empty 55-gallon drums in a containment structure and empty tanks throughout the facility which have been stored on site for an unknown amount of time. The contents of the tanks and containers were unknown and they were not labeled at the time of the inspection. CORRECTIVE ACTION: Submit a copy of a disposal receipt showing the removal of the empty tanks and containers or a signed statement as to how they have been sold, used, or otherwise managed.

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 01/09/2023. OBSERVATION: Hazardous materials were observed on site at the time of the inspection that are not listed in the most current CERS inventory or are listed in lesser quantities. CORRECTIVE ACTION: Submit a signed statement that an updated inventory has been submitted into CERS.

Agency Contact: JOHN VAN VEEN  
Agency Telephone: Not reported  
Agency Type: Private  
SIC Code: 241  
SIC Code 2: Not reported  
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).  
Primary Waste: STORMS  
Waste Type2: N  
Waste2: Stormwater Runoff  
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).  
Secondary Waste: Solid Wastes  
Secondary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: No reclamation requirements associated with this facility.  
POTW: The facility is not a POTW.  
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Disadvantaged Community: Disadvantaged Community  
CA Enviroscreen 3 Score: 71-75%  
CA Enviroscreen 4 Score: 70-75%  
Military DOD Site: No  
Facility Project Subtype: Not reported  
RWQCB Region: SANTA ANA RWQCB (REGION 8)  
Site History: A plume of groundwater contaminated by volatile organic chemicals (VOCs) is located south of Calif. State Highway 60 within the City of Ontario. In addition to VOCs, there are also other groundwater contaminants within the plume area that require treatment. The project will consist of three wells; a pipeline to convey the groundwater from the wells to a pipeline connected to Chino Desalter Authority (CDA) II; and three new decarbonators at CDA II. plume area that require treatment.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

Telephone 206-553-8665

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991  
Date Data Arrived at EDR: 02/02/1994

Last EDR Contact: 08/15/2011  
Next Scheduled EDR Contact: 11/28/2011  
Data Release Frequency: No Update Planned

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/22/2023  
Date Data Arrived at EDR: 07/06/2023  
Date Made Active in Reports: 07/24/2023  
Number of Days to Update: 18

Data Release Frequency: Quarterly

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2023  
Date Data Arrived at EDR: 06/23/2023  
Date Made Active in Reports: 09/20/2023  
Number of Days to Update: 89

Source: Environmental Protection Agency  
Telephone: 703-603-8704  
Last EDR Contact: 06/23/2023  
Next Scheduled EDR Contact: 10/09/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/22/2023  
Date Data Arrived at EDR: 07/06/2023  
Date Made Active in Reports: 07/24/2023  
Number of Days to Update: 18

Source: EPA  
Telephone: 800-424-9346  
Last EDR Contact: 09/01/2023  
Next Scheduled EDR Contact: 10/23/2023  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: 800-424-9346
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 09/01/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/23/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 07/24/2023	Source: EPA
Date Data Arrived at EDR: 07/31/2023	Telephone: 800-424-9346
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023

	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/25/2023	Source: Department of the Navy
Date Data Arrived at EDR: 05/31/2023	Telephone: 843-820-7326
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 54	Next Scheduled EDR Contact: 11/20/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695

Next Scheduled EDR Contact: 11/06/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 04/24/2023

Date Data Arrived at EDR: 04/25/2023

Date Made Active in Reports: 07/13/2023

	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 04/17/2023	Source: CalEPA
Date Data Arrived at EDR: 04/18/2023	Telephone: 916-323-2514
Date Made Active in Reports: 07/11/2023	Last EDR Contact: 07/18/2023
Number of Days to Update: 84	Next Scheduled EDR Contact: 10/30/2023
	Data Release Frequency: Quarterly

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/22/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 05/23/2023	Telephone: 202-307-1000
Date Made Active in Reports: 07/10/2023	Last EDR Contact: 08/21/2023

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## Records of Emergency Release Reports

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 06/19/2023	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 06/23/2023	Telephone: 202-366-4555
Date Made Active in Reports: 09/20/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 89	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## CHMIRS: California Hazardous Material Incident Report System

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 04/15/2023	Source: Office of Emergency Services
Date Data Arrived at EDR: 04/28/2023	Telephone: 916-845-8400
Date Made Active in Reports: 07/14/2023	Last EDR Contact: 07/18/2023
Number of Days to Update: 77	Next Scheduled EDR Contact: 10/30/2023
	Data Release Frequency: Semi-Annually

## LDS: Land Disposal Sites Listing (GEOTRACKER)

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 06/05/2023	Source: State Water Quality Control Board
Date Data Arrived at EDR: 06/05/2023	Telephone: 866-480-1028
Date Made Active in Reports: 08/25/2023	Last EDR Contact: 09/06/2023
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/18/2023
	Data Release Frequency: Quarterly

## MCS: Military Cleanup Sites Listing (GEOTRACKER)

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 06/05/2023	Source: State Water Resources Control Board
Date Data Arrived at EDR: 06/05/2023	Telephone: 866-480-1028
Date Made Active in Reports: 08/25/2023	Last EDR Contact: 09/06/2023
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/18/2023
	Data Release Frequency: Quarterly

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch
Date Data Arrived at EDR: 01/03/2013	Telephone: N/A
Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 07/31/2023
Number of Days to Update: 88	Next Scheduled EDR Contact: 11/13/2023
	Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

Next Scheduled EDR Contact: 12/11/2023  
Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995  
Date Made Active in Reports: 08/07/1995

	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset, as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

## HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

Date of Government Version: 06/29/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/29/2023	Telephone: 916-440-7145
Date Made Active in Reports: 09/19/2023	Last EDR Contact: 06/29/2023
Number of Days to Update: 82	Next Scheduled EDR Contact: 10/16/2023
	Data Release Frequency: Quarterly

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2021	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 07/05/2022	Telephone: 916-255-1136

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 02/11/2021	Source: RWQCB, Central Valley Region

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

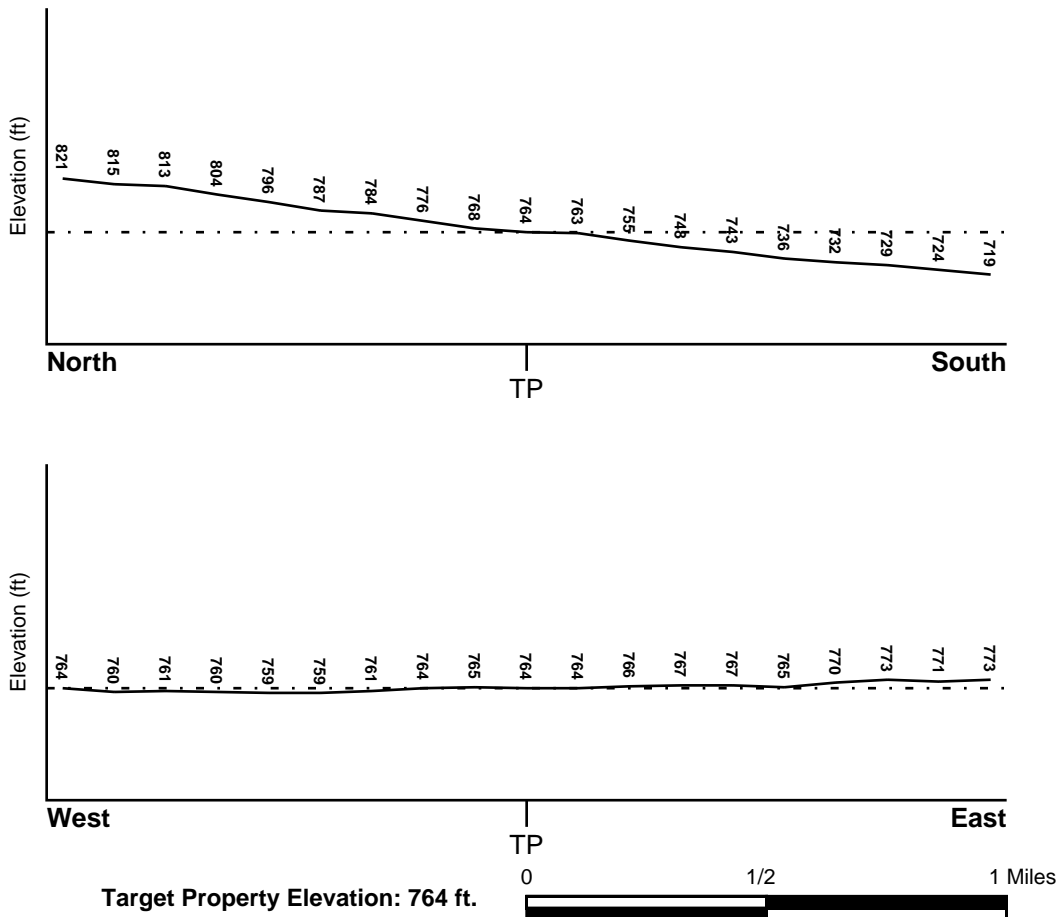

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8638H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8639H	FEMA FIRM Flood data

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### *Site-Specific Hydrogeological Data\*:*

Search Radius: 1.25 miles  
Status: Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### Soil Map ID: 2

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed

## EXECUTIVE SUMMARY

that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>MAPLE EARLY EDUCATIO</b> Status: No Further Action Facility Id: 36010047	<b>2547 EAST RIVERSIDE</b>	<b>NE 1/4 - 1/2 (0.371 mi.)</b>	<b>7</b>	<b>10</b>

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF: A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>ARTESIA SAWDUST PROD</b> Database: SWF/LF (SWIS), Date of Government Version: 05/08/2023 Facility ID: 36-AA-0426 Facility ID: 36-AA-0447 Operational Status: Active Regulation Status: Notification	<b>13434 SOUTH ONTARIO</b>	<b>S 1/4 - 1/2 (0.381 mi.)</b>	<b>8</b>	<b>11</b>

### ***Lists of state and tribal leaking storage tanks***

CPS-SLIC: A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 2 CPS-SLIC sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>SOUTH ARCHIBALD TCE</b> Database: CPS-SLIC, Date of Government Version: 06/05/2023 Facility Status: Open - Site Assessment Global Id: T10000004658	<b>EAST RIVERSIDE DRIVE</b>	<b>ENE 1/4 - 1/2 (0.471 mi.)</b>	<b>9</b>	<b>11</b>
<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>CHINO AVE LLC</b> Database: CPS-SLIC, Date of Government Version: 06/05/2023	<b>9510 CHINO AVENUE</b>	<b>SE 1/4 - 1/2 (0.258 mi.)</b>	<b>B5</b>	<b>10</b>

## EXECUTIVE SUMMARY

Facility Status: Open - Remediation  
Global Id: T10000019836

### ***Lists of state and tribal voluntary cleanup sites***

VCP: A review of the VCP list, as provided by EDR, and dated 04/24/2023 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>FORESTAR COUNTRYSIDE</b> Status: Certified Facility Id: 60002726	<b>9581 CHINO AVENUE</b>	<b>SE 1/4 - 1/2 (0.297 mi.)</b>	<b>B6</b>	<b>10</b>

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Other Ascertainable Records***

San Bern. Co. Permit: A review of the San Bern. Co. Permit list, as provided by EDR, and dated 05/09/2023 has revealed that there is 1 San Bern. Co. Permit site within approximately 0.25 miles of the target property.

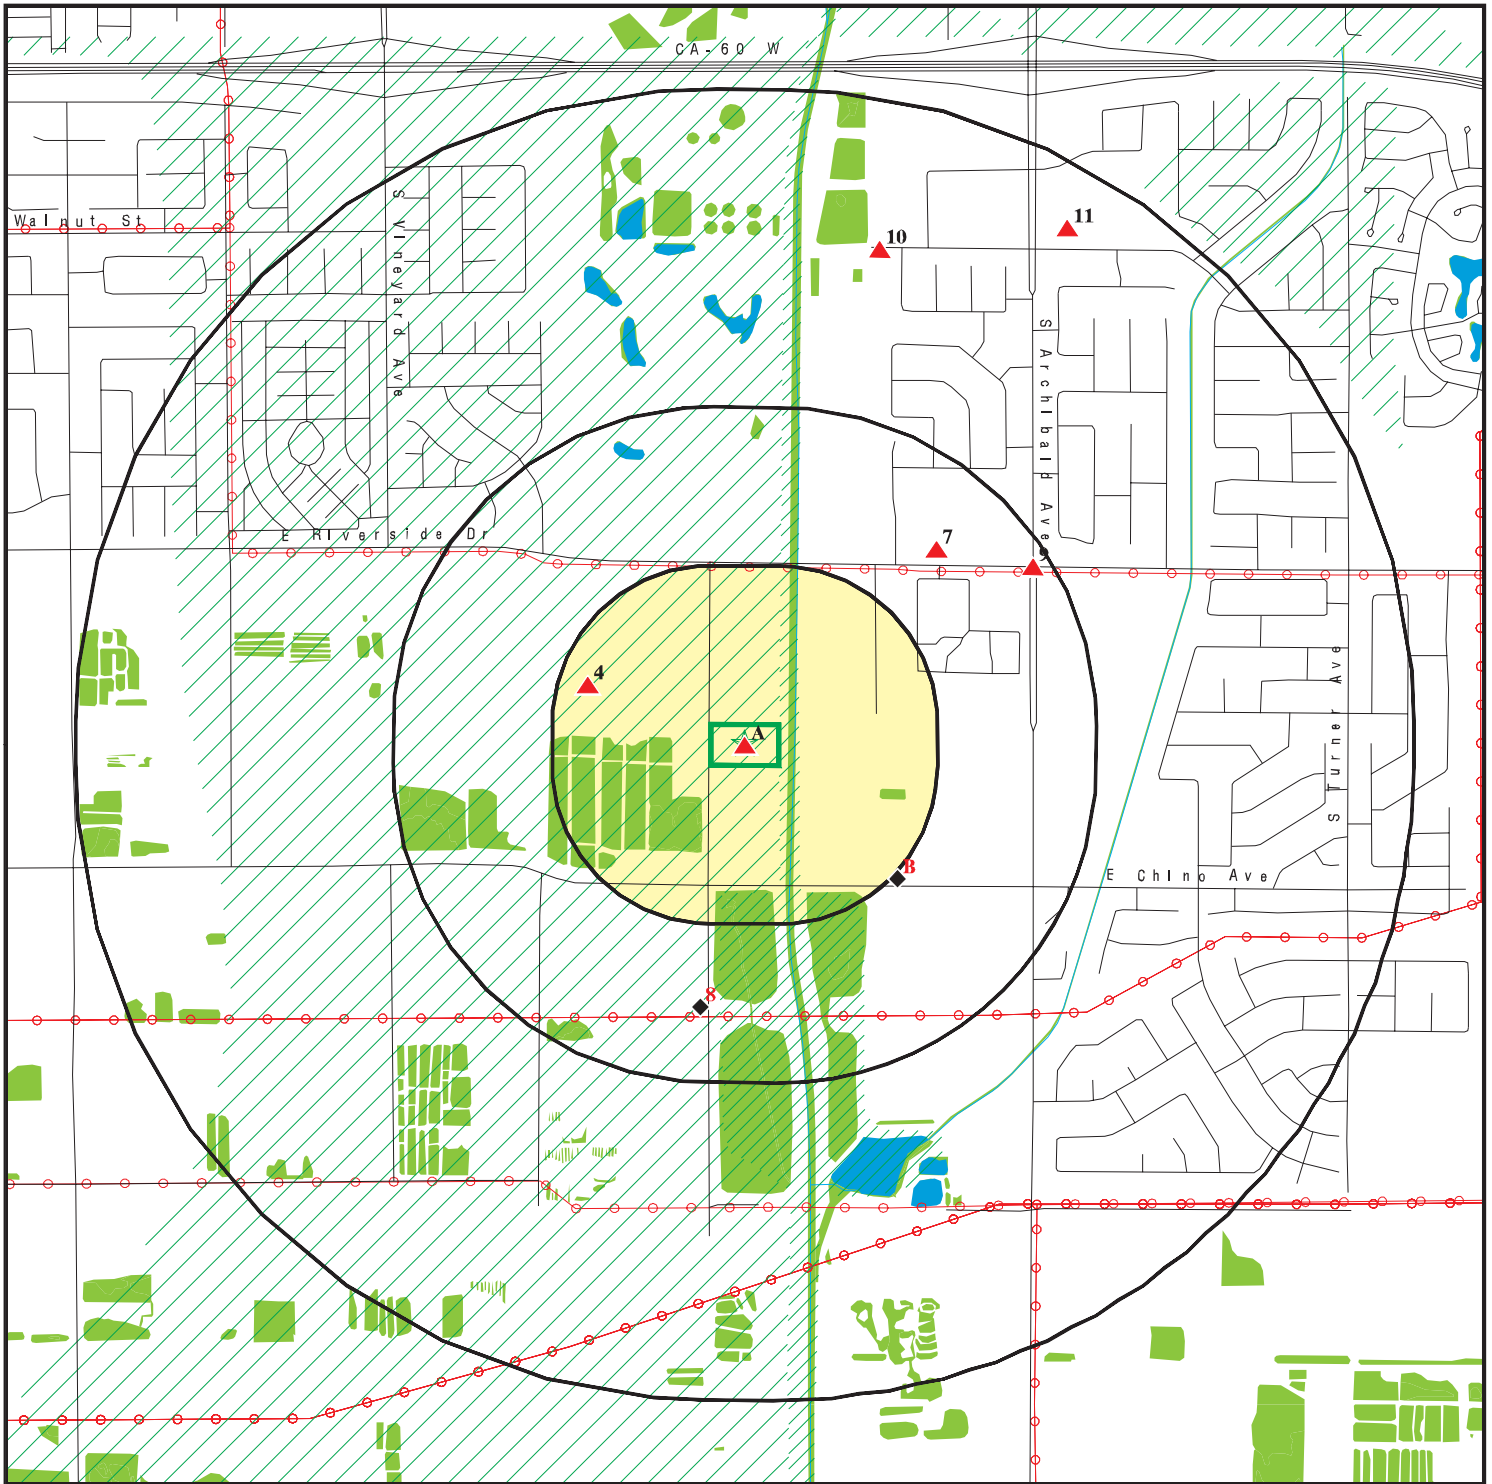

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>LEGEND DAIRY FARMS #</b> Facility Status: ACTIVE Facility Status: INACTIVE Facility Id: FA0000413	<b>9155 E RIVERSIDE DR</b>	<b>WNW 1/8 - 1/4 (0.204 mi.)</b>	<b>4</b>	<b>9</b>

Count: 3 records.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

CITY OF ONTARIO - SANCHEZ FAMILY TRUST  
13115 ONTARIO AVENUE  
ONTARIO, CA 91761

### TARGET PROPERTY COORDINATES

Latitude (North): 34.015074 - 34° 0' 54.27"  
Longitude (West): 117.60111 - 117° 36' 4.00"  
Universal Tranverse Mercator: Zone 11  
UTM X (Meters): 444497.0  
UTM Y (Meters): 3763795.8  
Elevation: 764 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map: 12015973 GUASTI, CA  
Version Date: 2018

South Map: 12014834 CORONA NORTH, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

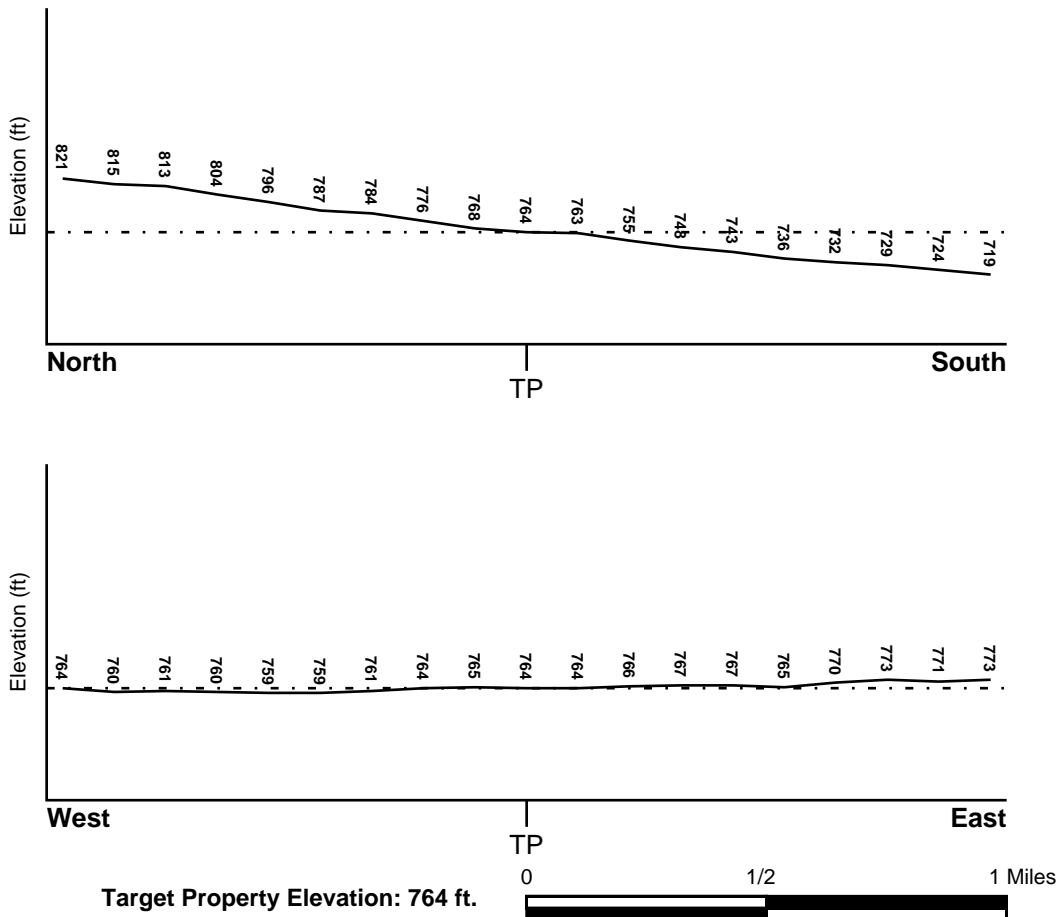

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8638H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8639H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GUASTI	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

### Soil Map ID: 2

Soil Component Name: HILMAR

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	22 inches	59 inches	stratified loamy sand to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

# Instructions for Completing the Underground Storage Tank - Facility Form

## GENERAL INFORMATION

This form was formerly known as SWRCB Form A.

Complete the UST - Facility page for all new permits, permit changes or any facility information changes. This page must be submitted within 30 days of permit or facility information changes, unless approval is required before making any changes. Submit one UST - Facility page per facility, regardless of the number of tanks located at the site.

As part of the application, the tank owner must submit a scaled facility plot plan to the local agency showing the location of the USTs with respect to buildings and landmarks, a description of the tank and piping leak detection monitoring program, and, for tanks containing petroleum, documentation showing compliance with state financial responsibility requirements.

## FORM INSTRUCTIONS

Check the box that indicates the reason for submittal. Only one form per facility is required.

## INSTRUCTIONS

### *I. Facility /Site Information*

1. Enter your Facility ID Number, if known. Otherwise, leave blank. This number is assigned by the CUPA and is the last 6 digits of the facility's establishment number (which appears on the CUPA permit.)
3. Enter the name of the business, as it appears on the Business Activities Form.  
Enter the physical address (no PO Boxes) for the site as it appears on the Business Activities Form. It should be the same address as the location address on business emergency/contingency plan.
401. Enter the nearest cross street (including Suffix - Ave., Ln., St., etc.) The cross street must be one that appears in a Thomas Guide.
402. Check the box that most closely describes the facility owner. NOTE: if the facility owner is a government agency you must enter the name of the agency point of contact in item 406.
403. Check the box that best describes the type of facility at which the UST(s) are located.
404. Enter the number of USTs on site. Do NOT include above ground storage tanks.
405. If the facility or site is located on an Indian Reservation or Indian Trust Lands check the "YES" box.

### *II. Property Owner Identification*

407. Enter the name of the legal owner of the property. If there are more than one property owner, enter the primary owner and list all additional owners on a separate sheet of paper and attach it to this form.
408. Enter the phone number where the primary property owner can be contacted.
- 409 - Enter the mailing address for the primary property owner. If there are more than one property owner, list all additional owner addresses
412. on a separate sheet of paper and attach it to this form.
413. Check the box that best describes the property owner.

### *III. Tank Owner Information*

414. Enter the name of the UST owner. The UST owner is the person or entity that legally owns the UST system, not necessarily the person or entity that operates the UST system.
415. Enter the phone number where the UST system owner can be contacted.
- 416 - Enter the mailing address for the UST owner.
- 419.
420. Check the box that best describes the UST owner.

### *IV. Board of Equalization UST Storage Fee Account Number*

This is the number that the State Board of Equalization (BOE) assigns you in order to assess the fuel you have in your UST(s). You are required to have this number prior to submitting your application. If you do not have a BOE number or if you have any questions regarding the fee or exemptions call BOE at (916) 323-9555.

### *V. Petroleum UST Financial Responsibility*

Check the box with best identifies the mechanism used by the UST owner and/or operator to meet the Federal and State financial responsibility requirements. USTs owned by federal and state agencies and non-petroleum USTs are exempt from this requirement.

### *VI. Legal Notification and Mailing Address*

Check the box(es) that indicates where you want any legal notifications and mailings to be sent.

**IF YOU HAVE ANY QUESTIONS CONTACT YOU DISTRICT INSPECTOR AT (909) 387-3080**

# Instructions for Completing the Underground Storage Tank - Tank Page 1

## GENERAL INFORMATION

- This form was formerly known as SWRCB Form B
- One form must be completed for EACH Underground Storage Tank (UST). For compartmentalized tanks, each compartment is considered a separate tank and requires completion of separate tank pages.
- A monitoring plan must be submitted with your UST pages.

## DEFINITIONS

The following definitions of specific terms from CCR Title 23 and CHSC §25281 are included to assist you in completing this form:

- "Owner" means the owner of an underground storage tank. This is often the property owner.
- "Operator" means any person in control of, or having daily responsibility for, the daily operation of an underground storage tank system.

## FORM INSTRUCTIONS

Check the box that indicates the reason for submittal.

## INSTRUCTIONS

### *Facility /Site Information*

1. Enter your Facility ID Number, if known. Otherwise, leave blank. This number is assigned by the CUPA and is the last 6 digits of the facility's establishment number (which appears on the CUPA permit.)
3. Enter the name of the business, as it appears on the Business Activities Form.  
Enter the physical address (no PO Boxes) for the site as it appears on the Business Activities Form. It should be the same address as the location address on business emergency/contingency plan.
431. Indicate where the UST is located within the site if the UST is not in an immediately obvious location.
432. Enter any additional description or information regarding the UST that may further identify it.

### *I. Tank Description*

432. Enter the identification number of the UST as assigned by the owner. This ID number must correspond to the ID number listed in your Business Emergency / Contingency Plan.
433. Enter the name of the company that made the UST.
434. Indicate whether the UST is compartmentalized or a "split-tank". Each compartment is considered a separate UST. If "YES", submit a separate tank form for each compartment.
435. Indicate the date that the UST was installed.
436. Indicate the fluid capacity of the UST in gallons.
437. Indicate the number of compartments. There must be a separate tank form for each compartment.

### *II. Tank Contents*

439. Check the box that best describes the stored substance.
440. Only if you checked box 1 in item 439. Check the box that best describes the type of petroleum product stored in the UST.
441. Only if you checked a box other than 1 in item 439 - Enter the common chemical name of the substance stored in the UST.
442. Only if you checked a box other than 1 in item 439 - Enter the Chemical Abstract Service (CAS) number for the substance stored in the UST. You may find the CAS number listed in the Material Safety Data Sheet provided by your supplier.

### *III. Tank Construction*

443. Check the box that best describes the type of UST construction.
444. Check the box that best describes the material that the primary (inner) UST is made of.
445. Check the box that best describes the material that the secondary (outer) UST is made of.
446. Check the box that best describes the material used to line the primary (inner) UST, if applicable.
448. Check ALL the boxes that best describe the corrosion protection installed on your UST.
- 450.- Check ALL the boxes that describe the spill protection installed on your UST and enter the type of protection and date  
451. installed.
452. Check ALL the boxes that describe the overfill protection installed on your UST and enter the date installed.

### *IV. Tank Leak Detection*

453. For **SINGLE WALL USTs ONLY** - Check ALL the boxes that describe the leak detection used or installed on your UST.
454. For **DOUBLE WALL USTs ONLY** - Check ALL the boxes that describe the leak detection used or installed on your UST.

### *V. Tank Closure Information*

455. Enter the date that the UST was last used.
456. Enter the estimated quantity of hazardous materials left in the tank.
457. Indicate whether the UST was filled with an inert material at the time of closure in place.

This underground storage tank with a capacity of 550 gallons is in Agricultural property located on 13115 Ontario Ave. Ontario, Ca 91761. It has not been in use but I would like to use it in the near future.

Sincerely,

A handwritten signature in blue ink that reads "Edmundo Sanchez". The signature is written in a cursive style with a large, stylized 'E' and 'S'.

Edmundo Sanchez

## F A R M   B U R E A U   N E W S L E T T E R

UNDERGROUND STORAGE TANKS. Some farmers may have been billed in error. Environmental Health Services does not have all farm tanks correctly categorized. Send the bill back for correction. EHS still charges a \$20 yearly "permit to operate" on all underground tanks. Tanks within city limits of cities which adopted the original ordinance have \$95.00 on the first and \$45.00 on each additional. Upland, Ontario and Rancho Cucamonga didn't adopt an ordinance and are under state law. Agricultural constituents may want to request their city councils amend ordinances.

FARM BUREAU BYLAW AMENDMENT. October, 1986 the Board of Directors recommended changing the number of directors from twenty-one (21) to twenty-two (22) and scheduling the Women's Committee Chairman as a voting director at large. The number of directors may be changed at the next annual members meeting, Bylaw Amendments, Article XX, Section 2.

PROPOSED NATIVE TREE AND PLANT ORDINANCE. The county wants to preserve unique trees and plant resources in unincorporated areas and on property under private or public ownership. A current ordinance requires a permit to cut native trees of certain diameter and height. The new one adds eucalyptus and others, plus increases the fine schedule for unauthorized removal. A "tree expert" will determine in writing whether a permit should be issued. Farm Bureau is requesting agriculture be exempt from the provisions since the very nature of farming is usually aesthetically pleasing to urban citizens.

CALIFORNIA FARM BUREAU FEDERATION is proceeding with other agricultural groups in the development of a statewide agricultural "designated entity" to receive, process and forward to the Immigration and Naturalization Service legalization applications for illegal aliens under the new immigration law. The "designated entity" would assure a measure of confidentiality and reduce the level of intimidation against aliens. It would also assure that an adequate supply of special agricultural workers become legalized and could create loyalty and goodwill towards employers by workers. A sample format to establish an alien's case for legalization is available to members from Farm Bureau, call (714) 875-5945.

FARM BUREAU'S ANNUAL MEETING IS SCHEDULED MAY 19, 1987, SALVATORE'S, FONTANA.

CALIFORNIA WOMEN FOR AGRICULTURE will have Henry Voss, President, California Farm Bureau Federation, speaking on "How Will Prop. 65 Affect Me" at their Ag Week celebration dinner, March 18, 1987, Holiday Inn, 1200 University Avenue, Riverside. For reservations send your check, \$20 per person to Alice Daniels, 1203 California Street, Redlands, California 92374.

PAUL HARVEY, POPULAR RADIO BROADCASTER, spoke about Farm Bureau on a recent daily radio program. On Farm Bureau policy, Harvey said, "Suddenly I realized I am reading what dues-paying, grassroots Americans have always believed in and died for. In this document I read specific guidelines on family, national security, law enforcement and property rights. I am reading an American Manifesto-what we stand for-and what we will not stand for."

The Farm Bureau has everything it needs--except the numbers. As our nation's farm population dwindles, so has its clout in Washington. Then I realized you don't have to be a practicing farmer to belong to the Farm Bureau and to support its objectives. Imagine what would happen if our Bureau leadership speaking not for 3.3 million--but for 50 million Americans--could confront the compromisers."

Harvey recommended that Farm Bureau let city folks contribute to help the organization "out-maneuver, out-legislate, out-shout the homegrown ingrates and the hyphenated intruders who refuse to repledge their allegiance". "We don't need another 'organization', our nation already has too many organizations. What we need is to breathe fire into the belly of this most respected one--before the ugly crack in that grand old handmade bell gets any wider".

SUPER SWEETS, a new type sweet corn, stays fresher, is twice as high in sugar and a bit more expensive should be available this year.

210 South Riverside Avenue  
Rialto, California 92376

This is to confirm that the San Bernardino County Hazardous Materials Division has identified records that may pertain to the subject site, as described in your request for records search.

The file(s) shown below have been retrieved for review. If you wish to view the original documents, please e-mail this office at [mmolina@sbcfire.org](mailto:mmolina@sbcfire.org) or call the number at the end of this letter to arrange an appointment.

**ACTIVE PERMIT FACILITIES:** (Regulatory files for facilities with annual operating permits to maintain underground storage tanks, handle hazardous materials, and/or generate hazardous waste. Files include permits, inspections, reports, test results, correspondence, and related materials. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities still in operation).

No record of active permit facilities identified in this search.

**INACTIVE PERMIT AND/OR NON-PERMIT FACILITIES:** (Inactive regulatory files for formerly permitted facilities that maintained underground storage tanks, stored hazardous materials, and/or generated hazardous waste and/or facilities with underground storage tanks removed and/or materials and waste removed. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities no longer operating underground tanks).

**SITE REMEDIATION:** (Underground Storage Tank Clean-Up under Local Oversight Program or Voluntary Hazardous Waste Clean-Up activity under Local Jurisdiction) (documents may be included in regular active or inactive permit files listed above).

No record of site remediation identified in this search.

Records searched include permit database systems for facilities with permits as hazardous waste generators, hazardous materials handlers, and/or underground storage tanks, including inactive and/or out of business records; logs of permits issued for the removal and/or installation of underground storage tanks; records and databases pertaining to illicit dumping and releases; records of non-permitted facilities; sites undergoing remediation for contaminated soil and/or groundwater; and incidents responded to by the hazardous materials emergency response team. Records searched date back to early 1980's. Please note if a facility has completed a submission in CERS, the most recent submission can be made available for review upon request.

**Records consist of 4 file(s), approximately 3" thick combined.** To request a file review appointment or further clarification, please contact this office (909) 386-8468 or by email to [mmolina@sbcfire.org](mailto:mmolina@sbcfire.org).

## REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT

The main focus of a REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT is to determine whether there exists in San Bernardino County Fire Department (County Fire) files any record relating to contamination or reports of spills at a particular site. A Certified Hazardous Materials Records Search Finding Report should reveal whether there are any facilities at the site that are subject to current or past regulatory activity by County Fire, such as underground storage tanks, hazardous material handlers, hazardous waste generators, and EPCRA or CalARP facilities, as well as any reports of spills, incidents, complaints, or cleanup activity, that can be a useful tool in providing a history of compliance or non-compliance.

Once County Fire has completed its records search, a Certified Hazardous Materials Records Search Finding Report will be prepared and issued, which will detail all County Fire records associated with a particular site by type, date, location, and status where applicable. (Any files identified in a Certified Hazardous Materials Records Search Finding Report can be made available for copies and/or review upon request.)

If the completed records search reveals no County Fire record of hazardous material activity at the site, a Certified Hazardous Materials Records Search Finding Report will be issued, noting that "no records" were identified.

Please provide a specific site address or location description. If a situs address does not exist or cannot be found, list another type of location identifier such as Assessor Parcel Number (preferable), cross streets or intersections (c.g., NWC 5<sup>th</sup> Ave. & Main St.), and/or legal description, and if possible attach a map to this request form.

**\*\* IMPORTANT -THIS PAGE MUST BE SIGNED PRIOR TO SUBMITTAL \*\***

**DISCLAIMER:** While all attempts are made to provide accurate, current, and reliable information, County Fire recognizes the possibility of human error. Therefore, County Fire, its officers, employees, agents and volunteers, make no representations as to the accuracy, completeness or suitability of a Certified Hazardous Materials Records Search Finding Report and provides a Certified Hazardous Materials Records Search Finding Report "as is", with no warranties, express or implied, including the implied warranty of fitness for a particular purpose. In no event shall County Fire be liable for any damages of any nature whatsoever, arising out of the issuance of a Certified Hazardous Materials Records Search Finding Report. County Fire therefore assumes no liability for damages incurred directly or indirectly as a result of any errors, omissions or discrepancies in a Certified Hazardous Materials Records Search Finding Report.

**RELEASE AND INDEMNIFICATION:** In consideration for the issuance of a Certified Hazardous Materials Records Search Finding Report, I hereby release and forever discharge County Fire, its officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability in connection with County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report, including, but not limited to, claims that may arise due to the active or passive negligence of County Fire, its officers, employees, agents and volunteers.

I am familiar with the provisions of California Civil Code Section 1542, which provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I hereby expressly waive any and all rights that I may have there under. I understand and acknowledge the significance and consequence of this specific waiver of California Civil Code Section 1542 and assume full responsibility for any injuries, damages, losses or liabilities that I may hereafter discover as possibly resulting from County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report.

In further consideration for County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report, I hereby agree, for myself, my heirs, administrators, executors and assigns, that I shall indemnify, defend (with counsel approved by County) and hold harmless County Fire, its officers, employees, agents and volunteers from any and all claims, demands, actions or suits arising out of or in connection with County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report brought by any third party.

\* \* \*

I have read the above terms and conditions, including the paragraphs entitled "DISCLAIMER" and "RELEASE AND INDEMNIFICATION", and by my signature below, I affirm that I understand these terms and conditions and accept them as part of my REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT.

I hereby request a Certified Hazardous Materials Records Search Finding Report for the location described on Page 1 of this application.

- I am including payment of the initial fee of \$130.00, for the first hour of research, by check or money order, payable to San Bernardino County Fire Dept. I understand that research exceeding one hour will be billed at the rate of \$130.00 for each additional hour spent by County Fire in completing this request.
- I have faxed or emailed this request and will forward payment along with the original request form within 48 hours.

**SUBJECT: REQUEST FOR RECORDS INFORMATION**

**RE: 13115 S. Ontario Ave.  
Ontario, California**

This is to confirm that the San Bernardino County Hazardous Materials Division has located records that may pertain to the subject site, as described in your request for records search.

The file(s) listed below are available for your review. Please e-mail this office at [eking@sbcfire.org](mailto:eking@sbcfire.org) or call the number at the end of this letter to arrange an appointment.

**ACTIVE PERMITS:**

*(Regulatory files for facilities with annual operating permits to maintain underground storage tanks, storage hazardous materials, and/or generate hazardous waste. Files include permits, inspections, reports, test results, correspondence, and related materials. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities still in operation).*

No record of active facility permits

**INACTIVE PERMITS:**

*(Inactive regulatory files for formerly permitted facilities which maintained underground storage tanks, stored hazardous materials, and/or generated hazardous waste and/or facilities with underground storage tanks removed and/or materials and waste removed. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities no longer operating underground tanks).*

## **SUBJECT: AGRICULTURAL UNDERGROUND STORAGE TANKS**

San Bernardino County Fire Department recently mailed information to all owners of agricultural underground storage tank(s) (AUST). The purpose of this follow up letter and the attached AUST certificate of compliance is to obtain current information regarding the status of existing AUSTs. In 1984, State Law exempted AUSTs from regulation if they contained motor vehicle fuels (gas, diesel, and heating oil). In 1987, State Law was amended to exempt AUST's 1100 gallons in capacity or less. AUSTs larger than 1100 or any size AUST containing waste or materials other than motor vehicle fuels are not exempt and are required to meet all current UST regulations.

Your cooperation and assistance is appreciated. Please complete the attached AUST certificate of compliance and return it within 30 days to:

COUNTY FIRE DEPARTMENT  
HAZARDOUS MATERIALS DIVISION  
FIELD SERVICES/ENVIRONMENTAL PROTECTION  
385 NORTH ARROWHEAD AVE, 2<sup>ND</sup> FLOOR  
SAN BERNARDINO, CA 92415-0153

If you have any questions or if you need further assistance, please contact your local inspector at (909) 387-3082.

**B. DOUGLAS SNYDER, CUPA PROGRAM MANAGER**
