**NOTICE OF PREPARATION AND SCOPING MEETING MATERIALS**

**NOP**

CLERK OF THE BOARD

Received on: 12/08/2020

Remove on: 01/20/2020

City of Ontario  
Planning Department  
303 East "B" Street  
Ontario, California  
Phone: (909) 395-2036  
Fax: (909) 395-2420

California Environmental Quality Act  
**Notice of Preparation**

**TO:** Property Owners, Responsible Agencies & Interested Parties  
**FROM:** City of Ontario, 303 East "B" Street, Ontario, CA 91764  
**SUBJECT:** NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT.

NOTICE IS HEREBY GIVEN that the City of Ontario will be the Lead Agency and will prepare an environmental impact report for the project identified below. We need to know the views of your agency as to the scope and content of the environmental information, which is germane to your agency's statutory responsibilities in connection with the proposed project. Your agency will need to use the EIR prepared by our agency when considering your permit or other approval for the project.

The project description, location, and the potential environmental effects are summarized herein. A copy of the Expanded Notice of Preparation (NOP) is available at City Hall, Planning Department, 303 East "B" Street, Ontario, CA 91764, and on the City's website at <http://www.ontarioca.gov>.

The proposed project  is,  is not, considered a project of statewide, regional, or area-wide significance. The proposed project  will,  will not, affect highways or other facilities under the jurisdiction of the State Department of Transportation. A scoping meeting  will,  will not, be held by the lead agency. A project **scoping meeting** will be held on **Monday, December 21, 2020 at 6:00 PM** via Zoom.

Pursuant to Governor Gavin Newsom's executive order N-29-20, the San Bernardino County Department of Public Health requirements, and to ensure the health and safety of our residents by limiting contact that could spread the COVID-19 virus, there will be no members of the public in attendance of the scoping meeting. Members of the public, project applicants and consultants, and staff will participate in this meeting via Zoom.

In place of in-person attendance, members of the public can observe and offer comment at this meeting remotely in one of three ways:

1. **PROVIDE PUBLIC TESTIMONY DURING THE MEETING:** The Zoom meeting link and call-in phone number will be made available on the City's website a minimum of 72 hours prior to the hearing, which can be accessed at <http://www.ontarioca.gov/planning>
2. **E-MAIL:** Please e-mail your comments to the City Contact no later than 4:00 PM on the day of the meeting.
3. **TELEPHONE BEFORE THE MEETING:** Please call the City Contact prior to and no later than 4:00 PM on the day of the meeting to submit your comments on the project.

Any members of the public who require special assistance or a reasonable accommodation to participate in the scoping meeting may contact the project planner or the Planning Department at (909) 395-2036, 72 hours prior to the meeting.

If you do not wish to participate in the scoping meeting, but would like to comment on the project, please send your comments, including contact information, to Alexis Vaughn, Assistant Planner, Ontario Planning Department, 303 East "B" Street, Ontario, CA 91764, (909)395-2036 or [avaughn@ontarioca.gov](mailto:avaughn@ontarioca.gov) no later than **Monday, January 4, 2021**.

**Project Title/File No.:** South Ontario Logistics Center Specific Plan (File No. PSP19-001)

**Project Location:** South Ontario Logistics Center Specific Plan (Specific Plan) EIR is located east of the existing right-of-way for the future Campus Avenue extension, north of Merrill Avenue, south of Eucalyptus Avenue and west of Grove Avenue in Ontario, California, 91764. The project consists of 23 parcels: APNs 1054-071-01, -02; 1054-081-03; 1054-091-01, -02; 1054-101-01, -02; 1054-231-01, -02; 1054-241-01, 02; 1054-321-01, -02; 1054-311-01, -02; 1054-051-01, -02; 1054-061-01, -02; 1054-251-01, -02 and 1054-301-01, -02. Regional access is available to the Project site via State Route 83 (CA-83) approximately one mile to the west, State Route 60 (CA-60) approximately

three miles to the north, Interstate 15 (I-15) approximately five miles to the east, and State Route 91 (CA-91) approximately eight miles to the south.

The project site is on an existing operational dairy farm with several residential structures, dairy barns, storage structures and feed storage barns, and numerous livestock corrals. To the north, east, and west of the proposed Project site exists mostly rural farmland, and to the south is the Chino Airport within the City of Chino.

**Project Description:** The Project includes a General Plan Amendment, Specific Plan, Development Agreement, Development Plan(s), and Tentative Parcel Map(s) to allow development of approximately 5.4 million square feet (SF) of industrial and business park land uses on the 222.18-acre site, as described further below. The Project is proposed in two phases. Phase I, comprised of Planning Areas 1 and 2, would allow approximately 3,172,780 SF of industrial and business park uses. Phase I will be evaluated at a project-specific level in the EIR. The Development Plan for Phase I currently proposes the construction of eight industrial concrete tilt-up industrial/warehouse buildings totaling 2,926,955 SF of industrial/warehouse and ancillary office space. The EIR will also evaluate, at a programmatic level, the potential future development of Phase II, which is comprised of Planning Areas 3, 4 and 5 (no specific development proposals have been identified for the Phase II area). The development of Phase II including construction phasing and timing would be determined based on market conditions and other factors. The EIR will evaluate the total maximum allowable development in the Specific Plan, which is 5,412,591 SF of industrial and business park land uses and associated onsite and offsite infrastructure improvements. The proposed General Plan Amendment would amend the City's General Plan Land Use Map by changing the existing land designations of the project site from 159.04 acres of "Low Medium Density Residential" (5.1-11 du/ac) and 63.14 acres of "Business Park" (0.6 FAR) to 181.04 acres of "General Industrial," (0.55 FAR) and 41.14 acres of "Business Park," (0.6 FAR) to facilitate the development of the Project site. The Specific Plan proposes a comprehensive land use plan, circulation plan, streetscape plan, infrastructure service plan, grading plan, maintenance plan, phasing plan, design guidelines, development regulations, and implementation measures to guide the development of the five Planning Areas.

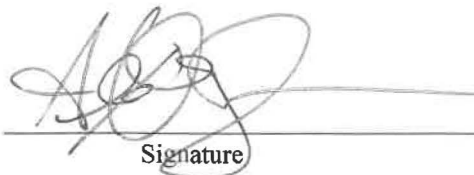

**Environmental Issues:** An Initial Study has not been prepared for the Project as the City has determined that an EIR will clearly be required for the Project, which is in the discretion of the Lead Agency as set forth in State CEQA Guidelines Section 15063(a). Accordingly, the following environmental topics will be analyzed within the forthcoming EIR:

- Aesthetics;
- Agriculture and Forestry Resources;
- Air Quality;
- Biological Resources;
- Cultural Resources;
- Energy;
- Geology and Soils;
- Greenhouse Gas Emissions;
- Hazards/Hazardous Materials;
- Hydrology/Water Quality;
- Land Use and Planning;
- Mineral Resources
- Noise;
- Population/Housing;
- Public Services;
- Recreation
- Transportation;
- Tribal Cultural Resources;
- Utilities/Service Systems; and
- Wildfire.

**Public Review Period:** The City welcomes input and comments regarding preparation of the EIR. The NOP and Expanded NOP are available for a 30-day public review period **beginning December 4, 2020 and ending January 4, 2021**. Pursuant to State CEQA Guidelines Section 15082, responsible and trustee agencies and other interested parties, including members of the public, must submit any comments in response to this notice no later than 30 days after receipt of the notice.

**Project Sponsor:** Bill Goltermann, Principal, Real Estate Development Associates, 4450 MacArthur Blvd., Suite 100, Newport Beach, CA 92660.

**Consulting firm retained to prepare Draft EIR:** Kimley-Horn & Associates Inc., 3880 Lemon Street, Suite 420, Riverside, CA 92501; Contact: Kevin Thomas (951) 543-9868.

## **NEWSPAPER NOTICE**

# Advertising Order Confirmation

## NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT AND SCOPING HEARING TO BE PREPARED BY THE CITY OF ONTARIO FOR THE SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN (FILE NO. PSP19-001) AND RELATED GENERAL PLAN AMENDMENT (FILE NO. PGPA19-004)

Notice is hereby given that the City of Ontario (Latitude 34°03'N / Longitude 117°37'W) will be the Lead Agency and will prepare an Environmental Impact Report (EIR) for the project identified below. Interested public agencies are invited to comment on the scope of the EIR. A copy of an expanded Notice of Preparation is available for review at the following locations or by or may be viewed online at <https://www.ontarioca.gov/Planning>.

City Hall, Planning Department    Ontario Main Library  
303 East "B" Street                    215 East "C" Street  
Ontario, CA 91764                    Ontario, CA 91764

**Project Location:** South Ontario Logistics Center Specific Plan (Specific Plan) EIR is located east of the existing right-of-way for the future Campus Avenue extension, north of Merrill Avenue, south of Eucalyptus Avenue and west of Grove Avenue in Ontario, California, 91764. The project consists of 23 parcels: APNs 1054-071-01, -02; 1054-081-03; 1054-091-01, -02; 1054-101-01, -02; 1054-231-01, -02; 1054-241-01, 02; 1054-321-01, -02; 1054-311-01, -02; 1054-051-01, -02; 1054-061-01, -02; 1054-251-01, -02, and 1054-301-01, -02. Regional access is available to the Project site via State Route 83 (CA-83) approximately one mile to the west, State Route 60 (CA-60) approximately three miles to the north. Interstate 15 (I-15) approximately five miles to the east and State Route 91 (CA-91) approximately eight miles to the south.

The project site is on an existing operational dairy farm with several residential structures, dairy barns, storage structures and feed storage barns, and numerous livestock corrals. To the north, east, and west of the proposed Project site, exists mostly rural farmland, and to the south is the Chino Airport within the City of Chino.

**Project Description:** The Project includes a General Plan Amendment, Specific Plan, Development Agreement, Development Plan(s), and Tentative Parcel Map(s) to allow development of approximately 5.4 million square feet (SF) of industrial and business park land uses on the 222.18-acre site, as described further below. The Project is proposed in two phases. Phase I, comprised of Planning Areas 1 and 2, would allow approximately 3,172,780 SF of industrial and business park uses. Phase I will be evaluated at a project-specific level in the EIR. The Development Plan for Phase I currently proposes the construction of eight industrial concrete tilt-up industrial/warehouse buildings totaling 2,926,955 SF of industrial/warehouse and ancillary office space. The EIR will also evaluate, at a programmatic level, the potential future development of Phase II, which is comprised of Planning Areas 3, 4, and 5 (no specific development proposals have been identified for the Phase II area). The development of Phase II, including construction phasing and timing, would be determined based on market conditions and other factors. The EIR will evaluate the total maximum allowable development in the Specific Plan, which is 5,412,591 SF of industrial and business park land uses and associated onsite and offsite infrastructure improvements. The proposed General Plan Amendment would amend the City's General Plan Land Use Map by changing the existing land use designations of the project site from 159.04 acres of "Low Medium Density Residential" (5.1-11 du/ac) and 63.14 acres of "Business Park" (0.6 FAR), to 181.04 acres of "General Industrial" (0.55 FAR) and 41.14 acres of "Business Park" (0.6 FAR), to facilitate the development of the Project site. The Specific Plan proposes a comprehensive land use plan, circulation plan, streetscape plan, infrastructure service plan, grading plan, maintenance plan, phasing plan, design guidelines, development regulations, and implementation measures to guide the development of the five Planning Areas.

**Environmental Issues:** An Initial Study has not been prepared for the Project as the City has determined that an EIR will clearly be required for the Project, which is in the discretion of the Lead Agency as set forth in CEQA Guidelines Section 15063(a). Accordingly, the following environmental topics will be analyzed within the forthcoming EIR:

- Aesthetics
- Agriculture and Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology and Soils
- Greenhouse Gas Emissions
- Hazards/Hazardous Materials
- Hydrology/Water Quality
- Land Use and Planning
- Mineral Resources
- Noise
- Population/Housing
- Public Services
- Recreation
- Transportation
- Tribal Cultural Resources
- Utilities/Service Systems
- Wildfire

The EIR will address the short and long-term effects of the project on the environment. It will also evaluate the potential for the project to cause direct and indirect growth, including

# Advertising Order Confirmation

will also evaluate the potential for the project to cause direct and indirect growth-inducing impacts, as well as cumulative impacts. Alternatives to the proposed project will be evaluated that may reduce impacts that are determined to be significant in the EIR. Mitigation measures may be proposed for those impacts that are determined to be significant. A mitigation monitoring program will also be developed as required by Section 15097 of the CEQA Guidelines.

The environmental determination in this Notice of Preparation is subject to a 30-day public review period per Public Resources Code Section 21080.4 and CEQA Guidelines Section 15082. Public agencies, interested organizations, and individuals have the opportunity to comment on the proposed project and identify the environmental issues, which have the potential to be affected by the project, and should therefore be addressed further in the EIR.

A scoping meeting will be held by the City of Ontario on **Monday, December 21, 2020, at 6:00 PM** via Zoom.

Pursuant to Governor Gavin Newsom's executive order N-29-20, the San Bernardino County Department of Public Health requirements, and to ensure the health and safety of our residents by limiting contact that could spread the COVID-19 virus, there will be no members of the public in attendance of the scoping meeting. Members of the public, project applicants and consultants, and staff will participate in this meeting via Zoom.

In place of in-person attendance, members of the public can observe and offer comment at this meeting remotely in one of three ways:

1. **PROVIDE PUBLIC TESTIMONY DURING THE MEETING:** The Zoom meeting link and call-in phone number will be made available on the City's website a minimum of 72 hours prior to the hearing, which can be accessed at <http://www.ontarioca.gov/planning>
2. **E-MAIL:** Please e-mail your comments to the City Contact no later than 4:00 PM on the day of the meeting.
3. **TELEPHONE BEFORE THE MEETING:** Please call the City Contact prior to no later than 4:00 PM on the day of the meeting to submit your comments on the project.

If you do not wish to participate in the scoping meeting but would like to comment on the project, please send your comments, including contact information, to Alexis Vaughn, Assistant Planner, Ontario Planning Department, 303 East "B" Street, Ontario, CA 91764, (909) 395-2416 or [avaughn@ontarioca.gov](mailto:avaughn@ontarioca.gov), no later than Monday, January 18, 2021.

**PUBLIC SCOPING MEETING PRESENTATION**

City of Ontario

South Ontario Logistics Center  
Specific Plan EIR

December 21, 2020

Scoping Meeting

# Purpose of Scoping Meetings

- ❑ Early public consultation
- ❑ Learn about environmental concerns regarding the project from potentially affected agencies and individuals
- ❑ Opportunity to identify and address issues that might otherwise arise late in the process
- ❑ Help focus the EIR's content and identify alternatives

# CEQA Process

- ❑ The California Environmental Quality Act (CEQA) is required for discretionary approvals.
- ❑ Purpose is to inform decision makers and the public of potential effects of project approval.
- ❑ Expanded NOP provides consultation and focuses subsequent efforts.

# Roles and Responsibilities

<i>Developer</i>	Design and submit development proposal
<i>City Staff</i>	Review and evaluate Developer's project Manage EIR Consultant Make recommendations to Decision Makers
<i>Environmental Consultant</i>	Evaluate impacts of project approval on the existing environment
<i>Decision Makers</i>	Planning Commission and City Council Evaluate and approve or disapprove project

# The Project

- ❑ Proposes a mix of industrial and business park land uses on approximately 222.18 acres.
  
- ❑ Proposes development and operation of up to:
  - ❑ 5,412,591 square feet of industrial/warehouse uses with ancillary office space
  - ❑ 3,172,780 square feet of industrial/business park uses in Phase 1
  - ❑ 2,239,811 square feet of development in Phase 2
  
- ❑ Located in the City of Ontario, bound by Eucalyptus Avenue to the north, Merrill Avenue to the south, and Campus Avenue and Grove Avenue to the west and east.

# Land Use Plan – Planning Areas

Proposed Land Use

Existing Land Use

# Proposed Development by Planning Area

Planning Area	Maximum Floor Area Ratio <sup>1</sup>	Site Acreage	Maximum Building Square Footage
<b>Phase 1</b>			
Planning Area 1: Business Park	0.60	23.0	601,128 SF
Planning Area 2: General Industrial	0.55	107.34	2,571,652 SF
<b>Subtotal</b>		<b>130.34</b>	<b>3,172,780 SF</b>
<b>Phase 2</b>			
Planning Area 3: Business Park	0.60	18.14	474,107 SF
Planning Area 4: General Industrial	0.55	56.3	1,348,835 SF
Planning Area 5: General Industrial	0.55	17.4	416,869 SF
<b>Subtotal</b>			<b>2,239,811 SF</b>
<b>TOTAL</b>		<b>222.18</b>	<b>5,412,591</b>

**Notes:**

1. Provided the GPA application submitted in conjunction with this Specific Plan to designate PAs 1 and 3 as Business Park and PAs 2,4, and 5 as General Industrial is approved.
2. The Project EIR as proposed is reviewing square footages and will be addressing the maximum allowable SF, per The Ontario Plan (TOP) thresholds. The FAR may be increased to the top max levels of 0.60 and 0.55 for BP and IG respectively with a Specific Plan Amendment and appropriate CEQA analysis.

# The Project

- ❑ Discretionary Approvals Necessary:
  - ❑ Certification of the South Ontario Logistics Center Specific Plan EIR;
  - ❑ Approval of Policy Plan (Land Use) Amendments;
  - ❑ Adoption of the South Ontario Logistics Center Specific Plan;
  - ❑ Approval of SB330 Replacement Site Upzoning
  - ❑ Approval of Parcel Map/Development Plan (Phase I);
  - ❑ Williamson Act Contract cancellation; and
  - ❑ Adoption of a Development Agreement.

# SB 330 Sites

Alternative TOP Land Use

# EIR Focus Areas

Based on the NOP and public scoping, the following topics will be addressed in the Project EIR:

- Aesthetics
- Agriculture/ Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology and Soils
- GHG Emission
- Hazards/ Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Mineral Resources
- Noise
- Population and Housing
- Public Services
- Recreation
- Transportation
- Tribal Cultural Resources
- Utilities and Service Systems
- Wildfire

# Opportunities for Public Involvement

- ❑ Comments on the NOP will be accepted through January 18, 2021.
- ❑ 45-day Draft EIR comment period is anticipated to run during Summer 2021.
- ❑ Responses to EIR comments will be provided to public agencies not less than ten days prior to public hearings.
- ❑ Notices will be provided on dates of Planning Commission and City Council hearings on Final EIR.

# Questions or Comments?

If you have further questions or require additional information, please contact Alexis Vaughn, Assistant Planner, at [AVaughn@ontarioca.gov](mailto:AVaughn@ontarioca.gov).

## CITY of CHINO

January 4, 2020

Alexis Vaughn  
City of Ontario, Planning Department  
303 East B Street  
Ontario, CA 91764

**RE:** Notice of Preparation of a Draft Environmental Impact Report; South Ontario Logistics Center Specific Plan

Dear Ms. Vaughn,

Thank you for the opportunity to review the Notice of Preparation of a DEIR for the South Ontario Logistics Center Specific Plan. Based upon our review, the City of Chino has the following comments:

### Land Development/Engineering

1. The City would like to collaborate and review infrastructure-related improvements (WQMP, drainage, potable water demand, sewer, etc.) that have downstream and potential off-site impacts to the City of Chino. Additionally, mitigation items may already exist on other EIR's for other Ontario projects, and a clear matrix showing overlap and methods to construct should be implemented.
2. The City would like to review the project's traffic study scoping agreement when it becomes available in order to evaluate trip generation, distribution, study intersections and corridors in and around the City of Chino. The City of Chino would also like to coordinate with the City of Ontario on project impacts from this project and any future project in either agency and establish an agreement for mutual collection and distribution of project fair share contributions towards impacts in the other's jurisdiction.

If you have any questions, please contact Principal Planner Michael Hitz by email at [mhitz@cityofchino.org](mailto:mhitz@cityofchino.org), or by phone at 909-334-3448.

Sincerely,

Warren Morelion, AICP  
City Planner

cc: Michael Hitz, Principal Planner

**Notice of Preparation of a Draft Environmental Impact Report for  
South Ontario Logistics Center Specific Plan (Proposed Project)**

South Coast Air Quality Management District (South Coast AQMD) staff appreciates the opportunity to comment on the above-mentioned document. Our comments are recommendations on the analysis of potential air quality impacts from the Proposed Project that should be included in the Draft Environmental Impact Report (EIR). Please send a copy of the Draft EIR upon its completion and public release directly to South Coast AQMD as copies of the Draft EIR submitted to the State Clearinghouse are not forwarded. **In addition, please send all appendices and technical documents related to the air quality, health risk, and greenhouse gas analyses and electronic versions of all emission calculation spreadsheets, and air quality modeling and health risk assessment input and output files (not PDF files). Any delays in providing all supporting documentation for our review will require additional review time beyond the end of the comment period.**

**CEQA Air Quality Analysis**

Staff recommends that the Lead Agency use South Coast AQMD's CEQA Air Quality Handbook and website<sup>1</sup> as guidance when preparing the air quality and greenhouse gas analyses. It is also recommended that the Lead Agency use the CalEEMod<sup>2</sup> land use emissions software, which can estimate pollutant emissions from typical land use development and is the only software model maintained by the California Air Pollution Control Officers Association.

South Coast AQMD has developed both regional and localized significance thresholds. South Coast AQMD staff recommends that the Lead Agency quantify criteria pollutant emissions and compare the emissions to South Coast AQMD's CEQA regional pollutant emissions significance thresholds<sup>3</sup> and localized significance thresholds (LSTs)<sup>4</sup> to determine the Proposed Project's air quality impacts. The localized analysis can be conducted by either using the LST screening tables or performing dispersion modeling.

The Lead Agency should identify any potential adverse air quality impacts that could occur from all phases of the Proposed Project and all air pollutant sources related to the Proposed Project. Air quality impacts from both construction (including demolition, if any) and operations should be calculated. Construction-related air quality impacts typically include, but are not limited to, emissions from the use of heavy-duty equipment from grading, earth-loading/unloading, paving, architectural coatings, off-road

---

<sup>1</sup> South Coast AQMD's CEQA Handbook and other resources for preparing air quality analyses can be found at: <http://www.aqmd.gov/home/rules-compliance/ceqa/air-quality-analysis-handbook>.

<sup>2</sup> CalEEMod is available free of charge at: [www.caleemod.com](http://www.caleemod.com).

<sup>3</sup> South Coast AQMD's CEQA regional pollutant emissions significance thresholds can be found at: <http://www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf>.

<sup>4</sup> South Coast AQMD's guidance for performing a localized air quality analysis can be found at: <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/localized-significance-thresholds>.

mobile sources (e.g., heavy-duty construction equipment) and on-road mobile sources (e.g., construction worker vehicle trips, material transport trips, and hauling trips). Operation-related air quality impacts may include, but are not limited to, emissions from stationary sources (e.g., boilers and air pollution control devices), area sources (e.g., solvents and coatings), and vehicular trips (e.g., on- and off-road tailpipe emissions and entrained dust). Air quality impacts from indirect sources, such as sources that generate or attract vehicular trips, should be included in the analysis. Furthermore, emissions from the overlapping construction and operational activities should be combined and compared to South Coast AQMD's regional air quality CEQA *operational* thresholds to determine the level of significance.

If the Proposed Project generates diesel emissions from long-term construction or attracts diesel-fueled vehicular trips, especially heavy-duty diesel-fueled vehicles, it is recommended that the Lead Agency perform a mobile source health risk assessment<sup>5</sup>.

In the event that implementation of the Proposed Project requires a permit from South Coast AQMD, South Coast AQMD should be identified as a Responsible Agency for the Proposed Project in the Draft EIR. The assumptions in the air quality analysis in the Final EIR will be the basis for evaluating the permit under CEQA and imposing permit conditions and limits. Questions on permits should be directed to South Coast AQMD's Engineering and Permitting staff at (909) 396-3385.

The California Air Resources Board's (CARB) *Air Quality and Land Use Handbook: A Community Health Perspective*<sup>6</sup> is a general reference guide for evaluating and reducing air pollution impacts associated with new projects that go through the land use decision-making process with additional guidance on strategies to reduce air pollution exposure near high-volume roadways available in CARB's technical advisory<sup>7</sup>.

South Coast AQMD staff is concerned about potential public health impacts of siting warehouses within close proximity of sensitive land uses, especially in communities that are already heavily affected by the existing warehouse and truck activities. The South Coast AQMD's Multiple Air Toxics Exposure Study (MATES IV), completed in May 2015, concluded that the largest contributor to cancer risk from air pollution is diesel particulate matter (DPM) emissions<sup>8</sup>. According to the MATES IV Carcinogenic Risk interactive Map, the area surrounding the Proposed Project has an estimated cancer risk over 1,054 in one million<sup>9</sup>. Operation of warehouses generates and attracts heavy-duty diesel-fueled trucks that emit DPM. When the health impacts from the Proposed Project are added to those existing impacts, residents living in the communities surrounding the Proposed Project will possibly face an even greater exposure to air pollution and bear a disproportionate burden of increasing health risks.

### **Mitigation Measures**

In the event that the Proposed Project results in significant adverse air quality impacts, CEQA requires that all feasible mitigation measures that go beyond what is required by law be utilized to minimize these impacts. Any impacts resulting from mitigation measures must also be analyzed. Several resources to assist the Lead Agency with identifying potential mitigation measures for the Proposed Project include South Coast AQMD's CEQA Air Quality Handbook<sup>1</sup>, South Coast AQMD's Mitigation Monitoring and

<sup>7</sup> CARB's technical advisory can be found at: <https://www.arb.ca.gov/ch/landuse.htm>.

<sup>8</sup> South Coast AQMD. May 2015. *Multiple Air Toxics Exposure Study in the South Coast Air Basin*. Available at: <http://www.aqmd.gov/docs/default-source/air-quality/air-toxic-studies/mates-iv/mates-iv-final-draft-report-4-1-15.pdf>.

<sup>9</sup> South Coast AQMD. MATES INV Estimated Risk. Accessed at: <https://scaqmd-online.maps.arcgis.com/apps/webappviewer/index.html?id=470c30bc6daf4ef6a43f0082973ff45f>.

Reporting Plan for the 2016 Air Quality Management Plan<sup>10</sup>, and Southern California Association of Government's Mitigation Monitoring and Reporting Plan for the 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy<sup>11</sup>.

Mitigation measures for operational air quality impacts from mobile sources that the Lead Agency should consider in the Draft EIR may include the following:

- Require zero-emissions (ZE) or near-zero emission (NZE) on-road haul trucks such as heavy-duty trucks with natural gas engines that meet the CARB's adopted optional NOx emissions standard at 0.02 grams per brake horsepower-hour (g/bhp-hr), if and when feasible. Given the state's clean truck rules and regulations aiming to accelerate the utilization and market penetration of ZE and NZE trucks such as the Advanced Clean Trucks Rule<sup>12</sup> and the Heavy-Duty Low NOx Omnibus Regulation<sup>13</sup>, ZE and NZE trucks will become increasingly more available to use. The Lead Agency should require a phase-in schedule to incentive the use of these cleaner operating trucks to reduce any significant adverse air quality impacts. South Coast AQMD staff is available to discuss the availability of current and upcoming truck technologies and incentive programs with the Lead Agency. At a minimum, require the use of 2010 model year<sup>14</sup> that meet CARB's 2010 engine emissions standards at 0.01 g/bhp-hr of particulate matter (PM) and 0.20 g/bhp-hr of NOx emissions or newer, cleaner trucks. Include environmental analyses to evaluate and identify sufficient electricity and supportive infrastructures in the Energy and Utilities and Service Systems Sections in the CEQA document, where appropriate. Include the requirement in applicable bid documents, purchase orders, and contracts. Operators shall maintain records of all trucks associated with project construction to document that each truck used meets these emission standards, and make the records available for inspection. The Lead Agency should conduct regular inspections to the maximum extent feasible to ensure compliance.
- Limit the daily number of trucks allowed at the Proposed Project to levels analyzed in the Final CEQA document. If higher daily truck volumes are anticipated to visit the site, the Lead Agency should commit to re-evaluating the Proposed Project through CEQA prior to allowing this higher activity level.
- Provide electric vehicle (EV) charging stations or at a minimum, provide the electrical infrastructure and electrical panels should be appropriately sized. Electrical hookups should be provided for truckers to plug in any onboard auxiliary equipment.

---

<sup>10</sup> South Coast AQMD's 2016 Air Quality Management Plan can be found at: <http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2017/2017-mar3-035.pdf> (starting on page 86).

<sup>11</sup> Southern California Association of Governments' 2020-2045 RTP/SCS can be found at: [https://www.connectsocal.org/Documents/PEIR/certified/Exhibit-A\\_ConnectSoCal\\_PEIR.pdf](https://www.connectsocal.org/Documents/PEIR/certified/Exhibit-A_ConnectSoCal_PEIR.pdf).

<sup>12</sup> CARB. June 25, 2020. *Advanced Clean Trucks Rule*. Accessed at: <https://ww2.arb.ca.gov/our-work/programs/advanced-clean-trucks>.

<sup>13</sup> CARB has recently passed a variety of new regulations that require new, cleaner heavy-duty truck technology to be sold and used in state. For example, on August 27, 2020, CARB approved the Heavy-Duty Low NOx Omnibus Regulation, which will require all trucks to meet the adopted emission standard of 0.05 g/hp-hr starting with engine model year 2024. Accessed at: <https://ww2.arb.ca.gov/rulemaking/2020/hdomnibuslownox>.

<sup>14</sup> CARB adopted the statewide Truck and Bus Regulation in 2010. The Regulation requires diesel trucks and buses that operate in California to be upgraded to reduce emissions. Newer heavier trucks and buses must meet particulate matter filter requirements beginning January 1, 2012. Lighter and older heavier trucks must be replaced starting January 1, 2015. By January 1, 2023, nearly all trucks and buses will need to have 2010 model year engines or equivalent. More information on the CARB's Truck and Bus Regulation is available at: <https://www.arb.ca.gov/msprog/onrdiesel/onrdiesel.htm>.

Mitigation measures for operational air quality impacts from other area sources that the Lead Agency should consider in the Draft EIR may include the following:

- Maximize use of solar energy by installing solar energy arrays.
- Use light colored paving and roofing materials.
- Utilize only Energy Star heating, cooling, and lighting devices, and appliances.
- Use of water-based or low VOC cleaning products that go beyond the requirements of South Coast AQMD Rule 1113.

Design considerations for the Proposed Project that the Lead Agency should consider to further reduce air quality and health risk impacts include the following:

- Clearly mark truck routes with trailblazer signs, so that trucks will not travel next to or near sensitive land uses (e.g., residences, schools, day care centers, etc.).
- Design the Proposed Project such that truck entrances and exits are not facing sensitive receptors and trucks will not travel past sensitive land uses to enter or leave the Proposed Project site.
- Design the Proposed Project such that any check-in point for trucks is inside the Proposed Project site to ensure that there are no trucks queuing outside.
- Design the Proposed Project to ensure that truck traffic inside the Proposed Project site is as far away as feasible from sensitive receptors.
- Restrict overnight truck parking in sensitive land uses by providing overnight truck parking inside the Proposed Project site.

South Coast AQMD staff is available to work with the Lead Agency to ensure that air quality, greenhouse gas, and health risk impacts from the Proposed Project are accurately evaluated and mitigated where feasible. If you have any questions regarding this letter, please contact me at [lsun@aqmd.gov](mailto:lsun@aqmd.gov).

Sincerely,

*Lijin Sun*

**Subject:** EIR comments

Alexis,

Hello, my name is Chuck Stuewe and I lease and pay county property tax on an aircraft hanger parcel located on the north side of Chino airport. I would like to voice my support for this project. Changes to the zoning from possible residential to general industrial will/should remove any future issues with homes under the flight path. In addition, the removal of the operational dairy will be a welcome change to the environment adjacent to the airport with it's repugnant stench and associated swarming flies. I can speak for my fellow pilots and airport tenants, they will ALL embrace this change.

Thank you,  
Chuck Stuewe ATP  
Phone # 714-380-0288

ps. I attempted to join the ZOOM meeting held 12/21/2020 at 6:00 pm but to no avail.

**RE: NOTICE OF PREPARATION (NOP) OF A DRAFT ENVIRONMENTAL IMPACT REPORT (DEIR)  
SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN (FILE NO. PSP19-001)**

Dear Ms. Vaughn:

Thank you for the opportunity to comment on the NOP of a DEIR for the South Ontario Logistics Center Specific Plan. The City of Eastvale offers the following comments for consideration in preparation of the DEIR:

- **Limonite Avenue** – The Eastvale General Plan designates Limonite Avenue as an Urban Arterial with an ultimate right-of-way of 152 feet, which is the largest in the City. This arterial also experiences the highest traffic volumes of any roadway in the City, with Average Daily Traffic (ADT) of more than 35,000 trips between Hamner Avenue and the Interstate 15. In addition, the City is in the process of updating its General Plan (including the Housing Element) which would further increase traffic volumes on this and other roadways throughout the City. The DEIR should focus on ensuring that traffic, and in particular truck traffic, generated by the build out of the specific plan avoid or minimize increasing traffic volumes on Limonite Avenue.
- **Traffic Impact Analysis** – Please provide the City of Eastvale with a copy of the traffic impact analysis once completed for review and comment.
- **Future Notices** – Please provide the City of Eastvale with a copy of all future public notices regarding this project.

If you have any questions or concerns, please do not hesitate to contact me at (951) 703-4499 or [ggonzalez@eastvaleca.gov](mailto:ggonzalez@eastvaleca.gov).

Sincerely,

Gustavo N. Gonzalez, AICP  
Planning Manager

**From:** MATHEW, JACOB K@DOT <Jacob.MATHEW@dot.ca.gov>  
**Sent:** Tuesday, January 5, 2021 11:31 AM  
**To:** Alexis Vaughn  
**Cc:** Clark, Rosa F@DOT  
**Subject:** South Ontario Logistics Center Specific Plan

Hi Alexis,

Thank you for providing the California Department of Transportation (Caltrans) the opportunity to review and comment on the Notice of Preparation of a Draft Environmental Impact Report (DEIR) for the South Ontario Logistic Center Specific Plan (Project), located north of Merrill Avenue, south of Eucalyptus Avenue and west of Grove Avenue in the City of Ontario. The project proposes for a General Plan Amendment, Specific Plan, Development Agreement, Development Plans, and Tentative Parcel Maps to allow development of approximately 5.4 million square feet of industrial and business park land uses on the 222.18-acre site.

As the owner and operator of the State Highway System (SHS), it is our responsibility to coordinate and consult with local jurisdictions when a proposed development may impact our facilities. As the responsible agency under the California Environmental Quality Act, it is also our responsibility to make recommendations to offset associated impacts with the proposed project. Although the project is under the jurisdiction of the City of Ontario, due to the project's potential impact to the State facilities, including State Route 60, 83 and Interstate 15, it is also subject to the policies and regulations that govern the SHS.

In the preceding DEIR, we recommend a Traffic Impact Analysis (TIA) be prepared to accurately evaluate the extent of potential impacts of the project to the operational characteristics of the existing State facilities by the project area. We recommend the TIA be submitted prior to the circulation of the DEIR to ensure timely review of the submitted materials to address any potential issues. We offer the following comments:

- 1) Submit copies of all TIA documents for review when available.** The data used in the TIA should not be more than 2 years old, and shall be based on the Southern California Association of Governments 2016 Regional Transportation Plan Model. Use the Highway Capacity Manual 6 methodology for all traffic analyses.

Caltrans is committed to providing a safe transportation system for all users. We encourage the City to embark a safe, sustainable, integrated and efficient transportation system and complete street to enhance California's economy and livability. A pedestrian/bike-friendly environment served by multimodal transportation would reduce traffic congestion prevalent in the surrounding areas. (See *Complete Street Implementation Action Plan 2.0* at [http://www.dot.ca.gov/hq/tpp/offices/ocp/docs/CSIAP2\\_rpt.pdf \[dot.ca.gov\]](http://www.dot.ca.gov/hq/tpp/offices/ocp/docs/CSIAP2_rpt.pdf)).

- 2)** Design the local streets to serve vehicular and pedestrian circulation equally, and for safe pedestrian friendly environment. Consider both Americans with Disability Act and California Highway Design Manual standards and requirements to provide transportation routes for all users and modes, including pedestrian and bicyclists. Provide a continuous multi-modal circulation system throughout the City, specifically for pedestrians, allowing current/future residents, employees, and guests to access the attraction places.
- 3)** Relegate the parking spaces to the back of the buildings and locate preferential parking for vanpools and carpools, along with, secure, visible, and convenient bicycle parking/racks accessible to retail and office locations. Consider installing electric vehicle charging stations, and locate parking space for low-emitting, fuel-efficient, alternative-fueled vehicle visitor parking in commercial and office uses.

These recommendations are preliminary and summarize our review of materials provided for our evaluation. If you have any questions regarding this email, please contact me.

Thanks,  
Jacob Mathew  
D-8, Planning

South Ontario Logistics Center Phase 1 - No Mitigation - San Bernardino-South Coast County, Summer

Project Characteristics - Adjusted per the SCE 2018 Corporate Responsibility and Sustainability Report. The report provides intensity factor of CO2e, the CO2 intensity factor is calculated as  $513 \cdot 25 \cdot 0.029 \cdot 298 \cdot 0.00617 = 510.44$  to avoid double counting.

Land Use - Site landscaping identified as "City Park" 616,896 sf. "Parking Lot" includes all parking spaces, truck stalls, loading docks, and drive aisles 1,888,524 sf

Construction Phase - Anticipated Construction Schedule. Building Construction, Paving, and Architectural Coating sub-phases are anticipated to overlap.

Demolition - includes demo of both phase 1 and phase 2 areas, estimated using GIS and aerial imagery

Grading - Site Balanced, no import/export of soil

Architectural Coating - SCAQMD Rule 1113 - low VOC paint

Vehicle Trips - total ADT = 7288: 5830 autos and 1458 trucks. auto trip rate under Industrial Park land use  $5830/601.128 \text{ ksf} = 9.6984336114770897379593031766945$ , truck trip rate shown under unrefrigerated w/h  $1402/2237.337 \text{ ksf} = 0.62663782881166315132677821892723$

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Area Coating - SCAQMD Rule 1113 - Low VOC paint

Energy Use -

Construction Off-road Equipment Mitigation - SCAQMD rule 403

Mobile Commute Mitigation -

Energy Mitigation - 2019 standards will reduce nonresidential energy use by 30% over 2016 standard, due mainly to lighting upgrades.

Water Mitigation - water reduction consistent with latest building code

Waste Mitigation - AB 939 - divert at least 50% of solid waste from landfills

Operational Off-Road Equipment - Assume 12 electric forklifts per building (96 total), 1 yard truck per building (8 total) 200 hp average

Fleet Mix - Refer to TIA for Fleet Mix, cars under industrial park, trucks under unrefrigerated warehouse

**1.3 User Entered Comments & Non-Default Data**

South Ontario Logistics Center Phase 1 - No Mitigation - San Bernardino-South Coast County, Winter

Project Characteristics - Adjusted per the SCE 2018 Corporate Responsibility and Sustainability Report. The report provides intensity factor of CO2e, the CO2 intensity factor is calculated as  $513 \cdot 25 \cdot 0.029 \cdot 298 \cdot 0.00617 = 510.44$  to avoid double counting.

Land Use - Site landscaping identified as "City Park" 616,896 sf. "Parking Lot" includes all parking spaces, truck stalls, loading docks, and drive aisles 1,888,524 sf

Construction Phase - Anticipated Construction Schedule. Building Construction, Paving, and Architectural Coating sub-phases are anticipated to overlap.

Demolition - includes demo of both phase 1 and phase 2 areas, estimated using GIS and aerial imagery

Grading - Site Balanced, no import/export of soil

Architectural Coating - SCAQMD Rule 1113 - low VOC paint

Vehicle Trips - total ADT = 7288: 5830 autos and 1458 trucks. auto trip rate under Industrial Park land use  $5830/601.128 \text{ ksf} = 9.6984336114770897379593031766945$ , truck trip rate shown under unrefrigerated w/h  $1402/2237.337 \text{ ksf} = 0.62663782881166315132677821892723$

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Area Coating - SCAQMD Rule 1113 - Low VOC paint

Energy Use -

Construction Off-road Equipment Mitigation - SCAQMD rule 403

Mobile Commute Mitigation -

Energy Mitigation - 2019 standards will reduce nonresidential energy use by 30% over 2016 standard, due mainly to lighting upgrades.

Water Mitigation - water reduction consistent with latest building code

Waste Mitigation - AB 939 - divert at least 50% of solid waste from landfills

Operational Off-Road Equipment - Assume 12 electric forklifts per building (96 total), 1 yard truck per building (8 total) 200 hp average

Fleet Mix - Refer to TIA for Fleet Mix, cars under industrial park, trucks under unrefrigerated warehouse

**1.3 User Entered Comments & Non-Default Data**

South Ontario Logistics Center Phase 1 - with Mitigation - San Bernardino-South Coast County, Summer

Project Characteristics - Adjusted per the SCE 2018 Corporate Responsibility and Sustainability Report. The report provides intensity factor of CO2e, the CO2 intensity factor is calculated as  $513 \cdot 25 \cdot 0.029 \cdot 298 \cdot 0.00617 = 510.44$  to avoid double counting.

Land Use - Site landscaping identified as "City Park" 616,896 sf. "Parking Lot" includes all parking spaces, truck stalls, loading docks, and drive aisles 1,888,524 sf

Construction Phase - Anticipated Construction Schedule. Building Construction, Paving, and Architectural Coating sub-phases are anticipated to overlap.

Demolition - includes demo of both phase 1 and phase 2 areas, estimated using GIS and aerial imagery

Grading - Site Balanced, no import/export of soil

Architectural Coating - The Project shall utilize "Super-Compliant" low VOC paints. Super-Compliant low VOC paints shall be no more than 10g/L of VOC

Vehicle Trips - total ADT = 7288: 5830 autos and 1458 trucks. auto trip rate under Industrial Park land use  $5830/601.128 \text{ ksf} = 9.6984336114770897379593031766945$ , truck trip rate shown under unrefrigerated w/h  $1402/2237.337 \text{ ksf} = 0.62663782881166315132677821892723$

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Area Coating - SCAQMD Rule 1113 - Low VOC paint

Energy Use -

Construction Off-road Equipment Mitigation - SCAQMD rule 403

Mobile Commute Mitigation - Require TDM program

Area Mitigation - The Project shall utilize "Super-Compliant" low VOC paints. Super-Compliant low VOC paints shall be no more than 10g/L of VOC

Energy Mitigation - 2019 standards will reduce nonresidential energy use by 30% over 2016 standard, due mainly to lighting upgrades.

Water Mitigation - water reduction consistent with latest building code

Waste Mitigation - AB 939 - divert at least 50% of solid waste from landfills

Operational Off-Road Equipment - Assume 12 electric forklifts per building (96 total)

Fleet Mix - Refer to TIA for Fleet Mix

South Ontario Logistics Center Phase 1 - with Mitigation - San Bernardino-South Coast County, Winter

Project Characteristics - Adjusted per the SCE 2018 Corporate Responsibility and Sustainability Report. The report provides intensity factor of CO2e, the CO2 intensity factor is calculated as  $513 \cdot 25 \cdot 0.029 \cdot 298 \cdot 0.00617 = 510.44$  to avoid double counting.

Land Use - Site landscaping identified as "City Park" 616,896 sf. "Parking Lot" includes all parking spaces, truck stalls, loading docks, and drive aisles 1,888,524 sf

Construction Phase - Anticipated Construction Schedule. Building Construction, Paving, and Architectural Coating sub-phases are anticipated to overlap.

Demolition - includes demo of both phase 1 and phase 2 areas, estimated using GIS and aerial imagery

Grading - Site Balanced, no import/export of soil

Architectural Coating - The Project shall utilize "Super-Compliant" low VOC paints. Super-Compliant low VOC paints shall be no more than 10g/L of VOC

Vehicle Trips - total ADT = 7288: 5830 autos and 1458 trucks. auto trip rate under Industrial Park land use  $5830/601.128 \text{ ksf} = 9.6984336114770897379593031766945$ , truck trip rate shown under unrefrigerated w/h  $1402/2237.337 \text{ ksf} = 0.62663782881166315132677821892723$

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2023 with SAFE Rule

Area Coating - SCAQMD Rule 1113 - Low VOC paint

Energy Use -

Construction Off-road Equipment Mitigation - SCAQMD rule 403

Mobile Commute Mitigation - Require TDM program

Area Mitigation - The Project shall utilize "Super-Compliant" low VOC paints. Super-Compliant low VOC paints shall be no more than 10g/L of VOC

Energy Mitigation - 2019 standards will reduce nonresidential energy use by 30% over 2016 standard, due mainly to lighting upgrades.

Water Mitigation - water reduction consistent with latest building code

Waste Mitigation - AB 939 - divert at least 50% of solid waste from landfills

Operational Off-Road Equipment - Assume 12 electric forklifts per building (96 total)

Fleet Mix - Refer to TIA for Fleet Mix

South Ontario Logistics Center Phase 2 - No Mitigation - San Bernardino-South Coast County, Summer

Project Characteristics - Adjusted per the SCE 2018 Corporate Responsibility and Sustainability Report. The report provides intensity factor of CO2e, the CO2 intensity factor is calculated as  $513 \cdot 25 \cdot 0.029 + 298 \cdot 0.00617 = 510.44$  to avoid double counting

Land Use - Site landscaping identified as "City Park" 439,564 sf. "Parking Lot" includes all parking spaces, truck stalls, loading docks, and drive aisles 1,321,176 sf

Construction Phase - Anticipated Construction Schedule. Building Construction, Paving, and Architectural Coating sub-phases are anticipated to overlap. Demo occurs during phase 1

Grading - Site Balanced, No import/export of soil

Architectural Coating - Rule 1113

Vehicle Trips - total ADT = 5214: 4178 autos and 1036 trucks. auto trip rate under Industrial Park land use 4178/474.107 ksf = 8.8123567042882724785755114351824 , truck trip rate shown under unrefrigerated w/h 1036/1536.163 ksf = 0.67440759867279709249604371411107

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Area Coating - Rule 1113

Energy Use -

Construction Off-road Equipment Mitigation - SCAQMD Rule 403

Energy Mitigation - 2019 standards will reduce nonresidential energy use by 30% over 2016 standard, due mainly to lighting upgrades

Water Mitigation - water reduction consistent with latest building code

Waste Mitigation - AB 939 - divert at least 50% of solid waste from landfills

Operational Off-Road Equipment - Assume 96 forklifts, same as Phase 1. Assume 8 yard trucks, same as phase 1, 200 hp

Fleet Mix - Refer to TIA for Fleet Mix

**1.3 User Entered Comments & Non-Default Data**

South Ontario Logistics Center Phase 2 - No Mitigation - San Bernardino-South Coast County, Winter

Project Characteristics - Adjusted per the SCE 2018 Corporate Responsibility and Sustainability Report. The report provides intensity factor of CO2e, the CO2 intensity factor is calculated as  $513 \cdot 25 \cdot 0.029 + 298 \cdot 0.00617 = 510.44$  to avoid double counting

Land Use - Site landscaping identified as "City Park" 439,564 sf. "Parking Lot" includes all parking spaces, truck stalls, loading docks, and drive aisles 1,321,176 sf

Construction Phase - Anticipated Construction Schedule. Building Construction, Paving, and Architectural Coating sub-phases are anticipated to overlap. Demo occurs during phase 1

Grading - Site Balanced, No import/export of soil

Architectural Coating - Rule 1113

Vehicle Trips - total ADT = 5214: 4178 autos and 1036 trucks. auto trip rate under Industrial Park land use  $4178/474.107$  ksf = 8.8123567042882724785755114351824 , truck trip rate shown under unrefrigerated w/h  $1036/1536.163$  ksf = 0.67440759867279709249604371411107

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Area Coating - Rule 1113

Energy Use -

Construction Off-road Equipment Mitigation - SCAQMD Rule 403

Energy Mitigation - 2019 standards will reduce nonresidential energy use by 30% over 2016 standard, due mainly to lighting upgrades

Water Mitigation - water reduction consistent with latest building code

Waste Mitigation - AB 939 - divert at least 50% of solid waste from landfills

Operational Off-Road Equipment - Assume 96 forklifts, same as Phase 1. Assume 8 yard trucks, same as phase 1, 200 hp

Fleet Mix - Refer to TIA for Fleet Mix

**1.3 User Entered Comments & Non-Default Data**

South Ontario Logistics Center Phase 2 - With Mitigation - San Bernardino-South Coast County, Summer

Project Characteristics - Adjusted per the SCE 2018 Corporate Responsibility and Sustainability Report. The report provides intensity factor of CO2e, the CO2 intensity factor is calculated as  $513 \cdot 25 \cdot 0.029 \cdot 298 \cdot 0.00617 = 510.44$  to avoid double counting

Land Use - Site landscaping identified as "City Park" 439,564 sf. "Parking Lot" includes all parking spaces, truck stalls, loading docks, and drive aisles 1,321,176 sf

Construction Phase - Anticipated Construction Schedule. Building Construction, Paving, and Architectural Coating sub-phases are anticipated to overlap. Demo occurs during phase 1

Grading - Site Balanced, No import/export of soil

Architectural Coating - The Project shall utilize "Super-Compliant" low VOC paints. Super-Compliant low VOC paints shall be no more than 10g/L of VOC

Vehicle Trips - total ADT = 5214: 4178 autos and 1036 trucks. auto trip rate under Industrial Park land use  $4178/474.107$  ksf = 8.8123567042882724785755114351824 , truck trip rate shown under unrefrigerated w/h  $1036/1536.163$  ksf = 0.67440759867279709249604371411107

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Area Coating - The Project shall utilize "Super-Compliant" low VOC paints. Super-Compliant low VOC paints shall be no more than 10g/L of VOC

Energy Use -

Construction Off-road Equipment Mitigation - SCAQMD Rule 403

Mobile Commute Mitigation - Require TDM program

Area Mitigation - The Project shall utilize "Super-Compliant" low VOC paints. Super-Compliant low VOC paints shall be no more than 10g/L of VOC

Energy Mitigation - 2019 standards will reduce nonresidential energy use by 30% over 2016 standard, due mainly to lighting upgrades

Water Mitigation - water reduction consistent with latest building code

Waste Mitigation - AB 939 - divert at least 50% of solid waste from landfills

Operational Off-Road Equipment - Assume 96 electric forklifts, same as Phase 1

Fleet Mix - Refer to TIA for Fleet Mix

South Ontario Logistics Center Phase 2 - With Mitigation - San Bernardino-South Coast County, Winter

Project Characteristics - Adjusted per the SCE 2018 Corporate Responsibility and Sustainability Report. The report provides intensity factor of CO2e, the CO2 intensity factor is calculated as  $513 \cdot 25 \cdot 0.029 \cdot 298 \cdot 0.00617 = 510.44$  to avoid double counting

Land Use - Site landscaping identified as "City Park" 439,564 sf. "Parking Lot" includes all parking spaces, truck stalls, loading docks, and drive aisles 1,321,176 sf

Construction Phase - Anticipated Construction Schedule. Building Construction, Paving, and Architectural Coating sub-phases are anticipated to overlap. Demo occurs during phase 1

Grading - Site Balanced, No import/export of soil

Architectural Coating - The Project shall utilize "Super-Compliant" low VOC paints. Super-Compliant low VOC paints shall be no more than 10g/L of VOC

Vehicle Trips - total ADT = 5214: 4178 autos and 1036 trucks. auto trip rate under Industrial Park land use  $4178/474.107 \text{ ksf} = 8.8123567042882724785755114351824$ , truck trip rate shown under unrefrigerated w/h  $1036/1536.163 \text{ ksf} = 0.67440759867279709249604371411107$

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Vehicle Emission Factors - EMFAC2017 San Bernardino (SC) 2024 and SAFE Rule

Area Coating - The Project shall utilize "Super-Compliant" low VOC paints. Super-Compliant low VOC paints shall be no more than 10g/L of VOC

Energy Use -

Construction Off-road Equipment Mitigation - SCAQMD Rule 403

Mobile Commute Mitigation - Require TDM program

Area Mitigation - The Project shall utilize "Super-Compliant" low VOC paints. Super-Compliant low VOC paints shall be no more than 10g/L of VOC

Energy Mitigation - 2019 standards will reduce nonresidential energy use by 30% over 2016 standard, due mainly to lighting upgrades

Water Mitigation - water reduction consistent with latest building code

Waste Mitigation - AB 939 - divert at least 50% of solid waste from landfills

Operational Off-Road Equipment - Assume 96 electric forklifts, same as Phase 1

Fleet Mix - Refer to TIA for Fleet Mix

Based on aggregated Instate Trailer TRU emission rates obtained from OFFROAD2017 Version 1.0.1.

Based on 86 trucks with TRUs per day.

## **APPENDIX B2**

### **HEALTH RISK ASSESSMENT**

EMFAC2017 (v1.0.2) Emission Rates

Region Type: Sub-Area

Region: San Bernardino (SC)

Calendar Year: 2023

Season: Annual

Vehicle Classification: EMFAC2007 Categories

Units: miles/day for VMT, trips/day for Trips, g/mile for RUNEX, PMBW and PMTW, g/trip for STREX, HTSK and RUNLS, g/vehicle/day for IDLEX, RESTL and DIURN. Note 'day' in the unit is operation day.

Idle (g/trip) 5 mph (g/mi) 15 mph (g/mi) 45 mph (g/mi) 50 mph (g/mi) 55 mph (g/mi)

\*\*\* MODEL SETUP OPTIONS SUMMARY

\*\*\*

-----

SOL\_construction\_r.ADO

\*\*Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --

\*\*NO GAS DEPOSITION Data Provided.

\*\*NO PARTICLE DEPOSITION Data Provided.

\*\*Model Uses NO DRY DEPLETION. DRYDPLT = F

\*\*Model Uses NO WET DEPLETION. WETDPLT = F

\*\*Model Uses URBAN Dispersion Algorithm for the SBL for 1009 Source(s),  
for Total of 1 Urban Area(s):

Urban Population = 2035210.0 ; Urban Roughness Length = 1.000 m

\*\*Model Uses Regulatory DEFAULT Options:

1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. No Exponential Decay.
6. Urban Roughness Length of 1.0 Meter Assumed.

\*\*Other Options Specified:

ADJ\_U\* - Use ADJ\_U\* option for SBL in AERMET

CCVR\_Sub - Meteorological data includes CCVR substitutions

TEMP\_Sub - Meteorological data includes TEMP substitutions

\*\*Model Assumes No FLAGPOLE Receptor Heights.

\*\*The User Specified a Pollutant Type of: PM\_10

\*\*Model Calculates 2 Short Term Average(s) of: 1-HR 24-HR  
and Calculates PERIOD Averages

\*\*This Run Includes: 1009 Source(s); 1 Source Group(s); and 160  
Receptor(s)

with: 0 POINT(s), including  
0 POINTCAP(s) and 0 POINTHOR(s)  
and: 1009 VOLUME source(s)  
and: 0 AREA type source(s)  
and: 0 LINE source(s)  
and: 0 RLINE/RLINEXT source(s)  
and: 0 OPENPIT source(s)  
and: 0 BUOYANT LINE source(s) with 0 line(s)

\*\*Model Set To Continue RUNNING After the Setup Testing.

\*\*The AERMET Input Meteorological Data Version Date: 16216

SOL\_construction\_r.ADO

\*\*Output Options Selected:

Model Outputs Tables of PERIOD Averages by Receptor  
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE

Keyword)

Model Outputs External File(s) of High Values for Plotting (PLOTFILE

Keyword)

Model Outputs Separate Summary File of High Ranked Values (SUMMFILE

Keyword)

\*\*NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours  
m for Missing

Hours

b for Both Calm

and Missing Hours

\*\*Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 198.00 ; Decay  
Coef. = 0.000 ; Rot. Angle = 0.0  
Emission Units = GRAMS/SEC ;  
Emission Rate Unit Factor = 0.10000E+07  
Output Units = MICROGRAMS/M\*\*3

\*\*Approximate Storage Requirements of Model = 3.9 MB of RAM.

\*\*Input Runstream File: aermod.inp

\*\*Output Print File: aermod.out

\*\*Detailed Error/Message File: SOL\_construction\_r.err

\*\*File for Summary of Results: SOL\_construction\_r.sum
